## List of Appendices

- Appendix 1: Curriculum Vitae/Resume for Leadership Changes
- Appendix 2: Membership List and Bylaws for Advisory Committees
- Appendix 3: Accreditation Steering Committee
- Appendix 4: Accreditation Leadership Group
- Appendix 5: State Board of Education Strategic Plan
- Appendix 6: State Board of Education Performance Measure Report
- Appendix 7: State Board of Education Master Planning Calendar
- Appendix 8: President and Vice President Leadership Organization Charts
- Appendix 9: Curriculum Vitae/Resume for Leadership
- Appendix 10: ISU 2014 Student Handbook
- Appendix 11: Quarterly Report (for prior three quarters)
- Appendix 12: FY 2011 Audited Financial Statements
- Appendix 13: FY2012 Audited Financial Statements
- Appendix 14: FY2013 Audited Financial Statements
- Appendix 15: ISU Foundation Operating Agreement
- Appendix 16: FY2014 Budget Development Schedule
- Appendix 17: FY2015 Budget Development Schedule
- Appendix 18: Academic Affairs Program Prioritization Template & Instructions
- Appendix 19: Academic Affairs Program Prioritization Scoring Sheet Example
- Appendix 20: Division of Health Sciences Clinics Handout
- Appendix 21: Division of Health Sciences 2012 Annual Report
- Appendix 22: Division of Health Sciences 2013 Annual Report
- Appendix 23: ISU Economic Impact Study
- Appendix 24: Division of Health Sciences Economic Impact Study
- Appendix 25: Division of Student Affairs Program Prioritization Learning Outcomes
- Appendix 26: First Destination Report
- Appendix 27: Program Viability Details
- Appendix 28: Academic Affairs Program Prioritization Action Plans
- Appendix 29: Non-Academic Methodology for Quintiles
- Appendix 30: Mission Fulfillment, Adaptation, and Sustainability Data FY2010-FY2013

## Institutional Overview

Founded in 1901, Idaho State University (ISU) is a Carnegie Research High Doctoral University. The University has evolved through distinct phases—the last occurring in 1963 with the change from Idaho State College to Idaho State University—reflecting a steady trajectory of growth and development. Today, the University serves a student population of nearly 15,000 students per fall and spring academic terms, and over 18,600 unduplicated annual headcount per year, representing 45 states and 62 countries. The University’s mission and Idaho State Board of Education-mandated service region is the result of the institution’s history, and Idaho’s unique geography. “No other state in the union has topographical structure so varied,” wrote celebrated Idaho writer Vardis Fisher in his Works Progress Administration-sponsored Idaho state guide in 1937, and, he continued, “sometimes so appalling.”<sup>1</sup>

Idaho State University’s geographic service region extends to the upper-Snake River region on the east side of the state, to the Magic Valley/Twin Falls towards the west, to the rural communities of the central mountains on the north. The University has campuses in four locations: Pocatello, Meridian, Idaho Falls, and Twin Falls. Idaho State University offers more than 270 academic programs ranging from professional technical certificates to Ph.Ds. The University’s disciplinary breadth, combined with its unique degree mix, offers opportunity and access commensurate with the Idaho State Board of Education’s (the Board) mandate to serve its diverse, largely rural region, and to provide healthcare programming for the state. The University hosts 15 men’s and women’s NCAA athletic teams and offers more than 160 student clubs and organizations for student participation.

During the review period (Fall 2010-Fall 2014), Idaho State University has undertaken a holistic approach, consistent with its Core Themes and Mission, to improving institutional effectiveness. Changes have included revisions to its planning processes in the areas of budget and fiscal stabilization; curriculum redesign, online catalog implementation and general education revision; the implementation of an enterprise resource program (Banner, now Ellucian) and the related changes to all business functions related to that implementation; implementation of the reorganized Division of Health Sciences and the development of the Meridian Health Science Center expanded face-to-face program offerings throughout ISU’s service region; implementation of expanded online program and course offerings through ISU’s *eISU* initiative; enhanced Information Technology capacity and function on campus and throughout ISU’s sites; expanded governance roles for faculty within the governance structure through the implementation of executive committees in the colleges; and the expansion of student services for student life and retention/student success.

Idaho State University’s academic units are organized into five colleges and a Division of Health Sciences. This includes the colleges of Arts and Letters, Business, Education, Science and Engineering, and Technology. The Division of Health Sciences is comprised of the College of Pharmacy, Kasiska School of Health Professions, School of Nursing, School of Rehabilitation and Communication Sciences, Office of Medical and Oral Health, and the Institute of Rural Health. In addition, ISU houses a Graduate School overseen by a graduate dean advised by graduate faculty.

Central to its healthcare mission, ISU offers high-quality degree programs in nearly all of the health professions, as well as postgraduate residency training in family medicine, dentistry, and pharmacy. The

University also serves the state and its region by providing full-service, cost-effective medical care options at its 15 health-related clinics in Pocatello and Meridian. The University faculty and staff provided health services for more than 54,000 patient visits during the 2013-14 academic year. The ISU Bengal Pharmacy, which opened in 2013, serves as an onsite classroom lab for students in the College of Pharmacy while providing pharmacy service options to the region. This past year, the Bengal Pharmacy opened its first telehealth pharmacy in rural, Arco, Idaho, at the request of city officials concerned that pharmacy services would no longer be available in that town. The ISU Treasure Valley Anatomy and Physiology Laboratories in Meridian, currently under construction, will include the only Bioskills Learning Center in the state, and is scheduled to be completed in Spring 2015. It will provide state-of-the-art learning experiences for ISU undergraduate and graduate students, as well as high school students across the state via the state's online learning network.

Idaho State University's commitment to access to university-level learning and discovery extends into the K-12 system in Idaho. The University's Early College program, which provides dual enrollment opportunities for Idaho high school students at reduced tuition rates, continues to grow, enabling high school students to take college-level courses preparing them for their future college careers. In FY2014, more than 2,000 students participated in the program. As a result of the program, in 2013 nine Renaissance High School students in Meridian earned associate degrees in general studies while still in high school, and this number doubled to eighteen in 2014.

In response to the rising costs of higher education and as part of ISU's initiative to offer entrepreneurial opportunities to students, ISU developed an innovative Career Path Internship (CPI) program that offers undergraduate and graduate students an opportunity to obtain paid professional experience – both on and off campus – while offsetting the cost of earning a degree. Last year, the University committed \$1.4 million to this program that offered more than 700 students an opportunity to participate. This number is expected to increase as a result of more than \$300,000 additional institutional funding for the 2014-2015 academic year. The CPI Program is just part of an ISU commitment to providing students with applied professional experiences. Last year alone, ISU students from the College of Education provided more than 1,500 hours of tutoring at local schools. A total of 514 students (264 graduate students and 250 undergraduate CPI students) in the College of Science and Engineering worked in research laboratories both on and off campus. The College of Business's Bengal Solutions program, an applied business support enterprise, gave MBA students in the College of Business a taste of real-world experience while providing support and business consultation to Idaho businesses.

Idaho State University expends approximately \$35 million annually on research, and is amongst a set of universities ranked as Research University High that represent less than 5% of the nation's 4,663 institutions of higher education.

Research and scholarship at ISU is rooted in nuclear energy, clean energy and technologies, the environment, and human health. Through the Center for Advanced Energy Studies (CAES), ISU faculty engage in state of the art research that contributes to the nation's economic stability by developing technologies that ensure a stable and secure energy infrastructure.

Idaho State University is engaged in a very large project funded by the National Science Foundation to develop and analyze large environmental data sets to benefit human society. Within this context, ISU is committed to developing a leadership position in ecosystem services. Ecosystem services is the collective benefits that humankind receives from ecosystems, e.g. drinking water, outdoor recreation, etc. But

managing ecosystems is dependent on the emergent use of biological sensors, mining of vast data sets to find “actionable data,” and to provide the basis for sound science-based policy decisions. Idaho State University is a national leader in these areas and thus contributes to the vitality of Idaho by providing solutions to managing its natural resources.

Idaho State University’s research vision includes robust private-public relationships and partnerships. There is a powerful commitment to moving research from “bench to market” in innovative ways that bolster economic development in the state, nation, and globe. Idaho State University is contributing technologies that will lead to innovations in nano-manufacturing, detection of mechanical stress in materials subjected to harsh environments, and the development of new materials capable of producing far more power for longer periods of time than any existing battery technology. These technologies, as they move from the laboratory to the market place, serve as an engine for economic development in Idaho.

During the last year, the University obtained an NSF grant for \$3.8 million, an NIH grant for \$1.8 million, and a \$2.2 million grant from the Office of Naval Research.

The University’s fiscal 2013 year-end financial results reflect an \$11.3 million improvement in its net position. Recent program prioritization efforts assessed the efficiency and cost effectiveness of all institutional functions. This university-wide initiative identified necessary modifications and improvements needed to ensure its long-term viability. Annually, the indirect and induced economic output from operations and employee, student, and visitor spending is estimated to be \$311.9 million. Idaho State University alumni living and working in Idaho contribute an estimated \$873.8 million into the economy each year.

Idaho State University boasts many impressive facilities, including CAES and the Research in Science and Engineering (RISE) Laboratory. The Idaho Museum of Natural History, located on the Pocatello campus, was featured in *National Geographic Magazine* in 2014. The \$34 million state-of-the-art Stephens Performing Arts Center, which debuted in 2004, was recently ranked No.4 on a national list of “The 25 Most Amazing University Performing Arts Centers” by the national website [bestvalueschools.com](http://bestvalueschools.com). Additional accolades include Victory Media, the premier media entity for military personnel transition into civilian life, repeatedly naming ISU as one of the top 15% of schools categorized as “Military Friendly Schools.” ISU has also been ranked as one of the safest campuses in the nation by University Primetime News, Collegesafe website, and The Daily Beast. Idaho State University was also recently named to the “Top 15 Most Affordable Colleges” list by [AffordableCollegesOnline.org](http://AffordableCollegesOnline.org). [Thebestcolleges.org](http://Thebestcolleges.org) cited the ISU Meridian Health Science Center as one of the top ten branch campuses in the nation for 2013. This recognition comes from the annual Health Science Experience Night, free Community Health Screenings for uninsured adults, and affiliation with The CORE – an economic development corridor that creates core competencies in the state for health and health-related research.

Idaho State University is committed to fulfilling its mission as a public research institution serving a diverse population through broad educational programming and basic, translational, and clinical research. The University is a demonstrated leader in the health professions, committed to advancing scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits, and high-quality academic instruction.

## Basic Institutional Data Form

Institution: Idaho State University

Address: 921 South 8<sup>th</sup> Avenue, Campus Box 8310

City, State, ZIP: Pocatello, ID 83209

Degree Levels Offered:  Doctorate  Masters  Baccalaureate  Associate  Other

If part of a multi-institution system, name of system:

Type of Institution:  Comprehensive  Specialized  Health-centered  Religious-based

Native/Tribal  Other (specify)

Institutional control:  Public  City  County  State  Federal  Tribal

Private/Independent ( Non-profit  For Profit)

Institutional calendar:  Quarter  Semester  Trimester  4-1-4  Continuous Term

Other (specify)

**Specialized/Programmatic accreditation:** List program or school, degree level(s) and date of last accreditation by an agency recognized by the United States Department of Education. (Add additional pages if necessary.)

\*Additional listing of programs or schools, degree levels and dates of last accreditation for other programs at ISU with specialized accreditation can be found at the conclusion of the Basic Institutional Data, as Attachment A.

Program or School	Degree Level(s)	Recognized Agency	Date
Dietetics	B.S.	ACEND (Academy of Nutrition and Dietetics, Accreditation Council for Education in Nutrition and Dietetics)	2008

### Institutional Indebtedness

Total Debt to Outside Parties	Last Completed FY Dates:6/30/2013	One Year Prior to Last Completed FY Dates:6/30/2012	Two Years Prior to Last Completed FY Dates:6/30/2011
For Capital Outlay	61,938,403	66,234,221	70,812,144
For Operations	0	0	0

**Domestic Off-Campus Degree Programs and Academic Credit Sites:** Report information for off-campus sites within the United States where degree programs and academic coursework is offered. (Add additional pages if necessary.)

**Degree Programs** – list the names of degree programs that can be completed at the site.

**Academic Credit Courses** – report the total number of academic credit courses offered at the site.

**Student Headcount** – report the total number (unduplicated headcount) of students currently enrolled in programs at the site.

**Faculty Headcount** – report the total number (unduplicated headcount) of faculty (full-time and part-time) teaching at the site.

Notes: \* academic credit courses and faculty headcount by specific programs and campuses is not available. \*\* Emergency Management and the Fire Services Administration programs are administratively located on the Meridian campus, but the programs are online.

**Programs and Academic Courses Offered at Sites Outside the United States.** Report information for sites outside the United States where degree programs and academic credit courses are offered, including study abroad programs and educational operations on military bases. (Add additional pages if necessary.)

**Degree Programs** – list the names of degree programs that can be completed at the site.

**Academic Credit Courses** – report the total number of academic credit courses offered at the site.

**Student Headcount** – report the total number (unduplicated headcount) of students currently enrolled in programs at the site.

**Faculty Headcount** – report the total number (unduplicated headcount) of faculty (full-time and part-time) teaching at the site.

Notes: Regarding ISU Study Abroad programs: Only bilateral partners and ISEP are official approved foreign country programs: however, ISU students can arrange study abroad on their own and be approved at any accredited foreign university or program.

\*Degree program information, academic credit courses, and faculty headcount are not available.

## **Preface**

### *Institutional Changes Since Year One Report*

Since the 2011 Year One Self-Evaluation Report was submitted, there have been substantive changes at Idaho State University. These changes fall within the following categories: Leadership, Financial Resources, Campus-wide Program Prioritization, and Policies and Procedures Processes.

#### ***Leadership***

Idaho State University's executive leadership team has been strengthened during the review period by the replacement of interim vice president appointments with permanent appointments following national searches. Two key leadership positions previously held by interims were the Provost and Vice President for Academic Affairs and the Vice President for Research. Other changes to key positions resulted from reorganization efforts undertaken by the new vice presidents, retirements, and career progressions. Curriculum vitae and/or resumes for these positions can be found in Appendix 1.

#### ***Vice President Transitions***

Dr. Laura Woodworth-Ney was selected and named the Provost and Vice President for Academic Affairs on June 24, 2013, after a national search was conducted. She replaced Dr. Barbara Adamcik who served as Interim Provost since June 2010. Dr. Woodworth-Ney, a native of Idaho, previously served as Associate Vice President for Academic Affairs where she was responsible for Curriculum Management and Academic Program Development, served as the ISU liaison to the Idaho State Board of Education (the Board), and had oversight of the Office of the Registrar, Early College Program, and the ISU-Twin Falls Outreach Center. Dr. Woodworth-Ney came through the academic ranks at ISU, and held previous administrative appointments at ISU that included chair of the Department of History and co-director of the Women Studies program. She also served on the ISU Faculty Senate, both as a senator and as an elected member of the Faculty Senate Executive Committee.

Dr. Howard Grimes was selected and named the Vice President for Research and Economic Development at ISU after a national search was conducted. He replaced Dr. Richard Jacobson who served as Interim Vice President from July 2011 through November 2012. Before his arrival at ISU in December 2012, Dr. Grimes was Vice President at Washington State University and responsible for leveraging WSU's assets for research. During this time, WSU nearly doubled their research operations and he was responsible for paving new ground toward interdisciplinary initiatives that transformed the institution. Coordinating and facilitating the University with government, national laboratories and the private sector, he advanced many WSU research technologies to the market place. Previous to that he led the graduate school at WSU while maintaining an active research laboratory focused on membrane transport biochemistry and long-distance metabolite transport in plant systems. As a PI, he has brought in over \$15 million in independent funding and published over 60 articles in peer reviewed journals. In the past six months at ISU, over \$9.5 million of new funding has been achieved while leveraging additional federal, state, and private funding efforts.

#### ***Academic Affairs***

Dr. Lyle W. Castle was hired as the Vice Provost for ISU in June 2013 after serving as Interim Associate Vice President for Academic Affairs from August 2012 to May 2013. Prior to working in academic affairs, Dr. Castle served as the Dean for Academic Programs for Idaho State University in Idaho Falls from August 2007 through July 2012. Before working in administration, Dr. Castle worked through the ranks

from Assistant Professor of Chemistry through Full Professor over the period from January 1994 through May 2003. During that time he was listed as an author/coauthor on 26 scientific papers in various chemistry journals and has served as the editor for the Journal of Heterocyclic Chemistry since 1999. He also served as the chair of the faculty senate from July 2002 to June 2003.

Dr. Linda Hatzenbuehler was appointed as the Vice Provost and Executive Dean of the Division of Health Sciences at Idaho State University in 2013 after serving as the Associate Academic Vice President and Executive Dean of the Division of Health Sciences. The Division of Health Sciences includes the majority of the health professions programs offered at ISU, including: College of Pharmacy, Kasiska School of Health Professions, Office of Medical and Oral Health, School of Nursing, and School of Rehabilitation and Communication Sciences; a total of 19 programs are housed within the Division, ten programs are also offered at the ISU Meridian Health Science Center. Prior to assuming administration of the Division of Health Sciences, Dr. Hatzenbuehler served as dean of the Kasiska College of Health Professions at ISU. Dr. Hatzenbuehler is licensed to practice psychology in Idaho and is Board Certified in Forensics.

Dr. Bessie Katsilometes, a 28-year ISU employee, has held a variety of leadership positions. She became Associate Vice President, University Programs, for the ISU Meridian Health Science Center in July 2013. Dr. Katsilometes was instrumental in the design and development of the Master Plan for ISU Meridian Health Science Center, initially established in August 2009 to expand the Pharmacy doctoral program and to consolidate academic programs in the Boise Valley into a permanent location. Dr. Katsilometes was Dean for Academic Programs at ISU Meridian Health Science Center from 2009-2013 and Dean of ISU-Boise from 2006--2009. Currently, Dr. Katsilometes is leading the effort to construct the Treasure Valley Anatomy and Physiology Laboratories, including a Bioskills Learning Center, for expansion of additional programs in the Division of Health Sciences.

Dr. Margaret Johnson was appointed Associate Vice President for Undergraduate Affairs in September 2013 after a national search was conducted. She replaced Dr. Laura Woodworth-Ney after her selection as Provost. As AVP, Dr. Johnson oversees program and curriculum development, general education, the Early College Program, the Student Success Center, eISU, and a variety of student-related matters. Dr. Johnson previously served as chair of the Department of English and Philosophy, the associate dean of the College of Arts & Sciences, the assistant dean of the College of Arts & Sciences, and the director of composition and assistant chair in the Department of English and Philosophy.

Ms. Selena M. Grace was appointed Associate Vice President for Institutional Effectiveness in October 2013 after a national search was conducted. Prior to accepting this position, she was the Chief Academic Officer for the Idaho State Board of Education (the Board). During this time, she was instrumental in bringing forward the Complete College Idaho plan and coordinating statewide collaborations that bridged secondary and postsecondary interests regarding the use of technology. She also advised the Board, institution presidents, and provosts on policies, statewide initiatives and key reform efforts. As AVP, Ms. Grace oversees regional and specialized accreditation, program review, Board initiatives, the Office of Institutional Research, and the Office of Registration and Records.

### ***Deans***

Since the Year One report there have been other significant academic leadership changes. Permanent Deans of the Graduate School, the College of Business, and the College of Technology were hired. Currently, there are two interim dean positions, one in the College of Science and Engineering and one in the Library.

Dr. Cornelis J. (Neels) Van der Schyf was named Dean of the Graduate School on April 29, 2013 after a national search was conducted. He replaced Dr. Nicole Hill who served as Interim Dean of the Graduate School September 2011 through June 2013. Dr. Van der Schyf previously served as Founding Chair of the Department of Pharmaceutical Sciences at Northeast Ohio Medical University (NEOMED) and Associate Dean of Research and Graduate Studies in the College of Graduate Studies at NEOMED, where he was responsible for the creation of the first graduate degrees (M.S. and Ph.D.) offered by NEOMED as a research degree-granting institution, and leading to the founding of its College of Graduate Studies. He has published over 115 peer-reviewed scientific publications, holds 14 patents or patents pending, 10 chapter books, and presented more than 200 times in various scientific venues. He was additionally responsible for the creation of the joint M.D./Ph.D. and Pharm.D./Ph.D. degree programs. Dr. Van der Schyf held previous administrative appointments that included Chair of the Department of Medicinal Chemistry at North-West University in South Africa, and Graduate Program Director at Texas Tech University Health Sciences Center.

Dr. Thomas A. Ottaway has served as the Dean of the College of Business since June 2012. Prior to his appointment as Dean he served as Associate Dean and as Chair of the Department of Informatics (formerly the Department of Computer Information Systems). Dr. Ottaway is a tenured Professor of Informatics and holds a doctorate in Business Administration from The Rawls College of Business Administration at Texas Tech University. He also holds a Master of Science in Business Administration from Texas Tech University, as well as Bachelor of Science in Computer Science from Wichita State University. Dr. Ottaway has held prior faculty appointments at Kansas State University and the University of Montana. Before entering academia, Dr. Ottaway was employed as a systems analyst with The Boeing Company.

R. Scott Rasmussen was named Dean of the College of Technology on April 1, 2012, after serving as Interim Dean for a year. He replaced Dr. Marilyn Davis who served as Dean from 2006 to 2011. Mr. Rasmussen previously served as the Executive Director and Chair of the Energy Systems Technology and Education Center where he was responsible for curriculum management, facilities creation and maintenance, and faculty and staff for five programs and \$2.6 million in NSF and USDOL grants. Mr. Rasmussen held previous administrative appointments, including Chair of the Electronics Department from 2000 to 2006. Mr. Rasmussen currently serves on the Idaho Governor's Workforce Development Board, The Bannock Development Corporation Board, and other economic and education development and oversight committees.

Karl Bridges was appointed Interim Dean of Libraries/University Librarian in July 2013. Previously, he served as Assistant University Librarian for Systems, responsible for operations of the library information resources. Prior to his appointment at ISU he served since 1991 in academic library positions at state universities in Illinois and Vermont where he worked in reference services with a focus on electronic resources. He is the author of numerous books and articles on librarianship as well as being past president of the Universities Library Section of the American Library Association.

Richard R. Brey, Ph.D., C.H.P. was appointed Interim Dean of the College of Science and Engineering in July 2013. Dr. Brey received his Ph.D. from Purdue University in Health Physics in 1994. He has published over 45 peer reviewed scientific publications and presented more than 130 times in various scientific venues. He was the 2002 recipient of the Health Physics Society's Elda E. Anderson award for his contributions to the profession in research and service. During the Spring of 2013, he was elected to serve as a Council member of the National Council of Radiation Protection and Measurements. Since 1995 he

has been the Director of an environmental radioanalytical laboratory which performs approximately 1,200 sample analyses per quarter, and the Director of the ISU Health Physics Program. Through 2005 until 2011 he served as the Director of The ISU Technical Safety Office and University Radiation Safety Officer. Between 2009 and 2010 he served as the Interim Chair for the ISU Department of Physics. Between 2004 and 2007 he served as a commissioner for ABET's Applied Science Commission representing the Health Physics Society. Between 2007 and 2011 he served as Commissioner at Large for the ABET Applied Science Accreditation Commission. He served as Associate Chair for the Department of Nuclear Engineering and Health Physics between 2010 and 2013 when he was appointed as the chair of that department.

### ***Non-academic Divisions***

Within the nonacademic units of the University, there have been associate vice president and key director-level changes as a result of reorganizations, retirements, and career progression.

Brant Wright was named Controller for ISU in May 2014 after a nationwide search. Mr. Wright is a 29 year veteran in accounting from various industries. As an experienced accounting and finance professional, he possess a record of success in implementing process improvements that reduce costs and align with changing budget requirements in higher education. He is familiar with the special requirements of complex, multi-level organizations, and those paradigms peculiar to education institutions. He has excellent administrative skills and places the needs of students as a first priority. He is known for his strong ethics and creating a client friendly environment.

Brian J. Sagendorf was appointed as the Director of Human Resources in May 2013. Mr. Sagendorf has over ten years of HR experience, six years of which have been at the Director level. Additionally, Mr. Sagendorf also has six years of HR experience in the higher education industry. Prior to his appointment as Director of Human Resources, Mr. Sagendorf was the Director of the Division of Human Resources for the City of Idaho Falls, Idaho, and was previously employed by ISU in the role of Senior HR Representative. Mr. Sagendorf has been involved in strengthening the HR profession in higher education by serving as the co-founding President of the Intermountain West Chapter for the College and University Professional Association for Human Resource Management, (CUPA-HR). Mr. Sagendorf is certified as a Professional in Human Resources through the Human Resource Certification Institute and received a Bachelor's Degree in Business Administration with an emphasis in Human Resource Management from Idaho State University.

James Martin was selected as the Director of Financial Aid and Scholarships in June 2013 after a national search. This position was previously held by Kent Larson, who retired. Mr. Martin previously served as the Associate Director in the Financial Aid office, and has been employed in various capacities in the ISU Financial Aid office since 1992. Mr. Martin held leadership roles in both state and regional aid associations. He earned a Bachelor of Business Administration from New Mexico State University in 1984 and a Master's of Public Administration from the University of New Mexico in 1993.

Dr. Adrienne King joined ISU in February 2014 as the Director of Marketing and Communications and oversees the University's strategic marketing communications. She previously served as Director of Relations and Communications at West Virginia University Institute of Technology where she led an award-winning creative team responsible for the institution's advertising, marketing, public relations, social media and website efforts. She was the managing editor of all of the University's publications and recruitment materials. She also oversaw the University's growing alumni relations program. Prior to working at WVU Tech, Dr. King was the Director of Marketing for the University of Charleston in West

Virginia. She earned her Doctor of Education in educational leadership in higher education administration from West Virginia University. She also holds a Master of Science degree in integrated marketing communications from WVU and a bachelor's degree in advertising/public relations and graphic design from Marietta College in Ohio.

Mr. Phillip (Phil) Moessner was selected and named the Associate Vice President for Facilities Services on January 7, 2013, after a national search. Mr. Moessner came to his current post after 25 years of service as a Civil Engineering Officer in the United States Air Force, retiring in 2012 as a Lieutenant Colonel. During his Air Force career, he commanded at both the squadron and group level, leading teams of between 322 and 1,600 personnel providing facility, emergency services, transportation, purchasing, environmental, and personnel administrative support to various bases throughout the United States, Europe, and the Middle East. Mr. Moessner's previous experience in higher education includes two years as the Director of Heavy Repair and Infrastructure at the U.S. Air Force Academy in Colorado Springs. He holds a Bachelor of Science in Civil Engineering from Virginia Tech, a Master's of Engineering Management from Old Dominion University, an EIT certificate from the Commonwealth of Virginia, and an Educational Facilities Professional (EFP) certificate from APPA.

Dr. Lance Erickson was appointed in June, 2013 following a national search for the Director of the Career Center that was vacated when the former director left to accept another position out-of-state. Dr. Erickson holds an Ed.D. in Educational Leadership and a Master's in Counseling from Idaho State University. Dr. Erickson, a Licensed Professional Counselor and National Certified Counselor, has over ten years' experience in the ISU Career Center including previous service as Interim Director and as the Counseling Services Coordinator, supervising Counseling Department interns.

Mr. Todd Johnson, was appointed as Director of the Veterans Sanctuary, following a national search in October, 2013. He holds a Master's Degree in Counseling and was previously employed at the Idaho National Laboratory where he was an Internship Specialist and supervised the Department of Energy, Office of Science STEM Internships: Idaho State University as an academic advisor and at the University of Colorado Denver as Career Counselor and Internship Specialist. He was instrumental in initiating the first Veterans Club at Idaho State University on the Idaho Falls Campus.

General Counsel: In August 2012, on the retirement of ISU's long-serving General Counsel, ISU retained the firm of Racine Olson Nye Budge & Bailey, Chtd., to provide General Counsel services. Idaho State University provides office space for two Racine attorneys, who are on campus daily and manage the Office of General Counsel, Compliance, and Risk Management. The Racine lawyers are on-call 24 hours a day to advise the President and top administrators. The General Counsel, who is also Risk Manager and ISU's designated Compliance Officer, has oversight of ISU's Policies and Procedures, is responsible for legal and NCAA compliance, serves on the President's Cabinet, oversees outside counsel when required, reviews and negotiates contracts, handles some litigation matters, assists in drafting policies and procedures, investigates violations, and otherwise acts as counsel and advisor on legal matters. The contract between ISU and Racine is renewable annually. Racine has 30 attorneys in offices in Pocatello, Boise, and Idaho Falls.

## Financial Resources

Idaho State University's financial condition is discussed in more detail in Standard 2.F.

The guiding financial precepts of the University are:

- Transactional Integrity
- Build and Maintain Adequate Reserves
- Maintain Effective Debt Capacity & Liquidity
- Foster revenue Diversity
- Planned and Controlled Spending
- Strong Control & Culture of Compliance

Idaho State University, like other state institutions and agencies, continues to monitor and make adjustments related to the economy and the changing dynamics of funding its programs. The campus community is encouraged to exert their best efforts to be fiscally responsible and take advantage of cost savings and revenue enhancing opportunities whenever and wherever possible. It is worth noting that the University's most recent year-end financial results reflect an \$11.3 million improvement in the University's net position, despite pressures on all key revenue sources and weak economic conditions. Total assets increased by \$7.6 million to \$308.3 million, driven largely by a significant increase of \$11.6 million in cash and investments. Key financial ratios measuring the institution's overall financial health continued to reflect sound performance with all but one ratio significantly above industry benchmarks. The positive trend in these ratios demonstrate the University's ability to operate within available resources, manage its debt strategically, invest in assets that generate resources, and position itself to invest in mission-critical initiatives.

As part of the ongoing efforts to control costs, ISU issued Series 2012 and Series 2013 refunding bonds to take advantage of record low interest rates and save approximately \$3.5 million in interest expense over the next ten years. Additionally, selected areas of cost are more closely monitored. They are:

- Hiring and Personnel Actions – All requests are reviewed with a high level of scrutiny as part of a tighter and more rigorous process. Organizations are asked to integrate and consolidate functions and activities and share personnel where it makes sense to do so.
- Overtime – All overtime is critically assessed and allowed if approved in advance.
- Consulting and other Significant Contracts – Contracts are evaluated with a view toward cancelling or suspending those where it makes sense and is feasible to do so.
- Printing and Mailing – Departments are encouraged to take advantage of electronic media, bulk mailing, and limited overnight delivery services.
- Publications and Subscriptions – Departments scrutinized these to assess their ongoing critical need and benefit to the University.
- Travel – All international travel must be approved by the President or his designee. All Vice Presidents and Deans are to take appropriated actions to minimize travel costs.
- Capital Equipment Expenditures – All departments are to postpone purchases until the need for the item is judged absolutely critical.
- Energy Conservation – Employees were encouraged to be mindful of energy saving steps they could take.

In continued recognition of the dedicated work and contributions ISU's team members have made toward achieving excellent financial performance, the University was able to supplement a 2% employment compensation increase from the state of Idaho to achieve an average 4.5% merit/equity/retention based compensation increases for faculty and staff. At the same time, this increase allowed us to bring all employees to a compensation level at least 3% above the poverty line, reduce the pay gap between entry pay levels of classified staff and the pay grade mid-point for those jobs, and eliminate or reduce the number of pay inequity situations.

Moody's Investors Service recently reaffirmed the institution's A1 rating, and institutional reserves are strong. Standard and Poor's has done likewise with its A/Stable rating.

### ***Campus-Wide Program Prioritization***

The entire campus engaged in a twelve-month, data-driven analysis of all of its academic and non-academic units and programs as outlined in its [Program Prioritization](#) process and timeline. Further explanation about Program Prioritization can be found in Standards 4.B., 5.A., and 5.B. The process utilized the Robert C. Dickeson Model as directed by the Board in May 2013. The Office of Academic Affairs employed an evaluation and program scoring matrix based on the Dickeson criteria that was approved by the Faculty Senate, Deans' Council, and the Board. The academic programs utilized a scoring matrix that included the following:

- Demand (30% weight)
- Quality (30% weight)
- Revenue and Cost (20% weight)
- Impact & History (20% weight)

The Office of Institutional Research provided the project support for Program Prioritization in Academic Affairs, and additional resources were housed in Institutional Research to manage the considerable additional workload.

For the non-academic programs on campus a survey approach was used to assess key Program Prioritization factors. The following five criteria and their respective weights were developed by the University and used to analyze, review, and rank non-academic programs into quintiles:

- Cost-Effectiveness (25% weight)
- Importance to the institution (20% weight)
- Demand (20% weight)
- Quality (20% weight)
- Opportunity (15% weight)

## *Response to Year One Recommendations*

This section responds to the recommendations found in the Year One Peer Evaluation Report (Fall 2011) that ISU received from the Northwest Commission on Colleges and Universities (NWCCU). The text of each topic is presented, followed by responses. The 2011 report of the Evaluator Panel included two recommendations that are addressed in the following discussion.

### **Recommendation 1**

*The institution should revisit the core themes and connect them more directly to the mission. Three of the Core themes indirectly relate to the mission and the community engagement does not flow from the mission statement. Std 1.B.1*

In 1998 the State Board of Education (the Board) approved revisions to the 1983 role and mission statements for the public institutions, including ISU's, which has been widely publicized. In recent years the Board engaged the public institutions in discussions regarding their assigned roles and missions. As part of a Board review and clarification of Board policy [III.I](#), and review of the revised 2010 NWCCU accreditation requirements, institutions were instructed in April 2011 to bring forward a draft revised mission statement. At the June 2011 State Board of Education meeting, the Board reviewed the draft revisions to the public institutions' role and mission statements, although no specific feedback was provided. In early September ISU was asked to submit a more general mission statement draft. At a special Board meeting that took place on September 9, 2011, the Board approved the revised institutional mission statements, with the caveat the Board would revisit the institutions' missions at a workshop to be held in February 2012. While the Board did not address the institutions' core themes at the September 2011 special Board meeting, those were addressed at the February workshop. In light of the recommendations received, ISU addressed Recommendation 1 through a comprehensive revision of the Mission Statement previously submitted to the NWCCU in September 2011; which in turn more directly tied ISU's Core Themes to the Mission Statement. The following represents the September 9, 2011 Mission Statement, and the revised Mission Statement and Core Themes approved by the Board February 2012.

### ***September 2011 Mission Statement***

Idaho State University is a public, doctoral-granting, research university, with high research activity (Carnegie Classification as RU-H) that serves a diverse population through its undergraduate, graduate, and professional degree programs; research and creativity activity; and public service endeavors, offered throughout the state and Intermountain region. The University provides statewide leadership in the health professions and related biological and physical sciences, and is engaged in cutting-edge interdisciplinary basic and translational research. The University offers high-quality undergraduate and graduate programs in the Colleges of Arts and Letters, Business, Education, and Science and Engineering; and within the Division of Health Sciences that offers postgraduate residency training programs in family medicine, dentistry, and pharmacy. The College of Technology provides students high-quality professional-technical training in response to the workforce needs of private industry and public entities in the state. Idaho State University's Early College Program provides current high school students the opportunity to begin their college-level coursework prior to graduating.

### **February 2012 Mission Statement**

The Mission of Idaho State University is to advance scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits and high-quality academic instruction; to use these achievements to enhance technical, undergraduate, graduate, and professional education, health care services, and other services provided to the people of Idaho and the nation; and to develop citizens who will learn from the past, think critically about the present, and provide leadership to enrich the future in a diverse, global society.

Idaho State University is a public research institution which serves a diverse population through its broad educational programming and basic, translational, and clinical research. Idaho State University serves and engages its communities with health care clinics and services, professional-technical training, early college opportunities, and economic development activities. The University provides leadership in the health professions and related biomedical and pharmaceutical sciences, as well as serving the region and the nation through its environmental science and energy programs.

*Core Theme One: Learning and Discovery.* Idaho State University promotes an environment that supports learning and discovery through the many synergies that can exist among teaching, learning, and scholarly activity.

*Core Theme Two: Access and Opportunity.* Idaho State University provides opportunities for students with a broad range of educational preparation and backgrounds to enter the University and climb the curricular ladder so that they may reach their intellectual potential and achieve their goals and objectives.

*Core Theme Three: Leadership in the Health Sciences.* Idaho State University values its established leadership in the health sciences with primary emphasis in the health professions. It offers a broad spectrum of undergraduate, graduate, and postgraduate training. We deliver health-related services and patient care throughout the state in its clinics and postgraduate residency training sites. We are committed to meeting the health professions workforce needs in Idaho. We support professional development, continuing education, and telehealth services. We are active in Health Sciences research.

*Core Theme Four: Community Engagement and Impact.* Idaho State University, including its outreach campuses and centers, is an integral component of the local communities, the state and the Intermountain region. It benefits the economic health, business development, environment, and culture in the communities it serves.

### **Recommendation 2**

*The institution should articulate the acceptable threshold or extent of mission fulfillment for all identified indicators in the Standard One report. (Std 1.A.2)*

Subsequent to the 2011 Evaluators' Report, ISU's Accreditation Steering Committee thoroughly reviewed all the indicators. The Steering Committee took particular attention to ensure that all indicators were indeed critical to mission fulfillment, and to ensure that data were available to establish acceptable thresholds and/or extent of mission fulfillment for all identified indicators. Since the completion of that work in 2013, the Accreditation Leadership Group, a smaller more focused leadership team comprised of administrators from various departments and faculty, worked to clarify the indicators, their relevance and capacity to determine the threshold or extent to determine mission fulfillment. The revised framework for the core theme objectives and indicators provides the necessary structure to assess outcomes that

represent an acceptable threshold and extent of mission fulfillment as required in Standard 1.A.2. The details of these changes can be found in the response to Standard 1.A.2.

## **Mission, Core Themes, and Expectations**

### *Executive Summary of Eligibility Requirements 2 and 3*

#### **Eligibility Requirement 2: Authority**

Idaho State University is authorized to operate and award degrees as a higher education institution by the Idaho State Board of Education (the Board), which serves as the governing board for all public higher education in the state, and as such, serves as the Board of Trustees for Idaho State University. The authority, responsibilities, and relationships of the Board and the public universities are described in [Idaho Code Title 33](#), the Idaho State Board of Education [Governing Policies and Procedures](#), and the Idaho State University [Policies and Procedures Manual](#).

#### **Eligibility Requirement 3: Mission and Core Themes**

Idaho State University's mission statement, from which the core themes and indicators are derived, was approved by the Board consistent with its legal authorization, and is deemed appropriate for a degree-granting public university. Idaho State University's primary purpose is to serve its students by providing educational programs that lead to recognized academic and professional-technical certificates and degrees. The university devotes all of its resources to support its educational mission and core themes.

## *Standard 1.A. Mission*

### ***Mission Statement***

In 1998 the Idaho State Board of Education (the Board) approved revisions to ISU's 1983 role and mission statement. Following changes to the 2010 NWCCU standards for accreditation, the Board approved additional revisions to ISU's role and mission in September 2011 and the following revisions in April 2012:

The Mission of Idaho State University is to advance scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits and high-quality academic instruction; to use these achievements to enhance technical, undergraduate, graduate, and professional education, health care services, and other services provided to the people of Idaho and the Nation; and to develop citizens who will learn from the past, think critically about the present, and provide leadership to enrich the future in a diverse, global society.

Idaho State University is a public research institution which serves a diverse population through its broad educational programming and basic, translational, and clinical research. Idaho State University serves and engages its communities with health care clinics and services, professional-technical training, early college opportunities, and economic development activities. The University provides leadership in the health professions and related biomedical and pharmaceutical sciences, as well as serving the region and the nation through its environmental science and energy programs.

### ***Interpretation of Mission Fulfillment***

Idaho State University's core themes are derived from essential elements of its mission. To that end, it is through the assessment of the objectives and indicators that allow the University to determine the extent or threshold of mission fulfillment. As part of the Program Prioritization process, ISU built a Program Viability data system which will be used to support strategic and core theme planning and budget decisions. This is one of the ongoing benefits of Program Prioritization at ISU. One central aspect of this analysis includes an assessment of how the programs align with the University Core Themes. As part of its ongoing strategic planning process, ISU articulates and reviews measurable indicators by which it evaluates adherence to its mission and progress toward fulfillment of core themes. The entire set of strategic plan indicators is continuously tracked by Institutional Research and updated as new data become available.

Idaho State University now has a robust capability of measuring mission fulfillment through the implementation of the Banner Enterprise Resource Planning (ERP) system in 2010 for student and data tracking. Prior to this implementation, the University utilized a legacy data system that was home grown and could not provide consistent or reliable data. Idaho State University's Office of Institutional Research has also recently been revitalized with a team of six highly-skilled professionals in survey development, computer programming and data analysis. Four new servers (two development and two production) were installed in Fall 2013 to provide additional infrastructure for data collection, analysis, and reporting. Therefore, there are some areas where baseline data must be reconstructed from the legacy data system and some data will only become available as the accreditation cycle proceeds. The University has worked continually to refine the indicators to ensure they are appropriate to determine mission fulfillment.

Idaho State University's core theme fulfillment comes from ISU's unique degree ladder, program mix, and array of delivery options that provides flexible access to the entire postsecondary educational spectrum.

Idaho State University offers degree programs from the professional-technical certificate through the research Ph.D. that is mandated by the Board’s definition of ISU’s [primary service region](#).

Figure 1: Degree ladder

As the University is located within a state with two time zones, divided by mountainous regions, with a total geographic area of over 82,000 square miles, ISU utilizes a broad, innovative mix of delivery options across its vast geographic footprint. To ensure access to educational opportunities and pursuant to Section 33-2101, Idaho Code, the Board recognizes five service regions, three of which are identified as ISU’s primary service regions.

Idaho State University demonstrates successful achievement of its core themes and indicators as identified below. This collectively demonstrates the commitment of its students, faculty, and staff to the University’s mission to enhance technical, undergraduate, graduate, and professional education as a public research institution that serves a diverse population through leadership in the health professions, learning and discovery, and community engagement.

**Mission Fulfillment**

The four core themes identified by the University, each with a set of objectives, outcomes, and indicators, provide a mechanism to assess and determine mission fulfillment. The accomplishments of ISU as defined by its core themes exceeds an acceptable threshold of mission fulfillment. The use of both qualitative and quantitative data at the program and campus level through the process of program prioritization had a key focus on the University core themes. It is through ISU’s core themes that it is able to evaluate and assess mission fulfillment. The University is deeply committed to continuing to improve the extent to which it fulfills its mission.

## *Standard 1.B. Core Themes*

Idaho State University identified four core themes derived from its Board-approved mission statement. Idaho State University worked to ensure that the objectives and indicators are meaningful and assessable, and allowed the University to demonstrate its strengths and identify areas of weakness. Where possible, ISU focused on outputs rather than inputs. The majority of the indicators are objective. For those that are subjective, objective evidence is provided. When possible, the indicators are direct and widely accepted as applying to the desired outcomes and objectives.

Idaho State University's core themes are:

***Core Theme One: Learning and Discovery.*** Idaho State University promotes an environment that supports learning and discovery through the many synergies that can exist among teaching, learning, and scholarly activity.

***Core Theme Two: Access and Opportunity.*** Idaho State University provides opportunities for students with a broad range of educational preparation and backgrounds to enter the University and climb the curricular ladder so that they may reach their intellectual potential and achieve their goals and objectives.

***Core Theme Three: Leadership in the Health Sciences.*** Idaho State University values its established leadership in the health sciences with primary emphasis in the health professions. We offer a broad spectrum of undergraduate, graduate, and postgraduate training. We deliver health-related services and patient care throughout the state in its clinics and postgraduate residency training sites. We are committed to meeting the health professions workforce needs in Idaho. We support professional development, continuing education, and telehealth services. We are active in Health Sciences research.

***Core Theme Four: Community Engagement and Impact.*** Idaho State University, including its outreach campuses and centers, is an integral component of the local communities, the state and the Intermountain region. It benefits the economic health, business development, environment, and culture in the communities it serves.

For each Core Theme, ISU identified objectives and key supporting indicators. These indicators provide concrete, meaningful, and transparent measures that detail the degree to which ISU is meeting its objectives. These measures will provide the University an overview of its performance, identifying both strengths and weaknesses.

### **Core Theme One—Learning and Discovery**

A central component of ISU's mission is to advance scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits and high-quality academic instruction. Learning and discovery are at that core. Teaching and learning have always been key components of ISU's identity. Idaho State University's status as a Research High university and its mission-specified emphasis on biomedical, interdisciplinary, basic, and translational research requires faculty to be active in research, to seek and obtain external grants, and to disseminate the results of their research and other scholarly activity.

One of the unique features of ISU is its strong partnership with the Idaho National Laboratory that supports ISU's research in renewable energy. The Idaho National Laboratory is a key player in the Energy System Technology and Education Center (ESTEC) at ISU's College of Technology. Idaho State University also operates the Idaho Accelerator Center which houses specialized nuclear facilities – serving as the principal investigating tool for research and development in nuclear physics applications in materials science, biology, as well as homeland and national security. Idaho State University is home to the Research and Innovation in Science and Engineering (RISE) facility. The RISE is a 215,000 square foot, state of the art, non-profit research and development facility dedicated to investigating the uses and behaviors of nano-scale materials in the areas of nuclear engineering, materials science, energy, and bio-technology. Between these latter two facilities, which are under the direction of the Vice President for Research and Economic Development, ISU manages approximately \$2-5 million of funding per year and this amount is growing rapidly due to strategic changes implemented in the past year.

Idaho State University's Meridian Health Science Center houses more than 25 undergraduate, graduate, and postdoctoral programs in the health professions and sciences, community clinics, and research laboratories. Its clinical services provide opportunities that serve both the teaching, research, and service mission in the treatment of patients.

Table 1: Objectives, Indicators, and Rationale for Core Theme One

**Objectives, Indicators, and Rationale for Core Theme One**

<b>Core Theme One: Learning &amp; Discovery</b> ISU promotes an environment that supports learning and discovery through the many synergies that can exist among teaching, learning, and scholarly activity.			
<b>Objective</b>	<b>Indicators</b>	<b>Meaningful</b>	<b>Assessable</b>
<b>1.1: Innovation and creativity in the pursuit of knowledge</b>  ISU fosters student learning through teaching, research, and creative activity. Students learn through opportunities that develop their careers, and engage in research and scholarly activities. Faculty are actively engaged in research and creative activities.	<b>1.1.1</b> Number of students participating in Career Path Internships (PM 1.1.2) <sup>2</sup>	This program provides opportunities for students to be employed as interns in positions concomitant with their academic and professional interests. It fosters student learning by giving students hands-on experience, enhancing job readiness skills and has demonstrated increased retention.	Report of internships awarded
	<b>1.1.2</b> Number of graduate assistantships and fellowships with teaching responsibilities (PM 1.3.1)	Assistantships and fellowships provide graduate students with professional experience and exposure to the latest teaching and research methods in their fields of study, and establishes mentorship opportunities through faculty oversight.	Report of assistantships and fellowships awarded
	<b>1.1.3</b> Number of students employed as English, math, and content area tutors (PM 1.3.2)	Content tutors encourage students to utilize innovation and higher levels of thinking. Tutoring provides an opportunity for undergraduate and graduate students to serve as mentors to peers, with the oversight and guidance of faculty.	Report of students employed as content area tutors
	<b>1.1.4</b> Number of students employed to work with faculty on research projects (PM 1.4.1)	Research provides significant learning experience for students to engage with faculty to expand students' understanding of concepts they can apply to theoretical and real world problems. Direct experience in research methodologies helps train student to be stronger problem solvers.	Report of students employed to work with faculty
	<b>1.1.5</b> Number of theses and dissertations completed	Theses and dissertations marks the culmination of thousands of hours of training, research, and writing. Through this preparation the student learns and	Report of number of theses and dissertations

<sup>2</sup> All references to PM identify a correspondence to an associated Performance Measures in the ISU Strategic Plan

		demonstrates the ability to conduct independent, original, and significant research within their discipline.	
	<b>1.1.6</b> Examples of end of the year research presentations	High-quality research reflects a research community that is dedicated to the pursuit and dissemination of knowledge. Provides an opportunity for students to showcase exemplary work/projects.	Evidence of research opportunities and students' understanding of research activities
	<b>1.1.7</b> Examples of outstanding research and innovation	The University culture is one of determined persistence that engenders innovation. High-quality research reflects a research community that is dedicated to the pursuit of knowledge, to the dissemination of knowledge, and to improving lives and solving society's most pressing issues.	Evidence of research and recognition of scholars
<b>1.2 Program quality and relevance</b>  ISU demonstrates academic excellence at all program levels: technical certificates; undergraduate, graduate, and professional degrees; and postgraduate professional training. Academic programs prepare students for employment or postgraduate study.	<b>1.2.1</b> Number of faculty peer-reviewed publications, juried shows or exhibits, performances, and conference presentations (PM 1.5.1)	As a Carnegie Research High University, there are high expectations of faculty demonstration of scholarly activity and currency with disciplinary trends.	Report of the number of faculty peer-reviewed publications, juried shows or exhibits, performances, and conference presentations
	<b>1.2.2</b> Examples of placement rates of graduates from academic and professional-technical programs (PM 1.6.2)	Program placement rates, where available, is a demonstration of both student success and program quality and relevance.	Evidence of program quality and relevance
	<b>1.2.3</b> Number of certificate, associate, and baccalaureate students who enroll in programs at the next degree level upon graduating	The number of students pursuing continued advanced degree level opportunities demonstrates students are receiving a high-quality education and are able to pursue advanced levels of training/education.	Report of post-baccalaureate enrollment

	<b>1.2.4</b> Number of regular comprehensive program reviews conducted each year (PM 5.2.1)	Program review provides a mechanism for evaluation and assessment to highlight areas of success and identify areas that need improvement. Central to the process of program review also requires that the results inform and guide strategic planning and the budgeting process.	Report of regular program reviews
	<b>1.2.5</b> Number undergraduate and graduate degrees awarded (PM 2.2.5)	Student completion data demonstrate quality of teaching and learning.	Report on degrees awarded

## **Core Theme Two—Access and Opportunity**

Since its founding in 1901, ISU has focused on providing educational pathways which take students from where they are to where they want to be. Idaho State University serves as the hub for public higher education in Southeast Idaho. Idaho State University’s mission includes offering a broad array of courses and programs, strengthening the economic and cultural environment of the region, and providing opportunities that would not otherwise be available.

Idaho State University’s roots lie in professional-technical (vocational) education and has long provided a ladder to educational and professional success for students with diverse backgrounds and interests. One example of this is the ISU Successful Transitions and Retention Track (START) that is focused on retaining its at-risk, underrepresented student population by providing social and academic support, helping them to manage barriers. After the first three years, the START program showed an overall retention rate of 76%.

Idaho State University’s Early College Program, which serves as both a recruitment and retention tool, enables high school students to take college-level courses. Idaho State University is the only university in the state that offers a two + two partnership with a high school where a student can earn his/her high school diploma and an Associate of Arts degree at the same time. In 2013 nine students graduated through this program; and in 2014 eighteen students graduated through this program.

Idaho State University is nationally known for its progressive veterans program, the Veteran’s Sanctuary. The University has a special focus that not only supports veterans in advising, articulation, job interview preparation and more, but also supports their families. These efforts have earned ISU the recognition by *GI Jobs Magazine* as a “Military Friendly” school since 2010; an honor only bestowed on the top 15% of colleges, trade schools, and universities in the United States.

Table 2: Objectives, Indicators, and Rationale for Core Theme Two

**Objectives, Indicators, and Rationale for Core Theme Two**

<b>Core Theme TWO: ACCESS AND OPPORTUNITY</b> – ISU provides opportunities for students with a broad range of educational preparation and backgrounds to enter the University and climb the curricular ladder so that they may reach their intellectual potential and achieve their goals and objectives.			
<b>Objective</b>	<b>Indicators</b>	<b>Meaningful</b>	<b>Assessable</b>
<p><b>2.1. Educational ladder – Access for student academic success</b></p> <p>ISU focuses on providing educational pathways with multiple access points and diverse opportunities for students to enter college and be successful in achieving their academic objectives.</p>	<p><b>2.1.1</b> Number of certificates, undergraduate and graduate degrees available (PM 2.2.5)<sup>3</sup></p>	<p>Many of today’s students arrive on campus uncertain of their academic interests. A diverse array of programs represents responsiveness to the varied interests and career paths, and financial needs students arrive with at ISU.</p>	<p>Report on the number of certificate and degree programs</p>
	<p><b>2.1.2</b> Number of students enrolled in ISU’s Early College Program (PM 2.4.1)</p>	<p>Participation in ISU’s Early College program demonstrates exposure to rigorous academic coursework in a supportive environment, allowing high school students to save both time and money in obtaining a college degree.</p>	<p>Report on the enrollment numbers for Early College</p>
	<p><b>2.1.3</b> In-state tuition and fees are competitive with peer institutions</p>	<p>Demonstration of access to quality instruction, combined with the lowest tuition of any public, baccalaureate-granting institution in the state.</p>	<p>Comparison of tuition and fees with peers</p>
	<p><b>2.1.4</b> Number of courses taught at outreach centers</p>	<p>Outreach center program offerings allow place bound and rural students multiple access points to pursue an undergraduate and graduate education that would otherwise not be possible.</p>	<p>Report on the number/types of courses at outreach centers</p>
	<p><b>2.1.5</b> - Number of online courses taught - Number of courses offered at non-</p>	<p>Traditional students constitute an ever-decreasing portion of today’s undergraduate population. Idaho State University is committed to providing non-traditional students with comprehensive academic offerings that better fit into their personal lifestyles.</p>	<p>Report on the number of online, non-traditional start time courses offered</p>

<sup>3</sup> All references to PM identify a correspondence to an associated Performance Measures in the ISU Strategic Plan

	traditional times (PM 1.1.1)		
	<b>2.1.6</b> Number Pell grants awarded	This is a demonstration of significant financial need. The number of Pell grantees attending ISU is a measure of commitment to providing access.	Report on the number of Pell grants awarded
	<b>2.1.7</b> Percent of financial aid awarded as a % of total eligible need	The percent of financial aid awarded is a measure of commitment to providing access. Students are supported through financial aid, enabling them to attend college and achieve their academic objectives, regardless of their financial means.	Report on aid awarded as a percent of total eligible need
<b>2.2 Student Support Services</b>  ISU recognizes students arrive with differing levels of college readiness, interests, and academic goals. Multiple initiatives support students' academic progression.	<b>2.2.1</b> Number of advisor contacts with students occurring through Central Academic Advising, TRiO Services (PM 2.2.1)	The large number of advisor contacts indicates that students are taking advantage of opportunities to seek advising, to build their plans of study, and to develop strategies to reach their academic goals.	Report on the number of contacts
	<b>2.2.2</b> Number of students employed on campus	Student employment options through work-study, the Career Path Internship program, and non-work study positions provide financial assistance for students while helping them stay connected to the University and giving them the opportunity to develop skills that would be useful in the larger workplace.	Report on the number of students employed on campus
	<b>2.2.3</b> Examples of student support centers	These programs provide physical, emotional, intellectual, and family support to ensure that students are able to focus their attentions on their academic progression more fully and to develop long-term academic plans.	Examples of student support options/ opportunities
	<b>2.2.4</b> Undergraduate student retention and graduation rates (PM 2.4.1)	Retention rates are common indicators that demonstrate the extent to which programs enable students to persist and graduate	Report on student retention and graduation

<p><b>2.3 Broad range of opportunities</b></p> <p>ISU creates opportunities for students to cope with issues surrounding college life. Student support services are provided and utilized. Students participate in community and service learning projects and activities, student organizations, and/or learning communities.</p>	<p><b>2.3.1</b> Examples of diversity of populations served and programs offered</p>	<p>Formal programs that support students from all backgrounds and affirm institutional commitments to diversity are powerful tools to bring students successfully into the University. The availability of resources and support for programs demonstrates one of the ways students' work in academic programs are further supported.</p>	<p>Evidence of formal programs with broad accessibility</p>
	<p><b>2.3.2</b> Number of students participating in student organizations (PM 2.5.1)</p>	<p>Research shows that co-curricular participation is positively associated with academic involvement and contributes to college persistence.</p>	<p>Report on number of students participating in student organizations</p>
	<p><b>2.3.3</b> Number of First Year Seminar and College Learning Strategies Courses (PM 2.1.2)</p>	<p>Institutional support for student development is critical for the retention of undergraduate students. Idaho State University's commitment is visible in the academic support resources available within First Year Seminar courses.</p>	<p>Report on the number of first-year seminar courses</p>
	<p><b>2.3.4</b> Number of Honors students</p>	<p>ISU offers the only Honors Degree in the state. It is an elite academic program for students who aspire to a more engaging and enriching collegiate experience. The number of honors students is a demonstration of the high-quality student ISU attracts.</p>	<p>Report on the number of honors students</p>
	<p><b>2.3.5</b> Examples of post-college support through career services</p>	<p>ISU recognizes that universities working to help students prepare for the job application and interview process, as well as help students and employers connect, increase the likelihood their students will secure jobs. The efforts surrounding career placement and planning demonstrates commitment to supporting students beyond degree completion.</p>	<p>Evidence of career placement planning and support</p>

### **Core Theme Three—Leadership in the Health Sciences**

As the lead health sciences institution in Idaho, the University's vision is to enhance the quality of life for its constituencies by applying the values of excellence in research, partnerships in community service, and professional education into practice. As such, ISU created the Division of Health Sciences (DHS), the largest academic unit at ISU. The Division of Health Sciences is comprised of the College of Pharmacy, Kasiska School of Health Professions, School of Nursing, School of Rehabilitation and Communication Sciences, Office of Medical and Oral Health, and the Institute of Rural Health. Programs in the health sciences have a major presence on the Pocatello, Idaho Falls, and Meridian campuses. Several of the professional programs offered are entirely online. The Division of Health Sciences operates 15 teaching clinics between Pocatello and Meridian. The ISU Meridian Health Science Center houses more than 25 (ten of the nineteen DHS disciplines) undergraduate, graduate, and postdoctoral programs in the health professions and sciences, community clinics and research laboratories, and is currently building a state-of-the-art Anatomy and Physiology Laboratories that includes the only Bioskills Learning Center in the state. All DHS programs are accredited by the relevant professional accreditation bodies.

More than \$36 million in research grants and funding during the past five years and \$12.6 million annually in free medical services are among the highlights of DHS. The Division of Health Sciences continues to grow, and its reliance on state-appropriated funds continues to decrease. Idaho State University's professional fees, clinic receipts, external grants and contracts and fundraising help recruit high-quality faculty and assure that the University's facilities have state-of-the-art equipment. Idaho State University's faculty's scholarly activity brings national recognition to ISU. Its clinics provide the training ground for entry-level professional students and service individuals in the community who might not otherwise have access to care. A significant portion of students' clinical training occurs with the cooperation of community partners.

Table 3: Objectives, Indicators, and Rationale for Core Theme Three

**Objectives, Indicators, and Rationale for Core Theme Three**

<p><b>Core Theme THREE: LEADERSHIP IN THE HEALTH SCIENCES</b> – Idaho State University values its established leadership in the health sciences with primary emphasis in the health professions. We offer a broad spectrum of undergraduate, graduate, and postgraduate training. We deliver health-related services and patient care throughout the state in clinics and postgraduate residency training sites. We are committed to meeting the health professions workforce needs in Idaho. We support professional development, continuing education, and telehealth services. We are active in health sciences research.</p>			
Objective	Indicators	Meaningful	Assessable
<p><b>3.1 Health Professions Programs</b></p> <p>In its leadership role, ISU consistently offer Idaho’s broadest array of high-quality health professions programs. Idaho State University’s Division of Health Sciences (DHS) leads the state in the number of health sciences programs offered and number of health professionals produced. ISU’s health professions programming demonstrates high quality.</p>	<p><b>3.1.1</b> Number of health professions programs offered (PM 3.3.1)<sup>4</sup></p>	<p>ISU is the leader in the state in the number and variety of health programs offered which demonstrates support of Core Theme Three and the health education mission.</p>	<p>Report on the number and diversity of health programs</p>
	<p><b>3.1.2</b> Number of health professions graduates (PM 3.3.1)</p>	<p>The number of health professions graduates speaks to high levels of retention in DHS, as well as the quality and strength of the programs offered.</p>	<p>Report on the number of health profession graduates</p>
	<p><b>3.1.3</b> Number of health professions programs at or near capacity (PM 3.3.1)</p>	<p>While many degree programs are limited by specialized accreditation requiring limits on faculty-student ratios, the ability of ISU to maintain enrollment in programs at capacity speaks to the quality and demand of health programs. The low faculty to student ratios allow students to engage in experiential learning which is often noted as the most profound educational opportunities.</p>	<p>Report on the number of health programs at or near capacity</p>
	<p><b>3.1.4</b> Number of qualified student applications compared to the seats available</p>	<p>Large applicant pools foster healthy competition and the ability for ISU to choose from the best and brightest of students. Continued demand for health programs, as evidenced by applicant numbers, demonstrates the need for such programs within the state, as well as nationally.</p>	<p>Report on the number of qualified applicants compared to seats available</p>

<sup>4</sup> All references to PM identify a correspondence to an associated Performance Measures in the ISU Strategic Plan

	<b>3.1.5</b> Participation of faculty at the state or national level	State and national leadership among the health professions' faculty indicates a strong dedication to service involvement, and recognition of the high caliber faculty employed by the University. Leadership provides faculty increased opportunity for collaborations and new activities critical to the health and vitality of ISU programs.	Examples of faculty holding positions at the state and national level
	<b>3.1.6</b> Number of students who have received national awards	The number of national awards given to students speaks to the dedication of ISU students in the pursuit of knowledge and the subsequent application to society.	Report on the number of student awards at the national level
	<b>3.1.7</b> Pass rates on licensure and certification exams in the health professions (PM 3.1.3)	High pass rates on national exams indicates that faculty are engaged and providing current, evidence-based practice in teaching; which translates into strong student performance on national exams. This denotes quality programs which meet the national standards.	Examples of pass rates on programs where national examinations are required
<b>3.2 Delivery of Patient Care and Related Health Services</b>  ISU delivers health-related services and patient care in the state through its clinics and postgraduate residency training sites. ISU serves the state, the public, and its health professions students through its clinics and other community health venues.	<b>3.2.1</b> Number of client visits to outpatient clinics (PM 3.2.1)	ISU clinics provide educational opportunities for students to be supervised by faculty and provide health care access opportunities for state citizens that may otherwise be unaffordable. Postgraduate residency training assists in meeting the demand for health care professionals in underserved areas.	Report on the number of client visits
	<b>3.2.2</b> Examples of affiliation agreements (PM 4.3.1)	Affiliated partners across the U.S. as well as international provide the resources essential for health science education with specific teacher student ratios. These affiliates provide diverse learning opportunities for interprofessional service, learning and scholarship. Idaho State University's diversity of partnerships allows for breadth and depth in connecting academic work and public health needs.	Evidence of a broad array of affiliated partnerships

	<b>3.2.3</b> Examples of faculty volunteer hours in community health screenings	Faculty are medical professionals with social contracts with patients. Community health screenings allow faculty to integrate teaching, clinical practice, research and service in visible venues. This experience is a professional development opportunity that strengthens faculty credentials and expertise as they role model clinical service.	Evidence of community support
<b>3.3 Health Sciences Research</b>  ISU contributes to the development of new knowledge in the biomedical and pharmaceutical sciences, rural health, clinical research studies, and professional research. ISU faculty and students engage in basic and clinical research in the health sciences.	<b>3.3.1</b> Examples of (faculty) peer reviewed publications, professional and other publications (PM 1.5.1)	Research that is broadly defined and inclusive, informs and enriches teaching. Faculty researchers are a model for student intellectual curiosity. Health science research provides new evidence to improve health.	Evidence of research and recognition of scholars
	<b>3.3.2</b> Number of health professions students who are participating in research (PM 3.3.3)	The ability to identify, analyze and resolve problems is invaluable in professional life and in citizenship. Research experience prepares students for pursuit of graduate and postgraduate learning.	Report on the number of students participating in research
	<b>3.3.3</b> Dollar amount of extramural support in the Health Sciences (PM 3.3.2)	Quality research programs are equated with external funding. External funding enhances visibility for ISU. Health science research provides new evidence to improve health.	Report of dollar amount

## **Core Theme Four—Community Engagement and Impact**

While ISU is the single largest employer in the Pocatello community, it provides more than economic health to the communities it serves. It provides access and opportunity, venues for learning and discovery, and has a strong health component. One aspect of the University's health community outreach is the ISU Meridian Health Science Center partnership with Ada County to provide free community health screenings for uninsured adults in the Treasure Valley (the largest metropolitan area of the state). Idaho State University is a member of the CORE, in Meridian; an Idaho business coalition for innovation in health care, research, and technology. It is dedicated to creating core competencies in health care and medical technology. In addition to ISU, the CORE includes: Boise State University, University of Idaho, AceCo, Ada County Commissioners, Bank of the Cascades, Blue Cross of Idaho, CenturyLink, City of Meridian, Dave Sanna - RBC Wealth Management, Eagle Road Professional Center, Gardner Company, Hawley Troxell, Idaho Council of Governments, Idaho Global Entrepreneurial Mission, Idaho Technology Council, Idaho Urologic Institute, Jay Lugo, Johnson Brothers Hospitality, Matt Joyce, MD PA, West Ada School District, MWI Veterinary Supply, Saint Alphonsus Regional Medical Center, St. Luke's Regional Medical Center, Washington Trust Bank, West Valley Medical Center, West Vet Animal Emergency & Specialty Center, and Zona Health.

Southeast Idaho's geographically disparate population benefits from ISU as a community center for educational, cultural, and entertainment opportunities. An example of the educational, cultural and entertainment opportunities includes ISU's Idaho Museum of Natural History's affiliation with the Smithsonian Institution. The museum is the only museum of natural history in the state, and one of just a few in the Intermountain West with such an agreement. Through the partnership, the Smithsonian shares its artifacts, programs, and expertise. This partnership allows the museum to host Smithsonian exhibits, bringing national exhibits to southeast Idaho. Another example is the \$34 million L.E. and Thelma E. Stephen's Performing Arts Center where music, dance, theatre, lectures and more bring the communities of Southeastern Idaho together.

Idaho State University promotes activities that conserve resources today and helps to provide resources for tomorrow. In a single year ISU Facilities Services recycles more than 74 tons of materials, including more than 57,000 pounds of cardboard; 29,000 pounds of white paper; 53,900 pounds of non-white paper; 3,768 pounds of plastic and metal; and 2,385 pounds of newspaper. In addition, ISU's facility vehicles run on recycled cooking oil. The fryer oil previously going to waste now powers facility vehicles. The recycled oil is carbon neutral and non-toxic to the environment.

Table 4: Objectives, Indicators, and Rationale for Core Theme Four

**Objectives, Indicators, and Rationale for Core Theme Four**

<b>Core Theme FOUR: COMMUNITY ENGAGEMENT AND IMPACT</b> – Idaho State University, including its outreach centers, is an integral component of the local communities, the state and the Intermountain region. It benefits the economic health, business development, environment, and culture in the communities it serves.			
<b>Objective</b>	<b>Indicators</b>	<b>Meaningful</b>	<b>Assessable</b>
<b>4.1 Economic Impact</b>  ISU contributes to the intellectual and financial capital, and provides infrastructure resources, to support the present economic development of the state. ISU directly contributes to the economic development of the state, region, and community.	<b>4.1.1</b> Estimates of economic impact (PM4.1.1) <sup>5</sup>	Economic impact studies measure the direct economic impact of an organization’s spending plus additional indirect spending in the economy as a result of direct spending. Total economic impact measures the dollars that are generated within Idaho due to the presence of Idaho State University.	Reports on the estimates of ISU’s economic impact
	<b>4.1.2</b> Amount of university spending from non-state funding sources	Total University spending from non-state funding demonstrates the resources the University is able to contribute to the growth of the local and state economy, generating new revenue	Evidence of economic contribution
	<b>4.1.3</b> Number of student volunteer clinical services	Community outreach is a reflection of the University’s commitment to serving the members of its community.	Report on number of hours
	<b>4.1.4</b> Net contribution to Idaho by non-resident students and their families	The University has become a destination institution for many non-resident and international students and the growth of non-resident enrollment contributes to the cultural and financial growth of the community.	Evidence of economic contribution
	<b>4.1.5</b> Examples of ISU healthcare professional graduates (PM 3.1.2)	Demonstration of the impact ISU health profession programs’ alumni have on the economic development of the state, and their community contributions in meeting shortage demands within the health professions.	Evidence of outreach and community contributions
	<b>4.1.6</b> Number of individuals served through Workforce Training	The ISU workforce training program provides continuing education opportunities, as well as opportunities for personal and professional enrichment, to those who would otherwise not have access to educational programs and services.	Report on the number of individuals served

<sup>5</sup> All references to PM identify a correspondence to an associated Performance Measures in the ISU Strategic Plan

		Demonstrates contribution to intellectual and financial capital within the community.	
<p><b>4.2 Community Engagement</b></p> <p>ISU is a unique reflection of the community it serves. ISU engages and supports the communities it serves, and those communities return that support.</p>	<p><b>4.2.1</b> Examples of active ISU formal partnerships, collaborative agreements, and contracts with public agencies and private entities (PM 4.3.1)</p>	Formal partnerships are a demonstration of community engagement. These partnerships and agreements create synergistic relationships for learning, discovery, and innovation.	Examples of partnerships, collaborative agreements and contracts with public/private entities
	<p><b>4.2.2</b> Examples of activities/events that meet the local and regional needs/ interests</p>	Attendance at ISU venues demonstrates that the community is interested and engaged in the activities and events the University offers. Pocatello is 168 miles from a metropolitan area, the closest of which is in Salt Lake City, Utah. Without ISU the region would have little opportunity to experience diversity of cultures, and variety of musical and educational events and exhibits.	Evidence of services that address local needs
	<p><b>4.2.3</b> Number of clinic participants who are served</p>	The communities served by ISU clinics benefit from quality health care. Idaho State University students in the health professions have the opportunity to work with citizens who otherwise would not have access to health care services, and demonstrates community outreach and support.	Report on the number of participants served through ISU clinics
	<p><b>4.2.4</b> Examples of continuing education and professional development</p>	Continuing Education and Professional Development programs provide a valuable contribution to the region's communities. These programs provide thousands of hours of training and education each year.	Evidence of opportunities provided to the community
	<p><b>4.2.6</b> Examples of campus resource conservation efforts (PM 4.2.1)</p>	As stewards of the state's resources, ISU is committed to taking care of the environment. Idaho State University has steadily implemented campus resource conservation to improve conditions at the University with an eye toward protecting valuable natural resources.	Evidence of campus efforts towards resource conservation

## Resources and Capacity

### *Executive Summary of Eligibility Requirements 4 through 21*

#### ***Eligibility Requirement 4: Operational Focus and Independence***

Idaho State University programs and services are predominantly concerned with higher education, as reflected in the [institutional mission](#), [strategic plan](#), and [core themes](#). The University has sufficient organizational and operational independence to be held accountable and responsible for meeting the Commission's standards and eligibility requirements.

#### ***Eligibility Requirement 5: Non-Discrimination***

Idaho State University is governed and administered pursuant to a [policy of nondiscrimination](#) that helps ensure respect for the individual and service in a nondiscriminatory manner while responding to the educational needs and legitimate claims of the constituencies it serves as determined by its charter, its mission, and its core themes. Board policy also shields ISU [employees](#) and [students](#) from institutional practices that may be discriminatory. To safeguard the protections afforded under the policy and make certain those protections are real, ISU employees and students are afforded a grievance process under [University](#) and [Board](#) policies for bringing concerns forward and having them addressed.

#### ***Eligibility Requirement 6: Institutional Integrity***

Idaho State University establishes and adheres to ethical standards in all of its operations and relationships. University and Board policies govern [faculty](#), [staff](#), and students and cover such areas as [conflict of interest](#), [misconduct in research and scholarship](#), academic dishonesty, [protection of sensitive data](#), appropriate use of [facilities](#), and accountability in [purchasing transactions](#). In addition, university employees are subject to Board policy [II.Q.](#), Conflict of Interest and Ethical Conduct. Idaho State University employees and operations are also required to comply with federal legislation, such as Title IX, Clery Act, VAWA, the Campus SaVE Act, FERPA, and [HIPAA](#), through extensive policies governing the use of and secure practices for [information technology](#) systems.

#### ***Eligibility Requirement 7: Governing Board***

The Idaho State Board of Education (the Board) is ISU's [governing board](#). As such it is responsible for the quality and integrity of the University and for each unit within a multiple-unit institution to ensure that the University's mission and core themes are being achieved. The governing board has eight [voting members](#), seven of which are appointed by the Governor, and one who is the elected state superintendent of K-12 public instruction.

#### ***Eligibility Requirement 8: Chief Executive Officer***

Idaho State University employs a [chief executive officer](#) who is appointed by, and directly responsible to, the Board. The Chief Executive Officer's full-time responsibility is leadership of the University, relations with the public and the Board. Neither the chief executive officer, nor an executive officer of the University, chairs the University's governing board.

#### ***Eligibility Requirement 9: Administration***

In addition to a chief executive officer, ISU employs a sufficient number of qualified administrators with appropriate preparation and experience who provide effective leadership and management for the University's major support and operational functions, and work collaboratively across institutional functions and units to foster fulfillment of the University's mission and achievement of its core themes.

**Eligibility Requirement 10: Faculty**

Idaho State University employs faculty who possess academic qualifications appropriate to their disciplines for teaching and research in their program areas. All faculty undergo an [annual evaluation](#) and a [periodic five-year performance review](#). The work of tenure-track faculty over a multi-year period is evaluated at the time the faculty member applies for tenure. This [comprehensive review process](#) is employed to ensure standards of quality and levels of performance in teaching, research, and service necessary to achieve educational goals and institutional mission are being met by the faculty. In addition to the NWCCU institutional accreditation, many ISU programs, particularly in the Health Professions, hold [specialized accreditation](#) mandating specific faculty-student ratios to ensure quality programming and delivery.

**Eligibility Requirement 11: Educational Program**

Idaho State University offers [educational programs](#) at the certificate, associate, baccalaureate, master's, and doctoral levels in alignment with its mission and core themes. Programs are based on recognized higher education fields of study, and of sufficient content and length, and conducted at levels of quality and rigor appropriate to the certificates and degrees offered, and which culminate in achievement of clearly identified student learning outcomes.

**Eligibility Requirement 12: General Education and Related Instruction**

Idaho State University has clearly defined general education requirements. The baccalaureate general education requirements or core curriculum (see [Undergraduate Catalog 2014-15](#)) serve as the general education component of all associate and bachelor's degree programs. This core curriculum has student learning outcomes identified for each of its components. Baccalaureate and graduate programs also have requirements related to the field of study and degree type (e.g., B.A., B.S., M.A., M.S., Ed.D., Ph.D.). Applied associate and certificate programs embed related instruction in required courses and, in the case of applied associate degrees, include general education courses in the areas of communication, computation, and human relations as part of the degree requirements (Board policy [III.N.](#)). Programs of study leading to occupational endorsements, applied associate, associate, baccalaureate, graduate licensure, master's, doctoral programs, and other postgraduate professional programs in a wide variety of fields are offered.

**Eligibility Requirement 13: Library and Information Resources**

Consistent with its mission and core themes, the University maintains and/or provides access to library and information resources with an appropriate level of currency, depth, and breadth to support the University's programs and services wherever offered and however delivered. For example, in support of ISU's mission and core theme responsibility to provide leadership in the health professions and related biomedical and pharmaceutical science, ISU's [Eli M. Oboler Library](#) delivers essential services and resources through the [Idaho Health Sciences Library](#).

**Eligibility Requirement 14: Physical and Technological Infrastructure**

Idaho State University provides the physical and technological infrastructure necessary to achieve its mission and core themes.

***Eligibility Requirement 15: Academic Freedom***

Idaho State University maintains an atmosphere in which intellectual freedom and independence exist. Pursuant to Board [policy](#) and University [policy](#), faculty and students are free to examine and test all knowledge appropriate to their discipline or area of major study as judged by the academic/educational community in general.

***Eligibility Requirement 16: Admissions***

Idaho State University publishes its student [admission policy](#) which specifies the characteristics and qualifications appropriate for its programs, and it adheres to that policy in its admissions procedures and practices.

***Eligibility Requirement 17: Public Information***

Idaho State University publishes an [electronic catalog](#) with current and accurate information concerning its mission and core themes; admission requirements and procedures; grading policy; information on academic programs and courses; names, titles and academic credentials of administrators and faculty; tuition, fees, and other program costs; refund policies and procedures; and opportunities and requirements for financial aid. Information for rules and regulations for student conduct and rights and responsibilities of students can be found on the [Student Affairs website](#); and information regarding the academic calendar can also be found online on the Office of the Registrar's [website](#).

***Eligibility Requirement 18: Financial Resources***

Idaho State University demonstrates financial stability with sufficient cash flow and, as appropriate, reserves to support its programs and services. Financial planning reflects available funds, realistic development of financial resources, and appropriate risk management to ensure short-term solvency and long-term financial sustainability.

***Eligibility Requirement 19: Financial Accountability***

For each year of operation, ISU undergoes an external financial audit, in a reasonable timeframe, by professionally qualified personnel in accordance with generally accepted auditing standards. Results from the audit, including findings and management letter recommendations, are considered in a timely, appropriate, and comprehensive manner by the administration and the Board.

***Eligibility Requirement 20: Disclosure***

Idaho State University accurately discloses to the NWCCU all information the Commission may require to carry out its evaluation and accreditation functions.

***Eligibility Requirement 21: Relationship with the Accreditation Commission***

Idaho State University accepts the standards and related policies of the NWCCU and agrees to comply with these standards and policies as currently stated or as modified in accordance with Commission policy. Further, the University agrees that the Commission may, at its discretion, make known the nature of any action, positive or negative, regarding the University's status with the Commission to any agency or members of the public requesting such information.

## Standard 2.A Governance

2.A.1	The institution demonstrates an effective and widely understood system of governance with clearly defined authority, roles, and responsibilities. Its decision-making structures and processes make provision for the consideration of the views of faculty, staff, administrators, and students on matters in which they have a direct and reasonable interest.
2.A.2	In a multi-unit governance system, the division of authority and responsibility between the system and the institution is clearly delineated. System policies, regulations, and procedures concerning the institution are clearly defined and equitably administered.

University constituent groups advise and recommend to the University president regarding matters of direct and reasonable interest to them, as part of the policy and decision-making processes of the University. This includes faculty, staff, students, and other identifiable institutional constituencies (Idaho State Board of Education policies [I.E.2a.](#), [III.C.2.](#), [III.C.3.](#), and [III.P.8.](#)). Idaho State Board of Education (Board) policy [III.C.4.](#) also authorizes the president to form advisory groups to study and make recommendations regarding specific issues.

The University's governance system is structured to provide effective processes for the views of faculty, staff, administrators, and students to be heard on matters in which they have a direct and reasonable interest. The [Governing Policies and Procedures](#) of the Board (Board policy) delineate the division of authority and responsibility between the Board and the institutions under its governance, including ISU. As noted above, the Board does not participate in the details of an institution's internal management but instead delegates authority to the University's president.

### **Faculty**

The time from April 2010 to October 2012 involved a formal, comprehensive review of the faculty governance system at ISU pursuant to a directive of the Board. This process included the Board suspending the ISU faculty senate, establishing a short-term provisional faculty senate, and electing a permanent faculty senate. In April 2012, the chair and vice-chair of the former Provisional Faculty Senate filed a complaint with NWCCU asserting that ISU was not in compliance with Standard 2.A. of Standard 2 Resources and Capacity. Upon review of the information submitted by the complainants and the University, NWCCU determined that ISU was not out of compliance with Standard 2.A.

Over the past several years a variety of committees and task forces, including the Faculty Senate, have reviewed and made recommendations for improving ISU's institutional governance structure, specifically the role of faculty and scope of their participation in shared governance.

Faculty elected a permanent faculty senate in October 2012. At its first meeting, the ISU Faculty Senate was given its charge and the scope of its authority and responsibility within the institutional advisory system and in relation to other university-level councils and committees pursuant to the Board policy [III.C.2.](#) During the 2013-14 academic year, the faculty senate took action on a variety of items ranging from providing recommendations on program prioritization; policies on evaluation of faculty tenure, bureau of education research and services, and fee reduction policy for dependents; electing senators to serve as chairs of Academic Dishonesty Board and Scholastic Appeals Board; developing and approving bylaws; and providing recommendations for proposed faculty constitution for consideration in Fall 2014.

Key existing councils—Research Council, Graduate Council, and University Curriculum Council—operated without interruption during those years. Each is functioning pursuant to bylaws adopted by its members that have been in place, with routine revision, since the inception of the council.

Faculty on the main campus and at outreach centers play a key role in providing input, advice, and making recommendations to the President, Provost, and other Administration through key advisory committees as follows (membership lists and bylaws for each advisory committee can be found in Appendix 2):

The [Faculty Senate](#) represents the University Faculty in the initiation, consideration, recommendation, and implementation of policy within the purpose and powers of the University Faculty. The Faculty Senate considers matters referred to it by the University Faculty, Senators, the Provost and Vice President for Academic Affairs, the University President, or the President's representative. It recommends to the Provost and Vice President for Academic Affairs changes in academic and other policies that affect the Faculty, and through the President recommends policy changes to the Board.

The [Undergraduate Curriculum Council](#) is responsible for ensuring the quality and appropriateness of undergraduate courses and undergraduate degree programs offered by the University. All proposals for the addition of or changes in undergraduate courses and undergraduate degree programs must be approved by the Curriculum Council.

The [General Education Requirements Committee](#), a subcommittee of the Undergraduate Curriculum Council, is responsible for courses and policies that relate to the University's general education requirements for appropriateness, rigor, assessment, and to make recommendations based on these evaluations to the Undergraduate Curriculum Council.

The [Graduate Council](#) is responsible for ensuring the quality and appropriateness of graduate courses and graduate degree programs. The Graduate Council provides recommendations concerning establishment and maintenance of requirements for graduation; allocation of privileges such as scholarships, honors, awards and grants-in-aid for graduate students; and the establishment of grade standards to be maintained by graduate students.

The **Research Council** is responsible for advising the Vice President for Research on the formulation, review, and application of policies touching on research matters. The Research Council provides oversight of subcommittees involved in the peer review and administration of internal grant awards funded by the Vice President for Research.

Faculty input also occurs through formal channels in the colleges, the Division of Health Sciences, and other units like the Oboler Library and the Idaho Museum of Natural History. As a key facet of ISU's reorganization, local level faculty governance has been given a prominent role in the governance advisory structure. Each college/division dean and unit head has established an advisory or executive committee comprised of faculty and administrative members in the college or unit. In the majority of colleges, faculty representatives are elected to serve on these committees. Typically, duties of the executive committees include developing policy and process on the college level for promotion and tenure, strategic planning, program review and assessment, faculty workload assessment, faculty development, budget planning, and space management. Individual deans may also involve their executive committees in other areas and issues. Thus, the opportunity for participating at the local level has augmented and diversified faculty

governance and allowed the colleges/division to tap into the faculty expertise and experience needed to make informed local decisions.

### **Staff**

Idaho State University staff provides essential services and support to the campus community at every level system-wide and perform functions critical to accomplishing the University's mission. The [ISU Staff Council](#) is the main representative body at the main campus and outreach centers of classified (hourly) and non-classified (salaried) employees and provides recommendations to the President regarding policy, proposed actions, and issue resolution as it pertains to staff members, their professional welfare, and similar employment-related concerns. Although this is accomplished in a variety of ways, a primary means is through the participation of Staff Council officers on several councils and committees including the President's Cabinet, Campus Planning Council, Special Budget Consultation Committee, Parking Advisory Board, University Safety, and similar groups. These officers take forward the input and recommendations of elected Staff Council members and the constituents they represent.

Non-classified (exempt) employee representation on Staff Council comes from four main groups:

*Instruction/Academic Support:* Examples of represented units include the Graduate School, Office of Research, Sponsored Programs, University Library, Idaho Museum of Natural History, Experiential Learning Assessment, Continuing Education and Conferences, Institutional Research, Registration and Records, ISU-Idaho Falls, ISU-Twin Falls, ISU Meridian Health Science Center, Academic Advising, Information Technology Services, and Educational Technology Services.

*Student Services:* Examples of represented units include Campus Recreation, Career Services, Disability Services, Early Learning Center, Counseling and Testing Center, International Student Services, Student Health Center, University Housing, Campus Planning, Facilities Services, Anderson Gender Resource Center, and TRiO Student Services.

*Finance and Administration:* Examples of represented units include the Controller's office, Budget, Grants, Accounting, Mail Center, Financial Aid, Scholarships, University Business Officers and Department Fiscal Officers, Human Resources, and Purchasing Services.

*Auxiliary Enterprises and Institutional Support:* Examples of represented units include University Relations, Development and ISU Foundation, Alumni Relations, Government Relations, General Counsel, Risk Management, Affirmative Action, and Records Management.

Classified employees from these categories are represented on Staff Council:

- Classified administrative/Executive Professional
- Secretarial/Clerical
- Technical/Paraprofessional
- Skilled Crafts
- Service/Maintenance

### **Administrators**

Idaho State University administrators support university functions on many levels. In central administration, administrative areas are divided into the following academic and non-academic units: Academic Affairs, Student Affairs, Research and Technology Transfer, University Advancement, Finance

and Administration, and Athletics. The vice presidents of these units participate in the President's Cabinet, as well as attend regular meetings of the President and vice presidents. These venues provide opportunities for the vice presidents to make recommendations and provide feedback regarding policy, process, and operation, and to provide input into the president's decision-making as it relates to their units and constituents. The vice presidents ensure that they meet with their leadership teams on a regular basis.

Other academic administrators participate in the Deans' Council that is comprised of the Provost and Vice President of Academic Affairs, the deans of the colleges, the executive dean of the Division of Health Sciences, and the associate vice presidents from the Office of Academic Affairs. These administrators provide input on matters of interest to the function and operation of their units and constituents that is then taken forward by the Provost and Vice President for Academic Affairs to the President and other vice presidents. Administrators from other units, such as the Vice President for Student Affairs, Vice President for Research and Economic Development, and the Vice President for Finance and Administration, regularly attend Deans' Council meetings to advise and inform the deans of matters and issues involving areas outside of Academic Affairs that may impact them. Additionally, administrators representing functions like Institutional Research, University Business Officers, Human Resources, Information Technology Services, Facilities Services, and University Advancement attend Deans' Council meetings as matters arise that require the deans' consultation and input.

### **Students**

Idaho State University students are represented by the Associated Students of Idaho State University (ASISU) that makes recommendations on issues that affect students (Board policy [III.P.8.](#)). According to its [constitution](#) and [bylaws](#), ASISU works to provide effective student participation and representation in all areas of campus services, programs, and activities; to participate in the improvement of educational programs, co-curricular activities, and services; and to advance the common interests and concerns of the student body. This mission is carried out primarily through the activities of the Student Senate and ASISU officers. The ASISU president, for example, is a member of the ISU president's cabinet and serves on numerous committees as the representative of student interests. Moreover, ASISU officers work closely with the Vice President for Student Affairs to advise and make recommendations regarding a broad range of topics and issues relevant to campus life, including academic, personal, ethical, cultural, social and career development, healthy lifestyles, and mental and physical wellness.

Idaho State University's outreach campuses are also governed by the ASISU constitution and bylaws, and students at these campuses enjoy the same representation and opportunity for input. Once threshold enrollment numbers are achieved, students at outreach centers are entitled to elect a local ASISU vice president and maintain a local Student Activities Board Coordinator, supported by a student committee, whose function is to coordinate with the main ASISU Students Activities Board to plan and implement meaningful and relevant programming to the local campuses.

2.A.3	The institution monitors its compliance with the Commission’s Standards for Accreditation, including the impact of collective bargaining agreements, legislative actions, and external mandates.
-------	--

**University Accreditation**

The Office of the Provost oversees the regional accreditation of the University, as guided by NWCCU. The Associate Vice President for Institutional Effectiveness oversees regional as well as specialized accreditation for the University, and is the Accreditation Liaison Officer. In 2010, in preparation for the revision of Standards and the condensed transition schedule, ISU formed the Accreditation Steering Committee, composed of representatives from across the University.

Idaho State University's Year One Self Evaluation was reviewed by a NWCCU Evaluation Panel and resulted in two recommendations. Following that, the Accreditation Steering Committee continued work on the later standards. In May 2012, ISU was notified that NWCCU would forego the University’s Year Three report and visit scheduled for Fall 2012, as well as the Year Five report in Fall 2013. Idaho State University’s Year Seven report and visit scheduled in Fall 2014 to address Standards 3, 4, and 5, was expanded to include onsite evaluation of Standards 1 and 2.

The Accreditation Steering Committee successfully addressed Standards 1 and 2, at which point a more focused group was needed to work on the remaining standards. To achieve this end the Accreditation Leadership Group (ALG) was constituted. The ALG is effectively a distillation of the Accreditation Steering Committee, as most members of the ALG came from the Steering Committee. See Appendix 3 for the membership of the Accreditation Steering Committee and Appendix 4 for the Accreditation Leadership Group. Idaho State University maintains a [webpage](#) dedicated to its accreditation status, and the university-wide accreditation status is published in the [undergraduate catalog](#).

**Collective Bargaining**

Idaho State University is not a party to any collective bargaining agreements, nor is any segment of the ISU workforce represented by a union or other collective bargaining agent.

**Legislative Actions and External Mandates**

Idaho State University monitors the external community, state, and federal environment through the Office of the Vice President for University Advancement. This office brings together units responsible for influencing public policy and opinion and strengthening the University’s reputation and the perceptions people have of it. The units and personnel most crucial for monitoring the local, state, and federal environment reside in the Office for University Advancement. They are:

**State Relations:** The Director of Government Relation is the chief representative in Boise to both the executive and legislative branches. The Director is a key member of the administrative team, advising the University’s president and vice presidents on legislative strategy and communicating to the university community about higher education issues. The University President and Vice President for University Advancement are also closely engaged in the legislative and political process.

**Regional and Community Relations:** Office of Marketing and Communications serves as a link between the University, surrounding communities, civic groups, and local government and other important groups. The Marketing and Communications Office’s mission is to build relationships, share information, and seek new opportunities that match the University’s academic capital with needs in the community.

2.A.4	The institution has a functioning governing board consisting of at least five voting members, a majority of whom have no contractual, employment, or financial interest in the institution. If the institution is governed by a hierarchical structure of multiple boards, the roles, responsibilities, and authority of each board—as they relate to the institution—are clearly defined, widely communicated, and broadly understood.
-------	---

The Board is the designated [governing body](#) for the state of Idaho for the institutions and agencies under its governance. The Idaho Constitution, [Article IX, Section 2](#), vests the Board with the general supervision of all public higher education and, as such, serves as the governing board (Board of Trustees) of Idaho State University. Thus, ISU is governed by a single board, not a hierarchical structure of multiple boards. Idaho Code [§33-3006](#), articulates the general powers of the Board of Trustees of ISU. The authority, responsibilities, and relationships among the Board, university administration, faculty, staff, and students are set forth in [Idaho Code, title 33, chapter 1](#) and Board [policy](#).

The Board consists of eight voting members (identified in Table 5), none of whom have any contractual, employment, or financial interest in the University. Seven of the members are appointed by the governor and are confirmed by the state senate for five-year terms of office. These members may be reappointed for a second five-year term (Idaho Code [§33-102](#)). The eighth member is the elected State Superintendent of Public Instruction, who serves as an *ex-officio* voting member of the Board. The officers of the Board include a president, vice president, and a secretary, who are elected to serve one-year terms (the officers may be elected to serve additional terms). The State Superintendent of Public Instruction serves as the executive secretary.

Pursuant to Idaho Code [§33-102A](#) the Office of the State Board of Education (OSBE) exists as an executive agency of the Board. The Board is authorized to appoint an executive officer of the state board. The executive director of the Board, who is appointed by and serves at the pleasure of the Board, serves as the chief executive officer of OSBE.

Although the Board is held accountable under Idaho law for ensuring its policies and procedures are followed, it does not participate in the internal management of its postsecondary institutions but instead delegates that responsibility to the university president (Board policy [I.A.2.](#)). The president exercises ultimate responsibility for governing and decision-making at the university level; promoting the effective and efficient functioning of the University; developing methods that will encourage responsible and effective contributions by parties in achieving university goals; and seeking input from constituent groups in making decisions regarding university planning and operation (Board policy [I.E.2a.](#), [I.E.2b.](#), and [III.C.1.](#)).

Table 5: Idaho State Board of Education Membership

Name	Position	Term Expires
<b>Emma Atchley</b>	President	06/30/2019
<b>Rod Lewis</b>	Vice President	06/30/2015
<b>Don Soltman</b>	Secretary	06/30/2019
<b>Richard Westerberg</b>	Member	06/30/2019
<b>Bill Goesling</b>	Member	06/30/2016
<b>Debbie Critchfield</b>	Member	06/30/2018
<b>David Hill</b>	Member	06/30/2017
<b>Tom Luna</b>	State Superintendent of Public Instruction (Ex-Officio, voting member)	Elected

2.A.5 The board acts only as a committee of the whole; no member or subcommittee of the board acts on behalf of the board except by formal delegation of authority by the governing board as a whole.

The Board acts only as a committee of the whole. [Section D](#) of the Board bylaws require that a quorum of members be present for voting in order to conduct any business. Significant policies and actions undertaken by the Board are decided upon at public meetings under the procedures described in Board policy [I.D](#). Moreover, Board policy [I.A.2](#) expressly states that members may not exercise official authority unless the Board is in session or they are acting on behalf of the Board pursuant to its direction. In addition, [Section H](#) of the Board bylaws prohibit subcommittees from taking any action, except when authority to act has been delegated by the Board.

2.A.6 The board establishes, reviews regularly, revises as necessary, and exercises broad oversight of institutional policies, including those regarding its own organization and operation.

At its regularly scheduled meetings, the Board reviews and revises, as necessary, its [Governing Policies and Procedures](#). The Office of the State Board of Education employs a Chief Policy and Planning Officer whose primary responsibility is review and oversight of the Board policy. The Chief Policy and Planning Officer works closely with OSBE’s Chief Academic Officer and Chief Fiscal Officer who are responsible for the review and maintenance of policy sections that fall under their area of responsibilities. The Board has five standing [committees](#): the Planning, Policy and Governmental Affairs Committee; the Instruction, Research and Student Affairs Committee; the Business Affairs and Human Resources Committee; the Audit Committee; and the Executive Committee. The Office of the State Board of Education’s staff work closely with Board committees to regularly review and revise the Board’s [Governing Policies and Procedures](#). The Board undertakes policy-making decisions with consideration to recommendations made by the Executive Director, the Chief Executive Officers, and other institutional or agency constituencies through committee meetings, and regularly scheduled Board meetings. The Board’s Strategic Plan (Appendix 5), Performance Measure Report (Appendix 6), and Master Planning Calendar (Appendix 7) can be found in the Appendices.

2.A.7 The board selects and evaluates regularly a chief executive officer who is accountable for the operation of the institution. It delegates authority and responsibility to the CEO to implement and administer board-approved policies related to the operation of the institution.

The Chief Executive Officer, or President, of the University is appointed by and serves at the pleasure of the Board, and has full power and responsibility for the organization, management, direction and supervision of the University, within the framework of the Board’s [Governing Policies and Procedures](#) (Board policy [I.E.2.a](#) and [I.E.2.b](#)). The President is responsible for the well-being of the University, and final decisions at the institutional level rest with the president. The Board clearly articulates in policies [I.M.5](#) and [II.C.4](#) its requirements for reporting and accountability by the presidents of the institutions. The Board evaluates the performance of the University’s President annually in May (Board policy [I.E.2.d](#)). The performance evaluation is based upon the terms of the employment agreement, the duties outlined in the policy, and mutually agreed upon goals.

2.A.8	The board regularly evaluates its performance to ensure its duties and responsibilities are fulfilled in an effective and efficient manner.
-------	---

Pursuant to Board policy, the Board’s Executive Committee develops each year a self-evaluation questionnaire tailored for use by individual Board members and the Board collectively to evaluate their own performance. This review and discussion typically takes place at the annual Board retreat every May. In addition, the Board conducts an annual self-evaluation of its policies, processes, and activities in conjunction with its annual strategic planning (Board policy [I.M.6.](#)). The self-evaluation is based on staff analysis of all institution and agency annual performance reporting and comments, and suggestions solicited from Board constituency groups and stakeholders, including the governor, the legislature, agency heads, and institution presidents. The institution and agency performance reporting assessment, input received from constituency groups, and self-evaluation questionnaire results are then discussed by the Board in conjunction with a regular or special meeting. The self-evaluation is used to further refine Board strategic goals, objectives, and strategies that will permit ongoing improvement of Board governance and oversight. The results of the Board’s self-evaluation process is shared with constituent groups with the expectation that it should influence strategic plan development. The Board’s planning and performance evaluation schedule for calendar years 2009-13 can be accessed in Board minutes, [pp. 510-512](#). Examples of annual Board review of its strategic plan can be found at Board minutes, [pp. 2-7](#), Board minutes, [pp. 39-64](#); Board minutes, [pp. 11-15](#), and Board minutes, [pp. 231-247](#).

2.A.9	The institution has an effective system of leadership, staffed by qualified administrators, with appropriate levels of responsibility and accountability, who are charged with planning, organizing, and managing the institution and assessing its achievements and effectiveness.
-------	---

Idaho State University’s system of leadership encompasses administration on both the university level and the division/college (local) levels. Administrators at each level are charged with planning, organizing, and managing their units, as well as assessing their unit’s achievements and effectiveness. In central and local administration, administrators have job responsibility and accountability that is similar to administrators in peer institutions and, therefore, appropriate by that standard.

***Institution Level***

At the university level, the President and Vice Presidents have the responsibility and accountability for planning, organizing, and assessing institutional achievements and effectiveness. Through the Board’s [Governing Policies and Procedures](#) cited in previous sections, ISU’s President is charged with ultimate responsibility for the internal management of the University. This includes final accountability for university planning and operations that will enable effective and efficient functioning, and will encourage responsible and effectual contribution and input from constituent groups in achieving university goals and institutional decision-making. The President acts in consultation with the vice presidents and is also advised by members of the President’s Cabinet. Identification of institutional units and their reporting lines to senior administration is readily accessible to university constituents and the public via an [organizational chart](#) on the Office of the President website.

Table 6: President's Cabinet

<b>Dr. Kent Tingey</b>	Vice President for University Advancement
<b>Mr. James A. Fletcher</b>	Vice President for Finance and Administration
<b>Dr. Howard Grimes</b>	Vice President for Research and Economic Development
<b>Dr. Patricia Smith Terrell</b>	Vice President for Student Affairs
<b>Dr. Laura Woodworth-Ney</b>	Provost and Vice President for Academic Affairs
<b>Randy Gaines</b>	Chief Information Officer
<b>Clayn Lambert, M.A., English Literature</b>	Faculty Senate Co-Chair, College of Technology
<b>Jenny Semenza, MLS</b>	Faculty Senate Co-Chair, Associate University Librarian
<b>Sydney Sharp</b>	President, Staff Council
<b>Kyle Son</b>	ASISU President
<b>Mr. Jeff Tingey</b>	Athletic Director
<b>Larry W. Satterwhite</b>	Alumni Board President 2013-2015
<b>Stacey Gibson</b>	Director of Equal Opportunity

**Local Level**

At the division and college levels the deans and directors are charged with the responsibility and accountability for planning, organization, management, and assessment of their respective units. With this approach administrators nearest to the units, and directly involved with their operations, are responsible and accountable for planning, organization, management, and assessment of their units. The deans are also advised and assisted in their colleges and units by executive committees comprised of faculty and administrators. Identification of institutional units and their reporting lines to senior administration is readily accessible to university constituents and the public via an organizational chart on the various websites and in the attached Appendix 8.

2.A.10 The institution employs an appropriately qualified chief executive officer with full-time responsibility to the institution. The chief executive officer may serve as an ex officio member of the governing board, but may not serve as its chair.

The Chief Executive Officer is held accountable to the Board for performing the following duties within his or her designated areas of responsibility:

1. Relations with the Board
  - Conduct of the University in accordance with the [Governing Policies and Procedures](#) of the Board and applicable state and federal laws.
  - Effective communication between the Board, the Board office, and the University.
  - Preparation of such budgets as may be necessary for proper reporting and planning.
  - Transmittal of recommendations initiated within the University to the Board.
  - Participation and cooperation with the Board office in the development, coordination, and implementation of policies, programs, and all other matters of statewide concern.
  - Notification to the Board President or Executive Director of any out-of-state absence exceeding one week.

## 2. Leadership of the University

- Recruitment and retention of employees.
- Development of programs, in accordance with an evolving plan for the University.
- In cooperation with appropriate parties, the promotion of the effective and efficient functioning of the University.
- Development of methods that will encourage responsible and effective contributions by various parties associated with the University in the achievement of the goals of the University.

## 3. Relations with the Public

- Development of rapport between the University and the public.
- Official representation of the University and its Board-approved role and mission to the public.

Arthur C. Vailas, Ph.D., became the 12th president of ISU on July 1, 2006. In this position Dr. Vailas serves as the Chief Executive Officer and President of the faculty and has full-time responsibility for management of the University. Dr. Vailas has extensive successful and productive experience in higher education as a faculty member, researcher, and administrator. Before joining ISU, Dr. Vailas was Vice President for Research and Intellectual Property management for the University of Houston, and Vice Chancellor for Research for the University of Houston System, where he acted as an advisor to the Texas governor on energy, helped establish the Research Partnership to Secure Energy for America, and developed a formal affiliation between the University of Houston and the Texas Medical Center. He served on the NASA national advisory council and was on the executive board of the Southeastern Universities Research Association. Earlier, he held faculty and leadership positions at the University of Wisconsin-Madison and University of California-Los Angeles.

An accomplished biomedical researcher, President Vailas has authored numerous peer-reviewed scientific publications, awarded national grants and honors, and has held leadership positions on national boards and scientific committees. He earned his Ph.D. at the University of Iowa, where he also completed a three-year National Institutes of Health postdoctoral fellowship in biochemistry and a research fellowship in the Department of Orthopedic Surgery of the University of Iowa College of Medicine.

Dr. Vailas's academic qualifications fit appropriately with achieving ISU's mission and core themes. His accomplishments and experience in research and medicine are particularly valuable given ISU's Carnegie classification as a doctoral research high institution; its mission to provide statewide leadership in the health sciences; its core themes of learning and discovery (embracing a rigorous research agenda); and its leadership in the health sciences (anticipating continued prominence and growth in this area).

2.A.11	The institution employs a sufficient number of qualified administrators who provide effective leadership and management for the institution’s major support and operational functions and work collaboratively across institutional functions and units to foster fulfillment of the institution’s mission and accomplishment of its core theme objectives.
--------	---

It is the policy of the University to attract and retain qualified individuals to serve in administrative leadership positions, both academic and nonacademic. Administrative leadership positions are not tenured, and the President reserves the right to appoint, continue, or terminate any administrator. The University conducts annual reviews to assess the recent accomplishments of administrators, and to address past, present, and future goals of the individual and the unit. Administrative leadership and management for ISU’s major support and operational functions occur in a variety of units, both academic and nonacademic, across the University, divisions, and colleges.

On the academic side and in addition to the colleges, there are a number of support units, schools, research centers, institutes, and clinics critical to ISU’s mission fulfillment that are managed and led by administrative directors who work collaboratively with the President and the Provost and Vice President for Academic Affairs to foster mission fulfillment and accomplishment of core theme objectives.

***Office of the Provost***

The Provost and Vice President for Academic Affairs is the Chief Academic Officer of the University. The Provost and Vice President for Academic Affairs oversees the annual budget process for academic affairs, represents the University both to internal and external constituencies, and directs major university-wide initiatives. Dr. Laura Woodworth-Ney was selected and named the Provost and Vice President for Academic Affairs June 2013 after a national search was conducted. Dr. Woodworth-Ney previously served as Associate Vice President for Academic Affairs at ISU where she was responsible for Curriculum Management and Academic Program Development, served as the ISU liaison to the Board, and had oversight of the Office of the Registrar, Early College Program, and the ISU-Twin Falls Outreach Center. Dr. Woodworth-Ney held previous administrative appointments that included chair of the Department of History and co-director of the Women Studies program. She also served on the ISU Faculty Senate, both as a senator and as an elected member of the Faculty Senate Executive Committee. The Provost and Vice President for Academic Affairs is assisted by two Vice Provosts and three Associate Vice Presidents. The University’s academic deans report to the Provost.

***Vice Presidents***

Including the Provost, there are five vice presidents with responsibilities in the following areas: finance and administration, student affairs, research and economic development, and university advancement. Resumes are included in Appendix 9. The vice presidents in their respective areas provide effective leadership and management for major support and operational functions. These areas of function include the following:

*Academic Affairs:* Office of the Registrar, Institutional Research, Student Success Center (Disability Services, Central Academic Advising, Native American Student Services, TRiO, University Tutoring, and Honors Program), Admissions & Recruiting, Scholarships, Early College Program, Idaho Museum of Natural History, Office of International Programs, Graduate School, University Library, Campus Outreach Directors

*Finance and Administration:* University Business Officers, Budget Office, Controllers Office, Human Resources, Purchasing Services, Student Financial Services, Financial Aid, Facilities Services, EO/Affirmative Action and Diversity, and Information Technology Services.

*Student Affairs:* University Housing and Residence Life, New Student and Parent Services, Counseling and Testing, the Career Center, Student Life and Student Conduct, Student Health Services, Veteran Services, Student Unions, student leadership and community service, student clubs and organizations, Campus Recreation and Associated Students of ISU.

*Research and Economic Development:* Research Development, Research Compliance, Sponsored Programs, Contracts, federal legislative initiatives, business outreach, management of institutional intellectual property, technology transfer, and promotion of new start-ups from ISU technologies.

*University Advancement:* Alumni Relations, Event Management, Government Relations, and Marketing and Communications.

**Deans**

There are five deans representing five colleges and a Vice Provost/Executive Dean representing the Division of Health Sciences. They are assisted by Associate Deans. The deans meet weekly with the Provost and Vice President for Academic Affairs through the Deans’ Council. The Deans’ Council is comprised of the Provost and Vice President for Academic Affairs, the Vice Provost, and Associate Vice Presidents for Academic Affairs. It is also comprised of the college deans, Vice Provost/Executive Dean for Division of Health Services along with the deans that report to the division—Dean of Pharmacy and Dean for the School of Nursing. It includes the Associate Vice President for ISU Meridian Health Science Center, Graduate School Dean, University Librarian, Executive Director for the Student Success Center, and the Director of the Idaho Museum of Natural History. The Vice President for Student Affairs also participates in the Council meeting. The group helps fulfil the mission of the Office of Academic Affairs to provide leadership, support, and advocacy to the colleges and other academic units to ensure quality and innovation in institutional planning and effectiveness, academic programming at all levels, faculty research and creative endeavors, enrollment management, and outreach activities throughout the state. An Associate Dean’s Council was created by Academic Affairs and the Deans’ Council in Spring 2014, comprised of the associate and/or assistant deans, chaired by the Vice Provost. The Associate Deans Council meets once a month, every second or third week, during the academic year.

<i>Academics</i>	
2.A.12	Academic policies—including those related to teaching, service, scholarship, research, and artistic creation—are clearly communicated to students and faculty and to administrators and staff with responsibilities related to these areas.

Academic policies related to teaching, service, scholarship, research, and artistic creation are disseminated in various ways to campus constituents.

*The Office of Academic Affairs:* The Office of Academic Affairs publishes information on its website concerning [policies](#) governing faculty workload, tenure and promotion, annual evaluation, and five-year

periodic performance review. In addition, academic policies are included in faculty development events presented annually by the Office of Academic Affairs, like the new faculty orientation and the promotion and tenure workshop. Related to these areas, policies are made available to campus constituents addressing academic planning, assessment, and program review.

*The Office for Research and Economic Development:* The Office for Research and Economic Development (ORED) and its three divisions—Division for Research Development, Division for Research Integrity, and Division for Innovation—offer extensive [online resources](#) pertaining to the federal, state, and institutional policies and procedures that govern academic research. Examples of areas covered include: finding and applying for external funds, accepting awards, animal care and use, biosafety, human subjects, technical and radiation safety, responsible and ethical research practices, technology transfer, export controls, conflict of interest, and intellectual property. Information is also available for administrators and staff who monitor and assist with research grants and contracts administration, purchasing, personnel, and other critical areas. Periodic announcements from the pertinent division are made to keep faculty and staff informed of new policies and changes to existing ones. Executive directors of each division communicate with faculty and staff on a regular basis to keep all informed of policies and the implementation of those policies.

*The Colleges:* In addition to institution level policies, colleges are able to develop complementary policies and processes that address faculty workload, tenure and promotion, annual evaluation, and periodic performance review at the college level. Faculty and staff learn about institution and college level policies and processes related to their job responsibilities at the time of hire, during new faculty and staff orientations, and periodically thereafter in individual, program, department, and college-wide meetings. Offers of employment to faculty outline expectations for workload that incorporate institution and college level policies. Students are given information about academic policies that affect them through the following means: verbally and in writing, face-to-face and online, in undergraduate and graduate catalogs, during new student orientation, in course syllabi, through department/program information for majors, and in individual advising.

*Human Resources:* As part of the hiring process, faculty and staff are required to participate in new employee orientation. Information about academic policies is included as part of this orientation.

*Idaho State University Policies and Procedures:* This online resource contains the [policies](#) related to teaching, service, scholarship, research, and artistic creation. For example, specific policies address [workload](#), [personnel](#), [intellectual property](#), and [conflict of interest](#) (Part 4, Section I-J), [misconduct in research and scholarship](#) (Part IV, Section 4-H), and [research practices](#) (Part IV, Section 4-I). The process for proposing and adopting new and revising existing policies at ISU is addressed in [Policy Development and Administration](#).

*Academic catalogs:* The [undergraduate and graduate catalogs](#) include sections on university policies related to teaching, general academic information pertaining to undergraduate or graduate education at ISU, research, scholarship/fellowship, and curricular opportunities.

2.A.13	Policies regarding access to and use of library and information resources—regardless of format, location, and delivery method—are documented, published, and enforced.
--------	--

The University Library, central Information Technology Services (ITS), and individual colleges have established policies regarding access to and use of library and information resources. The website of the Eli M. Oboler Library includes [policies](#) governing access to and use of information resources, format, location, access, borrowing privileges, and other key areas. These policies are enforced through imposition of [penalties](#) depending on the type and severity of the violation, including fines, suspension of library privileges, and eviction from library premises. ITS provides, current state of the art and secure, networking, computing, communications, instructional technologies, information systems access, and support for faculty, staff, and students. The ITS policies can be found on the Finance and Administration section of the ISU Policies and Procedures [website](#).

2.A.14	The institution develops, publishes widely, and follows an effective and clearly stated transfer-of-credit policy that maintains the integrity of its programs while facilitating efficient mobility of students between institutions in completing their educational programs.
--------	---

Idaho State University has developed clear policies governing transfer of credit that effectively maintain program integrity and facilitate student mobility. These policies are published in several sources: the [Office of Admissions](#) website, the [Office of the Registrar](#) website, and in the [academic catalogs](#). The University's transfer of credit policy is also subject to, and incorporates, Board policy [III.V](#).

<i>Students</i>	
-----------------	--

2.A.15	Policies and procedures regarding students' rights and responsibilities—including academic honesty, appeals, grievances, and accommodations for persons with disabilities—are clearly stated, readily available, and administered in a fair and consistent manner.
--------	--

Student rights and responsibilities, and the policies and procedures governing them, are set forth in many varied sources, notably the [ISU Student Handbook](#) (attached in Appendix 10). By widely disseminating this information via different media, ISU intends to ensure that student rights and responsibilities and related policies and procedures are clearly understood by the campus community, and that information needed to exercise and enforce them is readily available. Critical areas like academic integrity, appeals, grievances, and accommodations for persons with disabilities are addressed online (available in alternate format upon request) in the [ISU Student Handbook](#), which contains the Student Conduct Code, various [ISU Policies and Procedures](#), academic catalogs, student handbooks for individual colleges and programs, and the [Disability Resources Center](#) website. Information and advising about policies and procedures governing student rights and responsibilities are provided to students through fall and spring orientation, in face-to-face meetings, by email and telephone, and via other direct contact with faculty, staff, and administrators in the colleges. Information is additionally provided by staff in the Office of the Registrar, with advisors and counselors in the Office of Student Affairs and the Student Success Center, and in units such as the Veterans Sanctuary, Disability Resources Center, and Central Academic Advising.

Fair and consistent administration of the policies and procedures governing student rights and responsibilities is achieved through diligent oversight of policy development and implementation, adherence to process, and committed support of students. All major functional areas of the University share this duty, because all areas are responsible for specific policies and processes affecting students.

Certain student rights such as appeals in defined circumstances are implemented by standing ad hoc boards that involve a cross-section of constituents from the University community. Examples include the University Student Conduct Board, Scholastic Appeals Board, Academic Dishonesty Board, and Graduate Council. Membership on the Student Conduct Board includes faculty, staff, and students. The Student Conduct Board considers significant infractions of the Student Conduct Code and has the authority to impose university-level penalties up to and including suspension or expulsion for infractions. The Academic Dishonesty Board also has the authority to impose university-level penalties of suspension or expulsion for academic dishonesty, and is composed of three faculty members, three students (one of which is the ASISU Vice President), and an ex-officio staff member from the Office of Student Affairs. These standing boards, which typically provide for staggered terms of service, offer diverse constituent perspectives and provide a continuity of process and precedent that enables fair and consistent administration of student policies. The [Student Grievance Policy](#) provides redress to students for academic and non-academic grievances that is consistent with the Board policy [III.P.](#)

2.A.16	The institution adopts and adheres to admission and placement policies that guide the enrollment of students in courses and programs through an evaluation of prerequisite knowledge, skills, and abilities to assure a reasonable probability of student success at a level commensurate with the institution's expectations. Its policy regarding continuation in and termination from its educational programs—including its appeals process and readmission policy—are clearly defined, widely published, and administered in a fair and timely manner.
--------	---

Admissions are handled through the [Office of Undergraduate Admissions](#) (for undergraduate admissions), the [Graduate School](#) (for graduate admissions), the [International Programs Office](#) (assisting both undergraduate and graduate admissions), and the [College of Technology Student Services](#). These offices are adequately staffed with qualified employees who receive training to implement the requirements of ISU's admission and placement policies.

Policies and requirements regarding admission are located in the [undergraduate catalog](#) and on the Office of Undergraduate Admissions website for undergraduate admission, on the [International Programs Office](#) for undergraduate international students, and in the [graduate catalog](#) and Graduate School website for graduate admission. Because many programs' admission requirements vary, in particular in the Division of Health Sciences, students seeking admission into many programs are referred to the respective colleges and schools and the Graduate School. Students seeking admission into a professional-technical program are referred to the [College of Technology](#). Information for professional-technical admission is in the undergraduate catalog and online. Idaho State University's admissions standards were approved by faculty governance bodies (the Faculty Senate and its former Academic Standards Council for undergraduates, and the Graduate Council for graduate admissions) and are administered by the admissions staff at both the undergraduate and graduate level.

Idaho State University has defined different application processes and requirements for different types of students: new freshman, transfer students, former students, international students, professional-technical students, and graduate students. With regard to undergraduate standing, a student is assured admission if he or she can meet thresholds set for GPA and standardized test scores. Conditional admission is available to students who satisfy adjusted thresholds in these areas. These admissions requirements are based on Board policy [III.Q](#), and establish minimum core and credit requirements for undergraduate academic admission and professional-technical admission.

Graduate School admission processes and requirements are listed in the [graduate catalog](#) and include recommendation for admission by the department or college offering the desired degree program. Individual department requirements are listed in the graduate catalog and online on department and college websites.

To assure a reasonable probability of student success, prerequisite knowledge, skills, and abilities are assessed prior to enrollment through the ACT, SAT, or COMPASS tests for domestic undergraduates and COMPASS for international undergraduates. These test scores are used to place students in initial courses in English and mathematics. Course placement is communicated through the catalog, the student portal from the Banner ERP, and academic advisors.

Policies regarding continuation and termination from ISU programs, including probation, program dismissal, and related appeals, are published in print and online in a variety of locations. Primary resources include [ISU Policies and Procedures](#), the [ISU Student Handbook](#), [undergraduate and graduate catalogs](#), and the [Office of the Registrar's](#) website. Additionally, information about policies concerning probation and dismissal from particular programs can be found in student handbooks for individual colleges and programs and in course syllabi. Academic probation, program dismissal, and related appeals are handled through processes on the department and college levels and on the administrative level in units like the Office of the Registrar and the Office of Academic Affairs. Clear criteria governing probation and program dismissal and mandatory timelines for initiating and determining appeals enable fair and timely administration of the policies.

2.A.17	The institution maintains and publishes policies that clearly state its relationship to co-curricular activities and the roles and responsibilities of students and the institution for those activities, including student publications and other student media, if offered.
--------	---

Various University policies, including the [ISU Student Handbook](#), define the relationship of the University to co-curricular activities and delineate the respective roles and responsibilities for those activities. These policies govern the [ASISU](#), [student clubs and organizations](#), the [Student Media Board](#) (formerly the Communications Board), and related activities (e.g., sponsoring events and guest speakers, promoting entertainment, distributing posters and banners, etc.). Idaho State University's mission to help students develop into good citizens and leaders in a global society and the intent of Core Theme Two to provide access and opportunity for students to reach their potential, create a strong platform for co-curricular programming at ISU. This includes funding and support for special programs and initiatives, such as the Veterans Sanctuary, an academic minor in Leadership, the Outdoor Adventure Center, and The Rendezvous living learning community. These programs are under the supervision of the Division of

Student Affairs and are governed by the policies established by the University and the roles and responsibilities assigned by the Vice President for Student Affairs.

There are over 160 academic, cultural, honorary, Greek, religious, service and philanthropy, sports, and special student clubs and organizations founded and led by students. These co-curricular organizations are within the jurisdiction of ASISU under the Division of Student Affairs. Each organization is registered through a process administered by ASISU and are governed by guidelines set forth in the [Organization Manual](#). To be registered, ISU organizations must have a Constitution and are required to follow policies and guidelines outlined in the [ISU Student Handbook](#).

#### *Human Resources*

2.A.18 || The institution maintains and publishes its human resources policies and procedures and regularly reviews them to ensure they are consistent, fair, and equitably applied to its employees and students.

The Board is designated by the Idaho Constitution and Idaho Code as the employer for ISU. Employment conditions and terms of appointment at the University are subject to a contract of employment, Board policy and related rules, [ISU Policies and Procedures](#), and related policies of its offices and departments. Copies of Board policy [Section II](#) are on file in the ISU Office of Human Resources and on the Board website. [Classified employees](#) at the institutions are part of the Idaho Classified Personnel System and are subject to the [Administrative Rules](#) of the Idaho Division of Human Resources.

The ISU Policies and Procedures website is the official repository for all university-wide policies and procedures. Under [ISU Policies and Procedures](#), major functional areas are defined and the responsible executives within each area are identified. The responsible executives, which include the President, Provost, Vice Presidents, and senior Directors, are accountable for initiating and maintaining their area policies in the ISU Policies and Procedures. This includes annual review with updates where indicated. Human Resources is one of nine major functional areas under the purview of the Director of Human Resources. The annual review includes evaluation of a particular policy's utility and fairness in application, its continued relevance, and any need for update. Policies and procedures are uniformly structured in ISU Policies and Procedures format, in consultation with the [Office of General Counsel](#), to aid in interpreting and applying them. This facilitates consistent, fair, and equitable application of policies.

2.A.19 || Employees are apprised of their conditions of employment, work assignments, rights and responsibilities, and criteria and procedures for evaluation, retention, promotion, and termination.

Information about the conditions, rights and responsibilities of employment at ISU is available to the public through ISU's [Office of Human Resources](#) website. Prospective employees learn about specific positions through [job notices](#) published on the Human Resources website and other media during the application process and, if the applicant is a finalist, in the interview process with a search committee and the hiring authority. Employment information is widely disseminated and readily accessible to employees. Examples of resources include [ISU Policies and Procedures](#) available online, the Office of Human

Resources staff and its [website](#), the Office of Academic Affairs and its [website](#), college administrative units, written offers of employment, employment contracts, new employee orientations, and academic policies regarding [workload](#), [promotion](#), [tenure](#), [periodic performance review](#), [termination](#), and appeal and grievance rights and processes for [faculty](#), [non-classified staff](#), and [classified staff](#). Idaho State University's Office of Human Resources is responsible for providing employment related information, resources, and assistance for all categories of employees regarding rights and responsibilities in the workplace. This includes publication of criteria, qualifications, and procedures for selection of personnel and, once an employee is hired, the criteria and procedures for evaluation, retention, promotion, and termination. Human Resources also administers the implementation of employment-related policies, including grievance and appeal procedures. Human Resources sponsors regular new employee orientations, as well as participating in new faculty orientations conducted by the Office of Academic Affairs.

In addition to resources provided by Human Resources, faculty employees receive information about conditions of employment, workload, rights and responsibilities, and criteria and procedures for evaluation, promotion, tenure, and periodic performance review from their college and department and from the Office of Academic Affairs. The information is disseminated as part of new faculty orientation at the time of hire, the colleges' annual evaluation process, departmental and college meetings, individual meetings with deans and department chairs and faculty development workshops on promotion and tenure.

All ISU employees are evaluated annually according to the procedures set forth in ISU Policies and Procedures (Part 4, Section IV-B). In addition, Board policy requires annual evaluation of institutional employees, including [classified \(IDAPA 15.04.01.210.05\)](#), [non-classified](#), and [faculty](#). Job descriptions are included with the annual evaluations of classified and non-classified employees and are reviewed to ensure they accurately reflect duties, responsibilities, and authority of the position. The Office of Human Resources is currently managing the implementation of a comprehensive Talent Management Suite through Ellucian, a leading human resources software company for higher education that will be used to strengthen hiring processes and provide applicants easy online access to critical information about available positions and application processes, including job announcements and the terms, conditions, and benefits of employment at ISU. Additionally, the Talent Management Suite will provide an integrated IT solution for managing the employee performance appraisal process and employee learning and professional development objectives. The Ellucian Talent Management Suite will enhance the existing human resources information system modules in the Banner ERP system that is used to better gather and manage employment and employee data. This means more information can be generated in a shorter turn-around time for responding to the information needs of employees and supervisors, and for developing and administering employment policies.

An employment-related tool used by the Office of Academic Affairs is Digital Measures: [Activity Insight](#). This web-hosted service provides an online platform for faculty to enter and regularly update workload and other job performance metrics. Workload units are allocated among teaching, research/scholarly activities, and service. Major-related accomplishments are also noted. This information can then be used to generate reports for use in promotion, tenure, annual evaluations, and periodic performance reviews. The ability of faculty to access Activity Insight and input critical workload and performance information has significant impact beyond mere data collection. The communication among faculty and with administration that results from reports based on Activity Insight data increases and reinforces faculty

members' knowledge and awareness of the conditions of their employment, work assignments, rights and responsibilities, and the criteria and procedures used for evaluation, promotion, tenure, and termination.

2.A.20	The institution ensures the security and appropriate confidentiality of human resources records.
--------	--

Under Idaho law [§9-340C](#), Board policy [II.P.](#), and [ISU Policies and Procedures](#), certain information in personnel files is protected from disclosure such as: the employee's sex, race, marital status, date of birth, home address and telephone number, applications, testing and scoring materials, grievances, correspondence and performance evaluations. Other personnel information is not deemed confidential and may be disclosed such as: the employee's public service or employment history, classification, pay grade, longevity, gross salary and salary history, status, workplace and employing entity. Idaho State University ensures compliance with the law through implementation of its policy. Third parties are not given access to personnel records or any information from the files, other than what is required by statute.

Personnel records are stored in the Office of Human Resources in a fireproofed file room that is locked at all times. Human resource files and records are only accessible by the Human Resource Director, Associate Director, and Administrative Assistant, who have keys to the file room. An individual employee, and those in the employee's supervisory chain, are able to request and obtain access to the employee's personnel records. Others with a legitimate business reason may access information that comes within the scope of that reason.

Health insurance information is also stored in the Human Resources file and records room. These records are stored in separate fireproof and locked file cabinets on the opposite side of the room from personnel records. The only persons authorized to access this information are the employee and certain personnel from the human resources and payroll departments.

<i>Institutional Integrity</i>	
2.A.21	The institution represents itself clearly, accurately, and consistently through its announcements, statements, and publications. It communicates its academic intentions, programs, and services to students and to the public and demonstrates that its academic programs can be completed in a timely fashion. It regularly reviews its publications to assure integrity in all representations about its mission, programs, and services.

Communications about the University for general information and specific promotional purposes are within the purview of the Marketing and Communications unit that reports to the Vice President for University Advancement. Idaho State University and its units send out thousands of brochures, postcards, posters, letters, news releases, magazines, and other printed informational and promotional materials each year. These materials are an important part of the University's efforts to inform students and the public about the University. The University is currently finalizing a campus-wide strategic marketing plan that outlines the overall messaging strategy and brand attributes. The plan includes ongoing data analysis and market research enabling ISU to refine the plan as needed to ensure the greatest return on investment.

To ensure clear and consistent visual representation of the brand, graphic identity standards have been adopted for use by the University community. This includes the use of logos, colors, fonts, and graphic styles to create a recognizable and consistent image of the University. As part of a mandatory process, a Marketing Materials Approval Committee meets weekly and reviews and approves all materials used for marketing and promotional purposes. Communication tools which must receive approval from the Marketing Materials Committee include not only print publications, but also the variety of other communications disseminated on web and other social media platforms. The University provides to all units a series of approved templates which are used to brand and market the University and its units. Communications to faculty, staff, students, legislators, donors, alumni, friends, other political officers, and the general public are required to use standardized and University approved communication templates. These items are approved at the college level prior to being submitted to the committee. All committee meetings, as well as a checklist is available on the [website](#) to guide development of the communication prior to submission.

The ISU website and home page are developed and maintained by the Office of Web Communications within Marketing and Communications. Units may contract with Web Communications for unit websites. Idaho State University is in the process of purchasing a content management system (CMS). The CMS will enable the University and its units to more efficiently and effectively manage their online presence. All campus units will be required to utilize web templates within the CMS that will provide stronger brand recognition and ease of use. The content management system will allow the University to be even stronger in its communications efforts via electronic platforms. The new system will assist in several domains, including recruitment of students, communicating with parents, cultivating, soliciting and stewarding donors, providing news and accomplishments about ISU to all of the unique constituents of the University, as well as the public at large. Communication efforts have also been expanded and improved in communicating with the advisory boards of academic and non-academic units at the University, including both the Alumni and Foundation Boards of Directors. These two boards are instrumental in helping the University to achieve its strategic objectives by communicating with alumni, friends, legislators, and other donors and opinion leaders important to ISU.

Idaho State University communicates to students and the public regarding its academic intentions, programs, and services through various media—print, internet, television, radio, and social media. A central communications calendar, including all varieties of media, is currently being developed based on the strategic marketing plan. The University is continually seeking innovative and cost-efficient communications avenues strategically targeting constituents such as prospective students, current students, faculty and staff, alumni, donors and friends. These include various social media initiatives on the University's main channels: Twitter, Facebook, Instagram and YouTube. The University has implemented and been very successful using social media platforms to communicate with its various publics. Recently, the University won a national award for a campaign called "Ultimate Bengal" to engage students, prospective students, parents, and the general public in "liking" Idaho State University. The campaign was a first-of-its-kind among universities and has garnered national attention and awards. These means, as well as the regular use of focus groups, are also used to generate feedback and input from the University's various constituencies. Social media has provided a strong opportunity to augment feedback to the institution from those it serves. In addition to meetings, it is also used to solicit input from ISU's various advisory boards, as well as the Alumni and Foundation Boards of Directors.

There are a variety of publications used to communicate the University's messages as a whole, and which are also used to receive input. Those publications include the University Magazine which goes out in the fall and spring to all alumni and friends, for a total of roughly 80,000 distributed. The University Magazine has a number of stories on University research, accomplishments and University information, but it also solicits feedback from readers. An Annual Report of the President goes out early in the year during the legislative session. This publication also has strategically written stories designed to educate key leaders on the progress of the University. It includes the financials of the University, as well.

2.A.22	The institution advocates, subscribes to, and exemplifies high ethical standards in managing and operating the institution, including its dealings with the public, the Commission, and external organizations, and in the fair and equitable treatment of students, faculty, administrators, staff, and other constituencies. It ensures complaints and grievances are addressed in a fair and timely manner.
--------	--

Idaho State University's commitment to high ethical standards and practices in managing and operating the University is evident in policies and procedures that cover a wide spectrum of institutional constituencies and functions. Examples include a [statement on faculty ethics](#); [the obligation of faculty and staff](#) to comply with the Board's Conflict of Interest and Ethical Conduct policy [II.Q](#); the University's obligation to comply with Board policy with regard to [intellectual property](#); [ethical research practices](#); [misconduct in research](#) and scholarship; the ethical use and care of [animals in research](#); ethical use of [Information Technology](#) services; procedures enforcing ISU's ethical and legal obligations to maintain the security of information in its Information Technology system; [purchasing procedures](#) made subject to Board policy; ISU Foundation's [payment of professional fees on gifts](#) subject to professional ethical guidelines; disclosure of protected [patient information](#) under HIPAA in prescribed circumstances consistent with ethical standards; use of [human subjects in research](#) subject to ethical considerations like confidentiality and anonymity; the University's responsibility to ensure that students participating in [ISU student media](#) understand and comport with the ethical obligation to communicate responsibly and behave professionally; the [Student Media Board's responsibility](#), as publisher of student media, to the university community and the general public for ethical content, reporting, and media management and the Division of Student Affairs Principles of Ethical Standards which establish guidelines for working with and supporting students.

Idaho State University is also committed to the fair and equitable treatment of students, faculty, administrators, and staff. The [Office of Equal Opportunity/Affirmative Action and Diversity](#) keeps the campus community informed of federal and state law guaranteeing fair, equitable, and nondiscriminatory treatment and provides assistance to individuals who bring forward issues. Idaho State University employees and students are protected from [discrimination](#) based on race, color, religion, sex, national origin, disability, and age, and are provided work and classroom environments free from [sexual harassment and retaliation](#) for asserting their legal rights. Board policy mandates these same protections.

Evidence of ISU's commitment to fair and equitable treatment is also found in policies and procedures that allow employees and students to complain and seek remedy concerning institutional decisions. These grievance procedures are formal, such as in the case of internal grievance procedures set forth in the [ISU Policies and Procedures](#) and the [ISU Student Handbook](#). Processes also exist for campus constituents to file complaints or concerns about the actions of others (see for example the Office of Equal

Opportunity/Affirmative Action and Diversity [procedures](#) and Division of Student Affairs [Support Network](#)). The [Internal Audit Office](#) at ISU offers another avenue for addressing employee and student concerns. It is an independent organization that reports functionally to the Board and administratively to the ISU president. Internal Audit investigates allegations (including those made anonymously) of misconduct related to fraud, waste and abuse of university resources, conflicts of interest and non-compliance with policy and law.

Clearly stated policies and procedures and mandatory timelines for initiating and determining grievances and appeals help ensure that complaints and grievances are addressed in a fair and timely manner.

2.A.23	The institution adheres to a clearly defined policy that prohibits conflict of interest on the part of members of the governing board, administration, faculty, and staff. Even when supported by or affiliated with social, political, corporate, or religious organizations, the institution has education as its primary purpose and operates as an academic institution with appropriate autonomy. If it requires its constituencies to conform to specific codes of conduct or seeks to instill specific beliefs or world views, it gives clear prior notice of such codes and/or policies in its publications.
--------	--

Throughout its policies and procedures, ISU references conflict of interest in various contexts, and depending on the type of conflict, either prohibits it or mandates that it be disclosed and managed according to policy requirements. Moreover, [ISU policy](#) states that faculty and staff are subject to Board policy [II.Q.](#), Conflict of Interest and Ethical Conduct. Other sections of Board policy ([I.G.](#) and [III.B.3.](#)) reference a clear obligation owed by Board and institutional employees to avoid conflicts of interest and to refrain from using institutional resources for interests or activities outside the scope of their employment. Within this construct, ISU recognizes that interactions, partnerships, and collaborations with other institutions, companies, and non-governmental organizations has an intrinsic value in building the University.

Idaho State University has an ongoing policy review process. As part of that process has pending proposed changes that include a [policy](#) specifically addressing conflict of interest. The draft policy is currently under review and will be formalized once faculty have had the opportunity to provide input upon their return in the fall.

Idaho State University does not require constituencies to conform to specific codes of conduct or seek to instill specific beliefs or world views.

2.A.24	The institution maintains clearly defined policies with respect to ownership, copyright, control, compensation, and revenue derived from the creation and production of intellectual property.
--------	--

Idaho State University has in place a comprehensive set of policies governing intellectual property that address ownership and transactional aspects that are derived from the creation and protection of intellectual property. These policies conform to intellectual property policies adopted by the Board and made applicable to the state's postsecondary institutions. Idaho State University's intellectual property policies also expressly incorporate the Board's conflict of interest and disclosure rules pertaining to all

transactions involving intellectual property. Idaho State University intellectual property policies are published on the University's [website](#) under ISU Policies and Procedures. Pertinent state policies can be found on the Board's [website](#).

The ISU Office of Research is sponsoring a revision of the University's intellectual property policies to align them with the policies outlined by the Board. The Vice Presidents for Research and Economic Development and Technology Transfer Officers from the state higher education institutions are working together to develop more uniform policies in this area. The intent is to empower the universities with the tools and policies needed to advance technologies from the laboratory to the marketplace.

The Office for Research and Economic Development at ISU encourages and assists in the development and protection of intellectual property developed by Idaho State University faculty, staff and students. The office promotes the transfer of technology in an effort to provide benefit and support to the University's academic mission, to enhance the urban and state economy, and to provide to the general public access to Idaho State's intellectual property in a manner that is consistent with the University's academic principles. The office has the additional mission to identify, develop and establish relationships with business, industry and trade groups (preferable in Idaho, but not limited thereto) for joint programs of mutually beneficial economic impact to both parties and the state of Idaho.

2.A.25	The institution accurately represents its current accreditation status and avoids speculation on future accreditation actions or status. It uses the terms "Accreditation" and "Candidacy" (and related terms) only when such status is conferred by an accrediting agency recognized by the U.S. Department of Education.
--------	--

Idaho State University accurately represents that it is presently accredited by its regional accrediting body, the NWCCU, and by other specialized accrediting entities recognized by the Council of Higher Education Accreditation (CHEA) and the U.S. Department of Education that accredit or approve individual programs offered at ISU. Statements that ISU is accredited by the NWCCU and by specifically named accrediting entities appear in ISU's [undergraduate](#) and [graduate catalog](#), on the [Office of the Provost](#) website, and in the printed and electronic material of specially accredited programs.

2.A.26	If the institution enters into contractual agreements with external entities for products or services performed on its behalf, the scope of work for those products or services—with clearly defined roles and responsibilities—is stipulated in a written and approved agreement that contains provisions to maintain the integrity of the institution. In such cases, the institution ensures the scope of the agreement is consistent with the mission and goals of the institution, adheres to institutional policies and procedures, and complies with the Commission's Standards for Accreditation.
--------	---

Contractual agreements between ISU and external entities for products or services are circulated for review and approval according to defined, published procedures using required forms to document that proper processes have been followed. Many of these procedures and forms can be accessed at the [ISU Purchasing Services](#) website, including a list of [criteria](#) to ensure the propriety of expenditures. In addition, there are university-wide policies governing [formation and administration](#) of contracts between

the University and external entities, and other internal processes related to [contract purchases](#). The subject matter of a particular agreement will determine which parties are included in the review and approval process. Agreements related to educational services, for example, will be reviewed by the impacted academic units (e.g., individual programs, departments, and colleges), by the responsible administrative unit (e.g., the Office of Academic Affairs, the Office of Research and Economic Development, or the Office of Sponsored Programs), by the Office of the General Counsel, and ultimately by the Office of the President. Each level of review is intended to ensure the agreement is consistent with ISU's mission and goals, complies with the Board and institutional policies and procedures, and conforms to NWCCU standards for accreditation.

<i>Academic Freedom</i>	
2.A.27	The institution publishes and adheres to policies, approved by its governing board, regarding academic freedom and responsibility that protect its constituencies from inappropriate internal and external influences, pressures, and harassment.
2.A.28	Within the context of its mission, core themes, and values, the institution defines and actively promotes an environment that supports independent thought in the pursuit and dissemination of knowledge. It affirms the freedom of faculty, staff, administrators, and students to share their scholarship and reasoned conclusions with others. While the institution and individuals within the institution may hold to a particular personal, social, or religious philosophy, its constituencies are intellectually free to examine thought, reason, and perspectives of truth. Moreover, they allow others the freedom to do the same.

Idaho State University affirms the philosophy of academic freedom embodied in Board policy [III.B](#), that:

Institutions of higher education are operated for the common good and not to further the interests of individual faculty members or the institution as a whole. Academic freedom is essential to protect the rights of the faculty member in teaching and the student in learning. Freedom in research and teaching is fundamental to the advancement of truth. Academic freedom carries with it responsibilities as well as rights.

Academic freedom is affirmed as essential for the protection of the rights of faculty in teaching and of the student in learning, and as fundamental to the advancement of truth through research and teaching. Idaho State University supports the tenet that academic freedom should be respected and not abused. Pursuant to Board policy [III.B.3](#), it is the expectation that:

Each faculty member of the institution is a citizen, a member of a learned profession, and a representative of the institution. When speaking or writing as a citizen, the faculty member should be free from institutional censorship or discipline. However, as a member of the academic community and a representative of the institution, the faculty member should at all times be accurate, exercise appropriate restraint, show respect for the opinions of others, and make every effort to indicate that he or she is not an official spokesperson for the institution.

If there is a concern or evidence that academic freedom has been denied, a [grievance procedure](#) is intended to affirm a faculty member's rights to be informed of and question personnel recommendations at any level, and to provide a mechanism for grieving a final institutional decision on a grievable matter.

2.A.29	Individuals with teaching responsibilities present scholarship fairly, accurately, and objectively. Derivative scholarship acknowledges the source of intellectual property, and personal views, beliefs, and opinions are identified as such.
--------	--

Idaho State University policy clearly articulates the obligation of individuals with teaching responsibilities regarding the presentation of scholarship. Further, the pursuit of scholarship, research, and artistic creation are central to ISU’s mission and core themes. Faculty responsibilities include developing and improving scholarly competence; exercising critical self-discipline and judgment in handling knowledge; practicing intellectual honesty; demonstrating respect for students and adhering to faculty’s proper role as intellectual guide and counselor; fostering honest academic conduct; avoiding exploitation of students for private advantage; and acknowledging significant assistance from students, to name a few of the extended catalog of responsibilities included in ISU’s [policy](#). Faculty are also governed by institutional [policies](#) regarding intellectual property and patents.

*Finance*

2.A.30	The institution has clearly defined policies, approved by its governing board, regarding oversight and management of financial resources—including financial planning, board approval and monitoring of operating and capital budgets, reserves, investments, fundraising, cash management, debt management, and transfers and borrowings between funds.
--------	--

Idaho State University has multiple, extensive [policies](#) constituting oversight and management of financial resources that comply with Board policies. Examples of these policy areas include delineation of responsibility and authority in [financial management and services](#); centralized [contract administration](#); requirements, prohibitions, and procedures governing [budget control, deficit spending and cash balance monitoring](#); availability of [internal auditing](#) services; rules controlling expenditures for [travel](#) and [non-travel](#) food, entertainment, and gifts; and [fundraising](#).

## Standard 2.B Human Resources

2.B.1 The institution employs a sufficient number of qualified personnel to maintain its support and operations functions. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated. Job descriptions accurately reflect duties, responsibilities, and authority of the position.

Idaho State University has a workforce of over 3,500 employees and is the single largest employer in both Pocatello, and surrounding Bannock County. Thirty-four percent (34%) or 1,323 of this workforce are student employees with an additional 6% or 218 being graduate assistants (in the areas of teaching or research), making a total of 40% or 1,541 student employees. All of these students contribute to the University's efforts to provide services, while at the same time providing these students valuable work experience and financial assistance.

Figure 2: ISU employees as of November 22, 2013

Idaho State University implemented the Career Path Internship program in academic year 2010-11. Students in this program have the opportunity to apply to work in paid, on and off-campus positions that complement their academic major, area of study and research, or career interests. In 2013-14, more than \$1.4 million was allocated for this program, and an additional \$300,000 will be allocated in the 2014-15 academic year.

Faculty comprise 20% or 795 employees of the University's total workforce, and 33% or 571 employees of the 1,718 full-time employees. In addition to research and public service, the faculty taught 18,640 students for a total of 307,042 credit hours in 2013-14. Idaho State University has 845 affiliate faculty who make a significant contribution to the educational and research efforts of the University, normally for no remuneration.

Sixteen percent (16%) or 626 classified employees, 13% or 514 non-classified employees, and 10% or 387 temporary employees assist the University in its support and operation functions. One percent (1%) or

33 are health residents in either the ISU Family Medicine or the Department of Dental Sciences Residency Programs. These programs are explained in more detail at [Residencies](#).

The majority of university employees work at the Pocatello campus. The number of employees at other locations are: 105 at ISU Meridian Health Science Center, 52 at ISU-Idaho Falls, and 11 at ISU-Twin Falls.

Figure 3: ISU full-time employees as of November 22, 2013

Figure 4: ISU part-time employees as of November 22, 2013

Despite the economic challenges and limited state funding over the past seven years, ISU has continued efforts to provide salary increases for faculty and staff. During this time, compensation plans at ISU have provided for merit based increases as follows for faculty and staff:

Table 7: Compensation Plans for Faculty and Staff

	Salary Increase Pool for ISU Faculty & Staff	Range of Salary Increase, Distributed on Merit
<b>2014-15</b>	3% ongoing; and 1% temporary merit – not ongoing	0-4% merit based increase 0-2% merit based bonus
<b>2013-14</b>	2% ongoing	0-4% merit based increase
<b>2012-13</b>	4.5% ongoing	0-7% merit based increase
<b>2011-12</b>	1% temporary merit – not ongoing	0-4% temporary merit – not ongoing
<b>2010-11</b>	0%	NA
<b>2009-10</b>	0%	NA
<b>2008-09</b>	3% ongoing	0-5% merit based increase

Salary increases for each year as listed above were distributed based on merit which ensured that top performing faculty and staff were eligible to receive significant salary increases which has enhanced the ability of the University to recruit and retain top performing employees.

In addition to distribution of salary increases based on meritorious performance, annual compensation plans have also focused on the following notable compensation administration concepts. Each item of note as listed below, has contributed to the University’s ability to recruit and retain high performing employees, including hourly support staff, across all levels of the organization.

- Idaho State University has established a minimum hourly rate of pay equivalent to 3% above the federal poverty rate for a family of three. This practice has enhanced the University’s ability to recruit and retain high performing staff in positions assigned to the lowest pay grades. The minimum university rate of pay for support staff will continue to be adjusted each year to maintain a consistent differential above the aforementioned federal poverty rate and has improved the opportunity for employees in lower pay grades to earn a livable wage.
- Idaho State University has adjusted the entry level rate of pay for hourly support staff in each respective pay grade to be equivalent to 7% above the state of Idaho’s minimum rate of pay for assigned pay grades. By improving the starting rate of pay for all support staff pay grade assignments, the University has greatly enhanced the ability for academic and non-academic departments to recruit and retain high performing staff.
- As it move out of the financial challenges that came with the most recent recession, the University has made special efforts to address areas of pay inequity for faculty and staff. As administrators and department heads have identified top performing faculty and staff who have been paid inequitably in comparison to their internal peers, and/or in comparison to external market conditions, ISU has added additional equity adjustments in addition to their merit increases. This has been a key effort in retaining top performing faculty and staff whose previous salary levels were less competitive in a national market and/or internally inequitable.

Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and implemented at ISU by the Office of Human Resources. Human Resources staff guide departments and units with a standardized hiring process to ensure the best qualified personnel are selected. The Human Resources website provides additional resources to facilitate departments and units in the hiring of personnel. Idaho State University is an equal opportunity employer. The Director of Equal Opportunity/Affirmative Action and Diversity plays a key role in search processes and attends the initial meetings of search committees to review those processes.

Job descriptions accurately reflect duties, responsibilities, and authority of the position. The Human Resources staff assist departments with the developmental process of drafting job descriptions. These are reviewed and submitted with the annual evaluations of all classified and non-classified employees.

The Office of Human Resources is currently managing the implementation of a comprehensive Talent Management Suite through Ellucian, a leading human resources software company for higher education that will be used to strengthen hiring processes and provide applicants easy online access to critical information about available positions and application processes, including job announcements and the terms, conditions, and benefits of employment at ISU.

Table 8: Total ISU Employees (as of November 22, 2013)

Category	Description	Full-Time Headcount	Part-Time Headcount	Grand Total
<b>Faculty</b>	Full-Time 9 month	415		415

<b>Grand Total</b>		<b>1,718</b>	<b>2,178</b>	<b>3,896</b>

2.B.2 Administrators and staff are evaluated regularly with regard to performance of work duties and responsibilities.

Idaho State University administrators and staff are evaluated annually with regard to performance of work duties and responsibilities according to the procedures set forth in [ISU Policies and Procedures](#). In addition, Board policy requires annual evaluation of institutional employees, including [classified](#) (see also [IDAPA 15.04.01.210.05](#)), [non-classified](#), and [faculty](#). The [President](#) is also evaluated annually by the Board. Newly hired classified employees are evaluated after 1,040 hours of service in addition to annual evaluations.

2.B.3 The institution provides faculty, staff, administrators, and other employees with appropriate opportunities and support for professional growth and development to enhance their effectiveness in fulfilling their roles, duties, and responsibilities.

Professional growth and development opportunities are regularly provided to university employees through the Office of Academic Affairs, the colleges, the Office of Research and Economic Development, the Office of Human Resources, and other administrative units. In addition to [development resources](#) noted on the web, initiatives sponsored by the Office of Academic Affairs have included annual workshops addressing the promotion and tenure process and requirements; a grant of \$300,000, with additional matching funds from the colleges, to support faculty travel for research and scholarship needs; and sponsorship of department chairs to attend the American Council on Education Leadership Academy for Department Chairs, including payment of all related expenses. The colleges have also supported faculty development. A few examples include competitive grants to individual faculty members for travel, equipment purchases, publication costs, and similar uses, presentations on topics pertinent to faculty teaching and research interests such as intellectual property rights, project management, copyright laws, higher education's role in Idaho economy, and green energy development. Recently, the Office of Academic Affairs sponsored a comprehensive two-day workshop for faculty and administrators on the roles of institutional planning and assessment in demonstrating institutional effectiveness. The Office of Research and Economic Development also provides opportunities for faculty professional development. For example, an all-day grant writing seminar presented by Grant Writers' Seminars and Workshops, LLC, was offered in coordination with ISU's Biomedical Research Institute. Faculty members were able to compete for the additional opportunity to participate in a six-month, one-on-one professional grant writing assistance opportunity from Grant Writers' Seminars and Workshops.

There have also been enhancement grants from central administration and the colleges to address faculty development and other strategic needs. Funding for travel is a key part of this effort, because travel is often critical for faculty to experience professional development opportunities. In FY2011, the University budgeted \$683,749 for travel, which was a 4.56% decrease from FY2010. To address this university-wide decrease in travel funding, colleges have stepped in where possible to meet the need of faculty to participate in faculty development opportunities. For example, the College of Arts and Letters initiated a process for soliciting proposals and, based on recommendations from the college executive committee, awards faculty enhancement grants that include travel money and other support for professional development.

[Sabbaticals](#) are another professional development opportunity provided to faculty. Funding occurs on the college level. Although there has been a sustained reduction in overall state-appropriated funding, the sabbatical process continues and sabbaticals are being awarded.

Table 9: Sabbaticals Awarded

Academic Year	Number of Faculty Sabbaticals Awarded
2013-14	11
2012-13	13
2011-12	6
2010-11	14

Since 2009, nine ISU faculty members have been awarded nine Fulbright Scholarships, and the University provided support for these faculty while they were overseas teaching and conducting research. The university also offers support and opportunities for National Endowment for the Humanities fellowships. The university’s support of visiting professors and researchers also provides valuable opportunities for faculty and students to interact and learn from these individuals.

Idaho State University’s [Instructional Technology Resource Center](#) (ITRC) offers opportunities for faculty professional growth and development in instructional technology. ITRC maintains a schedule of regular [workshops](#) in areas that are critical to instructional development and delivery (e.g., [Moodle](#), ISU’s learning management system). Recently ISU launched an distance learning initiative called [eISU](#) that offers many opportunities for faculty development: a subscription to [Quality Matters](#) (QM), a nationally-recognized, faculty-centered, peer review program designed to certify the quality of online and hybrid courses, to begin in Fall 2015; multilevel training in use of the QM rubric; and faculty participation in a QM review of their online courses. Additionally, the ITRC and the Office of Academic Affairs sponsor eISU workshops twice during the academic year. These events focus on advances occurring in online education and cover such areas as best practices in pedagogy and course design, quality assurance, and new technologies. Content is varied so faculty at all levels of knowledge and experience with online education can benefit. The graph below identifies the cumulative number of faculty who have received training.

Figure 5: Faculty Receiving QM Training

A number of development opportunities are available to all ISU employees. The Office of Human Resources provides a wide variety of professional development [workshops](#) that are presented on the Pocatello campus and via distance learning technology to Meridian and Idaho Falls. Idaho State University employees can also access online training in a variety of areas that is sponsored by the [state of Idaho](#) and [private entities](#).

The Leadership Development Program, aimed at ISU's emerging and experienced leaders, provides the knowledge, skills, and tools critical to becoming a strategic leader. The curriculum includes effective application and use of policies, procedures, resources, and services. The program is currently offered on the Pocatello campus, and at the ISU Meridian Health Science Center.

[Staff professional leave](#) is also available for development activities such as research and writing in the recipient's field of specialization, regular attendance at classes of a university or institution, and participation in institute or university exchanges or other specifically defined activities that would clearly enhance the employee's performance.

In addition, various divisions of the University support professional development through attendance at professional association meetings, workshops and conferences regionally and nationally. In addition to staff development, programs on characteristics and needs of students and supporting underrepresented populations, Student Affairs has co-sponsored drive in workshops with higher education institutions across the state on such topics as threat assessment and behavioral intervention and Title IX policies and procedures.

2.B.4 Consistent with its mission, core themes, programs, services, and characteristics, the institution employs appropriately qualified faculty sufficient in number to achieve its educational objectives, establish and oversee academic policies, and assure the integrity and continuity of its academic programs, wherever offered and however delivered.

Idaho State University employs appropriately qualified faculty sufficient in number and consistent with its mission and core themes. Before a faculty position is created or vacancy filled, ISU follows a university-wide process that examines whether the position will advance fulfillment of the institutional mission; have a positive impact on student recruitment, retention, and learning; contribute to research activity; and provide a significant return on investment, in addition to other factors. At the college level, in determining a recruitment strategy for new faculty, the department faculty assess student demand and take into account existing areas of faculty expertise.

Table 10: 2013-14 Tenure Status and Rank

Rank	Tenure Status	Full-time	Part-time	Grand Total
<b>Professor</b>	Tenured	137	5	142
	On Track	3		3

<b>Adjunct Faculty</b>	Non-Tenured		176	176
<b>Adjunct Faculty Total</b>			<b>176</b>	<b>176</b>
<b>Grand Total</b>		<b>574</b>	<b>221</b>	<b>795</b>

The university-wide process for hiring employees begins with [completion and approval](#) of the [Increased Personnel Action Scrutiny \(IPAS\)](#) form. An estimated 30% of the individual IPAS requests are revised to ensure that the employee position aligns with strategic goals of the University.

To assure the integrity and continuity of academic programs, faculty staffing levels are analyzed as a component of program review for specialized and institutional accreditations. This helps ensure that ISU employs appropriately qualified faculty sufficient in number to achieve its educational objectives, and establish and oversee academic policies.

Despite a sustained decrease in state-appropriated funding, ISU is committed to maintaining and adding highly skilled and qualified faculty to assist ISU in fulfilling its mission and core themes. In AY 2013-2014 66 new faculty were hired.

2.B.5	Faculty responsibilities and workloads are commensurate with the institution’s expectations for teaching, service, scholarship, research, and/or artistic creation.
-------	---

The [faculty workload policy](#) states the University’s expectations for teaching, service, scholarship, research, and/or artistic creation that full-time academic faculty on nine-month contracts will be assigned fifteen workload equivalency units of effort each semester, and faculty on ten- to twelve-month contracts and part-time faculty will be assigned workload units that are proportional to those of full-time nine-month faculty. Of these fifteen workload units, a typical assignment would be an average of nine units of instruction, four to five units of research/scholarship/creative activity, and one to two units of professional service. Some flexibility is permitted in assigning workload. Each college, division, and/or academic unit is encouraged to develop a weighting system that takes into consideration various factors set out in the policy. The faculty workload assignment is documented in a faculty member’s Annual Faculty Evaluation Report.

The implementation of the Banner ERP system was a milestone event for the University that began in 2008 ([ERP Master Timeline](#)). This new ERP system provides data to analyze faculty workloads that was not readily available before. Idaho State University is utilizing [Activity Insight](#) by Digital Measures, a

web-hosted service that will significantly increase the ability of faculty to provide current information for annual activity reports, promotion and tenure, program review, and specialized program accreditation.

Historically, faculty have completed a “Post-Semester Faculty Activity Report” to record on paper form the allocation of their workload units. However, the information on these forms was difficult to analyze and report, with faculty providing feedback that the paper form was cumbersome and time-consuming. Although the Office of Academic Affairs created a web form in 2010-11, it did not work well because of technical limitations. Academic Affairs, through the Office of Institutional Research, has redesigned this report and put it online using Activity Insight. It is easier for faculty to complete the report and for deans to analyze and report the workload data to the Office of Academic Affairs. Activity Insight provides a solution to the “Post-Semester Faculty Activity Report” and the reporting of critical data for evaluation, review, and accreditation.

2.B.6	All faculty are evaluated in a regular, systematic, substantive, and collegial manner at least once within every five-year period of service. The evaluation process specifies the timeline and criteria by which faculty are evaluated; utilizes multiple indices of effectiveness, each of which is directly related to the faculty member’s roles and responsibilities, including evidence of teaching effectiveness for faculty with teaching responsibilities; contains a provision to address concerns that may emerge between regularly scheduled evaluations; and provides for administrative access to all primary evaluation data. Where areas for improvement are identified, the institution works with the faculty member to develop and implement a plan to address identified areas of concern.
-------	--

The annual evaluation process, the data collected, and the criteria used for evaluating performance is documented via the forms ([Procedures for Faculty Evaluations](#), [Annual Faculty Evaluation Report](#), [Post Semester Faculty Activity Report](#)) that are used in the process. These forms reflect that, in evaluating faculty, ISU uses multiple indices of effectiveness, each of which is directly related to the faculty member’s roles and responsibilities, including evidence of teaching effectiveness for faculty with teaching responsibilities. Department chairs submit annual evaluations for faculty to the dean of the college. After the dean reviews the evaluations and provides his or her own rating, a copy is sent to the Office of Academic Affairs. In 2009 the Human Resources module of the Banner Enterprise Resource Planning (ERP) system was implemented, followed in April 2012 by the personnel management feature. Data entry into the ERP system has enabled the Office of Academic Affairs to more easily monitor the annual evaluation process and ensure that evaluations are timely completed.

The Five-Year Periodic Performance Review (PPR) is an internal review conducted by the colleges for all continuing faculty (tenured, tenure-track, and non-tenure track appointments). The [PPR process](#) and [PPR evaluation form](#) use these same multiple indices of effectiveness, including those directly related to teaching effectiveness.

All tenured faculty are evaluated in a regular, systematic, substantive, and collegial manner at least once within every five-year period of service. The University’s [Tenure and Promotion](#) policy and [Five-Year Periodic Performance Review](#) policy were approved in 2011. Both policies underwent extensive review at multiple levels prior to final approval. The procedures in the University’s policies are intended to assure fair and equitable treatment of all faculty members during their evaluation, promotion, and tenure

reviews, and to ensure confidence that standards and criteria will be fairly and equitably applied. Individual units (division, college, school, and library) are able to establish guidelines for tenure and promotion that must be consistent with the policies of the Board and the University. This provides each unit the opportunity to apply and evaluate discipline-specific tenure and promotion criteria.

[Activity Insight](#), launched in May 2013 for the entire university, is another tool used in the faculty evaluation process. Faculty can enter or download into this web-hosted service their publications, exhibits, artistic performances, and other academic accomplishments. The University can upload the faculty's teaching load assignments. Once the data is entered into Activity Insight either by the faculty or the University, faculty can generate their annual evaluation with a click of the button. Faculty can easily generate curricula vitae and other reports for the promotion and tenure process. Department chairs can then access this information to be used in the annual evaluation process.

These forms for evaluating performance were created as reports in Activity Insight in 2013. Now data pushed into Activity Insight from the Banner ERP system or entered by faculty can easily be used many times. Automating reports such as generating curriculum vita (CV), Annual Faculty Evaluation, Post Semester Faculty Activity, and the Five-Year Periodic Performance Review. Activity Insight saves faculty many hours of labor. These reports can be generated electronically in minutes.

## Standard 2.C Education Resources

2.C.1	The institution provides programs, wherever offered and however delivered, with appropriate content and rigor that are consistent with its mission; culminate in achievement of clearly identified student learning outcomes; and lead to collegiate-level degrees or certificates with designators consistent with program content in recognized fields of study.
-------	--

Idaho State University's comprehensive mission encompasses professional-technical education through doctoral degrees; offering a broad range of [degree programs](#) that are consistent with its mission. There are [five colleges](#) and the [Division of Health Sciences](#) (DHS), where programs go through a rigorous approval and review process to ensure effective and efficient development and delivery of quality educational programming consistent with the University's mission and goals, as well as the statewide program planning process. Programs are delivered in a variety of formats: traditional lecture mode, hybrid (a combination of traditional and web delivery), and web-based (asynchronous and synchronous).

Appropriateness of program content and rigor, consistent with institutional mission, is maintained through three key intersecting processes of program and curricular review.

### **Curriculum and Program Changes**

All course changes of sufficient substance to require catalog changes are vetted through the university level [Undergraduate Curriculum Council](#) or the [Graduate Council](#), depending on the type of program. The Undergraduate Curriculum Council exercises, at the University level, the faculty's primary responsibility for the fundamental area of undergraduate curricula. The Undergraduate Curriculum Council approval is required for all curricular and program changes that are to appear in the undergraduate catalog. Their areas of responsibilities include: identification of potential confusion with existing programs, courses, and degrees due to the proposed title of the new program, course or degree; identification of potential dilution of existing programs, courses, or degrees; prevention of duplication with existing programs, courses, or degrees; detection of possible conflict with accrediting standards applying to existing programs, course, and degrees; evaluation of transfer policies and standards for award of ISU credit; and continued clarification of the undergraduate catalog.

The Graduate Council approves all courses offered for graduate credit and curricula for graduate degrees; approves regulations and requirements for graduate programs; receives and acts upon all petitions for waiving of regulations of graduate programs; approves the nominations to examining committees concerning candidates; approves requests by departments for assignment of non-graduate faculty to graduate faculty responsibilities including examining committees and the teaching of any courses which carry graduate credit. The Graduate Council distributes communication to the graduate faculty to inform them of the results of its deliberations, usually through its approved minutes posted on the Academic Affairs Moodle site. Representatives on the Graduate Council are expected to consult with their constituent graduate faculty members.

Other units, such as the University Library, Instructional Technology Services, and Educational Technology Services, are included in these review processes as well. These curriculum committees hold high standards for new offerings and curricular changes, and are charged in their bylaws with maintaining accuracy and quality of programs. This includes a review of how a proposed change furthers attainment of institutional mission. On a local level, to further the University's commitment to appropriate content and rigor and mission fulfillment, many colleges and units maintain a committee or council to oversee

curricular changes and review new programs submitted for approval. This local level review complements a more inclusive [program proposal](#) process for new programs and major program changes developed by the Board. The program proposal process involves review and approval at key levels: college and division, deans, provost, president, and the Board.

These review processes, at the institutional and state levels, are required for all proposed changes in curriculum and programs, wherever offered and however delivered, including programs with specialized accreditation.

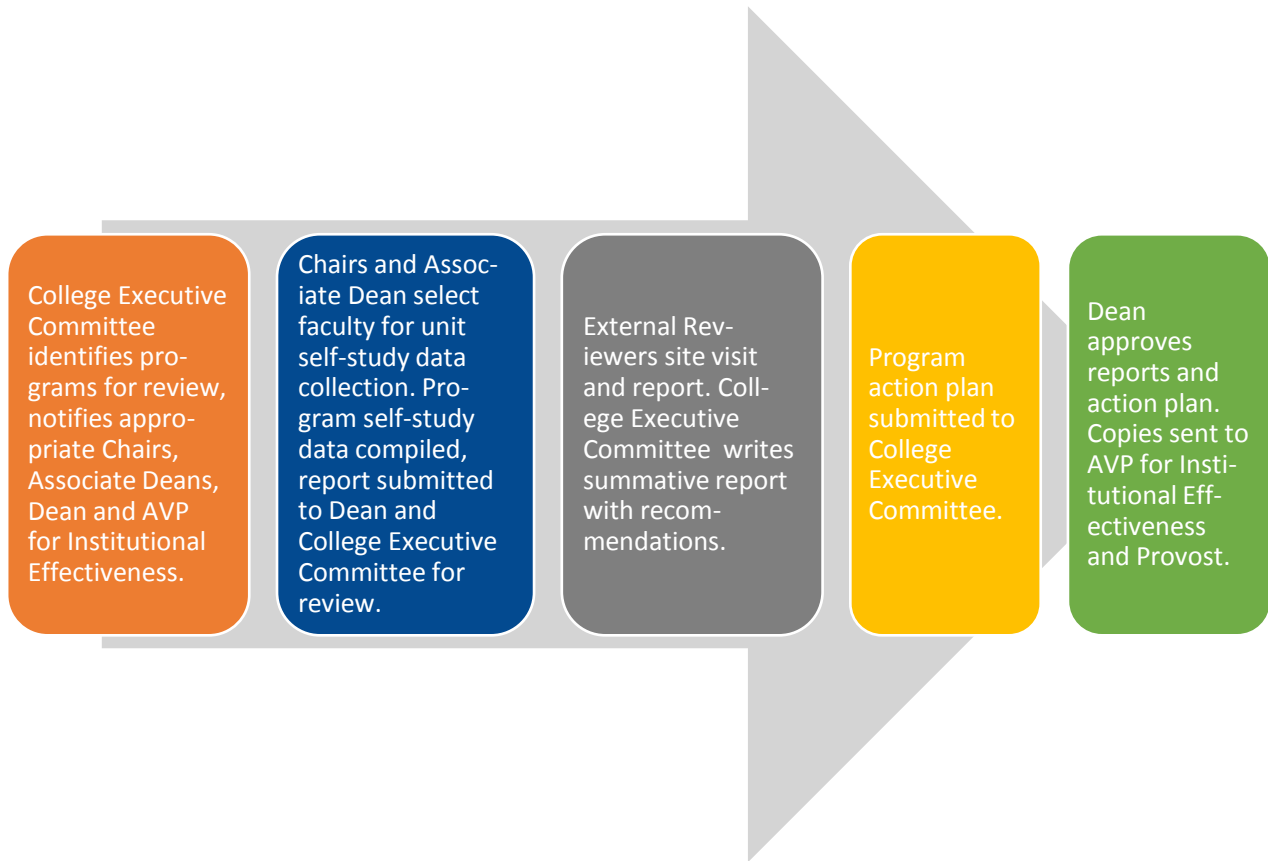

### ***Academic Program Planning, Review and Course Assessment***

Academic program planning begins as part of the Board policy [III.Z](#), Planning and Delivery of Postsecondary Programs and Courses. This policy requires the preparation and submission of five-year academic plans to advise and inform the Board in its planning and coordination of educational programs with the express intent of enhancing access to quality programs, while concurrently increasing efficiency, avoiding unnecessary duplication and maximizing the cost-effective use of educational resources. It is through this policy that institutions under the Board's governance are given specific statewide and service region program responsibilities. Idaho State University's Five-Year plan begins with extensive faculty and administrative input and approval to ensure quality and alignment with the University's mission, and regional and statewide program responsibilities.

In addition to program planning, ISU has established a program review plan, guidelines, and schedule that require programs be reviewed on a rotating five-year schedule. This information is available on the Academic Affairs website. The Office of Academic Affairs has identified the need for formal policy establishing the framework for a review mechanism that is ongoing and cyclical. It is the intent of the Office of Academic Affairs that a draft policy will be presented to the faculty for their input and recommendations when they return in Fall 2014. The faculty are charged with identifying objectives and learning outcomes for each of the courses for which they have primary responsibility; this includes courses that are offered through distance learning. Course objectives and outcomes are reviewed annually and revised as appropriate. They must align with program objectives and outcomes that are defined and refined through internal program review that occurs at least once every five years. As a key component of this review, faculty examine whether linkages exist between program goals and institutional mission and core themes. An external program review is performed following the internal review as part of a contemporaneous, inclusive review cycle. Faculty review findings from the program review, including the appropriateness of curricular content and rigor and consistency with institutional mission, and take action to address the findings. During the next review cycle, the impact of these actions is analyzed and further changes are made if indicated.

The flow chart below demonstrates the process for program review at the college level.

Figure 6: Program Review Process

The Office of Academic Affairs continues to work with the deans and department chairs to ensure full implementation of the program review and course assessment processes. Program review is central to Core Them One: Learning and Discovery, and, to that end, is an indicator ISU are tracking as part of its assessment of mission fulfillment. Indicator 1.2.4 as assessed below in Standard 4.A. recognizes the role program review plays in identifying areas of success, areas of weakness, and alignment with the University’s mission.

Table 12: Number of Academic Program Reviews

	FY2009	FY2010	FY2011	FY2012	FY2013
<b>Academic Program Reviews</b>	14	4	2	13	6

**Program Prioritization**

The most recent program prioritization mandate of the Board provided an opportunity that allowed for the most comprehensive assessment of program review for alignment with ISU’s mission. The Office of Academic Affairs approached this mandate with the goal of supporting strategic initiatives, institutional mission, strategic plan and core themes through appropriation of resources based on prioritization of academic units and programs. An evaluation and scoring matrix based on Dickeson criteria approved by

the Faculty Senate, Deans' Council and the Board was employed. The results of the twelve-month, data-driven effort were over 90 academic program recommendations. As part of this effort, a business intelligence web application focused at the program level, was developed for internal use by both deans and chairs as well as the Provost and Vice President for Academic Affairs. Internally, this is known as Program Viability. The Program Viability web application will provide annual and historical data for the use of on-going program decisions.

### ***Specialized Accreditation***

Many of ISU's degree programs undergo regular re-accreditation by specialized accrediting bodies ([undergraduate catalog](#) and the [graduate catalog](#)). These accrediting processes contribute in a critical way to ensuring that ISU programs have appropriate content and rigor and are consistent with institutional mission, culminate in achievement of clearly identified student learning outcomes, and lead to collegiate-level degrees with designators consistent with program content in recognized fields of study. Specialized accrediting bodies enforce strict guidelines for curriculum that reflect current national standards in the discipline. Because loss of accreditation can critically impact viability, programs strive to maintain required standards of content, rigor, and relevance to the field of study.

Idaho State University does not require programs with specialized accreditation to complete an internal program review in addition to the specialized self-study assessment and accreditor evaluation process. However, if the specialized accreditation is not outcomes based, outcome measures must be developed for the program, and provided to the Office of Academic Affairs as part of the institutional program review requirements.

In 2013, when the new Associate Vice President for Institutional Effectiveness was hired, specialized accreditation oversight was centralized in the Office of Academic Affairs to ensure coordination and support for programs obtaining or seeking to maintain specialized accreditation. These efforts involved ensuring the Office of Academic Affairs had current and accurate information listing all programs with specialized accreditation, dates for renewal/continued accreditation reports and/or visits, costs for accreditation, and any findings or required responses. All accreditation self-studies are submitted to the Office of Academic Affairs for review and comment by the Associate Vice President for Institutional Effectiveness and the Provost and Vice President for Academic Affairs before submission to the specialized accrediting bodies.

2.C.2	The institution identifies and publishes expected course, program, and degree learning outcomes. Expected student learning outcomes for courses, wherever offered and however delivered, are provided in written form to enrolled students.
-------	---

Expected outcomes for courses, programs, and degrees, as well as student learning outcomes for individual courses, are identified by the academic departments and maintained and published by the colleges and units on course syllabi and/or on program websites.

Comprehensive, cyclical program and curriculum review is a primary means to ensure that credit and degrees offered are based on student achievement and awarded in a manner consistent with generally accepted learning outcomes, norms, or equivalencies in higher education. Program review examines whether program curriculum and learning outcomes are being achieved, as evidenced by the assessment of

student performance measures. In preparing the program review self-study, faculty perform critical assessment tasks: identify the principal learning outcomes (or that knowledge and skills students are expected to acquire by degree completion); collect aggregate data showing how students are performing on each of those outcomes; analyze and evaluate the data by learner outcome; and propose actions based on the results. This review process connects student achievement of program learning outcomes and the award of credit and degrees.

2.C.3	Credit and degrees, wherever offered and however delivered, are based on documented student achievement and awarded in a manner consistent with institutional policies that reflect generally accepted learning outcomes, norms, or equivalencies in higher education.
-------	--

Course offerings are typically semester based, but include eight-week sessions. All courses are listed in the [undergraduate and graduate catalogs](#). Idaho State University also offers a series of remedial courses that prepare students for the rigors of university study.

As published in the [undergraduate catalog](#), ISU's definition of credit adheres to NWCCU and federal policies. One semester credit hour in academic courses requires (1) fifty minutes in class each week for one semester (which assumes approximately twice this amount of time in study and preparation outside the classroom), or (2) approximately two and one-half hours in laboratory each week for a semester, or (3) equivalent combinations of (1) and (2). For purposes of equivalency calculations, a semester is assumed to be sixteen weeks. Short-term courses of one week (five days) or more require time in class, laboratory, and preparation equivalent to the above for a total of 45 clock hours per credit.

Students may enroll for up to 18 credits per semester for undergraduates and 16 credits for graduate students, but may enroll for a larger number with permission of the dean of the individual colleges, or the dean of the Graduate School for graduate programs. To be eligible for participation in student activities, a student must be enrolled for at least 8 credits.

The number of credits awarded for a graduate thesis and other courses varies from department to department, relative to the degree and expectations of the discipline, and students may spread the registration for those credits over several semesters.

To be awarded an undergraduate ISU degree, students must complete all university [graduation requirements](#) pertaining to the undergraduate catalog and program credits and grades. Undergraduate students must also apply for graduation with the Office of the Registrar. Awarding of undergraduate degrees is strictly controlled by the Office of the Registrar, and requires signature of the department chair. Each degree granted is precisely matched with the published requirements for the degree.

The published criteria for degree award arise directly from the work of the Graduate Council and Undergraduate Curriculum Council charged with the curriculum review process, and these criteria arise directly from those generated and justified by the submitting program or department. This process of review provides assurance that students awarded a degree have satisfied the requirements of university policies that are based on defined levels of achievement in the curriculum.

Graduation requirements for graduate students are directed through the Graduate School with assistance through the Division of Graduation and Thesis/Dissertation Clearance. Clear instructions are provided on

the Graduate School website providing a [Summary of Procedures for Graduate Degrees](#), a [Graduation Checklist](#), [Application for Graduation](#), a [Graduation Participation Policy](#), and [Instructions for Preparing Theses and Dissertations](#).

In addition, graduate students are required to adhere to a continuing registration requirements by including at least one graduate credit during all semesters until they have completed their degrees. Students who, for compelling reasons, wish to interrupt their work on projects, theses, or dissertations may request, in writing, a leave of absence from the Graduate School. The student's academic clock does not stop during either violation of or approved deviation from the continuous enrollment policy. Graduate students who fail to meet the continuing registration requirement will be judged to have dropped out of their programs and will no longer enjoy access to university resources, including the library and computer facilities.

Academic rigor and progression at the graduate level are also supported by time limits to graduation, with an extension of time only obtained for good cause with the approval of the Dean of the Graduate School. For example, all requirements for a master's degree or educational specialist degree must be completed within eight years preceding the student's graduation. Therefore, all credits applied to a master's degree or to an educational specialist degree must have been taken within eight years immediately prior to granting of the degree unless it can be shown that the coursework taken more than eight years earlier covers material that has not changed substantially during the intervening time, or that the student has been able to remain current in the topics covered in the course. Evidence that the older coursework is still appropriate must be supported and approved in writing by the student's advisor and department chair, and submitted with a petition to the Dean of the Graduate School. Also, in these cases, the academic clock does not stop when a student fails to register for classes.

Credit time limits are also imposed on doctoral degrees. However, because many doctoral degrees are research and/or performance degree, the number of years involved in attaining or retaining competency cannot be readily specified. Rather, it is important that the doctoral student's competency be assessed and verified in a reasonable period of time prior to conferral of the degree and therefore more flexibility is allowed compared with master's degrees.

Comprehensive examination at the graduate level is used to assess students' readiness to undertake independent research or practice. It is expected that the examination will occur after all coursework has been completed and language or other requirements satisfied, and that it consists of a series of examinations covering all areas specified in the program of study.

Because the comprehensive examination attests to the academic competence of the student who is about to become an independent researcher or practitioner, the examination normally does not precede the awarding of the degree by too long a period of time. Consequently, doctoral candidates are allowed five years in which to complete remaining degree requirements. In the event that a student fails to complete the doctorate within five years after passing the comprehensive examination, an extension of this time may be obtained by special petition.

2.C.4	Degree programs, wherever offered and however delivered, demonstrate a coherent design with appropriate breadth, depth, sequencing of courses, and synthesis of learning. Admission and graduation requirements are clearly defined and widely published.
-------	---

Idaho State University's degree programs are reviewed on a number of levels to ensure coherent design, with appropriate breadth, depth, and sequence of coursework. This essential review occurs through a well-defined process that similarly assures appropriateness of program content, rigor, and consistency with institutional mission. Idaho State University's admission and graduation requirements are clearly defined and widely published in the [undergraduate](#) and [graduate catalog](#). These publicly posted requirements are the document of record for general admission to the University and admission to the specific programs. In addition to the official catalogs, admission requirements are posted on the Division of Student Affairs [website](#) for each category of student: freshman, transfer, graduate, and international, as well as the College of Technology [website](#) for professional-technical students. Other websites that set out requirements include the Graduate School for [admission](#) and [graduation](#) and the College of Technology for [admission](#) and [graduation](#). A number of programs in DHS, which have criteria in addition to the University's, post their admission requirements on program websites; for example, [Idaho Dental Education](#), [Family Medicine Residency](#), [Pharmacy](#), [Physician Assistant Studies](#), [Nursing](#), [Physical Therapy](#), [Audiology](#), [Speech-Language Pathology](#), and [Radiographic Science](#).

#### ***Program Development and Review***

At ISU, programs develop and evolve through a multi-level process of review and input that begins with faculty and ends with the Board. At each level, the process examines the program design and coherence with other programs, curriculum sequencing, alignment with institutional mission, use of institutional resources, and demand for the program of study.

In particular, program development and design and the content and sequencing of curriculum to optimize student learning are the quintessential function and responsibility of faculty. Through ongoing research and scholarship, faculty members maintain expertise and discover or advance knowledge in their fields of study. From that base, faculty develop courses with appropriate breadth, depth, and sequencing. Professional development opportunities also help faculty in applying methods of curriculum design and delivery that encourage synthesis of learning.

Faculty initiate new programs and revises existing ones through a program proposal that must be reviewed and approved for initiation. In some areas the first level of review is by a college curriculum committee, comprised of faculty and administrators within the college. All program proposals must be reviewed by the Undergraduate Curriculum Council, a university level council comprised of elected faculty from each college and several *ex officio* members from support units like the Office of Academic Affairs, the Office of Central Academic Advising, and the Office of the Registrar. After this review, the Deans' Council considers program proposals and recommends approval or disapproval by the Provost and Vice President for Academic Affairs. Review and decision by the Provost and Vice President for Academic Affairs is the final step for minor program proposals.

Proposals for new programs, discontinuations, and significant changes in existing programs are submitted for further review and [approval](#) by the Board. At this level in the process, proposals are reviewed by two committees: the [Instruction, Research and Student Affairs](#) (IRSA) Committee, a standing advisory committee of the Board that develops and makes recommendations on matters of policy and procedure

concerning instruction, research and student affairs; and the [Council on Academic Affairs and Programs](#), a working unit of the IRSA Committee that is comprised of the chief academic officers of the Board and the institutions. Factors in addition to program quality are considered at this level, e.g., whether the proposal duplicates programming at other state institutions and complies with Board policy governing institutional mission and service areas, and is in alignment with the University's five-year plan. Recommendations for approval or disapproval are made to the Board that is the final point of decision regarding academic programs.

Once degree programs with coherent design, appropriate breadth, depth, sequencing of courses, and synthesis of learning are implemented, the quality is preserved through periodic review within the departments. In addition to the functions described in Standard 2.C.1, the faculty also assess programs for continued coherence, appropriate breadth, depth, sequencing of courses, and synthesis of learning. Course objectives and outcomes are reviewed annually and revised as appropriate, and synthesis of learning is assessed. This review is also intended to maximize effectiveness of education relative to workforce needs, as well as academic standards for fields of study.

Complete program review occurs at least once every five years. As noted previously, an external program review is performed following the internal review as part of a contemporaneous, inclusive review cycle. Faculty evaluate findings from the program review, including program design, curriculum, and student learning, and take action to address the findings. During the next review cycle, the impact of these actions is analyzed and further changes are made if indicated.

### ***Specialized Accreditation***

The specialized accreditation process that many of ISU's degree programs undergo helps to ensure coherent design with appropriate breadth, depth, sequencing of courses, and synthesis of learning. These areas are covered within the review process. As noted in Standard 2.C.1., specialized accrediting bodies enforce strict guidelines for program design and curriculum. These guidelines require that current national standards in the discipline be reflected in appropriate breadth, depth, and sequencing of courses and that synthesis of learning across the curriculum is occurring.

### ***General Education***

Idaho State University's baccalaureate and academic associate degree programs require students to fulfill the requirements of the University's general education program. The rationale, structure, and requirements of the program are articulated in the [undergraduate catalog](#). Idaho State University's program was recently redesigned to reflect a more current, inclusive approach to general education that better facilitates synthesis of learning across curricula. Safeguarding quality, content, and continuity is within the domain of the [Undergraduate Curriculum Council](#) that is charged with maintaining academic standards in ISU academic programming. As described in Standard 2.C.1., this council has a major role in the university level curriculum review process and in ensuring coherent program design with appropriate breadth, depth, sequencing of courses, and synthesis of learning.

### ***Certification Exam Pass Rates***

As discussed in Standard 2.C.3, many ISU programs have a certification examination as a capstone event. Student performance on these national and state examinations are monitored by the departments and is a useful indicator of whether a program is coherently designed with appropriate breadth, depth, sequencing of courses and whether synthesis of learning is occurring. Results of certification examination are disclosed on most program, departmental, college or division websites by those programs that have an examination.

As an example, results of certification examination for the health professions are identified in the [Annual Report of the Division of Health Sciences](#).

2.C.5	Faculty, through well-defined structures and processes with clearly defined authority and responsibilities, exercise a major role in the design, approval, implementation, and revision of the curriculum, and have an active role in the selection of new faculty. Faculty with teaching responsibilities take collective responsibility for fostering and assessing student achievement of clearly identified learning outcomes.
-------	--

The faculty are foundational to the delivery and maintenance of high-quality educational programs. As discussed in previous sections, the faculty have critical roles and responsibilities on multiple levels of the process of curriculum creation, design, and implementation. The teaching faculty in a department are responsible for developing learning outcomes for each course in program curricula and for assessing student achievement of those outcomes, as required under ISU and the Board policies and specialized program and university accreditation standards (e.g., [undergraduate catalog](#)). The University Curriculum Council and the Graduate Council, both comprised of faculty, provide the processes through which the curriculum is designed, approved, implemented, and revised.

Faculty provide input regarding qualifications and other requirements for new faculty, including identifying areas of expertise needed for curriculum delivery and research in the program; select appropriate venues for publicizing faculty positions; recruit qualified candidates; serve on search committees; attend candidate open forums; and provide feedback regarding candidates, to name a few examples of these key functions.

2.C.6	Faculty with teaching responsibilities, in partnership with library and information resources personnel, ensure that the use of library and information resources is integrated into the learning process.
-------	--

The ISU Library has seen a significant shift toward electronic holdings and has a robust library management system, as discussed in Standard 2.E. The interlibrary loan mechanism is efficient, delivering the majority of documents electronically to any location, thereby facilitating integration of the outreach campuses with the primary library resources. Library staff provide class orientations, presentations, and in-library tutorials for students and faculty on request.

Idaho State University's [Instructional Technology Resource Center](#) (ITRC) is another major source used by faculty to integrate resources into the learning process at ISU. The ITRC provides educational technology resources like a Learning Management System (LMS), web conferencing, video conferencing, lecture capture, podcasts, audio-enhanced PowerPoint presentations and other technology tools. Additionally, the ITRC provides opportunities for faculty development through various instructional workshop topics, including the use of technology to provide accessible/equal access materials to all students. Universal Learning Design principles are subscribed to and shared with faculty seeking to improve and enhance their courses, whether face-to-face, hybrid, or fully online.

Faculty deliver online programs and courses through eISU, ISU's online learning initiative. Idaho State University's [eISU](#) courses are based on best practices in instructional design and quality assurance using the Quality Matters rubric as a guide for course design. Appropriate technology resources are integrated into online courses to achieve each course's learning objectives in the best manner possible for online course delivery as well as student learning and engagement.

2.C.7	Credit for prior experiential learning, if granted, is: a) guided by approved policies and procedures; b) awarded only at the undergraduate level to enrolled students; c) limited to a maximum of 25% of the credits needed for a degree; d) awarded only for documented student achievement equivalent to expected learning achievement for courses within the institution's regular curricular offerings; and e) granted only upon the recommendation of appropriately qualified teaching faculty. Credit granted for prior experiential learning is so identified on students' transcripts and may not duplicate other credit awarded to the student in fulfillment of degree requirements. The institution makes no assurances regarding the number of credits to be awarded prior to the completion of the institution's review process.
-------	--

The ISU [undergraduate catalog](#) includes experiential learning assessment as one of several alternative credit opportunities. Experiential learning assessment allows a student to be awarded undergraduate academic credit for experiential learning that is documented using the portfolio method. Through a portfolio the student describes and documents knowledge gained experientially and demonstrates how this knowledge acquired outside the classroom is related to college-level learning. Faculty in the academic department in which credit is being requested assessed the portfolio and make credit recommendations to the dean of the college. No representations regarding the number of credits to be awarded are made prior to the review process. Idaho State University allows a maximum of 16 credits toward credit requirement for an [associate degree](#) and 30 credits toward the credit requirement for a [baccalaureate degree](#). Maximums do not exceed 25 percent of credits needed for the degrees.

To receive credit awarded through experiential learning assessment, the student must have completed at least nine semester credit hours in ISU coursework with a minimum 2.0 GPA and must be enrolled the semester in which credit is awarded. Pursuant to Board policy [III.L.](#), experiential learning assessment credit is available only for undergraduate credit. Further, ISU policy makes it available only in those academic subjects offered at ISU, awarded according to faculty-developed criteria that reflect accepted standards in the field of study. The complete process required for documenting and evaluating experiential learning is available through the Office of the Registrar.

The College of Technology grants credit for prior learning, education, or work experience through an assessment process including evaluation of written documentation of training and experience; written examinations and demonstration of skills or interviews with program faculty (see [Credits Granted for Previous Training or Experience](#)).

2.C.8 The final judgment in accepting transfer credit is the responsibility of the receiving institution. Transfer credit is accepted according to procedures which provide adequate safeguards to ensure high academic quality, relevance to the students' programs, and integrity of the receiving institution's degrees. In accepting transfer credit, the receiving institution ensures that the credit accepted is appropriate for its programs and comparable in nature, content, academic quality, and level to credit it offers. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements between the institutions.

Idaho State University's policies and processes governing transfer credit are included in the [undergraduate catalog](#). They incorporate a number of mechanisms that safeguard the academic quality, relevance to program, and degree integrity, in addition to reflecting Board policy. The Board is currently reviewing policy [III.V.](#), Articulation and Transfer policy as part of its efforts to reform general education. Historically, Board policy III.V. identified a general education core curriculum for the associate degree and provided that students who complete an associate degree at an accredited institution in Idaho would be granted junior standing when transferring to a four-year public institution in Idaho, and that they would not have to take any additional lower division general education core courses. In April 2014 the Board established a policy specific to general education ([III.N.](#), General Education) and is in the process of revisions to III.V. Articulation and Transfer.

In addition to Board and institutional policy, ISU has entered into articulation agreements with a number of non-state institutions where there are substantial patterns of transfer. These agreements may cover course level equivalencies, as well as general education requirements. In cases not covered by an articulation agreement, faculty in the academic units determine transferability of credit to satisfy program curriculum and degree requirements. Transfer policies and course articulation information is provided on the website of the Office of the Registrar (e.g., [evaluation of transfer credit](#) and [transfer articulation](#)).

### *Undergraduate Programs*

2.C.9 The General Education component of undergraduate programs (if offered) demonstrates an integrated course of study that helps students develop the breadth and depth of intellect to become more effective learners and to prepare them for a productive life of work, citizenship, and personal fulfillment. Baccalaureate degree programs and transfer associate degree programs include a recognizable core of general education that represents an integration of basic knowledge and methodology of the humanities and fine arts, mathematical and natural sciences, and social sciences. Applied undergraduate degree and certificate programs of thirty (30) semester credits or forty-five (45) quarter credits in length contain a recognizable core of related instruction or general education with identified outcomes in the areas of communication, computation, and human relations that align with and support program goals or intended outcomes.

All baccalaureate and associate degree programs at ISU require completion of the University's general education program and fulfillment of the requirements under its structure. Idaho State University's requirements for general education in its various degree programs are articulated in the [undergraduate catalog](#). Idaho State University's general education program was recently redesigned to reflect a more current, integrated, and inclusive approach to general education, and ISU is now phasing in the new

program. The former general education program, which was in place for over 20 years, can be found in past [undergraduate catalogs](#). The process of general education reform occurred over a three-year period and came within the purview of the Undergraduate Curriculum Council. The work of reform was delegated to the General Education Requirements Committee, a subcommittee of the Undergraduate Curriculum Council comprised of faculty across the colleges. Faculty, faculty governance groups, and college deans reviewed several iterations of the proposed reform, and provided comments and recommendations to the Undergraduate Curriculum Council and General Education Requirements Committee, before the current general education program was finally approved by the Provost and Vice President for Academic Affairs.

The general education program is comprised of nine core objective areas: 1) Written English, 2) Spoken English, 3) Mathematics, 4) Humanities, Fine Arts and Foreign Language, 5) Natural Science, 6) Behavioral and Social Science, 7) Critical Thinking, 8) Information Literacy, and 9) Cultural Diversity. A minimum of 36 credits from the 9 core objective areas is required. Of these nine objective areas, students must meet objectives 1 through 6 and 9, and may choose to meet either objective 7 or 8.

Idaho State University’s general education program constitutes a recognizable core of general education that represents an integration of basic knowledge and methodology of the humanities and fine arts, mathematical and natural sciences, and social sciences. Its design promotes comprehensive literacy—including effective communication, mathematical, and technological skills; reasoning and creativity; and information literacy—and a broad knowledge base in the liberal arts. Once they complete the general education program, students will have the necessary foundation for all further university studies. They will be able to communicate effectively and clearly in standard written and spoken language; use mathematical language and quantitative reasoning effectively; think logically, critically, and creatively; and locate relevant sources and use them critically and responsibly. Lastly, ISU’s general education program is intended to prepare ISU students to be life-long, independent learners and active, culturally aware participants in diverse local, national, and global communities.

Under ISU Policy and Procedures, students seeking an associate of applied science degree must complete 15 credits hours of general education. To fulfill this requirement, a student must have six credit hours of written or spoken English from core objectives 1 or 2; three credit hours of computational Mathematics from core objective 3; three credit hours of behavioral and social sciences selected from specified courses in core objective 6; and three credit hours of elective general education selected from any core objective area not previously applied.

2.C.10	The institution demonstrates that the General Education components of its baccalaureate degree programs (if offered) and transfer associate degree programs (if offered) have identifiable and assessable learning outcomes that are stated in relation to the institution’s mission and learning outcomes for those programs.
--------	--

In April 2014, the Idaho State Board of Education (the Board) approved a new statewide general education policy [III.V](#). This is the first time the Board has had a policy specific to general education. The policy establishes statewide competencies that guide institutions’ determination of course that will be designated as Idaho General Education Matriculation (GEM) courses; establish shared rubrics that guide

course/general education program assessment; and create a transparent and seamless transfer experience for undergraduate students. To that end, the policy identifies six GEM competency areas, with the first two emphasizing integrative skills that are intended to inform the learning process throughout general education coursework and the major, and the other four representing ways of knowing that are intended to expose students to ideas and engage them in a broad range of active learning experiences. The six competency areas are: Written Communication, Oral Communication, Mathematical Ways of Knowing, Scientific Ways of Knowing, Humanistic and Artistic Ways of Knowing, and Social and Behavioral Ways of Knowing.

Idaho State University's general education program is comprised of nine core objective areas covering written and spoken English, Mathematics, Humanities, Fine Arts and Foreign Language, Natural Science, Behavioral and Social Science, Critical Thinking, Information Literacy, and Cultural Diversity. Within each of these core objective areas student learning goals are identified and articulated for that area. Additionally, each course included in a particular core objective area has a series of student learning outcomes that have been evaluated by the General Education Requirements Committee and have been found to support the particular objective. This committee is charged with reviewing all requests made by academic departments to include courses as satisfying a general education requirement. The learning outcomes, identified for the core objective areas and the courses that meet the objectives, are also assessable.

In connection with the new general education requirements that were put into place for the 2013-2014 academic year, members of the General Education Requirements Committee (GERC) are currently creating a new assessment plan for general education. A draft of this new plan is expected to be reviewed by GERC in Fall 2014. The plan will lay out a regular ongoing process for assessing both individual general education courses and the program as a whole.

Under Board policy [III.V.1](#), four-year public institutions in Idaho must accept the transfer associate degrees of students who complete the requirements for the associate of arts or science degree at an accredited institution in Idaho. These transfer associate degrees are deemed to satisfy the lower division general education core requirements of the four-year institutions, such as ISU. Even though ISU does not independently evaluate the courses comprising the degree, it is nonetheless assured that the general education component of these transfer associate degrees has identifiable and assessable learning outcomes tied both to program and mission.

2.C.11	The related instruction components of applied degree and certificate programs (if offered) have identifiable and assessable learning outcomes that align with and support program goals or intended outcomes. Related instruction components may be embedded within program curricula or taught in blocks of specialized instruction, but each approach must have clearly identified content and be taught or monitored by teaching faculty who are appropriately qualified in those areas.
--------	---

Board policy [III.X](#), requires the institutions under its governance to identify and assess student learning outcomes that align with and support program goals and intended outcomes. This includes applied degree and certificate programs. Faculty in these programs develop course objectives and learning outcomes and ensure they synchronize with program objectives and outcomes. Mandatory program

review helps to prevent inconsistencies and maintain alignment. Instruction components within individual programs may take either modular or course-based format. In either case, syllabi reflect instructional objectives and learning outcomes.

Qualifications of teaching faculty are assured through at least two levels of assessment. The department chair or program director is required under Board policy [II.G.4](#), to evaluate each faculty member annually. Idaho State University [policy](#) identifies a variety of data that may be used in evaluation, including peer input, student input, and class observation. In addition, where specialized accreditation of individual programs occurs, the accrediting body will examine instructors' credentials and their qualifications to teach courses in particular subject areas for the purpose of ensuring that credentials match instructional assignment. Programs without specialized accreditation undergo a similar evaluation of instructor qualifications as part of the regular institutional program review that functions to ensure only faculty with appropriate credentials are delivering program content. Idaho State University's applied degree and certificate programs are offered in the College of Technology that houses a general education program dedicated to servicing these programs exclusively. General education courses in the applied degree curricula are taught by instructors who have academic credentials that would also qualify them to teach in the University general education program. Program Profiles are on file with the Idaho Division of Professional-Technical Education for all applied degree and certificate programs offered by the College of Technology. Program profiles include student learning outcomes and are submitted or updated with each new program, expansion, or non-substantive change.

### *Graduate Programs*

2.C.12 Graduate programs are consistent with the institution's mission; are in keeping with the expectations of their respective disciplines and professions; and are described through nomenclature that is appropriate to the levels of graduate and professional degrees offered. They differ from undergraduate programs by requiring greater depth of study and increased demands on student intellectual or creative capacities; knowledge of the literature of the field; and ongoing student engagement in research, scholarship, creative expression, and/or appropriate high-level professional practice.

Idaho State University's mission statement highlights the institutional commitment to advancing scholarship and creativity by harnessing innovative research, exemplary instruction, and creative expression to create leaders, scholars, and global citizens at multiple levels, including graduate education. Idaho State University's Graduate School articulates in its mission statement that it "acts to recruit, support, retain and matriculate scholars, researchers and practitioners educationally empowered as critical thinking citizens and agents of innovation, opportunity and change." The graduate programs offered at ISU are consistent with the mission statements articulated at the university and graduate school levels in that they are focused on promoting scholarly discourse and engendering leaders within different disciplines.

Further, the Graduate School articulates a vision that guides program development, review, and assessment. Specifically, the vision statement captures ISU's aspiration to be a "driver of high-quality graduate education, and ... dedicated to the embodiment of academic and creative excellence, resulting in scholars, researchers and practitioners committed to and capable of continually broadening the scope

of academic discourse, discovery and innovation.” Such a framework ensures that graduate programs offered are consistent with the University’s mission, reflect the aspiration of leadership across disciplines, and promote the development of scholarly and creative excellence across graduate students. The Graduate School, in conjunction with the academic colleges, establishes baseline admissions requirements, final examination processes, graduation criteria, and programmatic structure. The individual graduate programs are provided with the authority to articulate additional, discipline-specific admission requirements, determine how to fairly assess in-depth knowledge application and synthesis in a final examination context, and to establish the most innovative curriculum to meet the best practices standards of the discipline.

Idaho State University’s mission statement reflects a commitment to a wide variety of graduate programs. As the state’s lead institution for education in the health professions and related biological and physical sciences, ISU offers numerous graduate programs in DHS and College of Science and Engineering. Examples of DHS programs include Pharmacy (Ph.D., Pharm.D., M.S.), Counseling (Ph.D., M.Coun.), Audiology (Au.D.), Occupational Therapy (M.O.T), Physical Therapy (D.P.T.), Speech Language Pathology (M.S.), Nursing (Ph.D., D.N.P., M.S.), Dental Hygiene (M.S.), and Physician’s Assistant (M.P.A.S.), while examples of College of Science and Engineering programs include Engineering (Ph.D., M.S.), Biology (Ph.D., D.A., M.S.), Applied Physics (Ph.D., M.S.), and Geosciences (Ph.D., M.S.). Idaho State University is also charged with preparing teachers, administrators, and other education professionals and does so through graduate programs in Educational Leadership (Ed.D.), Instructional Design (Ph.D.) and numerous M.Ed. programs. Finally, ISU is committed to maintaining strong arts and humanities programs as independent, multifaceted fields of inquiry. Graduate programs such as those in Fine Arts (M.F.A.), English (Ph.D., M.A.), Psychology (Ph.D.), and Political Science (D.A., M.A., M.P.A.) contribute to that strength. The [graduate catalog](#) provides an overview of all current graduate level offerings at ISU.

Meeting disciplinary expectations is critical to attracting graduate students, providing an effective education, and completing research and scholarly activities. Evidence that this is accomplished comes from many sources. For instance, graduate enrollment remains strong across the University, indicating ISU compares favorably to peer institutions that students could have attended instead. The tables below provide an overview of enrollment data for graduate students across the last seven years. Moreover, the conferral of graduate degrees increased by 31.6% over the AY2008 to AY2014 period.

Table 13: ISU Graduate Student Enrollment Fall 2007-Fall 2013

	Fall 2007	Fall 2008	Fall 2009	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Change Fall 2007 to Fall 2013	% Change Fall 2007 to Fall 2013
<b>Graduate Students</b>	2,743	2,695	2,670	2,357	2,366	2,193	2,171	-572	-20.9%

Table 14: ISU Graduate Degrees FY2008 – FY2014

	FY2008	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Change FY2008 to FY2014	% Change FY2008 to FY2014
<b>Masters</b>	341	375	438	404	480	480	474	133	39%
<b>Doctoral</b>	130	129	133	143	155	154	146	16	12.3%
<b>Total</b>	471	504	571	547	635	634	620	149	31.6%

All graduate students at ISU are required to complete a final examination that is comprehensive in nature and that reflects the student's ability to articulate theoretically and in application the in-depth knowledge and understanding of the relevant discipline. In addition, many graduate students who complete their degrees in some disciplines (e.g., Engineering and Health Professions) take state or national exams as a requirement of professional recognition and credentialing. Idaho State University graduate students have a consistent record of demonstrating pass rates at or above the median in those disciplines. Such external performance measures evidence the high level of professional practice, knowledge acquisition, and skill development present within ISU graduate students.

Furthermore, faculty members who deliver graduate programs must meet stringent professional standards as established by the discipline and the Graduate School. To be recognized as Graduate Faculty at ISU, faculty members must have terminal degrees for their discipline, evidence quality teaching, and maintain current knowledge as demonstrated by peer-reviewed publications, competitive grants, and regional and national awards. To earn the designation of Graduate Faculty at ISU, faculty members must be endorsed by their program and nominated for consideration at the Graduate School level. Graduate Council is the formal advisory board of the Graduate School with representation of graduate faculty from all academic colleges/division. Graduate Council determines policies and procedures, reviews and approves curricula for graduate programs, mediates student appeals and petitions, and evaluates nominations of faculty for membership on the Graduate Faculty. To be approved by Graduate Council to serve as a member of the Graduate Faculty, nominees must evidence professional productivity and scholarly maturity as defined by the following policy: "Scholarship is a fundamental activity of Graduate Faculty and represents one of our core values. Graduate Faculty are expected to generate and disseminate new knowledge that is judged to be valuable by their peers. Since the mode of expression of scholarship is discipline specific, it is judged according to the prevailing norms of the discipline. The scholarship standard is interpreted broadly, and a variety of activities may be used singularly or in combination to provide evidence of scholarly activity commensurate with Graduate Faculty status. Scholarship is evaluated relative to productivity, dissemination, quality, and contribution to the discipline." Finally, new faculty with recent degrees are regularly hired into most graduate degree-granting departments, providing the most current ideas and insight from numerous regionally accredited universities. Recently, the Graduate Council and the Provost approved the addition of an Allied Graduate Faculty category to the existing Graduate Faculty categories. The Allied category specifically addresses faculty who may not currently meet the full graduate faculty criteria, but have the expertise and/or background needed for many of the graduate faculty role activities. It also addresses the gaps often experienced by departments and programs and the desire of some disciplines to include qualified professionals (without terminal degrees) as instructors and committee members.

Idaho State University graduate programs are distinguished from its undergraduate programs by the increased depth of understanding, independent analysis, and/or original contributions required of graduate students. With regard to graduate coursework, two levels are traditionally offered: 5500 level courses where upper division undergraduate students may also be enrolled, and 6600 level courses where only graduate students may enroll. Objectives and outcomes for all courses have been published on campus and clearly show both course levels are characterized by more difficult assignments and more in-depth analysis than undergraduate courses.

Beyond the classroom, ISU graduate programs have significant expectations that exceed undergraduate education. For example, most graduate programs in Humanities, Sciences, and Engineering require the

completion of a thesis or dissertation that demonstrate both familiarity with primary sources as well as new independent analyses, leading to an original contribution of knowledge. In the Health Professions graduate education requires extensive practicum, clinical, or internship experience in addition to thesis or dissertation work (see below in 2.C.15).

2.C.13	Graduate admission and retention policies ensure that student qualifications and expectations are compatible with the institution’s mission and the program’s requirements. Transfer of credit is evaluated according to clearly defined policies by faculty with a major commitment to graduate education or by a representative body of faculty responsible for the degree program at the receiving institution.
--------	--

Idaho State University’s [Graduate Council](#) sets policies and procedures for graduate students regarding admission and retention that can be found in the [graduate catalog](#) (see below in 2.C.3).

Although staff in the Office of the Registrar place graduate level transfer work on graduate students’ academic records, the evaluation of and the decision to accept and apply transfer credits to a graduate student rests in the Graduate School. Graduate faculty in the departments, as well as the Graduate School, work together to determine the eligibility of transfer credits when requested. In all master’s degree programs, a total of nine semester credits may be transferred from a regionally accredited institution. Transfer of credits from a regionally accredited institution are acceptable only if the courses are specifically approved by the Graduate School and the applicable academic department of ISU when the final program of study is submitted. In these instances, only the credit hours transfer, not the grades. For doctoral programs, Departments may accept credits by transfer in total or in part from a master’s degree earned at Idaho State University or at another regionally accredited institution regardless of age of the courses.

Effective graduate recruitment forms a key component in the admission, progression and graduation of quality students at the graduate level and strategically, by actively contributing to the growth of graduate enrollment as set out in the Graduate School’s 2016 goals. In response to the four Core Themes of ISU, the Graduate School considers an excellent graduate student recruitment plan as key in enhancing and supporting quality in alignment with Core Theme One: Learning and Discovery; achieving Core Theme Two: Access and Opportunity for the best candidates for graduate education regardless of social, economic or ethnic background; attracting the very best candidates to support Core Theme Three: Leadership in Health Sciences; and a way towards increased Economic and Social Impact, Core Theme Four, in Idaho and broader.

A recent restructure of Graduate school operations was implemented to enhance logical job-related divisions to increase workflow and customer service through recruitment opportunities together with the academic graduate programs. The old structure had ill-defined lines of reporting, and two open lines – that of the Recruiter and Associate Dean. Analysis of best practices suggested that recruitment can best be achieved by partnering recruitment efforts with graduate level programs and faculty.

The restructure eliminated .9 FTE positions in the Graduate School (including abolishing the position of Recruiter) which allowed funds to be invested in recruitment optimization. As a result of these savings, local funds could be released to create the Graduate Recruitment Assistance Fund (GRAF) Program. This

amount was matched dollar-for-dollar by the International Programs Office (IPO) in order to facilitate recruitment efforts at the international level. The GRAF Program will utilize the expertise and enthusiasm of graduate faculty in graduate programs as contributory factors in graduate student recruitment, will increase the visibility of the Programs themselves (in conjunction with the Graduate School), will facilitate additional pipeline MOUs and set a solid foundation for increasing future enrollment into ISU's graduate programs.

In concert with this initiative, the Manager: Graduate School Operations was appointed project manager to direct a team for implementation of the Recruitment Module in Banner. This Module has streamlined recruitment, is more effective than the previous methodologies, and already resulted in a 20% application rate derived from recruitment efforts directed through the online inquiry forms.

Recruitment, retention and customer service operations have been moved into the Division of Student, Faculty, and Staff Support, with several new initiatives administered by this Division's staff.

Notably, a Special Projects Division, under the administrative leadership of the Manager: Graduate School Operations house several currently developed new initiatives and will also be the incubator unit for new initiatives. This Division has already generated two significant reports that inform current operations: 1) Reasons for application withdrawal; 2) Reasons for denials. Copies of these reports are available upon request.

2.C.14	Graduate credit may be granted for internships, field experiences, and clinical practices that are an integral part of the graduate degree program. Credit toward graduate degrees may not be granted for experiential learning that occurred prior to matriculation into the graduate degree program. Unless the institution structures the graduate learning experience, monitors that learning, and assesses learning achievements, graduate credit is not granted for learning experiences external to the students' formal graduate programs.
--------	--

More than half of ISU graduate programs offer credit for internship and clinical activities. Some are elective courses but most are required to obtain a graduate degree. These opportunities are an invaluable method of transitioning from student to professional within the discipline. All internships and clinical activities are monitored by ISU Graduate Faculty. Faculty establish the learning objectives and outcomes for internships and clinical work. They subsequently ensure the achievement of these outcomes by serving as supervisors or by monitoring the professionals who otherwise supervise the students. At the completion of each activity, the faculty assess the performance through their direct observation or in consultation with the professional supervisor. In addition, many of the graduate programs, particularly in DHS, must maintain specialized accreditation by national accrediting bodies in the particular discipline. That the program structures, monitors, and assesses the graduate learning experience that occurs through internships, field experiences, and clinical practices, according to nationally accepted standards, is reviewed and the activity validated through this rigorous accreditation process.

Idaho State University offers five graduate courses whose description includes "experiential" education: one in the Dental Hygiene program (DENT 6619), one in Advanced General Dentistry (IAGD 6624), one in English (ENGL 6631L), and one in Pharmacy (PHAR 9981). All these experiential courses have numerous prerequisites within the discipline and all involve mentoring by Graduate Faculty and/or approved

professionals. Throughout the University, no graduate credit is granted for experiential learning that occurred prior to matriculation.

2.C.15	Graduate programs intended to prepare students for research, professional practice, scholarship, or artistic creation are characterized by a high level of expertise, originality, and critical analysis. Programs intended to prepare students for artistic creation are directed toward developing personal expressions of original concepts, interpretations, imagination, thoughts, or feelings. Graduate programs intended to prepare students for research or scholarship are directed toward advancing the frontiers of knowledge by constructing and/or revising theories and creating or applying knowledge. Graduate programs intended to prepare students for professional practice are directed toward developing high levels of knowledge and performance skills directly related to effective practice within the profession.
--------	---

Expertise, originality, and critical analyses are required of ISU students who complete graduate degrees. In the Humanities, Sciences, and Engineering disciplines, graduate students complete a thesis or dissertation that demonstrate both familiarity with primary sources as well as new independent analyses, leading to an original contribution of knowledge. Many of these studies are published in peer-reviewed national and international journals. Faculty advisors use these publications to garner external support for additional research and scholarly work, thus passing through an additional level of peer review. In the arts, M.F.A. graduate students must exhibit a one-person show consisting of original creative work. In most Education and Division of Health Sciences programs, students complete extensive coursework directly related to their intended profession. Rigorous written and oral exams are administered to ensure their knowledge base is sufficient. Faculty committees guide and mentor students to ensure their knowledge base. Clinical practicums are required in almost all of the professional programs within DHS to enable students to gain the appropriate practical skills and necessary experience before graduation. The total number of student hours worked at these clinics differs from program to program. In the Pharmacy program, for instance, the State Pharmacy Board requires that students perform a minimum of 1,500 hours of such clinical services to qualify as pharmacists. A Family Nursing Practitioner is required to perform about 768 hours while a Physician Assistant performs about 1,720 hours of clinical services before graduation. [Residency programs](#) are also available at ISU. Community outreach provides another avenue by which graduate students deepen their knowledge and enhance performance skills for professional practice. In a typical year students from DHS perform about 5,242 hours of volunteer service in their programs of study. In addition, some programs, for example in the College of Business, typically require students to complete capstone projects.

<i>Continuing Education and Non-Credit Programs</i>	
---	--

2.C.16	Credit and non-credit continuing education programs and other special programs are compatible with the institution's mission and goals.
--------	---

Idaho State University's mission statement envisions comprehensive and diverse programming to meet the broad educational needs of southeast Idaho, the state, and the Intermountain region. This includes a strong continuing education component, attained through its community college function, professional-technical training, and professional development opportunities. Idaho State University's Core Themes

Three and Four further articulate the continuing education aspects of the mission. Core Theme Three, for example, links ISU’s leadership in the health sciences and the achievement of health science-related objectives, to the number of continuing education programs offered for physicians, pharmacists, nurses, and other health professionals. Idaho State University’s Core Theme Four incorporates continuing education programming to achieve key objectives.

Additionally, Board policy [III.L](#) requires that institutions of higher education in Idaho provide credit and noncredit continuing education. This includes learning activities for professional or personal development of the individual; recreation and cultural enrichment of the individual and community; licensing and certification for professional and practitioner qualification; credential and degree achievement; and job skills upgrading and retraining.

Idaho State University has a hybrid model of continuing education, with both decentralized and centralized components. For example, professional development courses for K-12 teachers and administrators are offered by the [Intermountain Center for Education Effectiveness](#) in the College of Education and [workforce training](#) activities are offered by the College of Technology. Additionally, most of the University’s professional programs offer continuing education for their graduates and professionals in their disciplines (see, e.g., DHS [Idaho Health Conference](#)). Centrally, the [Division of Continuing Education](#) provides information about professional development opportunities and supports programs for seniors such as New Knowledge Adventures, as well as offering non-credit face-to-face and online personal development and cultural enrichment programs for the wider community. This model of continuing education facilitates the delivery of diverse programming that enables ISU to achieve important components of its mission and goals and to comply with Board policies.

2.C.17	The institution maintains direct and sole responsibility for the academic quality of all aspects of its continuing education and special learning programs and courses. Continuing education and/or special learning activities, programs, or courses offered for academic credit are approved by the appropriate institutional body, monitored through established procedures with clearly defined roles and responsibilities, and assessed with regard to student achievement. Faculty representing the disciplines and fields of work are appropriately involved in the planning and evaluation of the institution’s continuing education and special learning activities.
--------	---

Idaho State University maintains direct and sole responsibility for academic quality of continuing education and special learning programs and courses. Under ISU’s hybrid model of centralized and decentralized continuing education programming, the roles and responsibilities are clearly defined and assigned, and controls are in place to assure quality and relevance to mission. Faculty in the colleges and academic units propose, develop, and deliver continuing education courses and activities; whereas, the approval and oversight of continuing education courses and activities, and recording of continuing education units (CEUs) and academic credits awarded is the responsibility of the college deans and the Office of Academic Affairs, through the Division of Continuing Education. In addition to the review by ISU, many of the units which provide CEUs are also reviewed by state or national professional associations which require extensive documentation of content and presenters.

Representatives from each college (including administrators, faculty, and staff), the Graduate School (when applicable), and the Director of Continuing Education approve and monitor all continuing education, professional development, and special learning activities, programs, and courses offered at ISU. No course or activity is authorized until the review process is complete. Once a course or activity is approved, the Division of Continuing Education will assign it a tracking number. If the approved course or activity carries academic credit, the unit's central scheduler is responsible for requesting a course index number and coordinating with the Office of the Registrar to ensure that the course is entered into the system so that students can register and final grades can be entered and transcribed.

The process for offering continuing education programming is well defined, with information and forms readily accessible on the Office of Academic Affairs website. Once a course is developed by a department or academic unit, a Continuing Education Approval Form is required to initiate the approval process. The completed form must be submitted to the Division of Continuing Education at least two weeks before the program/course is scheduled to begin and must include the following information:

- concise description of the proposed activity and credit to be given to those who complete it
- detailed syllabus, including learning objectives
- detailed agenda, including time schedule
- summary of the instructor's qualifications, including a current resume or CV
- description of prerequisites, if any, or student qualifications required to register for the activity
- description of how students are graded or performance evaluated
- plan of how the course will be assessed after completion

The Continuing Education Approval Form must be signed by the appropriate dean, department chair, or unit director. By signing the form, they are certifying that the proposed continuing education course meets academic criteria regarding content, contact hours, and instructor qualifications. Courses offering academic credit must have at least sixteen contact hours of instruction for each semester credit hour offered. Attendance must be taken for each session by means of an attendance sheet. A content assessment and course evaluation must be completed at the end of each course. Courses offered more than once during a year need only be approved before the first offering. Offerings in subsequent years must be approved again, but only material changes in the Continuing Education Approval Form must be resubmitted.

After a course is completed, the unit offering the course must submit to the Division of Continuing Education an End-of-Course Report that includes:

- a list of persons enrolled in the course, and certification by the instructor that each participant
- met attendance requirements to earn the grade, CEU, PDU, or similar credit provided
- student grades earned if the course awarded credit
- CEUs or PDUs awarded if appropriate
- individual student evaluations for the activity, or a summary of those evaluations
- an assessment of the activity consistent with the assessment plan provided in the Continuing Education Approval Form

Finally, the Division of Continuing Education maintains a database with the following information for each course offered:

- college/unit offering the continuing education course or program

- title of the course or program
- number of CEUs or academic credits for the course or program
- number of students in attendance

Faculty representing the disciplines and fields of work are suitably involved in the planning and evaluation of the continuing education and special learning activities at two primary points: development of courses and learning activities, as reflected on the Continuing Education Approval Form; and participation in the assessment at the end of the course.

2.C.18	The granting of credit or Continuing Education Units (CEUs) for continuing education courses and special learning activities is: a) guided by generally accepted norms; b) based on institutional mission and policy; c) consistent across the institution, wherever offered and however delivered; d) appropriate to the objectives of the course; and e) determined by student achievement of identified learning outcomes.
--------	---

Central oversight by the Office of Academic Affairs, through the Division of Continuing Education, ensures continuing education credit and CEUs are uniformly and accurately granted; are guided by accepted norms with appropriate objectives and student achievement of learning outcomes; and are in line with University mission and Board policy. Requiring deans or unit directors and department chairs to certify that a continuing education course or special learning activity meets academic criteria regarding content, contact hours, and instructor qualifications also assures that the granting of credit complies with these standards and expectations. To make this certification, the dean and faculty must conduct a substantive review to the requisite depth and degree. The faculty member is the expert in what are generally accepted norms in a particular area and what are appropriate objectives for a course. Moreover, the faculty member developing the course is best able to identify learning outcomes and assess student achievement of them.

2.C.19	The institution maintains records which describe the number of courses and nature of learning provided through non-credit instruction.
--------	--

The Division of Continuing Education is the central repository of all continuing education, professional development, and special learning programs offered at ISU for academic credit or for non-credit CEUs, Professional Development Units (PDUs), or similar designators. When a credit or noncredit course or activity is completed, a Continuing Education Final Report must be sent to the Division of Continuing Education, where these records are kept centrally. These records include course or activity descriptions, syllabi, instructor vitae, names of participants, grades, CEUs, PDUs, or certificates awarded, and similar information. Accreditation bodies for some units may require that records also be kept within the unit, but this does not override the requirement of duplicate records being kept centrally.

The Division of Continuing Education maintains a database with the following information for each course offered:

- college or unit offering the continuing education course or program
- title of the course or program

- number of CEUs or academic credits for the course or program
- number of students in attendance

Following this procedure ensures that ISU maintains appropriate records documenting the number of courses and nature of learning provided through its non-credit instruction.

## Standard 2.D Student Support Resources

Given the breadth of ISU's mission, the students who enroll at ISU bring with them a comparably broad range of aspirations, divergent levels of preparation, and varied support needs. This requires ISU to offer a wide array of student support services. Some are structured, others less so, but all are intentionally planned and implemented in support of ISU's mission, core themes, goals and objectives. Similarly, some are centralized while others are distributed.

2.D.1	Consistent with the nature of its educational programs and methods of delivery, the institution creates effective learning environments with appropriate programs and services to support student learning needs.
-------	---

There are a wide array of programs and services at ISU that support student learning needs and supplement the primary learning environments of the classrooms, laboratories, and clinics. The support these programs and services provide is essential to creating and maintaining effective learning environments. The following are examples of critical contributors to student support:

### **Student Success Center**

The [Student Success Center](#) was created in 2010 within the Office of Academic Affairs to improve services for students by integrating several key student support units under one administrative umbrella. Its [mission](#) supports key elements of the institutional mission by providing services and programs that are essential to the academic and intellectual development of students at ISU and encouraging students to realize their potential as prepared, responsible, and self-actualized members of an increasingly complex, diverse, and global society. The Student Success Center includes [Academic Programs](#), [Central Academic Advising](#), [Disability Services](#), [Native American Student Services](#), [TRiO](#), [University Honors Program](#), and [University Tutoring](#). These units offer free support services to aid student learning that include academic support courses, workshops, tutoring, and co-curricular activities to foster the intellectual development of students. The integrated approach used by the Student Success Center creates a full range of opportunities for student success and enhances students' learning experience.

*Academic Programs.* This unit offers diverse services through a number of programs.

[Bengal Bridge](#) is a relatively new effort to address remediation and retention issues. It focuses on assisting underprepared, first generation, low-income, first-time students in a campus residential setting offered during the summer. Students enroll in nine credits at a discounted tuition rate and are offered University Orientation, English Composition, Intermediate Algebra, and Introduction to Psychology to help prepare them to succeed in their college work.

The [College Learning Strategies](#) program provides a number of options to help students succeed, such as one-credit courses, individual tutoring, workshops, and handouts. These services cover several basic areas that are key to student success, such as time and stress management, reading, memory, test taking, math strategies, homework strategies, note taking, test taking and analysis. The College Learning Strategies program also presents workshops to university classes, campus organizations and groups, and at the residence halls.

Beginning Fall 2014, ISU's Intensive English Institute (IEI) will begin providing English language instruction for international students who wish to study in a comprehensive, academically rigorous program. The focus of the IEI will be on English for Academic Purposes (EAP). Classes will be taught by instructors with advanced degrees, Teaching English to Speakers of Other Languages (TESOL) credentials, and relevant experience. A minimum of 21 class hours per week will be required for each IEI student. Required core courses at each level include Reading, Writing, Speaking and Listening, and Vocabulary and Grammar. All IEI courses are non-credit and correspond to clock hours rather than credit hours. Upon enrollment at the IEI, students are grouped into one of six learner levels that include Elementary English I and II, Intermediate English I and II, and Advanced English I and II. The four required core courses are offered at each level. Students are placed into their initial level by assessment and required to complete all the subsequent levels in the IEI sequence. Each level can be completed in one eight-week session that corresponds to approximately 168 hours of direct group instruction. Successful completion of the Advanced English II level indicates that IEI students are prepared for full-time, university-level work. The expected timeline to complete the full course of study at the IEI (Elementary English I – Advanced English II) is approximately 18 months.

In the English for Speakers of Other Languages ([ESOL](#)) program, undergraduate and graduate students who are non-native English speakers receive academic instruction that enhances knowledge and understanding of the American language and culture. Students may participate in individual 60 minute tutoring sessions as well as workshops and excursions. In conjunction with the ISU Speech and Hearing Clinic, ESOL students may participate in two sessions of Accent Modification Evaluations for a small fee.

[First Year Seminar](#) introduces students to the vital components of university life and helps them achieve their academic and personal goals. Its courses are designed to assist students in developing positive learning behaviors and apply strategies to build confidence, gain awareness, and develop life-long skills that enhance their educational experience. Students who take First Year Seminar have higher GPAs, make stronger connections, and are more likely to graduate than students who do not take the seminar. Instruction teams consist of a faculty or staff member and a peer instructor.

[Service-Learning](#) is another program that affords students real-world learning experiences to enhance their academic learning while providing a tangible benefit for the community. Programs that offer service learning include Teacher Education, Chemistry, Didactic Program in Dietetics, First Year Seminar, Management, Marketing, and Physician Assistant Studies.

*University Tutoring.* Small group and individual tutoring is available to all ISU students through the University Tutoring unit.

The [Content Area Tutoring](#) program provides small group tutoring in every academic discipline taught at ISU except writing and mathematics and is available on both the Pocatello and Idaho Falls campuses. It affords student employment opportunities, allowing successful students to share their skills and experience with others. Most tutors are experienced graduate and undergraduate students who have obtained extra training as peer tutors.

In the [Writing Center](#), consultants work with students to improve the quality of the academic writing they do for their courses at all levels. The Writing Center also serves as a resource for university faculty, supporting writing across the curriculum in the general education courses and in all the disciplines. The online writing lab ([OWL](#)) is a virtual writing center where students can chat with a tutor screen-to-screen

in a Moodle chat room about writing projects and related questions. Writing Center handouts are available online.

The [Math Center](#) is a walk-in tutoring service staffed with trained student tutors who assist students in finding mistakes in their assignments and suggest different approaches and examples to solve math problems. In addition, the Math Center publishes study strategies online. Topics include organizing math notes, using the P.O.W.E.R. method for solving problems, and being aware of, and managing, negative attitudes toward math. Sample math finals for developmental math courses can also be viewed or downloaded from the Math Center's website. Idaho State University's Writing and Math Centers are certified through the College Reading and Learning Association.

*Central Academic Advising.* This unit provides ISU students with information about campus resources, offers assistance with schedules and degree planning, clarifies campus policies and procedures, and serves as a general resource for the student body. The advising staff includes a director and three full-time advisors and two part-time advisors at the main campus in Pocatello, two full-time advisors at each of the Idaho Falls and Twin Falls campuses, and one full-time advisor at the Meridian campus. Academic advisors communicate directly with faculty to help ensure advising regarding program curriculum is accurate and consistent. An important initiative of Central Academic Advising, in the early stages, involves working with faculty to promote the campus-wide use of degree plans and checklists that have a common format, are located at a similar place on each department's website, and are updated annually by a specified deadline. The common format and placement of degree plans and checklists provide a structure for new and continuing students to understand the components of a degree, to realistically assess the time needed to complete a degree, to have available in one place useful links to department information and websites, the undergraduate catalog, and a general education worksheet, as well as, linking the degree plan to the appropriate catalog year. The Central Academic Advising website showcases all current degree plans and checklists, which are linked to the department page to ensure information on both websites is the same, with department oversight of the content.

*Disability Services.* This Disability Services unit enables equal access to all programs and services sponsored or funded by ISU. Knowledgeable, well-trained staff authorize and provide reasonable accommodations and related disability services; advocate for an accessible and hospitable learning environment through removal of informational, physical, and attitudinal barriers; and promote self-determination and personal responsibility for students with disabilities. The [Dorothy Broyles Assistive Technology Lab](#) provides a safe learning environment and access to assistive technology for ISU students with disabilities. Equipment includes screen readers, scanners, and optical character recognition (OCR) software. Adaptive Technology Computer Workstations are also available at other locations. Interpreters, readers, and scribes are available to assist students with accommodations in and out of class. The Disability Services unit is one of the University's agents for compliance with federal and state laws and regulations mandating equal opportunity and access for persons with disabilities.

*Native American Student (Academic) Services (NAAS).* The NAAS [mission](#) is to help and support indigenous peoples in the attainment of their educational goals through academic advising, tutoring, resources, and advocacy. Some of the services provided include New Native Student Orientation, the Midterm Management Series, an NAAS Advising Day, pre-college workshops, a Shoshone-Bannock Parent Informational, and the Bengal Warrior Boot Camp. NAAS is also involved in important outreach with the local Shoshone-Bannock Tribe. A recent example is the Knowledge and Awareness Nexus (KAN) education

pilot program that serves first time students and those re-entering school after several years absence. The intent is to prepare participants for college level English and math and to provide learning opportunities in a culturally relevant manner.

*TRiO.* These federally funded programs provide students with a variety of support services including advising, counseling (academic, personal, financial and career), and tutoring. For students enrolled at ISU, TRiO offers [Student Support Services](#), and for those in high school, there are pre-college programs that include [Educational Talent Search](#), [Upward Bound](#), and [Upward Bound Math and Science](#). Idaho State University's program recently was awarded a highly competitive \$1.25 million Upward Bound Math and Science five-year grant to provide postsecondary education opportunities to limited income, first generation high school students who intend to major in STEM fields.

*University Honors Program.* The University Honors Program is a selective, liberal arts-based academic program that promotes a challenging curriculum to prepare students for post-undergraduate education. The goals of the Honors Program align with and advance Core Theme One and that part of ISU's mission seeking to "advance scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits and high-quality academic instruction; ... to develop citizens who will learn from the past, think critically about the present, and provide leadership to enrich the future in a diverse, global society." The Honors Program seeks to attract the best academic students, provide them with an enriched and challenging curriculum, and expose them to the artistic, scholastic, and scientific pursuits of other honors students and faculty. This provides the foundation for scholastic and creative exploration, study, and research necessary to prepare students to understand the past, think critically about the present, and plan for the future as tomorrow's leaders.

Honors Program students are admitted in a cohort, attend honors courses together, learn from one another, and share academic and social experiences throughout their college career. Honors Housing is also available as part of their scholarship. When students transition into their majors or programs, they participate in individual research and scholarly projects, working one-on-one with a professor or mentor in their discipline. Recent projects have involved honors research in Mathematics, Chemistry, Nursing, Elementary Education, literature, Art, and Business Management, to name a few. Ultimately, Honors Program students present and defend their work before a committee of honors faculty before receiving an Honors bachelor's degree. Idaho State University is the only public institution in the state of Idaho authorized to award an Honors bachelor's degree.

The Honors Program maintains a retention rate exceeding 80% and a six-year graduation rate of 72%. Honors Program graduates are among ISU's most successful students. Many of them receive top university awards, like the Outstanding Student Award, and have gone on to post-baccalaureate education in medicine, dentistry, other allied health occupations, veterinary medicine, law, business, public policy, and graduate programs.

### ***Student Affairs Division***

The mission of the Student Affairs Division is to provide outreach, activities, services, and programs to and advocacy for students that: supports their needs and goal attainment; facilitates learning and development; promotes health and wellness; creates challenging yet supportive environments; and strengthens diversity and embraces global perspectives, both on campus and in the community, through partnerships and collaboration. Concomitantly, Student Affairs provides advice and guidance to those

who seek to understand, appreciate, mentor and assist students. Under the purview of the Vice President for Student Affairs, the [Student Affairs](#) houses several [departments](#) that provide vital programs and services to support students. Some of these key programs, activities, and services are discussed below.

*University Counseling and Testing Service.* The mission of this unit is multipurpose. The [Counseling Center](#) supports the academic, emotional, social, vocational, spiritual, cultural, and professional development of students by offering counseling, assessment, outreach, training, and educational and health promotion services. In addition, the Center consults with faculty and staff about students and provides appropriate interventions. Lastly, the Counseling Center serves as a clinical training site for graduate students in the Counseling Program. The Center's three-year average for counseling sessions was 5,878 per year. In person counseling services are offered on the Pocatello and Idaho Falls campuses by Counseling Center personnel and by contract for Meridian students. Counseling Center personnel will also travel to Twin Falls to provide services, as needed.

Counseling Center staff are invited to classrooms to present materials on stress reduction, communication skills, anxiety, anger, and other topics. Workshops are presented at the Student Recreation Center, announced through the electronic student bulletin board and sent through email notification. Courses, workshops, and lectures are designed to meet the needs of specific individuals, groups, and departments. The three year average number of presentations was 132 per year.

The [Testing Center](#) offers a secure, professional, and proctored testing environment to meet individual, university, and community needs for admission, certification, licensure, correspondence, course placement, job placement, and academic course exams. Faculty may request proctored exams for any ISU course. Over 4,635 examinations were administered to students seeking admission to ISU, a specific academic program, or placement exam such as COMPASS. About 5,501 state and national examinations for a diverse array of license, certification, and admissions purposes were administered, including GRE, GMAT, and MAT.

*The Career Center.* A wide variety of academic credit support courses, presentations, and workshops related to career exploration are provided to ISU students through the [Career Center](#). An example is COUN 1150, Career and Life Planning that explores effective decision-making theories directed toward the student's life goals. Six sections totaling 159 students were offered in 2013-14. Individual assistance was directly provided to 1,679 students on resume writing, cover letters, and interviewing techniques. Two career fairs attracted over 700 participants in 2013-14. Counselors are also invited to present workshops and information in undergraduate and graduate courses geared toward career choices and academic success. Lastly, the Center provided clinical placements for graduate students in the Counseling Program.

The [Career Path Internship](#) program, administered through the Career Center, has been a particularly valuable resource for students to gain real world, paid experience in their chosen field of study or to explore career options in a meaningful way. Because students who are employed on campus and who work closely with faculty are more likely to persist and excel academically, the Career Path Internship program enhances student success. Institutional funding for the program and student participation continues to increase with \$1.7 million allocated for the 2013-14 school year. In addition, the program has been expanded to include off-campus placements with business and civic organizations.

*Diversity Resource Center.* This center assists ethnic and international students and organizations through the development and promotion of campus-wide activities that enhance multi-cultural awareness. The

*The Veterans' Sanctuary.* One of the first transition and support programs of its kind in the United States, ISU's [Veterans Sanctuary](#) was developed for veterans, by veterans, to provide exceptional service to military veterans of all eras attending ISU. The Sanctuary's "one-stop-shop" approach allows veterans to access all campus services, and many community services, through a single office. A support team provides assistance with G.I. Bill benefits and offers guidance from the moment student veterans arrive until they graduate. The Veteran's Sanctuary provides an extensive array of resources and support services, including a [getting started checklist](#), [outreach/college preparation](#), [orientations](#), [advising](#), [veteran's registration day](#), [disability resources](#), [tutoring](#), [counseling](#), and [scholarships](#). Tutoring services in English and math are free for student veterans, current service members, military dependents attending ISU, and ROTC cadets. A large, quiet study area with computers is provided in the Sanctuary located on the Pocatello campus.

Student veterans also have access to workforce preparation assistance. As an example, the [Career Closet](#) stocks interview-appropriate clothing for both men and women who are applying for jobs. Student veterans can meet with a student wardrobe advisor at the Veterans' Sanctuary, and together they select professional attire that becomes the student's property. If alterations are needed, the Career Closet staff will refer the student to a local participating tailor who is paid by the Veteran's Sanctuary. Other key aspects of the Sanctuary include its [Veteran's Club](#), [Advisory Committee](#), and [service projects](#). A [veteran's crisis hotline](#) is also available. In recognition of ISU's efforts, G.I. Jobs Magazine has listed ISU as a military-friendly school for 2010, 2011, and 2012, an honor given to the top 15 percent of colleges, universities and trade schools in the United States. In addition, the American Legion and Veterans of Foreign Wars (VFW) have awarded ISU with national citations.

*Learning Communities.* Formal learning communities in the residence halls at ISU provide a living/ learning academic focus for residents of similar interests. Learning communities are currently available for honor students, business/accounting majors, education majors, and students interested in the health professions. Learning communities provide both social and academic activities. Students in learning communities often are enrolled in the same class, have the opportunity to study together, interact outside of the classroom, participate in co-curricular activities, and form lasting friendships.

*Student Health Services.* This service provides primary, ambulatory medical care to students, and to a lesser extent, to faculty and staff. A mandatory student health activity fee covers unlimited office visits. Other medical procedures, tests and services are billed to the student's health insurance that is currently required by Board policy. Services include: ambulatory care, immunizations, advice, lab services, screening, psychiatric care and processing medical withdrawals. [Student Health Services](#) also provides clinical placements for students in health professions programs.

*New Student Orientation, Leadership and Service (LEAD).* This service includes orientation for new and transfer undergraduate students on the Pocatello and Idaho Falls campuses. The program focuses on academic success, involvement, campus resources and community service. The Leadership Program offers students opportunities to learn about and practice leadership in collaboration with ISU's Minor in Leadership. Service includes spring break volunteer trips and service to local communities.

*The Student Life Office.* The backbone of the Student Support Network providing student assistance, advising students on academic and non-academic policies and procedures, handling non-academic student grievances, administering the Student Conduct system, supporting the Academic Dishonesty and Scholastic Appeals Boards, convening and facilitating the Students of Concern Committee, composed of an academic affairs representative; the directors of Disability Services, Counseling and Testing Center, Student Health Services, Veterans Sanctuary, Campus Safety, and Housing Offices; University Counsel and the Vice President for Student Affairs. During 2013-14, the Student Life Office handled 259 student conduct cases, 156 student assistance cases, 48 students of concern, 32 academic conduct consults, 268 faculty/staff/parent consultations and 99 academic dishonesty reports. The *Student Conduct Code* was completely updated and revised in 2013-14 to ensure compliance with Title IX, VAWA and the Campus SaVE Act.

*The Early Learning Center.* This center, with locations in Pocatello and Idaho Falls, provides critical support for ISU students, faculty, and staff by delivering quality child care for their children, thereby meeting a fundamental need for a large segment of ISU's student population. The [Early Learning Center](#) offers a child-centered program for children between the ages of six weeks and eleven years and maintains safe and nurturing environments that promote the social, emotional, cognitive and physical development of children. This enables student parents to better focus on completing their education. The Center averages about 156 children a day, with an average of 313 children of students, faculty, and staff, and 99 children of alumni a year between the two sites. The Pocatello Center has received three stars under the IdahoSTARS Quality Rating (QRIS), and the Idaho Falls Center has received four stars, the highest rating available. Lastly, the Early Learning Center serves as a practicum/observation/research site for ISU and Idaho School District #25 high school students.

### **Finance and Administration**

[Diversity Resource Center.](#) This center, which reports to the Director of Affirmative Action/EEO and Diversity, assists ethnic and international students and organizations through the development and promotion of campus-wide activities that enhance multicultural awareness. In addition to its relationship with the Student Success Center, [Native American Academic Services](#), is also affiliated with the Diversity Resource Center and provides academic support for indigenous peoples to assist them in reaching their educational goals. Academic advising, tutoring, and advocacy are provided to help students understand the University culture. The Diversity Resource Center website sets forth [diversity statements](#) articulating the University's commitment to diversity and establishing guidelines in hiring diverse candidates that will help ensure institutional compliance with Affirmative Action/EEO diversity policies. It also provides links to [cultural student organizations](#) at ISU.

### **The Colleges**

In addition to centralized services, each of ISU's colleges and divisions maintain environments that enhance learning. These include labs, lounges, recital rooms, departmental libraries, simulation facilities, and tutoring. As an example, the College of Technology offers numerous successful support services for their prospective and current students. The [Adult Success Center](#) provides adult basic education involving free, comprehensive assessment and instruction in basic skills, including reading, writing, math, and English as a Second Language (ESL). The program provides literacy instruction, preparation for the GED® Tests and skills brush-up for college entrance or employment. The [Center for New Directions](#) offers events and annual workshops for students in transition, including career and educational counseling, mental health counseling, and other support services. The [Office of Student Services](#) offers [Success Workshops](#),

in person and online, for students in College of Technology programs who wish to enhance academic skills and learn information to help them be successful. These workshops are also available online. SkillsUSA, a national professional-technical student organization, provides opportunities for students to compete regionally and nationally to further hone competencies learned in their program area. This organization develops relationships outside the classroom while solidifying learning that takes place in the classroom. Some College of Technology programs participate in Live Works which allows students to participate in an environment similar to the workplace. Students provide services for customers/clients from campus and the community for minimal prices to cover product and equipment wear.

### **International Programs Office**

The population of international students at ISU has grown dramatically over recent years. Between Fall 2010 and Fall 2013, international students increased 153% or 561 students (from 367 students in Fall 2010 to 928 in Fall 2013). Recruitment, admission, and support services for this population are provided by the [International Programs Office](#). The [mission](#) of this office is to provide the best service and support possible for ISU’s international visitors (which includes degree-seeking students, visiting and exchange students, faculty, researchers, staff, and others) and to enhance foreign visitors’ stay at ISU, by providing quality cultural, academic, regulatory, and social programs. The [services](#) are comprehensive and critical to the success of ISU’s international student population.

Table 15: Student Headcount by Residency Status Fall 2010-Fall 2013 (end of term)

Residency Status	Fall 2013	Fall 2012	Fall 2011	Fall 2010	Latest Change	Latest % Change	Total Change	Total % Change
<b>Idaho Resident</b>	12,493	13,234	13,279	13,008	-741	-6%	-515	-4%
<b>International</b>	928	647	472	367	281	43%	561	153%
<b>Non Idaho Resident</b>	1,073	1,131	1,121	1,114	-58	-5%	-41	-4%
<b>Unknown</b>		1	1		-1	-100%	0	0%
<b>Totals</b>	<b>14,494</b>	<b>15,013</b>	<b>14,873</b>	<b>14,489</b>	<b>-519</b>	<b>-4%</b>	<b>5</b>	<b>0%</b>

### **The Library**

The multiple and varied resources available of [Eli M. Oboler Library](#) (discussed in Standard 2.E.) provide significant support for student learning. These include library holdings, librarians to assist students, and quiet places to study and research. The library also affords online access to articles and journals and makes available a variety of online self-guided tutorials including but not limited to academic integrity, plagiarism, search tools, citing sources, finding sources, and other research-based topics.

### **Technology Resources**

Technology is widely used to support learning at ISU. The [ISU website](#) provides information about policies and procedures; programs, degrees, and academic units; catalogs, calendars, and handbooks. Bengal Web, the student portal, is a critical resource for students. It provides access to, and information about, academic and nonacademic resources and support services. Students can register for classes, get course and financial aid information, and view and pay fees through BengalWeb.

Moodle serves as ISU’s primary learning management system. It supplements classroom instruction and provides the mechanism for online courses delivered through eISU. Moodle offers a user friendly interface and valuable tools for students and faculty members. The Instructional Technology Resource Center (ITRC) supports the Learning Management System, Moodle-ISU, provides support for Quality Assurance and review of online and blended courses, supports faculty using web conferencing, as well as

supports the development of various instructional media used in all types of courses (podcasts, audio enhanced PowerPoint, PDFs, etc. The ITRC offers regular workshops for faculty in the use of technology, learning design principles, and other technology tools offered by Idaho State University. Included in those training opportunities are workshops on using technology to provide equal access/accessibility to all students. These services are offered to all faculty whether teaching online, blended, or face-to-face classes.

Information Technology Services provides student computing resources throughout campus via labs and kiosks (15 labs and 26 kiosks with approximately 400 computers). The main lab in the Rendezvous is open 24 hours with consultants onsite to help with any general questions on the programs offered. The most current software is provided as well as specialized software and free printing. Wireless access and Google Apps accounts (email and other services). The Service (help) desk also provides students assistance with common computer issues and hands on help with wireless connection issues.

Many colleges also offer specific departmental computing labs and student support.

Idaho State University is currently evaluating options on how to best meet student technology needs whether it be via the traditional computing lab model, virtual labs, and/or moving to a laptop program for all students.

Evaluations are also currently underway to select a mobile applications platform for ISU. Information Technology Services is working with ISU student government leaders to select a system that meets the needs of students, identified through a recent survey.

2.D.2	The institution makes adequate provision for the safety and security of its students and their property at all locations where it offers programs and services. Crime statistics, campus security policies, and other disclosures required under federal and state regulations are made available in accordance with those regulations.
-------	---

The [Department of Public Safety](#) works to ensure the safety of all students, faculty, and staff at ISU, and provides service 24 hours a day, 365 days a year to the campus community. Through collaborative relationships with campus and community agencies and departments, Public Safety promotes cooperation and creates a secure atmosphere where learning can take place. Public Safety officers regularly attend regional training programs and are members of the Mountain West Campus Law Enforcement Association. Idaho State University Public Safety shares a statewide 700MHZ radio system. They also share a countywide computer system, making the interoperability for emergencies and drills invaluable.

The Pocatello campus is within the jurisdiction of the City of Pocatello's Police Department. City police patrol campus streets on a regular basis and work closely with Public Safety officers to resolve situations that occur on campus. Public Safety officers sit on the local emergency planning committee, share data base reporting and radio systems, meet monthly with fire and police departments, and conduct joint training with local law enforcement. Public Safety officers are available on the Pocatello campus 24 hours a day.

The ISU-Idaho Falls campus is within the jurisdiction of the Idaho Falls Police Department. A Public Safety security officer is on campus Monday through Friday from 8:00 a.m. to 4:00 p.m. Public Safety contracts with off-duty Idaho Falls police officers to ensure campus coverage from 4:00 p.m. to 11:00 p.m. Monday through Friday and on Saturdays from 12:00 p.m. to 6 pm. Idaho Falls police officers also patrol the area as part of routine city patrols.

ISU Meridian Health Science Center is within the jurisdiction of the Meridian Police Department. Meridian police patrol the campus area on a regular basis. A Public Safety officer is on site Monday through Friday 8:00am to 4:00pm. This is the only security officer that is not armed. After hours and on weekends Meridian police provide for the safety and security of the campus community. Similarly, the Boise Police Department is responsible for safety and security at the Boise Center Aerospace Laboratory, a research and teaching facility of ISU's Department of Geosciences. Idaho State University Twin Falls is located on the campus of the College of Southern Idaho and security is provided by the College of Southern Idaho Campus Security and the Twin Falls Police Department.

The Idaho Chiefs of Police Association (ICOPA) recently audited the Department's policies and procedures. This audit was successful, and makes Idaho State University the first and only university in the state of Idaho to become ICOPA accredited. By the end of 2014 there will also be crime analysis and threat assessment capabilities available through Public Safety.

Public Safety Security Officers have increased in functionality and value to the campuses they serve. They started as night watchmen and have grown to the important key players that they are today. As Officers' duties grew, they took on first responder responsibilities and are all graduates of the ISU Law Enforcement Academy which is Idaho Police Officers Standards certified. Upon graduation, all of the officers have passed the P.O.S.T. certification test. The officers receive annual P.O.S.T. certified training in the critical areas of their job. Officers are trained to patrol the campuses via vehicle, motorcycle, bicycle as well as using foot patrols.

Campus buildings are checked on a regular basis and statistics are kept through a building barcode check system. The officers patrol Nuclear Regulatory Commission regulated facilities at the reactor, the accelerator, and the R.I.S.E. complex, and receive annual NRC training and participate in annual drills at the NRC facilities.

The officers carry equipment in order to help them fulfill their duties and do so in the most professional manner possible. The amount of equipment and training they are responsible for has grown as their responsibilities have grown. Officers currently carry pepper spray, handcuffs, expandable batons and firearms. They are required to meet training and qualification expectations in order to carry and use this equipment. They also have individual WatchGuard cameras, radios and in car radar.

Public Safety officers are the first responders to every incident on campus and are expected to uphold the law as well as university policies such as the newly instated no smoking on campus policy and guns on campus law. In addition to responding to criminal activity and medical calls, they also provide an additional service by providing jump starts, vehicle unlocks, and escorts to anyone who feels they are in an unsafe situation. These officers are also key players in crime prevention and play an active role in all of the crime prevention methods listed later on in this section. All officers are Idaho Crime Prevention Association certified and have completed a crime prevention academy. Security officers also participate

in all drills and dignitary protection. The Patrol Division has large training and operations programs. These have grown over the years as their responsibilities have increased.

Public Safety dispatch is also available round the clock to help coordinate a response to issues developing on ISU campuses. Public Safety keeps university faculty, staff, and students, and families of students apprised and updated regarding emergencies. They are the primary point of contact for emergencies and missing persons on campus and work directly with family members in these instances. Dispatch is granted special rights to campus programs in order to better assist officers in locating personal student information, class schedules and other pertinent information in order to find and locate students and staff in emergency situations. Dispatch is also able to use these systems to verify employees for after hour access to campus buildings. Dispatch responds to multiple-line/multimedia calls from the public and internal/external entities for service information and for emergency medical, specialized team, hazardous materials, and fire. They assess call criticality, resource needs and availability, and initiate contact with response entities; re-determine relative priority; track officers by location, status, and activity type; acquire and provide officers with data; and relay and disseminate information. They make experience-based determinations regarding additional officer/resource needs; coordinate, track, and document high-risk operations; execute and coordinate emergency plans; manage communications and incident coordination for multiple agencies; determine need for additional communications center staffing during emergency or crisis operations and initiate manpower requests; and initiate calls to outside agencies for information or service needs. They provide the incoming shift with a detailed status briefing; participate in After Incident Reviews; ensure new team members manage duties and operations, and providing one-on-one training when necessary. The dispatch team is also vitally important to the compliance of the federal laws that campuses are accountable to. They assist with the day to day technical aspects of compliance. Dispatchers are the critical link between Public Safety, police, other emergency personnel, and the public. Dispatchers conduct phone conversations with people from differing socioeconomic backgrounds in emotionally charged and stressful circumstances, and from individuals with differing levels of comprehension and/or who may be under the influence of drugs or alcohol.

Public Safety staff communicates through email, website, and loud speaker announcements in a timely fashion with instructions to the community on how to maintain safety.

Public Safety meets the requirements of the Higher Education Opportunity Act by providing on its [website](#) crime reporting procedures, crime statistics, and additional information to inform the community about safety and security issues. The [Jeanne Clery Annual Security and Fire Safety Report](#) is also posted on the [Division of Student Affairs](#) website. In addition to providing crime information, ISU addresses safety by locating emergency “Blue Light” phones across the Pocatello, Idaho Falls and Meridian campuses which connect directly to local police departments, while red dot lines on office phones that connect directly to the Public Safety dispatch center.

In addition to these measures, Public Safety is also directly involved in several crime prevention efforts including: 24 hour escorts for faculty, staff and students, Students on Patrol, Neighborhood Watch, Rape Aggression Defense classes each fall and spring semester, building surveys, light surveys, Campus Cubs for the Early Learning Center and School District 25’s K-2<sup>nd</sup> grade classes that are held on campus at Albion Hall, and have increased the number of barcode checkpoints to 93 for the Pocatello campus and 17 for the Idaho Falls Campus. The responsibilities for reporting under the Clery act have also continued to grow

over the years as Clery now also holds campuses responsible for Title IX, VAWA and the campus saVE Act and also holds campuses responsible for keeping up to date with the annual updates to all of these laws.

Along with crime prevention Public Safety has worked hard to enhance the overall faculty, staff, and student safety on all three campuses. These enhancements have brought us to some staggering equipment totals considering they all started at zero. In addition to the increased equipment, there were also other enhancements which have brought Public Safety to where it is today: 38 AED's, 15 intrusion and over 50 fire alarms are tied to a central alarm station that is located in the dispatch center, 612 CCTV cameras, 42 DVRs, 3 NVRs, and 201 door access control systems, 39 interior notification systems and 5 exterior notification locations. Interior notification systems will be installed in all campus buildings by the end of 2014. CCTV and door access have doubled in the last 7 years and will continue to grow for many years to come. All of these systems are monitored by the 24 hour dispatch center.

The enhancements in crime prevention and campus safety are key factors in Idaho State University being ranked the 7<sup>th</sup> safest campus in the United States for the year 2012.

Due to the diligent efforts of all Public Safety staff ISU campuses now have emergency management in place. This includes one full time employee, two interns and two temporary employees that are designated solely to emergency management. Through the emergency management efforts the campus became a Storm Ready University in 2009, certified by the National Weather Service. In 2012 ISU received an Emergency Management and Preparedness (EMAP) grant audit in preparation for accreditation that identified several deficiencies. The University is currently addressing the deficiencies in preparation for an accreditation audit for certification in 2015. Some of the things that have come from emergency management are: Continuity of Operations Plans for all essential functions on campus. "Development of an all hazards Mitigation Plan to help reduce or prevent losses, a fully functional portable Emergency Operations Center that can be set up at three designated locations in Pocatello, one in Idaho Falls and one in Meridian, a mobile fully functional incident command/dispatch center, that was built in a bus, and can easily be driven to any location, a five-year drill schedule for all campus locations, and a computer tracking system for emergency drills, this mobile command/dispatch center is also used regularly for special events and emergencies. The University is a member of the Local Emergency Planning Council. It also works closely with first responders, homeland security and the 101<sup>st</sup> military Civil Service Team specializing in weapons of mass destruction. In addition to those items Emergency Management started conducting the fire drills for ISU in 2008 for all occupied buildings on all three campuses, and plans and conducts the yearly emergency exercises for the University. Emergency Management educates the campus community on preparedness through Newsletters and information booths. The University is also involved in community outreach through local emergency planning committee meetings.

Public Safety and Facilities Services jointly inform the campus and enforce regulations regarding fire safety, with municipal fire departments responding to fire alarms on campus. The safety of facilities is also monitored through ISU's [Campus Safety Committee](#) that is comprised of representatives from academic and nonacademic units across the campus. This committee's responsibility is to make recommendations to the Vice President of Finance and Administration concerning the security of ISU students and employees, unsafe physical or environmental conditions on campus, employee safety awareness education and training, safety training for laboratories and classrooms, safety issues rising from vehicular and pedestrian conditions, and similar concerns. Additional safety procedures exist for departments with specialized functions.

In 2014 Idaho enacted changes to Idaho Code §18-3309 to allow retired law enforcement officers and citizens with enhanced conceal carry permits to carry concealed weapons on campuses, with the exception of dormitories and certain event centers. While the campus is one of the safest in the nation, and the risk to the campus community is limited due to the enactment of this law, ISU has taken steps to ensure it have the capability to deal with any potential incidents arising from misunderstandings or abuse of the constitutional privileges the law seeks to protect. Idaho State University issued updated policies regarding weapons on campus, expanded its Public Safety operations by arming its patrol officers, and obtained hand-held metal detectors to assist in searches of event guests. The University has requested an additional \$789,700 to facilitate the expansion of its patrol force, enhancement of its training and certification programs, the conversion of most dispatch personnel from student officers to permanent employees, and the hiring of a full time emergency manager. These measures, in concert with the many safety and security programs already in place, are sufficient to ensure ISU remains a safe place for learning and research.

2.D.3	Consistent with its mission, core themes, and characteristics, the institution recruits and admits students with the potential to benefit from its educational offerings. It orients students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information and advising about relevant academic requirements, including graduation and transfer policies.
-------	---

Undergraduate admission standards for undergraduate students, College of Technology students, and graduate students appear in online versions of ISU’s [undergraduate catalog](#) and in print and online versions of the [graduate catalog](#), respectively. Policies and procedures pertaining to transfer and graduation also appear in the appropriate sections of the undergraduate and graduate catalogs. In addition, the ISU website contains detailed, easily located information about general admission policies, processes, and requirements, as well as program specific requirements and processes. This information enables students with a wide variety of backgrounds, qualifications, and interests to determine the suitability of ISU for meeting their educational goals. For example, by navigating the Future Students link on the main page, any prospective student can find [admission requirements](#) and other information to assist them in evaluating ISU’s programs and resources. Prospective and new students can learn about ISU rules, regulations for conduct, rights, and responsibilities through the [ISU Student Handbook](#) and the undergraduate and graduate catalogs, in residence hall floor meetings, or during orientation.

The Admissions Visitor Center has primary responsibility for outreach and recruitment of domestic undergraduate students. [Admissions advisors](#) are assigned responsibility for specific states and geographic areas, and they work with high schools and junior colleges, as well as coordinators within schools and colleges on the ISU campus, to provide prospective students with timely, quality information about ISU programs, university requirements, and timelines for degree completion. Admission advisors make individual presentations to prospective students in local schools, junior colleges, college fairs, during campus visits, and other settings. Special emphasis is placed on the admission process, including information about financial aid. The Admissions Visitor Center staff is assisted in recruitment by the ISU Ambassador Program that uses twenty specially trained students to give campus tours, attend ISU Information Nights, admitted students events, Bengal Visits Day and other events, and assist with communications and contacts with prospective and admitted students. The International Programs Office

is responsible for the recruitment, admission, and ongoing support of undergraduate and graduate international students. In performing its work, the International Programs staff collaborates with the colleges and the Graduate School.

[New student orientation](#) at ISU is held each fall and spring semester to introduce new and transfer students to the campus and promote strategies for academic, social, and cultural success and engagement. It consists of three phases. First time, full and part-time students may attend an advising and registration program (New Freshman Registration) in April, where they meet with an advisor to discuss options for majors and degree plans and to register for fall semester classes. A separate New Student Orientation program that occurs just prior to the start of fall term is required and offered to new, first-time students, their parents and guests. Among other activities, this orientation provides the opportunity for students to visit the colleges and meet with a faculty member in the students' selected field of study. Orientation also takes place at the Idaho Falls and Meridian campuses during this time frame. Much of the orientation programming focuses on academic readiness, adjustment and social networking, available support services and resources, co-curricular activities that support learning, community building and networking with faculty, staff and students. The last phase is a mandated online orientation offered through a partnership with EverFi that includes their Alcohol EDU and Haven portals. These portals focus on critical life skills and education on alcohol use and abuse and sexual assault prevention, including Title IX information. Enrolled students are required to complete Part One of this program by the end of the year. Idaho State University's Student Orientation Facebook page and Twitter feed provide additional resources. In addition to online graduate student orientation, additional opportunities are afforded to graduate students in the form of a face-to-face orientation hosted by the Graduate School in the early fall semester. Individual graduate programs often offer their own orientation events tailored to their cohort.

Academic advising is an essential resource for students entering the University to learn information relevant to their education and degree completion. It occurs at multiple levels. As discussed in Standard 2.D.1 and 2.D.10, Central Academic Advising, which is part of Enrollment Management, plays a primary role in advising students regarding general university requirements. Central Academic Advising delivers mandatory face-to-face or online academic [advising sessions](#) for all new students, and its [website](#) provides resources specifically for freshman and transfer students, including forms, informational handouts, and academic degree plans. Academic advising also occurs on the college level. Academic units in the colleges assign faculty and staff members to serve as advisors, primarily about program specific major and degree requirements. For new graduate students, a temporary advisor (department chairperson or graduate program director) is often assigned upon admission to the graduate school until a permanent advisor for the students program of study is selected.

2.D.4	In the event of program elimination or significant change in requirements, the institution makes appropriate arrangements to ensure that students enrolled in the program have an opportunity to complete their program in a timely manner with a minimum of disruption.
-------	--

Idaho State University follows Board policy [III.G.7.](#) in the event a program is discontinued. Idaho State University policy provides that, if a major program is discontinued by the University and the Board, students enrolled will be assisted in transferring to an equivalent program in the state. If there is no similar program within the state, currently enrolled students will be permitted to complete the program in accordance with existing graduation requirements (see [undergraduate catalog](#)).

2.D.5	The institution publishes in a catalog, or provides in a manner reasonably available to students and other stakeholders, current and accurate information that includes: a) Institutional mission and core themes; b) Entrance requirements and procedures; c) Grading policy;
	d) Information on academic programs and courses, including degree and program completion requirements, expected learning outcomes, required course sequences, and projected timelines to completion based on normal student progress and the frequency of course offerings;
	e) Names, titles, degrees held, and conferring institutions for administrators and full-time faculty;
	f) Rules, regulations for conduct, rights, and responsibilities; g) Tuition, fees, and other program costs; h) Refund policies and procedures for students who withdraw from enrollment; i) Opportunities and requirements for financial aid; and j) Academic calendar.

Idaho State University’s [undergraduate](#) and [graduate](#) catalogs, available in print and online, are the official repositories of information about all ISU academic procedures, policies, and programs, including graduate and undergraduate university and departmental entrance requirements and procedures; university and departmental grading policies; names, titles, degrees held, and conferring institutions for full-time and administrative faculty; tuition, fees, and other program costs; refund policies and procedures for students who withdraw from enrollment; opportunities and requirements for financial aid; and the academic calendar. The online undergraduate catalog is currently divided into the following categories:

About Idaho State University  
Academic Information  
Services for Students  
All Courses  
College of Arts and Letters  
College of Business  
Division of Health Sciences

College of Science and Engineering  
College of Education  
College of Technology  
Idaho Museum of Natural History  
Institutes  
Faculty  
Previous Catalogs

After significant research and assessment, it is the intent of the University to update the online undergraduate catalog, streamlining it and the graduate catalog; to fully move the graduate catalog to an online format consistent with the undergraduate catalog; and in doing so, provide greater transparency and ease of access for degree and program information.

In addition to the catalogs, departmental websites and the catalog also provide information on academic programs and courses, including degree and program completion requirements, required course sequences, and projected timelines to completion based on normal student progress and the frequency of course offerings. For example, course listings in the catalog, in addition to the course description, also list the academic term in which the course is offered. Expected learning outcomes are listed in the general university goals section and under departmental listings in the Undergraduate Catalog as well as in individual course syllabi. Rules, regulations for conduct, rights, and responsibilities which govern student life are all published in the [ISU Student Handbook](#).

2.D.6	Publications describing educational programs include accurate information on:
	a) National and/or state legal eligibility requirements for licensure or entry into an occupation or profession for which education and training are offered;
	b) Descriptions of unique requirements for employment and advancement in the occupation or profession.

The ISU [undergraduate](#) and [graduate](#) catalogs, as well as all educational program websites contain information regarding academic degree programs, certificates and licensures available, accreditations, alternate routes to certification (if applicable), admission standards, graduation requirements, and requirements for certification or licensure. In addition, where applicable, descriptions of unique requirements for employment and advancement in the occupation or profession are included, such as background checks and fingerprinting for applicants to teacher education programs.

2.D.7	The institution adopts and adheres to policies and procedures regarding the secure retention of student records, including provision for reliable and retrievable backup of those records, regardless of their form. The institution publishes and follows established policies for confidentiality and release of student records.
-------	---

Idaho State University's [Office of the Registrar](#) is an independent, neutral records administration unit. It manages and maintains access to present, past, and future student academic records and to information created and maintained by the University to satisfy state and federal regulations and to pursue institutional core themes and goals. The Office of the Registrar accomplishes this critical work by providing records valuation, process analysis, procedural and policy development, and advisory services throughout the University. Well-defined processes govern the backup and storage of student records to ensure their secure retention. The backup of data is a two-step process. Data (including applications and OS) is backed up to disk first, where de-duplication occurs, and then is backed up to tape. The initial backup of the records database to disk is kept for 30 days; whereas, the subsequent backup to tape is retained indefinitely. File system backup tapes are kept for six months. Full data backups are taken weekly on Friday nights, and incremental backups are taken every other night. The permanent backup tapes are taken offsite on Tuesdays.

Student Conduct records are maintained solely by the Student Life Office, within the Vice President for Student Affairs suite. Records are maintained both in paper format in a locked file cabinet and

electronically on a separate server drive that can only be accessed by network authentication and only those with authorization can view or make changes. Records are maintained for a minimum of five years, unless the student has been suspended or expelled and then the record is kept permanently. These records may be released with the written approval of the student or by Court ordered subpoena.

Idaho State University complies with the Family Educational Rights and Privacy Act (FERPA) and other policies and procedures for the confidentiality and release of student records. The Office of the Registrar's website provides comprehensive information regarding [FERPA](#), and the rights it affords [students](#), and its application to [faculty and staff](#). Idaho State University [policy](#) governing university information technology services requires all users to follow best practices in data collection, retention, storage, and release as it pertains to student records. This is intended to ensure compliance with FERPA and other policies and procedures for the confidentiality and release of student records.

Further, given ISU's health sciences mission, it also complies with the Health Insurance Portability & Accountability Act (HIPAA). Several of the University's clinics have been designated as health care components which means they must comply with HIPAA rules and regulations. Additional clinics may be designated if they begin performing HIPAA covered transactions. The University is committed to protecting confidentiality of protected health information and in complying with federal and state regulations regarding privacy and security of protected health information and has policy governing HIPAA compliance.

2.D.8	The institution provides an effective and accountable program of financial aid consistent with its mission, student needs, and institutional resources. Information regarding the categories of financial assistance (such as scholarships, grants, and loans) is published and made available to prospective and enrolled students.
-------	--

The mission of ISU's [Financial Aid and Scholarships Office](#) is to facilitate higher education by providing guidance, information, and support for individuals and families who are interested in financial aid. Information about the department and services is published on several websites and in the [undergraduate](#) catalog and the [graduate](#) catalog. Exceptional customer service is paramount to the full-time staff of seventeen employees. Their activities and functions include outreach efforts; processing applications; determining student eligibility; awarding and distributing federal, state, institutional, and outside funded financial aid; complying with rules and regulations that govern the distribution of financial aid; minimizing procedural barriers; providing efficient service to students who complete the necessary requirements; and demonstrating capable administration of financial aid program funds.

The Financial Aid and Scholarships website publishes extensive information regarding financial aid and scholarships. It is designed to apprise students of the various types of financial aid, to assist students in making informed decisions regarding their financial aid, and to make students aware of the impact their actions can have on a financial aid award, such as withdrawing from classes, dropping below threshold GPA levels for eligibility, repeating courses, etc.). Important information is also provided in brochures and flyers distributed at various informational events (e.g., FAFSA Completion Day, Financial Aid Nights, recruitment events, etc.) and through BengalWeb, ISU's online portal for students. There is also an index for consumer information available on the website.

In addition to assisting graduate students with student loan eligibility, the Financial Aid and Scholarship Office is instrumental in assisting with campus-based aid, such as special non-resident waivers, loans, and college work study for graduate students.

The effectiveness of the Financial Aid and Scholarships Office is evidenced by the number of financial aid applications processed and number of students awarded financial aid and scholarships each year. For example, in fiscal year 2012-13 over 18,000 financial aid applications were processed and over \$119 million in financial aid and scholarships was awarded to 11,833 ISU students. Financial Aid is also held accountable by having the A-133 audit annually. Additionally, ISU participates in the Federal Student Aid (FSA) Quality Assurance (QA) program where verification activities are reported to the U. S. Department of Education every other year for review and analysis. The Scholarship Office undergoes an audit review annually when the ISU Foundation Office is audited.

2.D.9	Students receiving financial assistance are informed of any repayment obligations. The institution regularly monitors its student loan programs and the institution's loan default rate.
-------	--

The Financial Aid Office facilitates student access to federal direct student loan programs. It works with the Admissions Office and the Office of the Registrar to administer aid programs to eligible students. Student borrowers receive information regarding repayment terms when they complete the Master Promissory Note and Entrance Counseling that ISU requires for first-time borrowers prior to disbursement. Idaho State University uses the federal website for this purpose, along with the information provided on the Financial Aid and Scholarships website and in BengalWeb. Student borrowers receive the information a second time when they complete Loan Exit Counseling required upon leaving the ISU.

Each September the U.S. Department of Education notifies ISU of its default rate on student loans, which it closely monitors. The three year cohort default rate is currently 13.4%. In light of the default rate, ISU has contracted with the Utah Higher Education Assistance Authority to help manage the students who are delinquent and in danger of defaulting. The Financial Aid Office has also started a default prevention effort by attempting to contact borrowers who are 60 or 90 days delinquent and encouraging the borrower to contact their loan servicer. The Financial Aid Office is also required to report to the U.S. Department of Education through the Fiscal Operations Report and Application to Participate (*FISAP*) each September.

2.D.10	The institution designs, maintains, and evaluates a systematic and effective program of academic advisement to support student development and success. Personnel responsible for advising students are knowledgeable of the curriculum, program requirements, and graduation requirements and are adequately prepared to successfully fulfill their responsibilities. Advising requirements and responsibilities are defined, published, and made available to students.
--------	---

Because academic advising is an essential ingredient to student development and success, ISU has in place a systematic and effective program of academic advisement to support students on both central and local levels of the University. All students have access to the Central Academic Advising's exceptional staff of

advisors and extensive online resources at any point during their pursuit of a degree. Students attending outreach campuses in Idaho Falls, Twin Falls, and Meridian have access on [campus](#) to Central Academic Advising advisors as well. Students in a professional-technical major are provided a full array of advising services and resources through the College of Technology [Student Services](#). Additionally, career counseling services are available in the [Career Center](#) to all ISU students. Academic advising also occurs on the local level in colleges and outreach centers. Academic units in the colleges assign faculty and staff members to serve as advisors, primarily about program specific major and degree requirements. The importance placed on academic advising is reflected in university ([II.H.1.c.\(1\)](#)) and college workload policies that credit advising as a component of faculty workload.

### ***Advising for Student Development and Success***

As discussed in Standard 2.D.1, [Central Academic Advising](#), which is part of the newly formed Enrollment Management unit within Academic Affairs, plays a primary role in advising students regarding university academic policies and procedures, curriculum and degree planning, and catalog requirements for graduation. In addition to in person counseling and advising services, the Central Academic Advising [website](#) provides a variety of resources including forms, informational handouts, and academic degree plans. All [first semester](#) and [second semester](#) freshmen must complete an online advising session on Fundamentals of Advisement and Registration, and all [transfer](#) students must complete an online advising session on Transfer Fundamentals of Advising and Registration. To ensure this occurs, a hold is placed in the Banner ERP system that blocks these students from registering for courses until they have completed the required advising session. As an alternative to the online session, first semester freshmen can satisfy the advising requirement by attending a new freshmen registration and advising event held in April. Participating freshmen can meet with academic advisors, Registrar's staff, and faculty and be assisted with degree planning, class schedules, and registration for fall semester (see Standard 2.D.3). Advisors are also available at new student orientation in the fall to continue providing advising support at the earliest points in a student's academic career. Regarding new transfer students, once they have completed their mandatory online advising session, these students are encouraged to meet with a faculty advisor in their discipline. If they have not selected a major, they are urged to meet with an advisor in Central Academic Advising.

Academic advising is available throughout a student's career. Each semester Central Academic Advising sponsors campaigns aimed at getting students to meet with an advisor. These include Be Advised, Declare Your Major, and Use Your ISU EMAIL account. The Central Academic Advising website also provides online advising sessions and other resources, like [The Advisor](#), for convenient access by all students. Student advising has become a more collaborative process as well (Standard 2.D.1). Units with advising functions, like Admissions, Recruitment, Central Academic Advising, TRiO, the Student Success Center, and the colleges, are sharing information about advising issues and solutions. Implementation of DegreeWorks software (Standard 2.A.21), along with efforts to increase communication between faculty and Central Academic Advising staff, helps ensure that students get timely, useful, and accurate information and advising about relevant academic and program related requirements throughout their career at ISU.

### ***Advising for Majors***

Students can also access online information about the [basic advising structure](#) to identify the initial steps in selecting a major and being assigned an advisor. For students who identify their choice of major on their admission application, a faculty or staff advisor will be assigned based on that designation. Central Academic Advising will also appear in the Banner ERP system as an advisor of record until the student

contacts the department of their major and is assigned a faculty advisor. The department assigns a major advisor when contacted by the student and submits an advisor change request to Central Academic Advising. From that point, the student's major and departmental advisor appears in the Banner ERP system and can be captured in institutional reports reflecting program majors, faculty workload, and similar performance measures. For students who are undecided as to their major, Central Academic Advising remains in the Banner ERP system as the advisor of record.

To assist undecided, transitioning, or prospective students, [faculty mentors](#) are available who can provide information about various disciplines. These services are valuable in helping students understand more fully what a field of study will entail and what opportunities a degree in the field will provide. Even those students who have identified their major area of interest are encouraged to meet with a mentor before officially declaring a major.

For graduate students, a temporary advisor (department chairperson or graduate program director) is often assigned upon admission to the Graduate School. In these cases, a permanent advisor for the student's program of study is then selected.

### ***Advising by Knowledgeable Personnel***

Each of the Central Academic Advising advisors has an area of specialty as well as the education and training to respond to any advising situation. Advisors are cross-trained, and this cross-training, along with specific expertise, enhances productivity as well as customer service. The Central Academic Advising staff have received numerous formal and informal commendations students, faculty, and parents. Central Academic Advising advisors are involved in all aspects of the undergraduate experience: recruitment, catalog requirements, admission, registration, retention, general education, major degree plans, student life, financial aid and scholarship, academic probation, and graduation. Additionally, the director of Central Academic Advising serves on a number of university committees to ensure communication among units regarding issues that impact student success. Examples include the Undergraduate Curriculum Council; the University Retention Committee; the Task Force on Freshmen Orientation, Advising and Registration; the Advising, Registration, Finance, and Financial Aid group, and various ad hoc committees.

2.D.11	Co-curricular activities are consistent with the institution's mission, core themes, programs, and services and are governed appropriately.
--------	---

The Division of Student Affairs at ISU offers a wide array of activities and resources to help complement students' experiences outside of the classroom.

There are more than 160 [student organizations and clubs](#), primarily on the main Pocatello campus, with a limited number of opportunities on the Idaho Falls and Meridian campuses. Campus involvement allows students to build relationships, engage with and learn about others from different backgrounds with different life experiences and abilities, and participate in activities and programs that enrich their lives and complement what they are learning in the classroom. Students acquire important leadership experiences and skills in organizing and directing these organizations. The interests and abilities of ISU students vary considerably which allows for a wide variety of academic, professional, cultural, religious, service, and special interest organizations including, honor societies, sports clubs and Greek life.

The [Student Activities Board](#), [Summer Activities Board](#), [Union Program Council](#), and other student organizations host a wide variety of student and community centered activities. These include entertainment such as movies, concerts, theatrical projects, and family events to homecoming activities, to educational programming. Educational programming is diverse; ranging from enhancing financial management skills to voter registration drives and civic engagement, and healthy lifestyles. The Student Union provides funding for and partners with the Diversity Center to sponsor cultural events that connect students and the community in learning about and celebrating unique cultures. The Pond Student Union houses a newly renovated and remodeled Games Center with video games, billiards, ping pong, and bowling, as well as Benny's Pantry that provides groceries and personal sundries for students, faculty, and staff in need.

The [Craft Shop](#) on the Pocatello campus offers a wide variety of classes and services for students and community members to learn new skills.

[Campus Recreation](#) is located in the newly completed addition to Reed Gym. The new Student Recreation Center offers over 100,000 square feet of recreation space and houses indoor courts for tennis, racquetball, basketball, and a large indoor climbing wall. Additionally, weights, fitness machines, and cardio areas, including an indoor track, allow students to enjoy physical activities and foster healthy living. Intramural programs are also available through Campus Recreation with about 30 activities from which to choose.

The [Outdoor Adventure Center](#) provides students, faculty and staff with outdoor opportunities through for credit classes in collaboration with the College of Education, workshops, special events, and common adventure trips. The Outdoor Adventure Center offers 300 trips a year, including kayaking, rafting, climbing mountain biking, horseback riding, kayak touring, canoeing, road biking, alpine and cross-country skiing, backpacking, and ice climbing. The Cooperative Wilderness Handicapped Outdoor Group (CW HOG) offers recreational activities for people of all abilities. The CW HOG's Alpine Tower is a fifty foot tall, self-supporting structure providing unique challenges and team-oriented experiences for the ISU and Pocatello community. It is designed to incorporate both low and high challenge course elements including those for persons with disabilities. Special events include the Pocatello Pump, a rock climbing competition, CW HOG's PIG-OUT fundraising dinner, and the Pocatello Ski Swap, along with other fundraising and recreation related presentations.

The Earl R. Pond Student Union (Pocatello) and the Samuel H. Bennion Student Union (Idaho Falls) serve as focal points for campus life and experiential education. Facilities include computer labs, food courts, bookstores, meeting rooms, and student government offices. The Pond Student Union also offers games, bowling, a barbershop, KISU radio station, the Outdoor Adventure Center, Bengal Theater, Craft Shop, art gallery, Creative Productions, and much more. The Involvement Center is located on the first floor of the Pond Student Union and is home to the Student Activities Board, Student Organizations, and Greek Life offices.

2.D.12 If the institution operates auxiliary services (such as student housing, food service, and bookstore), they support the institution’s mission, contribute to the intellectual climate of the campus community, and enhance the quality of the learning environment. Students, faculty, staff, and administrators have opportunities for input regarding these services.

Idaho State University’s auxiliary services support students and their environment through traditional, suite and apartment style student housing, food services (contracted through Chartwells) and a bookstore (contracted through Follett) in the Ear R. Pond Student Union on the Pocatello Campus. Food Services are offered in the Bennion Student Union on the Idaho Falls Campus. Food Services has a student advisory board that provides input into the meal and snack offerings available. In addition, food services comment cards are readily identifiable in food services venues and suggestions and ideas are encouraged.

Housing and Residence Life are actively engaged in recruiting faculty to live in apartments within traditional housing facilities.

2.D.13 Intercollegiate athletic and other co-curricular programs (if offered) and related financial operations are consistent with the institution’s mission and conducted with appropriate institutional oversight. Admission requirements and procedures, academic standards, degree requirements, and financial aid awards for students participating in co-curricular programs are consistent with those for other students.

Idaho State University consistently applies admission, academic standards, degree requirements, and financial aid policies to all students, irrespective of their involvement in intercollegiate athletic or other co-curricular activities. The Provost and Vice President for Academic Affairs, in consultation with the faculty, has responsibility for setting and maintaining academic standards in compliance with Board policies. The Registrar and Directors of Admission, Financial Aid, Scholarships, and the University Bursar have responsibility to ensure that standards, policies, and procedures are applied appropriately and consistently in their areas of responsibility. Intercollegiate athletes and students participating in any co-curricular programs at ISU follow the same rules and regulations outlined under Board and ISU policy.

Athletes and students participating in co-curricular programs receive scholarships based on the recommendation of committees and are cleared through the ISU Scholarship Office. Students receiving scholarships must meet criteria outlined by the scholarship and respective scholarship committees or staff. Not all athletes and participants of co-curricular programs receive scholarships due to limited scholarship dollars. NCAA policies require that intercollegiate athletes’ progression toward graduation is monitored more closely than non-athletes, and student athletes must achieve certain benchmarks each year toward degree completion. Student athletes and students participating in co-curricular programs are not given special/different treatment or privileges regarding academic standards. Athletes and students in co-curricular programs must meet the same expectations as any other students regarding academic assignments, grading scales, testing, attendance, etc. Policies in the [ISU Student Handbook](#) apply equally to all ISU students.

In 2011-12 Idaho State University tied with Eastern Washington University for the most student-athletes that were named Big Sky conference Academic All-Stars. Idaho State University went on to win the award again in 2012-2013 and in 2013-2014.

Idaho State University's academic progress rate (APR) by sport in 2012-2013, compared to the Big Sky Conference, were number one for the following six sports: women's basketball, women's golf, indoor track and field –men, outdoor track-men, indoor track and field –women, and outdoor track-women.

The average GPA for ISU student athletes continues to increase. In Fall 2009 the average cumulative GPA was 2.88 compared to 3.24 in Fall 2013.

Part of the success of ISU's student-athletes can be attributed to ISU's Student-Athlete Support program. The Student-Athlete Support Center and Guided Study Area was established to provide student-athletes at Idaho State University with academic assistance to help them take full advantage of educational opportunities so that they can achieve the most from their educational experience at Idaho State University. The department of Intercollegiate Athletics personnel understands that a student-athlete is in a unique situation with additional responsibilities and time constraints. The department has every interest in supporting student-athletes academically and athletically.

This multifaceted program is directed towards maximizing the academic experience for all student-athletes. The program offers the following services to student-athletes:

- Athletic Academic Advising
- Guided Studies Area (Study Table)
- Content Area Tutoring (CAT) Program
- Tutor Drop in Centers
- Mentoring Program
- Life Skills/First Year Seminar Courses & Supplemental Life Skills Workshops
- Compliance

2.D.14	The institution maintains an effective identity verification process for students enrolled in distance education courses and programs to establish that the student enrolled in the distance education course or program is the same person whose achievements are evaluated and credentialed. The institution ensures the identity verification process for distance education students protects student privacy and that students are informed, in writing at the time of enrollment, of current and projected charges associated with the identity verification process.
--------	---

Each ISU student is issued a unique identification number (Bengal number), access to BengalWeb and an ISU email account. Enrolled students are provided with unique usernames and passwords to ensure that they have sole control over their online activities. The Instructional Technology Resource Center facilitates distance education courses and online programs on the ISU campus, and faculty members choose from additional precautions that limit the opportunities for academic dishonesty to ensure the integrity of distance learning programs, including test design within Moodle. Some programs host distance learning students on campus at the beginning of the term or program and closely monitor the consistency of their work once the students return to their distant locations. Additional faculty members use [proctored examinations](#). Proctors for distance exams must be university or civil employees, or the exams must be taken at approved testing centers. Idaho State University policy and the Academic Dishonesty Policy requires all distance learning students to maintain the same standards for integrity and honesty as students attending class in-person.

## Standard 2.E Library and Information Resources

Information related and supporting Information Technology (IT) can be found in response to Standards 2.G.5-8. below.

2.E.1	Consistent with its mission and core themes, the institution holds or provides access to library and information resources with an appropriate level of currency, depth, and breadth to support the institution's mission, core themes, programs, and services, wherever offered and however delivered.
-------	---

The [Eli M. Oboler Library](#) serves the ISU community by providing collections and services in support of the University's teaching and research missions. As the largest state-supported library in eastern Idaho, the library plays a role in the development of university cooperative programs and in the provision of library services to the citizens of Idaho. The Eli M. Oboler Library is described as one library geographically dispersed, united by technology. Pocatello is home to the main library collection and includes the Idaho Health Sciences Library and Arthur P. Oliver Law Library. It is a selective depository library for government documents and has a variety of collections, including Special Collections – which includes Intermountain West, rare books and manuscripts, reference, Idaho documents, U.S. government documents, health sciences, maps, newspapers, and periodicals.

The Library Dean and University Librarian reports to the Provost and Vice President for Academic Affairs and is a member of the Deans' Council. As a peer with other deans, the Library Dean is kept informed of the needs of the colleges and outreach centers and participates in critical conversations relative to the curricular and research initiatives of the University. Library faculty are tenure and non-tenure-track, which directly informs their work to support the collection and service elements of library operations.

The Eli M. Oboler Library has scholarly resources that support fulfillment of ISU's mission and core themes. Purchases and subscription services for the subject-based library collection are made jointly between library faculty and departmental faculty through a liaison system that connects a library faculty member and a department-assigned faculty representative from each academic department. Together these individuals, with input from department faculty, make decisions on the composition of the subject collection that will support the programs in the academic department by ensuring appropriate levels of currency, depth, and breadth of the resources. The Library maintains a collection of current cross-disciplinary and reference resources tailored to the programs offered at ISU. This is reflected in the array of 169 databases that support scholarly activity and learning.

The Eli M. Oboler Library invests substantial effort in providing electronic resources to the ISU community. Electronic materials, books, journals, and databases are purchased under license agreements that enable access for student, staff, and faculty, at all ISU campuses. Materials not in the ISU Library collection may be borrowed via a worldwide bibliographic utility system and are made available to the ISU community without charge. In addition to providing resources for teaching, scholarship and research, the Library's mission encompasses training in the use of these resources. The Library faculty and staff provide a variety of instructional services in classes ranging from introductory sessions in general education courses to specialized sessions designed for specific graduate degree programs. Library web resources include links to tutorials on varied topics such as Academic Integrity and Research Success.

Since 1908, the ISU Library and its institutional predecessors have participated in the Federal Depository Library Program. These libraries serve the public by collecting, organizing, maintaining, preserving, and assisting users with information from the federal government. Depository libraries provide local, no-fee access to federal government information in an impartial environment with professional assistance. Selecting 65% of all Federal Depository program materials for its collection, the Eli M. Oboler Library is the largest selective depository in the state and is the largest depository library of any type serving the Second Congressional District of Idaho.

Idaho State University's Idaho Health Sciences Library within the Eli M. Oboler Library is a member of the National Network of Libraries of Medicine that strives to enhance access to health information for health professionals and the public. Idaho State University's Idaho Health Sciences Library serves as a resource library for the state of Idaho within the National Network of Libraries of Medicine—Pacific Northwest region.

Idaho State University's Library also works with the broader academic library community to leverage resources through cooperative purchasing. Idaho academic libraries, including those at ISU, University of Idaho, and Boise State University, are each purchasing members of the Orbis Cascade Alliance, a group of academic libraries largely in Washington and Oregon. Through that membership, libraries experience discounts on resources across a variety of subjects. EPSCoR Science Information Group, which is a cooperative of libraries at EPSCoR institutions, is another important cooperative buying group ISU belongs to. Through this cooperative, ISU and other institutions are able to buy resources to support the sciences and engineering – specifically tailored to the particular program needs at the respective institutions.

Libraries at ISU, University of Idaho, and Boise State University have established reciprocal borrowing agreements for interlibrary loans. Idaho State University's Library will lend books requested by University of Idaho or Boise State University students with the expectation these university libraries will provide similar services for ISU students.

The Eli M. Oboler Library engages with the local and regional communities in distinct ways. The Library is open to the public, and members of the public can check out books from the collection after obtaining a community borrower's card. The public is also able to use designated computers in the Library for daily one-hour segments by obtaining a guest pass. Outreach may also involve sharing expertise and resources with other entities such as the Idaho National Laboratory and the Bannock County Law Library. In providing these types of services, the Library contributes to economic development within the community and region.

Although the Library strives to address each academic department's curricular and research needs through carefully selected book purchases and journal subscriptions, its ability to provide this support has been limited by a Library budget that struggles to maintain consistent levels of overall purchasing power from year to year in the face of ongoing, excessive inflation in the cost of scholarly resources, greatly exceeding the overall rate of inflation, mostly available only from a single source from monopolistic publishers; which continually erodes the Library's purchasing power. In 2007 the state legislature discontinued yearly funding appropriations to help cover inflationary costs of academic library collections at state institutions.

Idaho State University administration has taken positive steps to offset this financial reality. During certain fiscal years when academic units overall were required to absorb deep budget cuts, the University worked

to support the Library. In October 2011 the Library was granted a permanent increase to base from the University sufficient to compensate for the 2007 legislative discontinuance of inflationary support for the years 2008-11. Ongoing inflation since 2012 continues to cause issues in the continuation and enhancement of collections. Failure of the state to provide an annual inflationary increase amounts to a cut – even when the library base budget is left untouched internally. The library has dealt with this through strategic reallocations of resources and creating internal cost efficiencies to maintain service levels for the campus.

The issue of inflation in materials costs is an ongoing concern for the Library administration which ISU is trying to approach through development of a strategic restructuring of its finances which includes reviews of library allocations, selective changes in resource purchases, careful examination of expenditures with an eye to cost savings and reallocation, examination of fee structures for services, and creating more transparent financial accountability for the campus. The University is integrating better technology, such as improvements in its interlibrary loan services, to better meet the resource needs of library users. The goal is create a sustainable financial model with the potential for long term positive growth in collection quality and user services.

2.E.2	Planning for library and information resources is guided by data that include feedback from affected users and appropriate faculty, staff, and administrators.
-------	--

Planning for library and information resources is based on feedback from multiple sources that include students, faculty, and staff. The University Library Committee, a representative body of elected faculty, meets throughout the academic year, making recommendations to the Library Dean on matters of policy and collection development that impact faculty research and instruction. Library and information resources faculty and staff are able to evaluate and comment on the impact of proposed course and program changes on their respective units' operations and resources. Idaho State University's process for all curricular and programming changes, involving the Undergraduate Curriculum Council and the Graduate Council, requires a Library review. This process informs Library staff of proposed changes in course and program offerings so they may comment on the immediate impact on existing resources and plan for the future impact. Similarly, the Library administration is included in the planning for new programs as part of the Board's [program approval](#) process. When degree programs are initiated, changed, or discontinued, financial analysis is included in the program proposal that looks at the financial impact on library resources. If deficiencies are found in library resources relative to a particular program proposal, then additional resources are added, or the scope of the proposal is altered in such a way as to ensure adequate library resources and/or funding. Program proposals are an integral part of the institutional system for ensuring that new programs fit institutional mission and core themes; hence, this process guides the purchase of library materials in support of mission and core themes.

2.E.3	Consistent with its mission and core themes, the institution provides appropriate instruction and support for students, faculty, staff, administrators, and others (as appropriate) to enhance their efficiency and effectiveness in obtaining, evaluating, and using library and information resources that support its programs and services, wherever offered and however delivered.
-------	---

Library staff provides instruction and support for the informed use of its collection and services in many ways. It regularly staffs a reference desk at the Library facilities at the Pocatello and Idaho Falls campuses. Library staff offers workshops on the use of the Library and its resources are offered both on-site and online to ISU students. Idaho State University faculty may request customized class presentations to be delivered by library staff in the library’s fully equipped classroom in Pocatello or in Idaho Falls, via a mobile computer lab. Web-based library instruction is available for ISU students. The Library has a faculty member based in Meridian to provide service to ISU students there. Idaho State University and Renaissance High School in Meridian share a library space in the ISU Meridian Health Science Center which leads to good collaborations and represents ISU well to dually enrolled Renaissance High School students who are simultaneously earning an Associate of Arts degree from ISU, while earning their high school diploma, and other potential students in that area.

The Eli M. Oboler Library maintains an integrated library system. It offers an online catalog for the print and electronic collections, serves as the circulation system and automated interlibrary loan request system, provides for electronic ordering and invoicing and fund accounting, and interfaces with the Banner ERP system for the tracking of accrued and paid library fines and fees. The Library subscribes to several specialized finding tools for its electronic resources to allow users to better identify and access resources.

2.E.4	The institution regularly and systematically evaluates the quality, adequacy, utilization, and security of library and information resources and services, including those provided through cooperative arrangements, wherever offered and however delivered.
-------	---

The Library regularly administers [LibQual](#), a standard tool developed and used by academic libraries to assess programs, services, and collection – which is administered every three years. Other key assessments are performed on an annual basis to inform resource retention decisions. Working with a faculty representative from each department, Library staff evaluates current subscriptions, level of usage, and availability of alternate resources. The staff also examines use data for other Library resources and evaluates ongoing suitability. Existing policies and procedures are reviewed by Library faculty and staff and modify as needed.

In Spring 2014 the Library conducted the LibQual survey, of which three areas were highlighted: Physical facilities, resources, and service/hours.

***Physical Facilities***

The survey highlighted that the physical facility of the Library was seen as dated with a lack of quiet appealing research spaces and computer labs and a lack of electrical outlets. The Library is in the process of renovations in FY2015 that include new carpet, furniture, paint, and better electrical services for users. The Library is adding better research spaces and upgrading technology in public areas.

Requests have been made to the Idaho Permanent Building Fund Advisory Council to financially support a renovation of the Heating, Ventilation, and Air Conditioning systems and the restrooms within the Library. These multi-million dollar efforts will replace outdated equipment, upgrade sanitary provisions, and replace the ceiling and lighting system. The effort will provide an enhanced experience for all Library users.

**Resources**

The survey highlighted a need to increase databases, journals and full text resources – especially in the areas of the sciences and health care. Economic conditions in the state coupled with ongoing inflationary costs for materials have made it increasingly difficult to maintain resource offerings at the level the Library sees as desirable. In light of the economic conditions that have plagued the state, and the recognized need to address demand, the Library has been carefully reviewing finances with an eye to creating a stable sustainable financial environment that will minimize the need for cancellations of journals and other materials. The University Administration continues its long standing positive support for the Library as it explores alternative funding avenues and alternative strategies, such as enhanced interlibrary loan and better access to electronic resources, to serve its users.

**Service/Hours**

The survey further highlighted that users would like to see greater availability of hours, new services such as book delivery, and website redesign for easier navigation. Users provided positive recognition of the library staff as helpful and approachable. In the past, the Library has attempted extended hours, but usage didn't justify the associated costs. The Library is currently upgrading interlibrary loan services. As resources become available, the Library will evaluate redesign of the website, adding of mobile applications, and other technology changes to better serve users.

Library administration recognizes that there are areas to address to create a better experience for library users. The Library is developing a comprehensive approach and plans for these various challenges and will fix them as fast as resources become available. In the past year the Library has made significant progress in identifying what needs to be done and starting efforts to accomplish positive changes. It looks forward in the next year or so to significant physical and organizational changes that will enable the Library to accomplish its mission to the campus much more effectively. As an organization it is committed to creating positive outcomes, good relationships with the campus, and making a better library for all users.

*Standard 2.F Financial Resources*

2.F.1	The institution demonstrates financial stability with sufficient cash flow and reserves to support its programs and services. Financial planning reflects available funds, realistic development of financial resources, and appropriate risk management to ensure short-term solvency and anticipate long-term obligations, including payment of future liabilities.
-------	---

ISU continues to advance its culture of fiscal responsibility and effective financial management that is requisite to fulfillment of ISU’s mission and core themes. Its sound finances, rigorous financial policies, and qualified staff attest to the success of these well-grounded efforts.

Idaho State University is financially stable with sufficient cash flow and reserves to support its programs and services. [Moody’s Investors Service](#) has reaffirmed ISU’s current A-1 bond rating and given a stable outlook due to ISU’s strong operating performance, adequate resource base, and healthy liquidity position. Standard and Poor’s has done likewise with its A/Stable rating. The university’s financial stability is diligently monitored through the finance and administration management and staff that is validated by both internal and external audits that ensure a thorough, periodic review of university financial practices. These audits have yielded consistently clean results that provide unqualified opinions with no material findings and timely university responsiveness to concerns. In addition to periodic internal and external audits, ISU prepares quarterly financial reports for assessment by management and submission to the Board’s [Audit Committee](#). These reports include unaudited comparative financial data and analysis, reflecting certain assumptions and estimates from unaudited statements of revenues, expenses and changes in net assets, and unaudited statements of net assets (see Appendix 11 for the Quarterly Report for the Three Months Ended).

The past several years of less than adequate and decreasing percentage of state financial support has caused ISU to increasingly seek and rely on other sources of funds. More of the financial burden has, by necessity, been assumed by the students through increases in tuition and fees, which is of concern to the institution. Increased success in obtaining research-related dollars and contributions has helped somewhat to address the state’s funding shortfalls. Additionally, ISU’s unrestricted net assets, or general reserves, are sound and have permitted strategic investments that have the potential to produce revenue. An example is the cash purchase of the RISE (Research and Innovation in Science and Engineering) complex, a 209,000 square foot building which will play a key part in achieving ISU’s mission to advance the creation of new knowledge and cutting-edge research that can support new partnerships and the development and application of intellectual property.

Idaho State University continues to improve its strategic financial position as evidenced by strong growth in the University’s reserves. In the last six years, the University’s reserves have increased from \$205,771 in fiscal year 2008 to \$26,103,744 in fiscal year 2013.

*Table 16: University Reserves*

	<b>FY2008</b>	<b>FY2009</b>	<b>FY2010</b>	<b>FY2011</b>	<b>FY2012</b>	<b>FY2013</b>
<b>Reserves</b>	\$205,771	\$4,325,224	\$7,617,115	\$12,391,009	\$16,276,176	\$26,103,744
<b>\$ Increase</b>	--	\$4,119,453	\$3,291,891	\$4,773,894	\$3,885,167	\$9,827,568
<b>% Increase</b>	--	2102%	76%	63%	31%	60%

Idaho State University surpassed the Idaho State Board of Education’s (the Board) minimum reserve target for Idaho’s higher education institutions in fiscal year 2011, and is working towards closing the gap on the fiscal year 2013 \$11,111,160 difference in achieving the Board’s optimum reserve level target. Idaho State University leadership has made concentrated efforts to manage costs and, as a result, produced positive operating results demonstrating the University’s strong financial performance.

Table 17: Financial Performance

	FY2013	FY2012	FY2011	FY2010
<b>Reserves</b>	\$26.1	\$16.3	\$12.4	\$7.6
<b>5% Min Op Exp Criteria</b>	\$11.2	\$11.1	\$10.5	\$10.4
<b>2 Month Op Exp Criteria</b>	\$37.2	\$37.0	\$35.0	\$34.6
<b>Operating Expense</b>	\$223,289,422	\$222,035,121	\$209,724,689	\$207,824,538
<b>5% of Operating Expense</b>	\$11,164,471	\$11,101,756	\$10,486,234	\$10,391,227
<b>2 Months of Op. Exp.</b>	\$37,214,904	\$37,005,854	\$34,954,115	\$34,637,423

2.F.2 Resource planning and development include realistic budgeting, enrollment management, and responsible projections of grants, donations, and other non-tuition revenue sources.

Idaho State University’s financial planning and budgeting processes are impacted by the state Legislature and Division of Financial Management and the Board, whose members are appointed by the Governor and confirmed by the Legislature. The Board allocates monies to the individual institutions based upon Board policy. Idaho State University’s financial health and increased monetary reserves are evidence of sound financial management. The University decreased its long-term debt in FY2013 by \$4.6 million.

In July 2014, ISU finalized negotiations with the Department of Health and Human Services - Division of Cost Allocation for ISU's new F&A Rate. Idaho State University previously used the short-form method for recovering federal grant and contract indirect costs with a rate for on-campus organized research of 47% only applied to salaries and wages. For fiscal years 2015 through 2017, ISU will be using the long-form method for recovering indirect costs and came to an agreement with DHHS-DCA for an on-campus organized research rate of 42% that can be applied to modified total direct costs (MTDC), allowing ISU to recover a greater and more equitable share of indirect costs from federal grants and contracts.

2.F.3 The institution clearly defines and follows its policies, guidelines, and processes for financial planning and budget development that include appropriate opportunities for participation by its constituencies.

Idaho State University addresses financial planning budget development through a comprehensive process. The Vice President for Finance and Administration initiates this process by providing institutional units, academic and nonacademic, with parameters to guide each unit’s financial planning and budget development for the fiscal year. The college deans and unit directors then work with their University Business Officers, department chairs, faculty and staff, and unit managers to develop a plan and budget for their unit within the required parameters. There is a Special Budget Consultation Committee appointed by the Vice President for Finance and Administration that consists of three faculty members, two representatives from ISU’s Staff Council, three student leaders from ASISU, a senior staff member

from the Office of Academic Affairs, the Vice President for Finance and Administration, and two university business officers, all supported by other staff from the Office of Finance and Administration.

The Special Budget Consultation Committee hears presentations from all institutional units that outlines the unit's proposed budget for each of the required scenarios. A unit may be asked to meet with the committee, as a follow up on the presentation, to clarify items, answer questions, and provide additional information. Following these presentations and additional meetings, the committee considers how best to meet the University's budget requirements for the fiscal year and recommends a budget for each unit based on the presentations and other information provided. The budget recommendations of the Special Budget Consultation Committee are reviewed with the institution's vice presidents and the President. Each component of the University's budget is revised as necessary to reinforce and support ISU's overall resources, goals, and strategies, in particular its primary mission of health sciences education.

2.F.4	The institution ensures timely and accurate financial information through its use of an appropriate accounting system that follows generally accepted accounting principles and through its reliance on an effective system of internal controls.
-------	---

ISU maintains its accounts in accordance with Generally Accepted Accounting Principles (GAAP) and the standards promulgated by the Government Accounting Standards Board (GASB) to ensure full compliance with all applicable rules, regulations, and laws.

To help ensure institutional accountability, a comprehensive [system](#) of University business officers and financial staff operates in all academic colleges and other major departments to assist in overall business management, ongoing financial monitoring, compliance with controls, and support for strategic planning in the units. Although embedded in the units, the University Business Officers and financial staff report to the Office of Finance and Administration and account for their work through that office.

The Banner ERP system has now been fully implemented. Idaho State University received the Board's approval to proceed with the selection and implementation of an ERP system in 2005. The Banner ERP system provided by Ellucian (previously SunGard Higher Education) was selected in Spring 2007, and the Board approved a three-year project budget of \$15.4 million in August 2007. Implementation began that fall and was finished on schedule and \$700,000 under budget. The last major modules were placed into production in Spring and Summer 2010. The core modules of ISU's Banner system are Finance, Human Resources/Payroll, Student Information, and Financial Aid, along with a Portal and Data Warehouse. Additional modules for travel and expenses management, electronic workflow, and degree audits have been implemented recently. Major project milestones are listed in the table below.

Table 18: University Project Milestones

Module	Go-Live Date
HR/Payroll	December 2008
Web Portal	December 2008
Data Warehouse	December 2008
Finance	July 2009
Document Management	September 2009
Student Admissions	October 2009
Financial Aid	January 2010
Registration	April 2010
Student Fee Assessment	July 2010
Travel and Expenses	February 2012
Degree Works	June 2012
Workflow	May 2012

In addition to these Ellucian systems, the University has also completed the implementation of an online payment processing and cashiering system, parking system, applicant tracking and performance management system, reporting system, as well as other ancillary systems.

2.F.5	Capital budgets reflect the institution’s mission and core theme objectives and relate to its plans for physical facilities and acquisition of equipment. Long-range capital plans support the institution’s mission and goals and reflect projections of the total cost of ownership, equipment, furnishing, and operation of new or renovated facilities. Debt for capital outlay purposes is periodically reviewed, carefully controlled, and justified, so as not to create an unreasonable drain on resources available for educational purposes.
-------	--

Planning for capital projects is an ongoing activity that includes specific facilities requirements that reflect ISU’s mission and core themes. Capital project plans are developed by Facilities Services in consultation with Academic Affairs, Student Affairs, and Finance and Administration leadership. The plans are reviewed by senior administration and approved by the President on an annual basis. Instruction and administrative related capital projects are funded primarily through the Idaho Division of Public Works (DPW), with oversight by the state’s Public Building Fund Advisory Council. Requests for capital project funding are submitted to the Board where they are prioritized with requests submitted by other higher education institutions and then submitted to DPW for funding and execution.

Over the last three fiscal years (2013-2015), ISU has garnered over \$6.9 million in state-appropriated funding for 6 major facility projects through this process. Additionally, the University has funded \$0.9 million, and various donors have contributed over \$3.8 million to 11 capital construction or renovation projects. The grand total of over \$11.6 million represents a significant investment in the future of academic excellence at ISU. Additional funding has also been received from the state through DPW, and augmented by internal funds and donations, for general alterations and repairs to campus facilities.

In FY2014, a special appropriation by the Idaho Legislature provided ISU with \$3.75 million for identified deferred maintenance issues. Idaho State University is not immune from the national problem of the impacts due to deferred maintenance. The FY2014 special appropriation has been placed toward 21 major projects—ranging from concrete repairs, through infrastructure repairs, to roofing replacement. All

of these projects will enhance students' experiences at ISU. Ongoing strategic and financial attention is being given to the remaining backlog of deferred maintenance issues.

Debt service requirements are reviewed annually as part of ISU's financial statement preparation. Idaho State University periodically engages an independent arbitrage consultant to verify that ongoing bonds and related facility usage are compliant with applicable regulations. All debt financing must be approved by the Board and includes consultation with external bond attorneys and bonding consultants. The University recently refinanced over \$30 million in bonds resulting in interest savings of over \$3.5 million over the life of the bonds.

The University incurred no new long-term debt and continued to pay down existing debt. All debt assumed by the University must be approved by the Board.

2.F.6	The institution defines the financial relationship between its general operations and its auxiliary enterprises, including any use of general operations funds to support auxiliary enterprises or the use of funds from auxiliary services to support general operations.
-------	--

Auxiliary enterprises at ISU contribute and relate directly to the mission, strategic goals, and core themes of the University. As required by Board policy [V.B.4.a.](#), ISU's auxiliary enterprises are essentially self-supporting entities primarily providing services to individuals and departments in the university community. All operating costs are paid out of income from fees, charges, and sales of goods or services. No state appropriated funds are allocated to cover the operating costs of auxiliary enterprises except for Intercollegiate Athletics. Charges for the use of auxiliary facilities or services are assessed to departments or programs supported by state appropriated funds. The Board establishes the maximum amount of state appropriated funds that may be allocated to intercollegiate athletics each year. Idaho State University follows all applicable guidelines for auxiliary enterprises and its financial statements reflect this practice.

2.F.7	For each year of operation, the institution undergoes an external financial audit, in a reasonable timeframe, by professionally qualified personnel in accordance with generally accepted auditing standards. Results from the audit, including findings and management letter recommendations, are considered in a timely, appropriate, and comprehensive manner by the administration and the governing board.
-------	--

Board policy [V.H.](#), requires that financial statement audits be conducted annually by an independent certified public accountant selected by the Board. These audits must be done in accordance with generally accepted auditing standards and include the auditor's opinion on the basic financial statements. The university's audit must also meet the requirements of the Federal Single Audit Act (FSAA), and the auditor issues additional opinions as required by the FSAA. Separate audits also are performed on selected university units such as the NCAA Agreed-Upon Procedures. These audits may include a letter from the auditor to management that highlights outstanding accounting issues. Any material weakness in the internal control structure of the University is reported in a letter from the auditor directly to the Audit Committee of the Board. In addition, the University is provided with a management letter identifying other nonmaterial issues that may be of concern or indicate system weaknesses. The management letter includes the University's response to any such issues.

The annual audited financial report is presented to the Board at the December Board meeting following the June 30th fiscal year end. The external audit is currently performed by Moss Adams, LLP.

The audited financial statements are included in the President’s Annual Report to the Board. Copies of the prior three years audited financial statements can be found in Appendices 12, 13, and 14. The statements are also an integral part of the Single Audit report that is distributed in accordance with the FSAA. Copies of all audits are maintained in the Office of the Vice President for Finance and Administration and are on the University’s website for review by the general public and also are available electronically upon request. This is in compliance with Idaho Code §59-1011 that provides that ISU, as a state agency, must make university records available for public examination.

Similar but separate audits are performed on the ISU Foundation and the Bengal Athletic Boosters that includes opinions and may also include a management letter

2.F.8	All institutional fundraising activities are conducted in a professional and ethical manner and comply with governmental requirements. If the institution has a relationship with a fundraising organization that bears its name and whose major purpose is to raise funds to support its mission, the institution has a written agreement that clearly defines its relationship with that organization.
-------	--

Institutional fundraising is a collaborative effort among units that are housed in University Advancement as well as the academic colleges under the oversight of the Vice President for Advancement. These units include the Idaho State University Foundation, the Development Office, the [Alumni Association](#), and [Marketing and Communications](#). Primary responsibility for institutional fundraising activities lies with the ISU Foundation and the Development Office.

### **Idaho State University Foundation**

The Foundation is a 501(c)(3) organization registered in the state of Idaho, and it is addressed by ISU [policy](#) and a separate operating agreement with the University as approved by the Board. The operating agreement between the ISU Foundation and the University is approved every two years by the Board. The Foundation Board of Directors consists of 20 to 25 individuals from around the country who help the University in its fundraising efforts. The current president of the Board is Mr. Arlo Luke, former CEO and current member of the Board of Varsity Facilities Services. Mr. Bill Eames serves as chairman of the Foundation Board. Dr. Gene Hoge serves as president-elect. Idaho State University’s Vice President for Advancement serves as executive vice president of the Foundation Board of directors. The Foundation Board meets twice a year in person and on other occasions via telephone. The Foundation Board executive committee meets each month on a conference call at which all Foundation board members are invited to participate. At that monthly meeting, the vice president for advancement makes a report on the issues of note at the University so that communication between the two entities is clear and concise. Other Foundation Board committees meet regularly telephonically. Committees of the Idaho State University Foundation which meet regularly include the Executive, Governance, Audit, Finance, Investment, Development, Nominating, and Business Evaluation Committees. A new initiative of the Foundation in working with the University is the goal of becoming much more entrepreneurial in generating funding for both the institution and the Foundation. The Foundation has engaged in setting up Limited Liabilities Companies (LLCs) with the goal of utilizing strengths and

resources available on campus to serve the public at large and generate resources for the institution. The first LLC set up was Bengal Pharmacy, LLC. Bengal Pharmacy LLC is located in two places: 1) on the University campus providing pharmaceutical services to faculty, staff, and students and the public; 2) the Bengal Pharmacy LLC has set up a telephonic branch in Arco, Idaho, some distance from campus. That pharmacy is linked telephonically to the pharmacists on the main campus, with technicians and robotic facilities at the remote venues. It is becoming a tremendous success, writing more scripts than had been anticipated in the original business plan. The Foundation will continue to look for these opportunities in other areas including, potentially, medical clinics, geographic information systems, and others. The engagement of individuals on the ISU Foundation Board of Directors and their effectiveness has increased markedly as the University has refined and improved its fundraising efforts.

Idaho State University's President and the ISU Foundation President oversee and are extensively involved in all fund-raising efforts. The Foundation President, along with the Vice President for Advancement, who directly supervises development, and the Foundation board treasurer and board attorney ensure that the ISU Foundation and the Development Office adhere to all federal and state laws governing the solicitation and management of charitable funds. The Foundation's accounts are overseen by the Foundation Director of finance and are maintained in accordance with Generally Accepted Accounting Principles that ensure resources for various purposes are classified for accounting and reporting purposes into funds that are in accordance with activities or objectives specified. Separate accounts are maintained for each fund. Gift acknowledgments substantiate donors' contribution amounts and identify the fair market value. Gifts in-kind are received and processed in accordance with IRS Guidelines. Endowments, life income funds, insurance policies, and all other investments are administered by the appropriate ISU Foundation Board officers and involve the Investment, Audit, Finance and Development committees of the Foundation Board of Directors. In order to facilitate administration of the ISU Foundation's investments and decrease the associated overhead, the Foundation adheres to an investment and spending policy whereby earnings are credited to the donor account and a spending allocation is set aside for donor purposes. Terms specified in donor agreements differing from this practice are honored.

The financial activity of the ISU Foundation is accounted for in an independent financial system overseen by the Finance Director of the Foundation. Annually, an independent external auditing firm audits the Foundation and assesses the propriety of the financial activity and related controls. The firm reports the results of the audit and its opinion on the fairness of the financial statements in the report that are distributed to the Foundation Board of Directors, key university officials, and the Board. In addition, the University closely follows the ISU Foundation bylaws and charter agreement. In 2008 the Foundation and the University signed an agreement designed to ensure an "arm's length" relationship between the two bodies consistent with new promulgated Board policy requirements (see Appendix 15 for the Foundation Operating Agreement).

### **The Development Office**

The central development office includes the areas of Planned Giving, Major Gifts, Annual Giving, Corporate and Foundation Giving, and various support staff. The Associate Vice President for Development oversees the Development Office, and also supervises a staff comprised of a donor researcher, a stewardship coordinator, two give processors, a database manager, and an administrative assistant. The AVP also supervises the major gift development officers assigned to and located at the

various colleges and academic units. The size of the Development Office staff has increased, and fundraising initiatives at the University have been refined. A critical goal is to improve ISU's development efforts, particularly in the areas of corporate giving, foundations, annual giving, planned giving and major gifts. Development efforts both in the central office, as well as the major gift officers located in the various academic units, continues to improve appreciably. Success is evaluated based on national metrics introduced by fundraising consultant Jerold Panas. Each year, the Development Office and the deans cooperatively set the goals for each major gift officer in the specific academic unit. Goals include major gift dollars raised, solicitations completed, new donors identified, and stewardship visits, among many others. A focus is on major gifts of \$10,000 and greater in building the endowment and in getting an increasing percentage of foundation board members to make major gifts. An increased endowment will not only provide more sustenance for the fundraising operation, but for other critical University needs such as scholarships, equipment, personnel, and other important elements in helping the University achieves its goals.

The corporate and foundation development officers are located in Boise. Most development officer positions are jointly funded by the Development central office and the colleges. The Development Office also works very closely with the ISU Foundation board of directors to raise funds, with particular high priority on funds for scholarships which are critical for ISU's continued enrollment management.

### **Alumni Association**

The ISU Alumni Association exists to provide a lifelong two-way connection between alumni and their university. It acts as the guardian of tradition, keeps members informed about their alma mater and their fellow alumni, provides opportunities for alumni to get together in social and educational settings, and promotes the needs of the University and its students.

Sustaining outreach, engagement, and involvement of alumni of ISU is of paramount importance to the Office of Alumni Relations and the ISU Alumni Association Board of Directors. All activities, events and programs are planned and executed with alumni needs, wants and interests in mind to enhance their connection or re-connection with their alma mater.

Recognizing ours is a diverse alumni base, communication and the platforms for ensuring continued connection is done in diverse methods. Platforms utilized include:

- Maintaining current and user-friendly Alumni website ([isu.edu/alumni](http://isu.edu/alumni))
- Idaho State University Alumni Facebook platform ([www.facebook.com/idahostatealumni](http://www.facebook.com/idahostatealumni))
- Twitter @IdahoStateAlum

These platforms are consistently utilized to keep alumni informed of current and upcoming events, activities, programs and educational opportunities, and providing instant two-way communication.

- Additional methods of sustaining alumni communication and engagement include:
- Email messaging for specific information sharing
- Direct mail or invitation
- ISU Magazine
- Recognition and awards programs- Homecoming, Sports Hall of Fame, Outstanding Students and Professional Achievement Awards, Golden and Silver Bengals
- Group-specific programs and events (degree/demographic/geographic) designed to offer differing demographic groups educational, social and engagement opportunities. Examples

include legislative advocacy, young alumni and family events, speaker series-varying topics, ski tour event, golf tournaments, mentoring opportunities with current students.

- Enhanced membership program offering goods and services options to all alumni at varying levels of involvement.

The role and responsibility of the [Alumni Association](#) in fundraising has changed. Formerly involved almost exclusively in alumni social events and golf tournaments, the alumni organization has matured significantly and now assists in fundraising efforts, as well as in political efforts with the state Legislature. The Alumni Association Board of Directors has become increasingly active in all aspects of assisting the University. In addition to fundraising activities, the Alumni Board is engaged in the recruitment of students, political activities through an advocacy committee, social events such as concerts, golf tournaments, and other family-type activities, Homecoming, Commencement, a speaker series taking faculty and staff to university alumni, and various other activities to engage not only the alumni of the institution, but the general public. Special emphasis has been placed on building engagement in Boise/Meridian, Twin Falls, and Idaho Falls.

### **Marketing and Communications**

The public relations arm, [Marketing and Communications](#), is also playing a more strategic role in University development efforts, with initiatives to vitalize University marketing with a more strategic focus targeting key constituents such as alumni, donors and friends in support of the University's overall fundraising efforts. As has been mentioned, the marketing communications of the University has developed, increased, and improved dramatically over the past seven years with a focus on strategic and comprehensive communications using the various media and modes to not only communicate the University's goals and accomplishments, but to solicit input as well. Communication efforts have improved a great deal. One element of tremendous success has been the hiring of a videographer. The videographer has provided material for the web site, including Facebook and YouTube, but has also been doing short vignettes for prospective and current students as well as their parents, in addition to public school officials in ISU's service regions and beyond. The individual also produces video news releases used in local and regional television stations to provide information about the University and to solicit feedback. These efforts are also measured through a series of matrices which include clipping services, focus group feedback, number of articles placed, number of visits to its web pages and other social media platforms, and clip through rates. These efforts have improved the Foundation's ability to generate resources in support of the institution.

Collaboration among these areas—ISU Foundation, Development Office, Alumni Association, and Marketing and Communications—has produced more effective advancement efforts at ISU. This is critical to the attainment of ISU's mission and core themes. As state resources become increasingly scarce, the University must rely more on contributed funds to fully support the provision of high-quality educational programs.

## Standard 2.G Physical and Technological Infrastructure

2.G.1	Consistent with its mission, core themes, and characteristics, the institution creates and maintains physical facilities that are accessible, safe, secure, and sufficient in quantity and quality to ensure healthful learning and working environments that support the institution's mission, programs, and services.
-------	--

The fulfillment of ISU's mission and core themes requires that it have significant physical presence in four Idaho communities:

Pocatello: ISU main campus has over 1,000 acres of property. Facilities Services oversees 22 developed acres with 70 owned buildings (3 additional leased) that encompasses 3,539,455 gross (119,225 sq. ft. leased) square feet of space.

Idaho Falls: ISU Idaho Falls has over 47 acres of property. Facilities Services oversees 27.5 developed acres with 4 owned and 1 leased buildings that encompasses 213,208 gross (4,291 sq. ft. leased) square feet of space.

Meridian: ISU Meridian has over 4 acres of property and 2 owned buildings (2 additional leased) that encompasses 192,352 gross (2,347 sq. ft. leased) square feet of space.

Twin Falls: ISU – Twin Falls currently leases about 3,000 sf from the College of Southern Idaho.

Idaho State University has 11 additional leased spaces spread throughout Idaho that are used for educational and/or research purposes that add another 15,294 square feet to its educational space inventory. Idaho State University facilities reflect the variety of structure and space that is necessary to fulfill its mission and core themes.

Idaho State University's nearly 4 million square footage of facilities includes 234 classrooms totaling 198,266 square feet; 510 teaching/open/research labs totaling 419,210 square feet; 1,855 office/conference rooms totaling 541,371 square feet; 152,463 square feet of library and study space; 177,212 square feet of special use space; 20,306 square feet in health related space, and 945,628 square feet in housing space. The remaining space encompasses general use, non-assignable and unclassified space. This type of space includes athletics, media production, food facilities, lounges, day care, clinics, greenhouses, animal facilities, merchandising, recreation, bathrooms, hallways, custodial, elevators, lobbies, stairways, mechanical rooms, and other uses.

Primary responsibility for physical infrastructure resides with [Facilities Services](#). Subunits of Facilities Services include Maintenance and Operations; Engineering, Planning and Environment; and Public Safety.

As described in Standard 2.A.4. above, the Board serves as ISU's governing body. In that capacity the State Board has general supervision and control of all ISU property, real and personal. It is empowered to acquire any property which in the Board's judgment is needed for the operation of the University, and to dispose of any property which is deemed unnecessary for its operation. [Idaho Code § 33-3005](#).

Other state level advisory or oversight organizations include the [Permanent Building Fund Advisory Council](#) (PBFAC) that receives Capital Construction and Alterations and Repairs lists annually; the [Idaho Division of Public Works](#) that provides design and construction oversight of major improvement projects; and Idaho [Division of Building Safety](#) that is the primary external agency responsible for the ongoing

inspection of all ISU buildings. All new construction, alterations, and repairs follow established standards and practices in order to ensure delivery of accessible, safe, and secure facilities.

Idaho State University maintains a six-year major capital outlay plan and submits its annual Alterations and Repairs list to PBFAC. This plan is maintained by Facilities Services in their Engineering, Planning, and Environment Department and can be provided upon request. Idaho State University ensures sufficient quantity of accessible, safe, and secure facilities through an ongoing assessment, analysis, and prioritization of capital outlay and space use. New space requirements and proposals to modify existing space are addressed using Facilities Services' Project & Space Request (PSR) procedures with each request validated by the vice president for the requesting department. Idaho State University maintains and regularly reviews its [Campus Master Plan](#). The review ensures that the plan supports the university mission and core themes.

The key components of the Campus Plan review include audits of the current condition of campus facilities, space usage and inventory, and current capacity. Maintaining ISU's campus master plan is a collaborative process involving Facilities Operations, Information Technology Services, Public Safety, faculty, staff, students, and administrators as well as other stakeholders. The Facilities Conditions Audit, preventative and zone maintenance programs, and a Rapid Response program enables Facilities Operations to maintain quality and adequacy of facilities.

Space management is a collaborative effort. Individual colleges and vice presidents, in concert with Facilities Services, Information Technology Services, Purchasing, and other stakeholders, oversee space assignments. Facilities Services provides oversight of space usage and compliance to local, state, and federal regulations. The Space Management function within Facilities Services ensures the sufficiency and efficiency of space and maintains the [Space Planning Guidelines](#).

Idaho State University continues to lead the state in providing health care education and research opportunity. Work is currently underway to produce state-of-the-art Anatomy and Physiology (A&P) Laboratories at both the Pocatello campus, and the ISU Meridian Health Science Center. The Treasure Valley Anatomy and Physiology Laboratories will be the only hands-on learning laboratory located on the western region of the state of Idaho, and ISU is grateful to partner with private enterprise to provide this one-of-a-kind facility. Due to high program demand, the Physician Assistant Studies program is being expanded into larger facilities at both ISU Meridian Health Science Center and the Pocatello campus. Distance learning provisions are being incorporated into all four of these projects so that students located throughout the nation can learn through collaboration with Idaho State University.

Pioneering research into nanotechnology, particle physics, and nuclear science are underway at the Research and Innovation in Science and Engineering (RISE) Complex in Pocatello. The Center for Advanced Energy Studies (CAES) in Idaho Falls continues to be a research platform for ISU and the state of Idaho, as new appropriations totaling \$2 million are being directed toward university-led research at this facility. The CAES represents a consortium of the three universities (ISU, the University of Idaho, and Boise State University) in collaboration with Idaho National Laboratories (INL). Recent (2014) Nuclear Regulatory Commission licensing will allow research into cancer-fighting isotopes continues at the Idaho Accelerator Center (IAC) located in Pocatello. Recent upgrades to the IAC for FY2016 will ensure this facility remains the primary accelerator research center in Idaho. In FY2014, the College of Science and Engineering proved particle detection and counting technology within a new clean-room located in Pocatello. Licensing of this technology with private enterprise is currently underway.

FY2014 upgrades to academic facilities include: an ADA elevator in Turner Hall (student housing) and in Garrison Hall (faculty offices); a new MAC lab in Frazier Hall; learning and discovery centers added to the Idaho Museum of Natural History; repurposing of a study area into a high-tech business lecture center within the College of Business; upgrades to the central HVAC system in the Liberal Arts building; new roofing for Fine Arts; upgrades to exterior ADA pathways throughout the Pocatello campus; renovation and expansion of the cashiering area in the Administration building; installation of a practice playing field for student athletes; upgrades to Miller Ranch Stadium to enhance student athlete's home field advantage; remodeling and repurposing of the College of Education basement level to add classroom and learning space; continuing expansion of CCTV and Emergency Notification Systems throughout the University; installation of modern lighting on the Hutchinson Quadrangle to enhance nighttime safety and energy conservation; and repairs and upgrades to the swimming pool and locker room areas in Reed Gymnasium.

Mr. Jack Wheatley, alumni and benefactor, has generously supported exterior beautification efforts at ISU over the course of the last three years. Donor-funded projects include: entry signage and plantings at the four major campus street entries; more than 200 long-lived trees planted throughout the campus; two large exterior seating and events circles on the main campus Quad, upgrades to the entry seating and planting at the entry to the College of Business; a planted berm project at the entry to Reed Gymnasium; enhancements to the ISU Veteran's Memorial; a new plaza near the Administration Building; and collaboration with the city of Pocatello in major exterior beautification upgrades through a \$500,000 Idaho Transportation Department "Complete Streets" grant which will transform Martin Luther King Jr. Memorial Way into a pedestrian, bicycle, and commuter-friendly central campus corridor.

2.G.2	The institution adopts, publishes, reviews regularly, and adheres to policies and procedures regarding the safe use, storage, and disposal of hazardous or toxic materials.
-------	---

ISU's [Technical Safety Office](#) (TSO) is responsible for Radiation Safety, Hazardous Chemicals, and the University's Chemical Hygiene program. Its [mission](#) is to "ensure that radiation and radioactivity, lasers, and hazardous and biomedical wastes at ISU are managed safely and in accordance with applicable Federal and State laws and regulations." The Technical Safety Office, which includes a director and Technical Safety Officer, is housed in the Physics Department but reports administratively to the Vice President for Research. The Technical Safety Officer participates in or chairs several safety committees, such as Radiation, Laser, Animal, Hazardous Chemical, Human Subject, and Recombinant DNA/RNA Molecules, and is an ex-official member of the University Safety Committee. The Technical Safety Officer also monitors and manages the hazmat program and hazmat facility, and manages the Chemical Hygiene plan for colleges and departments such as Chemistry, Pharmacy, Physics, Engineering, and Biosciences.

Facilities Services oversees the [Campus Safety Committee](#) that is made up of representatives from each college, student leadership, faculty, and staff. The Committee is supported by ex officio professionals from services groups on campus. Facilities Services monitors and maintains the hazardous materials generated by its shops.

The university safety groups are monitored and guided by local, state, and federal agencies according to their policies and requirements:

- Idaho Division of Building Safety
- Local fire department inspections

- Center for Disease Control and Prevention
- Idaho Department of Environmental Quality
- Environmental Protection Agency
- National Institute for Occupational Safety and Health
- Nuclear Regulatory Commission

2.G.3	The institution develops, implements, and reviews regularly a master plan for its physical development that is consistent with its mission, core themes, and long-range educational and financial plans.
-------	--

The current Campus Master Plan is under review as part of a collaborative process involving campus constituencies and external stakeholders. A final draft has been presented to both ISU senior leadership and the Idaho Permanent Building Fund Advisory Council. Although still technically a draft, the document is being used to inform decisions on capital construction requirements and space utilization while final approval is pending. Facilities Services’ audits (see discussion under Standard 2.G.1) provided baseline data on facility conditions and were a critical component of the analysis of the remaining lifespan and capability of each facility. There are individual master plans for both the Meridian and Idaho Falls campuses and are factored into capital construction requirements and prioritization.

2.G.4	Equipment is sufficient in quantity and quality and managed appropriately to support institutional functions and fulfillment of the institution’s mission, accomplishment of core theme objectives, and achievement of goals or intended outcomes of its programs and services.
-------	---

Several classifications of equipment are described in this section: instructional, research, departmental, and facility. [See Section 2G.5 for a discussion on Information Technology equipment.] Because instructional equipment, its use, function, location, and financial source, is often shared among units, ownership and control can be complex and unclear. Institutional units, therefore, operate in good faith in purchasing, maintaining, and sharing resources and equipment. Where ownership and control are clear, instructional equipment will be maintained and controlled by the instructional units that own and control it. Research equipment is purchased, managed, and maintained by research grant managers, associated departments (or units), and principal investigators. In general, fixtures or equipment that are part of the physical infrastructure of the institution, is managed and maintained by Facilities Services. Equipment can also be purchased by an academic or nonacademic unit, using various funds, and it will be managed jointly with Facilities Services based on prior arrangements or mutual understanding. The control of equipment by individual units may include usage priority, training, and maintenance.

	<i>Technological Infrastructure</i>
2.G.5	Consistent with its mission, core themes, and characteristics, the institution has appropriate and adequate technology systems and infrastructure to support its management and operational functions, academic programs, and support services, wherever offered and however delivered.

Technology, particularly information technology, is critical in supporting the fulfillment of ISU’s mission. Information Technology Services (ITS) supports the University’s teaching and research mission, as well as administration applications, by providing essential information and instructional technology and support, built on an effective and reliable information technology infrastructure. The ITS unit is comprised of Networking and Telecommunications, Enterprise Applications and Operating Systems, Information Security, Customer Service and Support, Education Technology Services. The Chief Information Officer heads ITS and reports through both the Vice President for Finance and Administration and the Provost and Vice President for Academic Affairs, and is a member of the President’s Cabinet. Centralized computing services are provided by the Information Technology Services Department.

Idaho State University implemented an Enterprise Resource Planning (ERP) system between 2007 and 2012 with two driving motivations: to improve user services and to move university services off of an aging hardware and software platform. Both of these goals have been achieved. The core modules of ISU’s Banner system are Finance, Human Resources/Payroll, Student Information, and Financial Aid, along with a Portal and Data Warehouse. Major project milestones are listed in the table below.

Table 19: ERP Major Milestones

Module	Go-Live Date
HR/Payroll	December 2008
Web Portal	December 2008
Data Warehouse	December 2008
Finance	July 2009
Document Management	September 2009
Student Admissions	October 2009
Financial Aid	January 2010
Registration	April 2010
Student Fee Assessment	July 2010
Travel and Expenses	February 2012
Degree Audit	June 2012
Workflow	May 2012

Additional modules were implemented in conjunction with the implementation of the ERP system, as listed below:

- travel and expenses management
- electronic workflow
- degree audits
- online payment processing and cashiering system
- applicant tracking and performance management system
- reporting system
- housing management

- parking system
- room scheduling

Idaho State University's new ERP system and related enterprise applications have dramatically improved the services provided to its 20,000 students, faculty, and staff. Examples include:

- There are no queues in the system for student registration. In the past, students often spent 6-8 hours in the queue waiting for an opportunity to register for their classes.
- Pre-requisites, co-requisites, and other registration restrictions are enforced by the system. This process improves academic quality at the University and facilitates the accreditation of many programs.
- Wait lists for closed classes are available for the first time. Many students sign up for a wait list, and many of those students are later able to register for those classes. This process provides a much fairer way to allocate space when a seat opens in a closed class, compared to the old method of giving the open space to the first person who happens to ask for it.
- Final semester grades are now posted within five hours of the close of the grading period, instead of five days later as was required by the legacy system. Understandably, students are especially eager to learn the outcome of their semester's work, and greatly appreciate this improvement.
- Students can now complete the transcript request process entirely online. In the past, students had to submit their request on a paper form, and send a check for payment or pay in person.
- Online student bills are provided through BengalWeb (the university portal, implemented in an earlier phase of the ERP project) and Self Service Banner. In the past, bills were mailed to students, at considerable expense to the University. The preparation and mailing of bills to students also required a great deal of staff time each semester.
- Online fee payment is available through BengalWeb and CASHNet. In the past, students had to pay their fees in person at the Cashier's Office or in the Ballroom.
- Students can sign-up for installment payment plans online in BengalWeb. In the past, students had to meet with university staff to sign-up for a payment plan.
- The entire Financial Aid process can now be completed online, from application, through notification and tracking during the review process, acceptance of financial aid, application of financial aid toward tuition and fees, and disbursement of excess financial aid.
- Refunds and excess financial aid can be directly deposited to students' bank accounts. In the past, refund checks were mailed to students, or picked up in the Ballroom or at the Cashier's Office.
- Final semester grades are now posted within five hours of the close of the grading period, instead of five days later as was required by the legacy system. Understandably, students are especially eager to learn the outcome of their semester's work, and greatly appreciate this improvement.
- Students can now complete the transcript request process entirely online. In the past, students had to submit their request on a paper form, and send a check for payment or pay in person.
- Students, faculty and staff can purchase parking permits and pay parking fines online. In the past they had to visit the Public safety office or purchase permits during registration in the Ballroom.
- Employees can enter their time sheets electronically, and managers can review and approve them online. In the past, paper time sheets were prepared and the data manually entered into the system.

These improved services removed significant barriers, and centralized services for students, faculty, and staff in the Banner system in an easy-to-use portal called BengalWeb. They are available via a single log-in to the portal. By replacing previously manual processes with online services, the University freed more

than 1,500 hours of staff time per year and produced an estimated annual cost savings in excess of \$253,250.

Educational Technology Services (ETS) provides technology support and training to ensure effective use of technology in instruction. Individual units with ETS support various aspects of technology support for faculty, staff, and administrators on campus. The IT Help Desk provides primary technology support for students.

Specifically, the Instructional Technology Resource Center (ITRC) supports the Learning Management System (LMS), Moodle-ISU, provides support for Quality Assurance and review of online and blended courses, supports faculty using web conferencing, as well as supports the development of various instructional media used in all types of courses (podcasts, audio enhanced PowerPoint, PDFs, etc. The ITRC offers regular workshops for faculty in the use of technology, learning design principles, and other technology tools offered by Idaho State University. Included in those training opportunities are workshops on using technology to provide equal access/accessibility to all students. These services are offered to all faculty whether teaching online, blended, or face-to-face classes. The ITRC also supports a community Moodle server that is used by Pocatello School District 25 to serve 200 teachers and approximately 2,500 students. An additional 41 teachers from districts throughout southeast Idaho serve another 200 students via this Moodle server.

The Video Network unit supports faculty that use the extensive ISU video network to teach classes in Idaho Falls, Meridian, Twin Falls and other remote video locations by facilitating the use of the video network, supporting technology usage in those settings, capturing those lectures, and working with the ITRC to improve instructional materials for those courses.

The classroom technology support group supports faculty in their use of any technology in the classroom for face-to-face instruction. The classroom support unit designs and supports technology enhanced classrooms. Typically, technology in those classrooms include projector, sound system, computer, DVD/BluRay players, laptop connections, and document cameras.

Historically, the IT Service (help) Desk also provided support to some classroom facilities that caused some confusion for faculty regarding who to call when support was needed. To strengthen customer service and support to ISU's main campus instructional facilities, ITS reorganized technology support for all classrooms and assigned to ETS the primary responsibility for faculty support of classroom facilities. An ITS team member transitioned to ETS to oversee classroom technology support in the Rendezvous classroom building, along with numerous classrooms in the main campus academic buildings. This reorganization also gives the IT Service Desk more time to focus on the support of student-use technology centers and other enterprise IT support initiatives. Idaho State University's ITS [Help Desk](#) provides users with their main source of IT information and assistance. Assistance is available on line, via phone, and in person.

ITS, along with the Instructional Technology Resource Center, also supports eISU that is a distance learning initiative implemented to advance ISU's commitment to sustained, quality online instructional delivery. A per credit online fee is collected and distributed to both academic and administrative units to support this effort. The Instructional Technology Resource Center provides a wide array of instructional technology tools and services, including faculty training and support in these areas. By participating in

distance learning, ISU students also acquire the tools they need to be successful in a digital age. The ITS resources allow students to learn, work, and communicate from anywhere at any time.

### ***Networking***

Over the past 30 years, network connectivity has moved from important, but limited, to critical and ubiquitous. During the last three years, Idaho State University has increased wide area network (WAN) bandwidth capacity from 300 Mbps to 1.1 Gbps with capability to burst to 1.6 Gbps. This bandwidth capacity comprises Internet2, and Commodity Internet. Through this on-going strategic investment, ISU faculty, researchers and students are able to connect to a number of research institutions and networks via the Idaho Regional Optical Network (IRON). IRON provides connectivity to sister institutions BSU and UI, research networks via Abilene/Internet2, the Pacific Northwest GigaPop (PNWGP), the Utah Educational Network (UEN), Idaho National Laboratory (INL), Pacific Northwest Laboratory (PNNL), and many others. Idaho State University also connects to the state's education network, the Idaho Education Network (IEN), a high-speed broadband network that connects K-12 high schools across the state.

Idaho State University's local area network (LAN) core is a 4x1Gbps Ethernet backbone with 10/100/1000 Mbps PoE connectivity to most desktops throughout campus. Idaho State University also maintains a comprehensive, centrally managed, 802.11 a/g/n wireless infrastructure with 802.1x authentication on the Pocatello campus along with its outreach centers in Idaho Falls and Meridian. Wireless is available throughout campus in academic buildings, student union buildings and housing complexes with a project under way to provide a minimum of (1) new access point per classroom.

### ***Voice Communications***

Idaho State University owns, maintains and operates a Rolm 9751 Model 50 fully redundant digital PBX with approximately 4,000 ports for the main Pocatello campus. Idaho State University has begun a three year project to migrate the University from the legacy PBX to Cisco (CUCM) VoIP technology. The ISU centers in Meridian and Twin Falls, along with various off-campus facilities are already using Cisco VoIP.

The legacy PBX, in conjunction with the installed Cisco VoIP solution at off-campus locations, allows 4-digit dialing between all ISU facilities, regardless of locations, without toll charges. The main campus and the ISU centers in Idaho Falls, Twin Falls and Meridian all use the centrally managed Cisco Unity voice mail system.

As IT services have become increasingly mission critical, ISU has worked to ensure that those services are both robust and secure. Backup power is in place for mission critical applications. A regular schedule of data backup is in place. All server data (about 100 TB) is sent to backup appliances. These feature de-duplication and compression, and currently have a combined capacity of 18 TB. The data is then copied to tape and stored off-site. Idaho State University's data retention policy consists of three distinct sets of data: regular server files are retained for six months; student academic data is retained for one year; and ERP database data is retained indefinitely.

Processes include full backup weekly. These are supplemented by daily incremental backups. The systems administrator in charge of data backups monitors backup job results on a daily basis and the computer operations staff are in charge of tape rotation and data verification under the guidance of the backup systems administrator. Backup software has built-in data verification functionality. This is performed on

random jobs in each category (file system, student academic data, and ERP database data) on a monthly basis.

A core identity management system has also been purchased and put into production. Interfaces to various application services such as the BANNER Enterprise Resource Planning system (ERP), Active Directory and Google application services are functional. The old campus directory server has been upgraded to the new directory services managed via the identity vault. Work is now underway to implement access management interfaces to services such as standards-based federation, web single sign-on, cloud storage, mobile devices, and self-service password administration.

Anticipating Idaho State Board of Education (the Board) approval in mid-August 2014, ISU will also begin a \$1.4 million dollar hardware refresh of all ERP hardware. The servers and associated network and storage equipment represent the current state of the art for modern enterprise operation. The proposed solution also enhances the business continuity/disaster recovery plans of the University by dividing the servers between two existing computer operations centers on campus.

In addition a project is currently under way to improve network resiliency. A redundant metropolitan optical Ethernet (MOE) head-end is being installed in the main data center (lower campus) that will duplicate the MOE head-end in the current telecommunications switch room (upper campus). This project will load balance traffic to and from all off-campus locations with an automatic fail-over if one of the circuits is disrupted or one of the data centers goes off-line. The MOE network facilitates a network that is transparent to the end-user; they cannot see a difference in functionality between off-campus and on-campus locations.

Additionally, with the fiber optic in place to support the MOE redundancy, ISU will also move one of the two Internet Service Providers from the telecommunications switch room to the main data center.

As networked systems became more important, and more common, ISU evolved a mixed system in which some were centrally administrated and others, particularly specialized systems, were managed at the local level. Broad oversight of non-central systems is accomplished through a series of direct and dual reports to central IT. This allows, among other things, for ISU to quickly and efficiently address any deficiencies in IT security.

Besides significant investments in the ISU network and data centers, ISU has made an even larger investment in IT security. A number of software systems have been purchased to more closely monitor, log, and/or detect suspicious activity and it is in process of implementing a data management zone. Additional staff were added to help implement and manage these systems and processes. More robust security policies have been adopted <http://www.isu.edu/policy/2000/index.shtml>, and mandatory security training was implemented for all faculty and staff.

An outside consulting firm was hired to complete a campus wide asset and control discovery project, as well as very specific risk assessments and gap analyses for HIPAA governed entities on campus. All high risks have been addressed. As a result, a formal IT audit and continuing risk assessment process has been developed and implemented.

2.G.6	The institution provides appropriate instruction and support for faculty, staff, students, and administrators in the effective use of technology and technology systems related to its programs, services, and institutional operations.
-------	--

Educational Technology Services (ETS) provides technology support and training to ensure effective use of technology in instruction. Individual units with ETS support various aspects of technology support for faculty, staff, and administrators on campus. The IT Service Desk provides primary technology support for students.

Specifically, the Instructional Technology Resource Center (ITRC) supports the Learning Management System (LMS), Moodle-ISU, provides support for Quality Assurance and review of online and blended courses, supports faculty using web conferencing, as well as supports the development of various instructional media used in all types of courses (podcasts, audio enhanced PowerPoint, PDFs, etc. The ITRC offers regular workshops for faculty in the use of technology, learning design principles, and other technology tools offered by Idaho State University. Included in those training opportunities are workshops on using technology to provide equal access/accessibility to all students. These services are offered to all faculty whether teaching online, blended, or face-to-face classes

The Video Network unit supports faculty that use the extensive ISU video network to teach classes in Idaho Falls, Meridian, Twin Falls and other remote video locations by facilitating the use of the video network, supporting technology usage in those settings, capturing those lectures, and working with the ITRC to improve instructional materials for those courses.

The classroom technology support group supports faculty in their use of any technology in the classroom for face-to-face instruction. The classroom support unit designs and supports technology enhanced classrooms. Typically, technology in those classrooms includes projector, sound system, computer, DVD/BluRay players, laptop connections, and document cameras.

Idaho State University's ITS Help Desk provides users with their main source of IT information and assistance. Assistance is available on line, via phone, and in person.

2.G.7	Technological infrastructure planning provides opportunities for input from its technology support staff and constituencies who rely on technology for institutional operations, programs, and services.
-------	--

ISU's CIO is a member of the president's cabinet and regularly presents and discusses IT projects/issues at this weekly meeting. In addition, the CIO attends Dean's Council and Vice President's meetings, as necessary, to discuss issues and seek input. There is an ERP steering committee that governed the Banner ERP system implementation, and still exists and meets, when strategic decisions are needed.

On an operational level, a technical operations group, with campus wide representation, meets biweekly to share information and make operational decisions. Campus system administrators, central and departmental, meet on a regular basis to share information and discuss common issues.

A formal governance structure exists for ISU's eISU efforts. Faculty and key staff make up an advisory committee which meets regularly throughout the year to submit and address ideas for improving ISU's online presence and existing offerings as well as looking at how best to move forward with more online

offerings to address expanded outreach and retention for students. There is also an eISU Steering Committee that makes budget decisions and implementation of suggestions from the advisory committee.

An ISU Moodle faculty advisory group provides regular input for management of Moodle, ISU's learning management system. This group meets each semester and provides input on Moodle and suggestions for improvements as well as a sounding board for feature changes planned in future Moodle releases.

2.G.8	The institution develops, implements, and reviews regularly a technology update and replacement plan to ensure its technological infrastructure is adequate to support its operations, programs, and services.
-------	--

As technology has become mission critical, ISU has developed a plan to ensure that the central IT infrastructure remains adequate. An extensive review was done evaluating various funding models, including a survey of peer institutions. A decision was made to continue central subsidy of the core infrastructure vs adding additional chargebacks to departments. Departments still pay ongoing costs of phones and some one-time costs for network connections.

Student technology fees and voluntary computer lab fees provide adequate revenue to keep centrally provided student technology resources updated on a 3-5 year cycle.

## Planning and Implementation

### Standard 3.A. Institutional Planning

3.A.1	The institution engages in ongoing, purposeful, systematic, integrated, and comprehensive planning that leads to fulfillment of its mission. Its plans are implemented and made available to appropriate constituencies.
3.A.2	The institution's comprehensive planning process is broad-based and offers opportunities for input by appropriate constituencies.
3.A.3	The institution's comprehensive planning process is informed by the collection of appropriately defined data that are analyzed and used to evaluate fulfillment of its mission.
3.A.4	The institution's comprehensive plan articulates priorities and guides decisions on resource allocation and application of institutional capacity.

Board policy I.M.2.a. states:

Institution, and agency strategic plans shall be aligned with the Board's statewide strategic plan and, for institutions, with their accreditation requirements. They are to, [sic] be created in accordance with Board guidelines, and must be consistent with Board approved mission statements. Community colleges shall use the mission statements approved by their respective local Board of trustees. Institution mission statements shall be approved in accordance with Board policy subsection III.I.

In addition, Board policy mandates that strategic plans are concise, containing a comprehensive mission and vision statement covering the major programs, functions and activities of the institution or agency, general goals and objectives for the major programs, functions and activities of the organization. These plans are submitted annually in accordance with a schedule established by the Executive Director of the Board. Strategic plans are made available to the appropriate constituencies through the Board's [website](#), state of Idaho's Division of Financial Management's [website](#), as well as the institution's website.

Idaho State University has maintained an ongoing strategic planning process within the parameters of the Board requirements for several decades. The current strategic plan has been a rolling strategic plan, as required by the Board, and has undergone significant updates annually since 2010. The first series of updates included the addition of ISU's core themes, with yearly changes mandated by the Board based on their yearly review and changing priorities. In April 2012, after the Board approved ISU's revised mission and core themes in February 2012, Academic Affairs leadership in conjunction with the vice presidents, the deans, and Accreditation Steering Committee revised its strategic plan to align with the mission, core themes, and the Board's strategic plan. A timeline of this work appears below.

Table 20: Strategic Planning Process Timeline

Date	Activity
April 2009	Start of 2009-2013 Strategic Plan
January 2010	New NWCCU Standards Approved and Adopted
May 2010	Executive Vice President of NWCCU Ron Baker visits campus
June 2010	ISUS's Accreditation Steering Committee formed and began process of preparing ISU's self-evaluation
Winter 2010	Steering Committee identifies Core Themes and Objectives

<b>February 2011</b>	Core Themes and Objectives solicited comments and feedback from campus community
<b>June 2011</b>	Board reviews draft revision to ISU mission statement, with request to submit a more general mission statement
<b>September 2011</b>	Board approves revised mission statement, with caveat they will be readdressed during the mission statement discussion at the April 2012 Board meeting work session
<b>September 2011</b>	ISU submits Year One Report to NWCCU
<b>April 2012</b>	Board approves revised mission statement and core themes, in response to recommendations from Year 1 report
<b>April 2012</b>	Board approved revised ISU Strategic Plan integrating Core Themes, objectives and indicators
<b>May 2012</b>	ISU was notified it would forgo its Fall 2012 Year 3 report and Fall 2013 Year 5 report
<b>April 2013</b>	Board requests updates and revisions to ISU Strategic Plan
<b>May 2013</b>	ISU hosts workshop on Demonstrated Institutional Effectiveness led by Dr. Michael Middaugh
<b>October 2013</b>	Accreditation Leadership Group formed begins refinement of indicators and Core Theme Assessment
<b>June 2014</b>	Board requests updates and revisions to ISU Strategic Plan

In conjunction with Strategic Planning, ISU’s budget process is designed to allow extensive participation by all constituents. Collaboration is encouraged throughout the departments and college units, as well as University-wide, to build an effective understanding of college and unit goals, and the relationship between budget planning and prioritizing. Idaho State University works to ensure significant participation by faculty and staff within each of the academic units. The budget development schedule for FY2015 was also designed to be consistent with the program prioritization schedule (this information is included in Appendix 16 and Appendix 17 for the prior two years). Additionally, in line with the Program Prioritization initiative, it was determined budget adjustments would be based upon the following five criteria:

1. Cost Effectiveness (budget vs. actual, productivity, performance)
2. Importance to the Institution (mission, vision, core themes, strategic plan, mandates)
3. Demand (internal, external)
4. Quality (input, outcomes, how well delivered, research, student retention)
5. Opportunity (collaboration, resource sharing, savings, improvements)

The Office of Finance and Administration has developed a consistent process with consistent forms and timelines for budget planning that is applied across campus. As discussed in Standard 2.F.3, ISU has established a Special Budget Consultation Committee appointed by the Vice President for Finance and Administration that consists of three faculty members, two representatives from ISU’s Staff Council, three student leaders from ASISU, a senior staff member from the Office of Academic Affairs, the Vice President for Finance and Administration, and two university business officers, all supported by other staff from the Office of Finance and Administration. The Special Budget Consultation Committee hears presentations from all institutional units that outline the unit’s proposed budget for each of the required scenarios. Following these presentations and additional meetings, the committee considers how best to meet the University’s budget requirements for the fiscal year, and recommends a budget for each unit based on the presentations and other information provided. The budget recommendations of the Special Budget Consultation Committee are reviewed with the institution’s vice presidents and the President. Each component of the University’s budget is revised as necessary to reinforce and support ISU’s overall resources, goals, and strategies, in particular its primary mission of health sciences education.

The most recent program prioritization mandate of the Board provided an opportunity that allowed for the most comprehensive assessment of academic and non-academic program review for alignment with ISU’s mission. Idaho State University approached this mandate with the goal of supporting strategic

initiatives, institutional mission, strategic plan and core themes through appropriation of resources based on prioritization of academic and non-academic units and programs. For the academic programs an evaluation and scoring matrix based on Dickeson criteria approved by the Faculty Senate, Deans' Council and the Board was employed. As part of this effort, a business intelligence tool focused at the academic program level, was developed for internal use by both deans and chairs as well as the Provost and Vice President for Academic Affairs. Internally, this is known as Program Viability. The Program Viability web application will provide annual and historical data for the use of on-going program decisions.

As further discussed in Standard 2.A.9, at the university level, the President and Vice Presidents have the responsibility and accountability for planning, organizing, and assessing institutional achievements and effectiveness. Through Board policy cited in previous sections, ISU's president is charged with ultimate responsibility for the internal management of the University. This includes final accountability for university planning and operation that will enable effective and efficient functioning, and will encourage responsible and effectual contribution and input from constituent groups in achieving university goals and institutional decision-making. The president acts in consultation with the vice presidents and is also advised by members of the President's Cabinet.

3.A.5	The institution's planning includes emergency preparedness and contingency planning for continuity and recovery of operations should catastrophic events significantly interrupt normal institutional operations.
-------	---

ISU's Emergency Management Program requires that the University have a comprehensive all hazards emergency response plan which encompasses the four strategic pillars of emergency management: preparedness, prevention/mitigation, response, and recovery. ISU's Emergency Response Plan utilizes the Incident Command System, and is in compliance with the National Incident Management System.

Idaho State University's Emergency Response Plan acts as the fundamental guidance for emergency response on all ISU campuses. The coordination of this plan and standard operating procedures within the plan is an ongoing process through regular training and exercises, to include local first responders at all ISU campuses.

All personnel who are defined and tasked as emergency responders or emergency management personnel are required to train and/or be certified to minimum levels of competency as required by various federal, state, and local standards, including Homeland Security Presidential Directive-8 (HSPD-8). For most personnel, this means, at a minimum, completing training courses such as the NIMS introductory course IS 700 or higher and the Introduction to Incident Command System (ICS) for Higher Education ICS 100he.

The University has established a fully-equipped Emergency Operations Center, and alternate Emergency Operations Centers on all three campus locations; and have a fully operational van that can be used at the incident site as either an Emergency Operations Center or as the incident command post.

As a supplement, each building on campus has established an evacuation/lockdown plan with building coordinators assigned to direct these efforts.

The Continuity of Operations Plan (COOP) strategy involves all campus entities with essential functions necessary to ensure the University's ability to maintain operational capability during any incident or

catastrophe/disaster, whether man made or natural. This strategy includes a Continuity of Government Plan for the President's Office. The essential functions identified by the University, and for which it is developing COOPs include the following: Security; Safety; Health Services; Academic Affairs; Research; Finance & Administration; Facilities; Information Technology Services; and Student Affairs, specifically food services and housing.

Idaho State University is working toward emergency management accreditation through the Emergency Management Accreditation Program, to be completed by January 2015. Emergency Management Accreditation Program, as an independent non-profit organization, fosters excellence and accountability in emergency management and homeland security programs, by establishing credible standards (64 Standards) applied in a peer review accreditation process.

As IT services have become increasingly mission critical, ISU has worked to ensure that those services are both robust and secure. Backup power is in place for mission critical applications. A regular schedule of data backup is in place. All server data (about 100 TB) is sent to backup appliances. These feature de-duplication and compression, and currently have a combined capacity of 18 TB. The data is then copied to tape and stored off-site. Idaho State University's data retention policy consists of three distinct sets of data: regular server files are retained for six months; student academic data is retained for one year; and ERP database data is retained indefinitely.

Processes include full backup weekly. These are supplemented by daily incremental backups. The systems administrator in charge of data backups monitors backup job results on a daily basis and the computer operations staff are in charge of tape rotation and data verification under the guidance of the backup systems administrator. Backup software has built-in data verification functionality. This is performed on random jobs in each category (file system, student academic data, and ERP database data) on a monthly basis.

## **Core Theme Planning, Assessment, and Improvement**

### *Executive Summary of Eligibility Requirements 22 and 23*

#### ***Eligibility Requirement 22: Student Achievement***

Idaho State University identifies and publishes the expected learning outcomes for each of its degree and certificate programs. This information can be found in the [undergraduate catalog](#). As part of its program review process, the University engages in regular and ongoing assessment to validate student achievement of these learning outcomes.

#### ***Eligibility Requirement 23: Institutional Effectiveness***

As indicated in ISU's response to Standards 3, 4, and 5, the University applies clearly defined evaluation and planning procedures, assesses the extent to which it achieves its mission and core themes, uses the results of assessment to effect institutional improvement. These activities reside at both the local and university level, where results are communicated to the ISU's constituents primarily through reports and briefs from the Office of Academic Affairs and the Office of Finance and Administration. Through these processes it regularly monitors its internal and external environments to determine how and to what degree changing circumstances may impact the institution and its ability to ensure its viability and sustainability.

### Standard 3.B Core Theme Planning

3.B.1	Planning for each core theme is consistent with the institution’s comprehensive plan and guides the selection of programs and services to ensure they are aligned with and contribute to accomplishment of the core theme’s objectives.
3.B.2	Planning for core theme programs and services guides the selection of contributing components of those programs and services to ensure they are aligned with and contribute to achievement of the goals or intended outcomes of the respective programs and services.
3.B.3	Core theme planning is informed by the collection of appropriately defined data that are analyzed and used to evaluate accomplishment of core theme objectives. Planning for programs and services is informed by the collection of appropriately defined data that are used to evaluate achievement of the goals or intended outcomes of those programs and services.

Preparations for this self-evaluation began before the new standards were formally adopted by the NWCCU. Representatives from ISU attended a number of sessions on the proposed standards and were broadly familiar with them when they were adopted in 2010. In May 2010, Dr. Ron Baker, then Executive Vice President of NWCCU, visited the University and articulated the standards to major stakeholders at ISU. By June 2010 ISU’s Accreditation Steering Committee was formed and formally began the process of preparing the institution’s self-evaluation. The membership of the Steering Committee was intended to be inclusive, and the committee sought campus expertise as needed. Its deliberations began with a review of the new standards and careful consideration of ISU’s Mission Statement and Strategic Plan. The self-evaluation process has led to refinement of each of those documents.

By the winter of 2010 the Steering Committee had identified four Core Themes and Objectives for each theme. Beginning in February 2011 these were shared with the campus in a variety of presentations. The Steering Committee solicited comments and refined the Core Themes and Objectives, and began development of the set of indicators. Given the new accreditation standards process, and the compressed time frame for completion of the Standard One Report, the Steering Committee continued its work throughout the summer. It submitted the report draft for review by the University community in early September.

Idaho State University’s Year One Self Evaluation was reviewed by a NWCCU Evaluation Panel and resulted in two Recommendations. Following that, the Accreditation Steering Committee continued work on the later Standards. In May 2012 ISU was notified that NWCCU would forego the institution’s Year Three report and visit scheduled for Fall 2012, as well as the Year Five report in Fall 2013. Idaho State University’s Year Seven report and visit scheduled in Fall 2014 expanded to include onsite evaluation of Standards Two, Three, Four, and Five.

In Spring 2013 ISU hosted a workshop entitled “Demonstrating Institutional Effectiveness,” which was led by Dr. Michael Middaugh. The workshop was intended to strengthen ISU’s responses to standards Three and Four and attracted nearly 200 participants from ISU and other institutions.

By May 2013 ISU’s accreditation efforts accelerated. The Steering Committee had successfully addressed Standards 1 and 2, and at this point, a more focused group was needed to work on the remaining standards. To achieve this end the Accreditation Leadership Group (ALG) was constituted. The ALG is

effectively a distillation of the Steering Committee, as most members of the ALG came from the Steering Committee. See Appendix 3 and Appendix 4 for the membership of these two groups.

The University regularly and systematically collects data related to clearly defined indicators of achievement, analyzes those data, and formulates evidence-based evaluations of the achievement of core theme objectives. This analysis is intimately tied to strategic planning review and analysis which takes place on an annual basis in conjunction with regular review and input at the April and October Board meetings. As discussed in Standard 3.A. above, ISU demonstrates clearly defined procedures for evaluating the integration and significance of institutional planning, the allocation of resources, and the application of capacity in its activities for achieving the intended outcomes of its programs and services and for achieving its core theme objectives. Idaho State University disseminates assessment results to its constituencies and uses those results to effect improvement.

# Effectiveness and Improvement

## Standard 4.A Assessment

### Core Theme One—Learning and Discovery

Objectives	Indicators
<p><b>1.1 Innovation and creativity in the pursuit of knowledge</b></p> <p>ISU fosters student learning through teaching, research, and creative activity. Students learn through opportunities that develop their careers, and engage in research and scholarly activities. Faculty are actively engaged in research and creative activities.</p>	<p><b>1.1.1</b> Number of students participating in Career Path Internships</p>
	<p><b>1.1.2</b> Number of graduate assistantships and fellowships with teaching responsibilities</p>
	<p><b>1.1.3</b> Number of students employed as English, math, and content area tutors</p>
	<p><b>1.1.4</b> Number of students employed to work with faculty on research projects</p>
	<p><b>1.1.5</b> Number of theses and dissertations completed</p>
	<p><b>1.1.6</b> Examples of end of the year research presentations</p>
	<p><b>1.1.7</b> Examples of outstanding research and innovation</p>
<p><b>1.2 Program quality and relevance</b></p> <p>ISU demonstrates academic excellence at all program levels: technical certificates; undergraduate, graduate, and professional degrees; and postgraduate professional training. Academic programs prepare students for employment or postgraduate study.</p>	<p><b>1.2.1</b> Number of faculty peer-reviewed publications, juried shows or exhibits, performances, and conference presentations</p>
	<p><b>1.2.2</b> Examples of placement rates of graduates from academic and professional-technical programs</p>
	<p><b>1.2.3</b> Number of certificate, associate, and baccalaureate students who enroll in programs at the next degree level upon graduating</p>
	<p><b>1.2.4</b> Number of regular comprehensive program reviews conducted each year</p>
	<p><b>1.2.5</b> Number undergraduate and graduate degrees awarded</p>

**Core Theme One, Objective 1.1**

Table 21: Objective 1.1

Core Theme One: Learning and Discovery	
Objectives	Indicators
<p><b>1.1 Innovation and creativity in the pursuit of knowledge</b></p> <p>ISU fosters student learning through teaching, research, and creative activity. Students learn through opportunities that develop their careers, and engage in research and scholarly activities. Faculty are actively engaged in research and creative activities.</p>	<p><b>1.1.1</b> Number of students participating in Career Path Internships</p>
	<p><b>1.1.2</b> Number of graduate assistantships and fellowships with teaching responsibilities</p>
	<p><b>1.1.3</b> Number of students employed as English, math, and content area tutors</p>
	<p><b>1.1.4</b> Number of students employed to work with faculty on research projects</p>
	<p><b>1.1.5</b> Number of theses and dissertations completed</p>
	<p><b>1.1.6</b> Examples of end of the year research presentations</p>
	<p><b>1.1.7</b> Examples of outstanding research and innovation</p>

**Indicator 1.1.1: Number of students participating in Career Path Internships**

The Career Path Internship (CPI) program provides significant internship opportunities for ISU students at all levels related to their academic and career interests. These internship experiences help students acquire meaningful knowledge and familiarity with the world of work and helps them prepare more proficiently for their life and career after university graduation. This hands-on involvement significantly impacts their educational experiences at ISU while simultaneously increasing student retention.

The CPI program began in FY2011 with a modest budget of \$300,000 and a few hundred student participants. The CPI budget has increased each year and is projected to have a budget of \$1.7 million for FY2015; the number of student participants has also continued to grow. The table below illustrates the growth of the CPI program:

Table 22: Growth of Career Path Internship Program

	FY2011	FY2012	FY2013	FY2014	FY2015
<b>Number of Students in CPI program:</b>	282	521	668	722	
<b>Budget of CPI program:</b>	\$300K	\$1.2M	\$1.3M	\$1.4M	\$1.7M*

\*Projected budget for FY2015

The CPI program is a university priority and the administration has developed opportunities for students and departments to increase professional assistance while offering students experiences to develop their skills and marketability. Not only will students participate in positions directly related to their career ambitions, they will take part in other activities to develop their critical thinking abilities and provide overall transferable skills.

At the beginning of each fiscal year, departments may submit CPI funding requests to their respective college dean to acquire CPI money by using the Funding Request Form found on the main CPI webpage. Based upon the available CPI funding each Fiscal Year, which is determined by the Vice President for Finance and Administration, the Provost will designate allocations for each ISU college within Academic Affairs, and the Vice President for Student Affairs will designate allocations to non-academic departments. CPI allocations and expenditures for each college will be reviewed carefully after each pay period. CPI allocations may be revoked and reassigned if these funds are not being used judiciously and for the program's intended purpose as stated above. Current allocation of CPI positions is 82.3% to academic units and 18.7% to non-academic units. CPI allocations and expenses are based on the University's fiscal calendar (July 1<sup>st</sup> to June 30<sup>th</sup>).

*Qualifications for CPI Eligibility:*

1. Applicant must be enrolled as a degree-seeking ISU student. (Students have to be taking full-time credits from ISU if they are taking classes from another university at the same time)
2. Student must be enrolled in at least 12 credits as an undergraduate or 9 credits as a graduate. However, graduate students who are working on a thesis or dissertation must enroll in at least 1 academic credit to remain eligible.
3. May work only one CPI position at a time.
4. Must be in good academic standing with the University to qualify for, and maintain a CPI position.
5. Must not be receiving a graduate assistantship with a stipend within the same semester. Graduate students with a stipend may do a CPI for 12 weeks during the summer, but not during the regular school year.
6. A student who is enrolled in the spring and also registered for the fall, but not enrolled for the intervening summer is eligible for a summer CPI.
7. Students enrolled in post baccalaureate programs are ineligible.
8. All CPI paperwork with each required signature must be completed.
9. Full time ISU employees and non-ISU students are ineligible for CPI positions.

Of the 668 students that participated in the program during the 2012-13 academic year, 76% returned for the 2013-14 academic year. The Career Center conducted a survey to identify participant satisfaction with the program, and 99% of CPI students said the experience they gained in their internship will enhance their chances of finding a full-time job in their field. The Career Center also conducts a graduation employment survey six months after graduation. The plan is to ask the graduates if they participated in the CPI program and if so, did it help in their job placement.

Indicator 1.1.1 is an indicator in ISU's FY2015-2019 Board approved Idaho State University Strategic Plan – Mapping Our Future: Leading in Opportunity and Innovation supporting Goal 1: Learning and Discovery, with a FY2014 benchmark of 600 CPI students. Idaho State University will begin a new strategic planning phase in January 2015.

***Indicator 1.1.2: Number of graduate assistantships and fellowships with teaching responsibilities***

Graduate assistantships and fellowships at ISU are highly valuable resources offering a mechanism for the creation of paid positions that have been shown in literature and practice to further graduate students' educational experience, develop higher-level skills, and exponentially increase employment potential.

Idaho State University awards assistantships to select graduate students in many of its graduate programs. For many students in ISU graduate programs, graduate assistantship stipends serve as the primary means of support. Further, the freedom afforded (benefits such as health insurance and tuition) in receiving the graduate assistantship, allows graduate students to grow professionally by allowing them to work, research, teach, develop and apply discipline-based skills in their area of expertise.

It is important to note that assistantships and fellowships are mutually beneficial to both the student and the University. Importantly, the University's educational goals are met in a number of important ways. The University benefits in virtually every program, undergraduate and graduate, from assistance provided by high-quality teaching and research services at a cost that cannot be matched in any other way. In addition, some programs support graduate assistants' attendance and/or participation in regional or national professional conferences with a mentor. Not only do such opportunities broaden a student's picture of his or her field of study, but they allow students a platform to network with other professionals, make potential business contacts, learn about potential internship and employment opportunities, and identify opportunities for future collaboration and funding.

Appointment to an assistantship is contingent upon admission into a graduate degree program as a classified student. Currently the Graduate School considers programmatic needs, future growth in graduate education, emerging or declining fields, and other strategic metrics for the allocation of graduate assistantship funds in individual departments or programs. Once appointed, program or department-specific assignment of duties for the assistantship recipient are determined by the hiring department.

At Idaho State University, two types of graduate assistantships exist, each with its own specific responsibilities and benefits: Graduate Teaching Assistants and Graduate Research Assistants.

*Graduate Teaching Assistants* – Graduate Teaching Assistants, also known as GTAs, often aspire to join academia by becoming professors or higher education educators in the future. Major responsibilities of GTAs include teaching entry-level undergraduate classes or non-major courses in their field of study. Additional responsibilities may include meeting with the class professor, creating lesson plans, and grading student evaluations. GTAs may or may not have primary responsibility for a course; they may serve as discussion leaders, graders, leaders of laboratory sections, or assist in capacities such as preparation of assignments, and other administrative duties necessary for a course. GTAs are employed by the University on appropriated funds to provide direct assistance for the teaching mission of the University by supporting departments or programs individually. They are expected to provide just less than 20 hours of service per week to the University in exchange for their stipend and benefits. The number of GTA positions is relatively stable, allocations can be planned in advance, and numbers may grow as State appropriations are directed towards this strategic resource.

*Graduate Research Assistants* – Graduate Research Assistants, also known as GRAs, often run lab experiments or assist in other lab or research work to assist a professor in his or her research program. GRAs are therefore employed – and usually paid from a grant held by the student's advisor – to perform duties related to a scholarly project or program of research under the guidance and direction of the

particular faculty member called a mentor or principal investigator. These duties allow the GRA to gain valuable research experience in their given field. GRAs may also be asked to help present at professional conferences or help prepare articles for peer-reviewed journals. GRAs may sometimes have academic or administrative support responsibilities as assigned by their mentor, such as setting up classroom demonstrations or grading exams.

Because the source of funding for GRAs is usually extramural and grant-based, the number of GRA positions available university-wide will vary from year to year or even semester to semester. Strategic planning based on these positions is difficult. However, GRA positions afford an effective way to leverage total available graduate assistantship positions by exchanging with GTA positions in years when a faculty member has a grant. Faculty members are therefore highly encouraged to request funding for GRAs in their grant proposals.

*Fellowships* – Doctor of Arts Fellowships are awarded each year to students admitted to and enrolled in Doctor of Arts programs. These fellowships are available in the Departments of Biological Sciences, English, Mathematics, and Political Science. Most of these fellowships are awarded in the spring semester for the next academic year. Although English no longer offers a D.A. program, in favor of a Ph.D. only offering, the English Ph.D. program’s aims and scope continue to be aligned with that of the Fellowship and will remain eligible for the Fellowship, with the Fellowship descriptive language currently under review to reflect that change.

The table below shows a significant upswing in assistantships and fellowships and is estimated to have a minimum of 50 more in FY2015.

Table 23: Graduate Student Assistantships and Fellowships

	FY2011	FY2012	FY2013	FY2014
No. of students	243	251	240	250

Indicator 1.1.2 is also an indicator in ISU’s Strategic Plan, supporting Goal 1: Learning and Discovery, with a FY2014 benchmark to increase by ten over the next three years.

**Indicator 1.1.3: Number of students employed as English, math and content area tutors**

Idaho State University’s employs student tutors through three distinct sub-programs: Content Area Tutoring, the Math Center, and the Writing Center. Student demand and tutor availability are two primary reasons the number of student tutors hired can fluctuate from one term to the next.

Table 24: Number of University Tutors

	FY2011	FY2012	FY2013
Math, English, and Content Area Tutors	191	112	141

Student demand affects the total number of student tutors ISU hires because the majority of tutors are hired through the Content Area Tutoring program. Content Area Tutoring recruits tutors in response to specific student requests. If twelve students request tutoring in a single course, then they attempt to find enough tutors to meet those students’ needs.

Demand is also affected by and fluctuates because of students’ schedules: if students requesting tutoring can be grouped together at one or more times convenient for a single tutor, no further tutors will need be hired. However, if students’ availability is incompatible, that may necessitate recruitment of additional tutors with different schedules.

Tutor availability affects the total number of student tutors in several ways. First, fully-qualified student tutors are not always available for the positions needing to be filled. More than 80% of tutors are current ISU students. If there are not any current students available to fill a particular tutoring need, ISU may hire a non-student to meet the needs. During some terms, ISU has many qualified student applicants to choose from and the total number of its student tutors is higher; in others, the percentage of non-student tutors may be greater and the total number of student tutors lower.

Second, ISU’s overall number of tutors is impacted by individual tutors’ schedules. In one semester, for example, the Math or Writing Center tutoring staff may include four student tutors each of whom is able to work a dozen hours a week. The following term, the same tutors may have different obligations and an additional three or four student tutors may be needed to cover the same hours. A finance tutor with a flexible schedule who wants to tutor fifteen hours a week may be the only finance tutor Content Area Tutoring needs in a given term; during the previous term, three tutors with more limited hours may have met the same demand.

Third, the number of tutors needed in any given semester varies with the qualifications of its tutors. If the same student can tutor management, accounting, and finance, that’s a single hire. If separate tutors must be hired for each of these subjects—or for different courses within any of them—the total number of tutors increases accordingly. During some terms, the same student can tutor both MGT 2216 and MGT 2217; in others, they cannot, and a second tutor must be hired.

The College of Technology Resource Center employs peer tutors, advanced students in professional technical education (PTE) programs, who tutor students within their programs. Peer tutors are recommended by their program instructors and are trained to guide the student toward independent problem solving. Beginning Fall 2014, College of Technology peer tutors will receive certification through the International Tutor Training Program Certification (ITTPC) offered by the College Readiness and Learning Association, and will be eligible for three levels of certification based training. Optimal training provides students with an increased quality of tutoring and improves student success. In FY2014, 259 PTE students received 4,255 hours of tutoring

*Table 25: College of Technology Resource Center Peer Tutors*

	FY2011	FY2012	FY2013
<b>Resource Center Peer Tutors</b>	63	48	50

Indicator 1.1.3 is an indicator in ISU’s Strategic Plan supporting Goal 1: Learning and Discovery, with a FY2014 benchmark to maintain adequate number of student tutors to meet need, because tutoring needs can vary significantly from semester to semester.

**Indicator 1.1.4: Number of students employed to work with faculty on research projects**

Idaho State University undergraduate and graduate students are actively involved in research with faculty across campus. Research opportunities are noted because they illustrate the dedication of the University to provide students diverse learning experiences in and out of the classroom.

While the table below reflects how the number of students employed to work with faculty on research projects has fluctuated over the last few years there are a variety of reasons for the fluctuations. This is due in part to a decrease in general research dollars, combined with the growth of the Career Path Internship (CPI) program, and increased need to use local funding to support these efforts. Currently, to generate this data ISU utilized the payroll system and tracked positions that were funded by Current Restricted Federal Grants, Current Restricted State Grants and Current Restricted Other Grants. Additionally, some students choose to participate in research for academic credit, or collaborate on a volunteer basis to gain experiences to apply for graduate school. At this time, it is difficult to determine whether the number of students employed in this area is truly down or the source of payment has shifted to the CPI program and local funding sources. In order to assess the long term impact of these changes, an analysis will need to be conducted to obtain a true picture of student employment in the research area.

Table 26: Student Research Employment

	FY2011	FY2012	FY2013
Number of Students employed to work with faculty on research projects	385	413	372

Indicator 1.1.4 is an indicator in ISU’s Strategic Plan supporting Goal 1: Learning and Discovery, with a FY2014 benchmark to increase by 3% per year for the next five years.

**Indicator 1.1.5: Number of theses and dissertations completed**

The following graph depicts the trend, in real numbers per year, of the number of total graduate degrees conferred by ISU’s Graduate School programs. The number of degrees conferred is an accurate quantitative metric of student success at the graduate level and, in ISU’s case, includes aggregate numbers of thesis/dissertation, as well as non-thesis degrees. Some programs don't require theses/dissertations but are clinical or business project oriented, with such an option as gradable towards degree completion.

There was a slight continuous rise in the number of graduate degrees conferred from 2008 through 2013, with a slight decline in 2014.

The trend at ISU follows a national trend in graduate degrees conferred. In the wake of the most recent recession there is accumulating evidence that students have been unusually nimble in modifying their higher education choices based on observed changes in the labor market, leading to increased or decreased enrollment over a time period, and hence commensurate increased or decreased graduation rates (degrees conferred), usually seen 4-5 years following the earlier enrollment shift.

Several avenues exist for students to adjust higher education decisions and expectations –in particular at the graduate degree level – in response to declining or rising business cycles. These decisions are reflected and even paralleled in the graph below.

These reactionary options to a changing labor market include the following three actions (among several others that can be detailed as well):

1. Students may enroll in a graduate degree program, whereas they might previously have opted to forgo a graduate education in deference to entering a lucrative job market earlier.
2. Students already enrolled in college as undergraduates may choose to continue as graduate students until the economy and stressed job market returns to normal.
3. Students already enrolled as graduate students can modify their time to degree completion.

In a volatile business cycle any or all of these effects would alter the proportion of students graduating in certain fields, and their time to graduation, in particular if ISU assumes that these effects are fundamentally different across disciplines. A cursory analysis of the graduation numbers (i.e. degrees conferred) in particular disciplines offered at ISU will allow a parsing out of the effect of the economic climate impacted graduation rates over the period 2008-2014.

Figure 7: Graduate Degrees Conferred

Figure 8: Total Theses/Dissertations

Figure 9: August Theses/Dissertations

Figure 10: December Theses/Dissertations

Figure 11: May Theses/Dissertations

While Indicator 1.1.5 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating the ability of students to conduct independent, original, and significant research within their discipline. This indicator further supports Objective 1.1 Innovation and creativity in the pursuit of knowledge. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this and other metrics will be incorporated into that discussion.

***Indicator 1.1.6: Examples of end of year research presentations***

There are various opportunities for students to present research projects. Many faculty engage undergraduate and graduate students in faculty research and educate them about research activities. In many colleges, students are involved in all phases of the faculty research projects, starting with literature reviews, IRB applications, and data collection and analysis.

The Division of Health Sciences Research Day is hosted annually. This event provides an opportunity to showcase scholarly activities of faculty and students through poster, podium and roundtable presentations. The purpose is to promote in students the desire to not only practice clinically, but to also move practice forward with more effective, evidence-based methods and applications. The 2014 Research Day had 68 participants with more than 455 in attendance. The event also hosted regional research leaders to promote collaboration in the Mountain West Clinical Translational Research-Infrastructure Network. Researchers met one-on-one with researchers at both the Pocatello and Meridian campuses to bolster research efforts with ISU and universities across the western region of the U.S. The project is designed to increase patient-focused research in topics that address health issues in the western U.S. Research infrastructure in the region will be enhanced through pilot grant programs, study design and biostatistics support and faculty development offerings.

In May 2014, ISU College of Science and Engineering collaborated with the Idaho National Laboratory to host the National Wireless Research Symposium focusing on wireless communications. The symposium included six single-track research sessions, technical panels that reflected state-of-the-art research.

A collaboration between the College of Arts & Letters and the Anderson Gender Resource Center, the Annual Gender & Sexuality in Everyday Life Conference, provides students and faculty opportunities to present research on various topics related to gender and sexuality. Over 30 papers were presented by students and faculty from ISU and other institutions around the country.

The College of Education, Instructional Design program hosts a Research Day the last Saturday before finals week each semester. All Master's students in the M.Ed, and Ph.D. students in the Instructional Design program attend and present their research or projects derived from their semester coursework. For example, the beginning Master's students may present findings concerning the classroom integration of specific instructional technologies as part of EDLT 6616 (Integration of Technology into the School Curriculum) and advanced Master's students may present on the design and development of an online module as part of EDLT 6656 (Multimedia Development in Education). Beginning Ph.D. students may present a group project on evaluation of online resources (EDLT 7744, Instructional Systems Design II), while advanced Ph.D. students may present a draft version of a conference presentation that they have been working on in seminar (EDLT 7749) or practicum (EDLT 7737). Presentations may represent individual or group work, depending on the assignments for class. In addition, doctoral candidates engaged in dissertation research are encouraged to present their preliminary findings. Research Day allows student work to be reviewed by peers (often prior to the final submission for grading); it allows distance students from both programs to meet face-to-face, creating a sense of social cohesion among and between cohorts; and it creates a recruiting opportunity to bring students from the master's program to the Ph.D. Research Day provides evidence that students are meeting objectives for their courses (which are aligned with Instructional Design or Instructional Technology standards) as well as the more general COE Standards for Advanced Professionals that addresses professionalism, research, and dissemination of results.

Psychology holds an annual research day as part of recruitment efforts for the graduate programs. All students enrolled in years one through four participate; typically 5-6 give oral presentations while the rest provide poster presentations. All faculty participate. In April 2014, the Psi Chi, Psychology Honor Society, also hosted an undergraduate conference with attendees and presenters from across the region. Students gave oral presentations as well as poster presentations.

The School of Rehabilitation and Communication Science had five poster presentations by students at the Inter-Mountain Speech and Hearing Association Convention in Denver, CO; 13 poster presentations, and four oral presentations by students at the American Speech-Language and Hearing Association Annual Convention in Chicago, IL.

The School of Performing Arts had 11 music students present solo public recitals during Spring 2014. These solo recitals are the culmination/capstone of their creative studies.

Another event is the Research Symposia. The Undergraduate and Graduate Student Research Symposia were held in the spring of each academic year. Both were opportunities for students from any discipline, to showcase the research they worked on over the past year. Students developed a poster, describing their research, and presented it at the symposia. The university community was invited and many faculty, from all disciplines, attended. Many students used this as an opportunity to prepare for poster presentations at discipline-specific conferences. Any ISU student with research or creative activities to present were included. The Symposia was not held in FY14. The event is currently being re-evaluated.

*Table 27: Students Participating in Research Presentations and Events*

	FY2011	FY2012	FY2013
<b>Number of student participating in research symposia</b>	134	160	142

### **Examples of Student Research Presentations**

Exploring the predictors that may influence the variations in teen birth rates by state, Moparhi, D. (Presenter & Author, Graduate), Fore, M.E. (Author Only), Mispireta, M.L. (Author Only), Piland, N. F., Division of Health Sciences, Research Day, ISU-DHS, Pocatello, ID, March 15, 2013.

Rural Anesthesiologist Compensation: Revisiting the Rural Pass-Through, Wucinich, M. (Presenter & Author, Graduate), Mispireta, M.L. (Author Only), Fore, M.E. (Author Only), Piland, N.F. (Author Only), Stead, S., Cohen, N. (Author Only), Reynolds, P. Q., Division of Health Sciences Research Day, ISU-DHS, Pocatello, ID, March 15, 2013.

The capstone for the Master of Public Health (M.P.H.) program is a thesis. At the end of the program, all students present their thesis findings during a formal oral defense. Several examples are listed below:

Moore, K.E., Hunt, L., Carr, G.M., & Tivis, R.D. Participant satisfaction with ISU Meridian Health Science Center’s free comprehensive community health screening events. Presented on April 2014 at ISU Research Day.

Thorne, J., Moore, K.E., & Carr, G.M. Routine HIV and hepatitis C screenings utilizing an interprofessional approach. Presented on April 2014 at ISU Research Day.

Tivis, R., Hunt, L., Moore, K., & Carr, G. Community health screenings: Evaluation of an interprofessional experience. Presented on April 2014 at ISU Research Day.

Wucinich, M. K. Rural anesthesiologist compensation: Revisiting the rural pass-through. Podium Presentation. Presented on April 2014 at ISU Research Day.

Gruver C, Mispireta ML, Rankin LL, Blanton C. Shared medical appointments and children with type 1 diabetes: factors influencing glycemic control. Presented on April 2013 at ISU Research Day in Pocatello.

Wucinich M, Miller TR, Mispireta ML, Piland N, Reynolds PQ. Rural anesthesiologist compensation – revisiting the rural pass-through. . Presented on April 2013 at ISU Research Day in Pocatello.

Campbell J, Louis G, Mispireta ML. A case study of a community health worker program: Comunidades Unidas Peru. Presented on April 2011 at ISU Research Day in Pocatello.

While Indicator 1.1.6 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating the opportunity to showcase exemplary work/projects. While this is a qualitative measure, this indicator further supports Objective 1.1 Innovation and creativity in the pursuit of knowledge.

#### ***Indicator 1.1.7: Examples of outstanding research and innovation***

Idaho State University student and faculty researchers regularly contribute to scientific, medical (health), and other advances across the disciplines, often in collaboration with colleagues and partners. High-quality research reflects a community that is dedicated to the pursuit of knowledge, to the dissemination of knowledge, and to improving lives and solving society's most pressing issues.

Below are examples of outstanding research and innovation taking place at Idaho State University.

In collaboration with the University of Idaho and Boise State University, ISU has successfully competed for a \$16.3 million NIH award entitled IDEa Network for Biomedical Research Excellence. This grant funds undergraduate summer fellowships (114 since the program started) and 29 graduate student research assistantships. Since January 2014, ISU has secured new awards; over \$4.5 million in the area of material science and nanotechnology, over \$1 million to develop a novel medical isotope to treat human cancers ( $^{67}\text{Cu}$ ), \$1.7 million to study sleep in children and substance use/abuse, and \$3.5 million from the National Science Foundation for long-term environmental research. These new awards add significantly to university base funding of approximately \$40 million. Idaho State University is aggressively developing leadership positions in nuclear material science and nanotechnology, long term environmental ecosystem services research, and the health sciences.

Idaho State University's Research Park is focused on moving new technologies from bench to market efficiently. Thus, ISU has developed strong partnerships with several private companies including ON Semiconductor, KAERCI, Advanced Ceramic Fibers, International Isotopes, and Halliburton.

Idaho State University is committed to applying for grants to fund critical research that has far reaching impact on the community. Below are recent examples of grants awarded to ISU faculty:

Development and Implementation of a Person-Centered Hospital Discharge Planning Model, grant from Centers for Medicare and Medicaid Services, Russ Spearman, PI, Debra Larsen Aubrey, Co-PI.

Traumatic Brain Injury State Partnership Grant from Health Resources and Services Administration, Russ Spearman, PI. Only 20 states were funded, Idaho ranked 8th with a score of 95 out of 100. \$1 million over four years.

Idaho Awareness to Action Youth Suicide Prevention Early Intervention Project, Beth Hudnall Stamm, PI, Ann Kirkwood, Co-PI

Safe and Stable Families, grant from the Idaho Department of Health and Welfare, Debra Larsen Aubrey, PI

Cost Effectiveness Study of the Indian Health Service Teleradiology Initiative, grant from University of New Mexico, Neill F. Piland, PI

National Institutes of Health's National Institute on Alcohol Abuse & Alcoholism and National Institute of General Medical Sciences grant, Maria Wong. \$1.62 million grant titled Sleep physiology and risk for alcohol problems in children of alcoholics.

Child Welfare Training Contract, Idaho Department of Health & Welfare, Extension, Jensen-Hart, S. PI. \$1,278,750 – December 2010- June 2015.

Xiaomeng Xu. 2014-Present Understanding the Role of Self-expansion in Physical Activity (PI: Xu, X.). Funded: \$82,427. Mountain West Clinical Translational Research – Infrastructure Network (#1U54GM104944-01A1, NIGMS, NIH) Pilot Grant.

Brumley, M.R. (PI). Title: Experiential modulation of action patterns in the developing rat. National Institutes of Health (NIH). Total amount awarded: \$164,607 (April 2010-March 2013). Direct costs: \$150,000.

Lynch, S.M. (Principle -Investigator; Co-PI: Dana Dehart and Co-Investigators: Joanne Belknap and Bonnie Green) on Bureau of Justice Assistance/Department of Justice Grant “Women’s pathways to jail: The roles & intersections of serious mental illness & trauma.” Awarded \$496,022. October 2010 to September 2012.

Wong, M.M. (Principal Investigator). National Institute of Alcohol Abuse and Alcoholism (R21 AA016851) “Sleep problems and substance use/ abuse in adolescence and young adulthood.” April 2008 – March 2011. \$ 249,642 total costs.

Students and recent alumni have presented their research at regional and national conferences. National conferences indicate that the presentation has been peer-reviewed, meaning, these presentations are considered of high quality. In addition, students/recent alumni have co-authored technical reports, i.e. deliverables for externally funded contracts.

### *Local/regional/national Conferences:*

Gruver C, Mispireta ML, Rankin LL, Blanton C. Shared medical appointments and children with type 1 diabetes: factors influencing glycemic control. Presented on May 2013 at the Idaho Academy of Nutrition and Dietetics Annual Conference in Boise.

Moparthi D, Fore E, Mispireta ML, Piland N. (2013). Exploring the predictors that may influence variations in teen birth rate by state. Proceedings of the 141st American Public Health Annual Meeting & Exposition. Boston, M.A., November 3-6, 2013.

Jeehoon Kim gave three research presentations at the 20th International Association of Gerontology and Geriatrics conference in Seoul, Korea. Dr. Kim also presented research at the Gerontological Society of America and the Society for Social Work and Research conferences.

Candace Christensen presented at the National Organization of Forensic Social Work Conference and at the CSWE conference in Dallas where she won an award. Her research focuses on gender based violence.

Staci Jensen-Hart was an invited conference presenter on ethics (April 2012) for the Idaho Association of Play Therapy.

Gesine Hearn with Kim Lee. Invisible Wounds: The Social Construction of Veterans' post-war symptoms. Annual Meeting of the Society for the Study of Social Problems; August 18 – 21, 2011, Las Vegas, Nevada.

Gesine Hearn. 2010. The Brotherhood of Pain: Persistent pain among college football players. Paper presented at the Annual Meeting of the Pacific Sociological Association, April 7 – 11, 2010, Oakland, California.

### *Technical Reports*

Sierra, H., Fore, E. and Mispireta, M. (2012). Gateway 2 Health: The Health of Southeastern Idaho. Technical Report. Pocatello, ID: Idaho State University. Public Health Program.

Running, Katrina, 2013. Oral Presentation, Annual Meeting of the American Sociological Association, New York, NY, Towards Climate Justice: How Do the Most Vulnerable Weigh Environment-Economy Trade-offs? (Presenter and Author).

Lee, H., Kim, J. & Rhee, G. 2013. Paper award with honorarium. "Do Types of Participation in Activities Matter in Improving Health and Mental Health of Older Cancer Survivors?" Poster presentation at the 20th International Association of Gerontology and Geriatrics. Seoul, Korea.

Lynch, Dehart, Belknap & Green (March 2013) Women's pathways to jail: Examining mental health, trauma, and substance use. Bureau of Justice Assistance Policy Brief. NCJ 241045.

Evans, John A (Presenter & Author), Stewart, Tara L, Washam, Ayla L, Boot, Trent, Rittenhouse, Emily, Society for Personality and Social Psychology, "Neuroticism and poor health: Self-perceptions of aging as a mediator," Austin, TX. (February 2014).

Kauer, Sierra (Presenter & Author), Roberto, Megan (Author Only), Vineyard, Mary Anne (Author Only), Strain, Misty (Author Only), Singh, Ratan (Author Only), Brumley, Michele R (Author Only),

Society for Neuroscience, "Postnatal development and spinal mediation of the bilateral leg extension response (LER) in rats," San Diego, CA. (November 13, 2013).

Lawyer, Steven R, Four Corners Association for Behavior Analysis, "Behavioral mechanisms of impulsive choice human health problem behaviors," Park City, UT. (April 2014).

Lynch, Shannon M (Presenter & Author), DeHart, Dana (Author Only), Belknap, Joanne (Author Only), Green, Bonnie (Author Only), Johnson, Kristine (Author Only), Resilience After Trauma, International Society for Traumatic Stress Studies, "Mental Health as a Mediator of Trauma Exposure and Offending," International Society for Traumatic Stress Studies, Philadelphia, PA. (November 8, 2013).

Rasmussen, Erin. Keynote/Plenary Address, Texas Association for Behavior Analysis, Dallas, TX, Impulsive choice for food as a mechanism of obesity: From rats to humans., Rasmussen, E. B., Conference, Regional, Academic, March 2013.

Stewart, Tara L, Chipperfield, J C, Society for Personality and Social Psychology, "Attributing heart attack/stroke to 'old age:' Implications for health outcomes," New Orleans, LA. (January 2013).

Weller, Joshua A, Society for Research In Child Development biennial meeting, "Risky decision making in maltreated adolescents: Do losses loom larger than gains when predicting health outcomes?" SRCD, Seattle, WA. (April 15, 2013).

Wong, Maria (Presenter & Author), Annual Research Society of Alcoholism Scientific Meeting, "Age of onset of alcohol and other substance as typology of alcohol dependence in the NESARC sample," Research Society of Alcoholism, Orlando, Florida. (June 23, 2013).

In an ongoing effort to encourage excellence in research, ISU selects five (5) Outstanding Researchers from which one is chosen for the Distinguished Researcher of the Year and is presented with an award of \$3,000. Faculty members are selected based on significant contributions in research to the University and society. The 2014 faculty that received ISU Outstanding Researcher awards were: Jennifer Attebery, professor of English; Rex W. Force; associate dean for clinical research in the Division of Health Sciences (DHS); Alan Hunt, associate professor of physics; Erika Kuhlman, professor of history; and Kathleen Lohse, associate professor of ecology.

Jennifer Eastman Attebery is professor of English and chair of the Department of English and Philosophy. Attebery's research focuses on vernacular culture of the Rocky Mountain West in the 19th and early 20th centuries, with an emphasis on Swedish Americans and other ethnic groups. Her main contributions to these fields have been expanded understanding of the multicultural West and new attention to the multimodality of vernacular expression in the immigrant letter and in holiday practices.

Rex W. Force, Pharm.D., is associate dean for clinical research in DHS at ISU. He also holds appointments as professor of Pharmacy Practice and Family Medicine and director of research in the Department of Family Medicine. With a focus on primary care pharmacotherapy, medication safety, and rural health service delivery, He has authored more than 50 professional and research publications; presented more than 100 research papers or abstracts; and speaks regularly at professional meetings. With a focus on primary care pharmacotherapy, medication safety, and

rural health service delivery, Force and his collaborators have received grants and contracts in worth more than \$5 million while at ISU.

Alan W. Hunt is research associate professor of physics. During his nearly 12 years at Idaho State University, his research projects have spanned from liquid semiconductors for novel power generation applications to electron/ion induced spaceship charging. However, his most prolific research area has been investigating and developing techniques for detecting, identifying and quantifying fissionable/fissile materials for security, nonproliferation and nuclear forensics applications. The common theme in all of his research endeavors has consistently been and continues to be the interaction of ionizing radiation with matter and how to exploit the associated phenomenon for applications. These research programs have resulted in seven students receiving Master's degrees, five students receiving Ph.D. degrees, 40 publications, four patents and more than \$20 million in research funding as principal investigator or co-principal investigator.

Erika Kuhlman is professor of history, director of Women Studies, and editor of the journal *Peace and Change: A Journal of Peace Research*. Her study of the women's peace movement during the First World War was followed by a history of women's involvement in postwar reconciliation between nations. Her 2012 book, "Of Little Comfort: War Widows, Fallen Soldiers, and the Remaking of the Nation after the Great War" traces the lives of German and U.S. women who lost their husbands to battle. Since 2012 she has studied soldiers who survived the war well enough to leave the country for which they had fought, Germany, to seek a fresh existence in the United States. Her chapter about a German writer who deserted his unit and stowed away on a ship bound for Philadelphia will appear in an anthology of Great War literature titled *Modernism and War*, forthcoming from Fairleigh Dickinson University Press. Currently she is at work on a study of five U.S.-bound German veterans, both fictional and historical.

Kathleen Lohse is associate professor of biological sciences. Lohse works at the interface of ecology, earth system/soil science and hydrology, studying the processes shaping ecosystems and their responses to anthropogenic changes. From this foundation, she tackles the challenges and complexities of sustainability and global change science. Her primary research interests include 1) understanding the hydrologic and biogeochemical processes shaping watershed ecosystems, 2) studying the ways in which land use and other human-caused changes are altering these processes in both terrestrial and aquatic ecosystems and across these traditional disciplinary boundaries, and 3) integrating social processes and other human dimensions into watershed and ecosystem management.

*Four ISU faculty members have recently been selected for Fulbright Scholar and Specialists awards. They include:*

Rajendra Bajracharya, professor and coordinator geomatics technology in the College of Technology. Fulbright Scholar award to Kathmandu University, Nepal. Research in Nepal will focus in the area of geodesy, which is the science of accurately measuring and understanding the Earth's geometric shape, orientation in space, and gravity field.

Cynthia Blanton, associate professor, Division of Health Sciences, dietetics program, earned a Fulbright Award in nutrition to Canada. Blanton will be a visiting chair in Health and Food Safety at the Institute for Nutriscience and Health in University of Prince Edward Island. Project title is "Enhancing blueberry's health effects with probiotics" and its purpose is to determine whether

blood pressure-lowering effect of blueberry consumption is improved by co-ingestion of probiotics, beneficial live bacteria.

Philip Cole, professor in the Department of Physics and Astronomy in the College of Science and Engineering, has received an Award in physics to Germany. Teaching and research project will take place at the Physics Institute of the University of Bonn at ELSA (Electron Stretcher Accelerator). Cole will investigate the nature of the string force as mediated by the quark subdegrees of freedom in neutrons and protons and how quanta of light interact with quarks through the kind of force particles that are interchanged.

Cory Schou, professor of informatics and director of the ISU Informatics Research Institute (IRI), has been selected for a Fulbright Specialists project in New Zealand at University of Waikato. He will work with developing international cooperation between University of Waikato and ISU by presenting lectures, leading computer security workshops for industry, academia and government institutions.

*Past Fulbright student and faculty awardees include:*

Autumn Gomez, 2008, student, Idaho State University graduating senior Autumn Gomez has earned a Fulbright award to work as an English Teaching Assistant in Andorra, a small country located between Spain and France. A double-major in international studies and Spanish, the 29-year-old will begin her Fulbright duties in September 2008.

Alan Johnson, 2010, faculty, Idaho State University Associate Professor of English Alan Johnson has been awarded a Fulbright Scholarship to lecture and study at the University of Mumbai in Mumbai, India, during Spring 2010.

Jennifer Attebery, 2010, faculty, Jennifer Eastman Attebery, English Department Chair and director of the folklore program at Idaho State University, has been awarded the Fulbright Distinguished Chair in American Studies at Uppsala University in Uppsala, Sweden. The Distinguished Chair position is co-hosted by the Swedish Institute for North American Studies and Uppsala University's Department of English. Attebery traveled to Uppsala Spring 2011 to lecture on American Studies and to pursue her research concerning Swedish immigrant folk culture, focusing on calendar customs. Her time at the Institute and English department brought her into contact with scholars of Swedish immigration and with resources in Swedish libraries and archives, including Uppsala's extensive folklore archives.

Bethany Hundley was awarded a Fulbright Full Research Scholarship to complete a two-part study on the deaf and deaf literacy in Nepal during the 2010-11 academic school year. Hundley – who is 80 percent deaf herself, continues to lose hearing and communicates verbally primarily through lip reading – traveled to a deaf school outside Kathmandu and lived there from August through December prior to residing in a rural village to conduct a community study of deafness from January to May.

Garth Lambson, one-month scholarship, student, Summer 2011, was awarded a Fulbright scholarship to study the Irish language and folklore at the National University of Ireland in Galway. He attended a one-month study session at the NUI summer college in An Cheathrú Rua. Lambson, and stayed in An Cheathrú Rua with an Irish-speaking family.

Michael Adams, 2011, student, pursued his passions for sculpture, Viking ships, and Norse mythology. Combining these interests into multi-media sculptural installations he worked in Oslo, Norway.

Cynthia Pemberton, faculty, was awarded a Fulbright scholarship to teach at the University of Malta, in Misida, Republic of Malta, for the 2011-12 academic year.

Chikashi Sato, faculty, received a Fulbright Scholarship to teach and conduct research Tribhuvan University in Prithvi Narayan Campus, Pokhara, Nepal for seven months, 2011-12. A professor of environmental engineering, Sato spent about 80 percent of his time teaching students environmental science and engineering by addressing issues of water quality and proposing possible solutions to improve water quality and human health standards in their country. He devoted the rest of his time to research in the development of sustainable water treatment.

Ben Crosby, 2013-14, faculty, geosciences Associate Professor, traveled about 6,000 miles south to Concepción, Chile, where he served as a Fulbright Scholar at the Universidad de Concepción to conduct research to assess the impact of hydroelectric dams in Chile.

Joséphine A. Garibaldi, 2014 (awarded in 2013), faculty, associate professor of dance in the School of Performing Arts in the College of Arts and Letters, was awarded a Fulbright Scholar grant to teach at the Latvian Academy of Culture, Department of Contemporary Dance, in Riga, Latvia

*Many faculty have been recognized for their creative activities and contributions to their fields (here are a few examples).*

Thom Hasenpflug – Commission and world premiere of new percussion ensemble composition by Vienna Conservatory. Dr. Hasenpflug was invited to Vienna for the premier

Vanessa Ballam – Featured performer at the Utah Festival of Opera and Musical Theatre, and the Anchorage Opera

Diana Livingston Friedley, soprano, and Kori Bond, piano – Release of new CD recording through Centaur Records

Michele Brumley was invited to serve as a guest editor for Developmental Psychology due to growing recognition of her contributions to the field

Elizabeth Cartwright, Anthropology has established a community based, participatory research and applied anthropology site just outside of Cuzco, Peru. Summer 2014 work will include a team of hydrologists, anthropologists, and community health workers in six Quechua villages.

While Indicator 1.1.7 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating the University community's dedication to the pursuit of knowledge, to the dissemination of knowledge, and to improving lives and solving society's most pressing issues. This indicator further supports Objective 1.1 Innovation and creativity in the pursuit of knowledge.

## Core Theme One, Objective 1.2

Table 28: Objective 1.2

Core Theme One: Learning and Discovery	
Objectives	Indicators
<b>1.2 Program quality and relevance</b>  ISU demonstrates academic excellence at all program levels: technical certificates; undergraduate, graduate, and professional degrees; and postgraduate professional training. Academic programs prepare students for employment or postgraduate study.	<b>1.2.1</b> Number of faculty peer-reviewed publications, juried shows or exhibits, performances, and conference presentations
	<b>1.2.2</b> Examples of placement rates of graduates from academic and professional-technical programs
	<b>1.2.3</b> Number of certificate, associate, and baccalaureate students who enroll in programs at the next degree level upon graduating
	<b>1.2.4</b> Number of regular comprehensive program reviews conducted each year
	<b>1.2.5</b> Number undergraduate and graduate degrees awarded

### ***Indicator 1.2.1: Number of faculty peer-reviewed publications, juried shows or exhibits, performances, and conference presentations***

Evidence of faculty's up-to-date engagement with current trends within their disciplines can be demonstrated by the trend of increasing numbers of peer reviewed publications among the faculty at ISU. This information was collected from Activity Insight, a web hosted service by Digital Measures which tracks faculty activity. There are some limitations for current longitudinal use of the data, as faculty began using Activity Insight within the last year. Faculty have been instructed to enter at minimum, the past three years of data, and many faculty members have done so. The following tables display data corresponding to the volume of various form of scholarly activity.

The University launched Activity Insight Summer 2013. Faculty were instructed to focus on entering data for calendar year 2013 because Activity Insight would be used to generate data for the 2013 Annual Faculty Evaluation. As time allows faculty will enter data for prior years into Activity Insight. The tables below highlight the peer-reviewed publications and presentations for calendar year 2013.

Table 29: Peer-Reviewed Publications by College

Colleges	2013
College of Arts and Letters	52
College of Business	16
College of Education	20
College of Science and Engineering	101
College of Technology	
Division of Health Sciences	49
Library	4
<b>Grand Total</b>	<b>242</b>

Table 30: Peer-Reviewed Presentations by College

Colleges	2013
College of Arts and Letters	85
College of Business	21
College of Education	28
College of Science and Engineering	57
Division of Health Sciences	154
College of Technology	2
Library	2
<b>Grand Total</b>	<b>349</b>

The institution values scholarship in many forms. The following table illustrates marked growth in such activity within the College of Arts and Letters.

Table 31: Peer-Reviewed Professional Performances and Exhibits by College

Colleges by Performance Type	Performance/Exhibit Year				Grand Total
	2012	2013	2014	(no year reported)	
College of Arts and Letters	9	27	10	8	55
Division of Health Sciences				3	3
<b>Grand Total</b>	<b>9</b>	<b>27</b>	<b>10</b>	<b>11</b>	<b>58</b>

Activity among the faculty of ISU demonstrates a variety of scholarly activities and research in all colleges and divisions. This speaks to the dedication and modernity of the faculty. Demonstrated strengths in research, creative and scholarly activity promote interprofessional collaborations as well as student engagement.

Indicator 1.2.1 is a new indicator in ISU's Strategic Plan supporting Goal 1: Learning and Discovery and therefore no benchmark has been established.

***Indicator 1.2.2: Examples of placement rates of graduates from academic and professional-technical programs***

Many students with degrees from ISU go on to have successful careers. While some programs (College of Technology) work with students to aid them in finding first employment (placement), some programs do not actively seek job placements, but do report rates of employment of their graduates. The table below illustrates placement rates for some selected programs. While this is not a comprehensive list, the data is not available for all programs. Most programs which are accredited by outside bodies, do require that employment data is collected. In other majors, such as English, it can be much harder to determine first employment as the former students are not beholden to report their employment.

Table 32: Placement Rates for Selected Programs

Description	FY2009	FY2010	FY2011	FY2012	FY2013
College of Technology – All Professional-Technical Education	77.75%	83.33%	85.68%	87.20%	87.60%
Teacher Preparation Program*				94%	70%
Radiographic Science**	100%	100%	100%	100%	100%
Occupational Therapy**				100%	100%
Pharmacy***	100%	100%	100%	100%	100%

This is not an exhaustive list of placement rates. Idaho State University intends to utilize the State Longitudinal Database System (SLDS) as soon as Idaho Department of Labor data is available to assist with placement rates.

\*Based on self-reported survey of graduates of all teacher preparation programs (2013 response rate 63%)

\*\*Self-reported on a survey

Indicator 1.2.2 is an indicator in ISU’s Strategic Plan supporting Goal 1: Learning and Discovery, with a FY2014 benchmark to maintain pass rates at or above the national averages for each program where national data are available.

**Indicator 1.2.3: Number of certificate, associate, and baccalaureate students who enroll in programs at the next degree level upon graduating**

Based on the FY2007 cohort of 512 students awarded a technical certificate or associate degree from ISU, 88 or 17.9% continued on to complete a bachelor’s degree by Spring 2014. Of the 1,114 students that earned a bachelor’s degree in FY2007 from ISU, 217 or 24.33% continued on to complete a graduate degree.

While Indicator 1.2.3 is not an indicator in ISU’s Strategic Plan, it was determined that it was an important indicator for demonstrating student capacity to pursue advanced levels of training/education because of the high quality of degrees they earned while at ISU. This indicator further supports Objective 1.2 Program quality and relevance.

**Indicator 1.2.4: Number of regular comprehensive program reviews conducted each year.**

Academic Program Review (APR) is an integral part of Idaho State University’s ongoing efforts to ensure that its educational mission is being met through the delivery of programs that are effective in meeting goals through curricula that are current and relevant. APR provides faculty and academic units the opportunity to reflect upon the content of their programs and delivery of curriculum, assessing its effectiveness and planning for actions to maintain or improve the quality of teaching and scholarship at the institution, and alignment with core themes.

The review process is scheduled on a seven year cycle, and takes 18-24 months to complete the series of stages, which are: 1) Planning and data collection; 2) Unit self-study; 3) Site visit by the review team; 4) Reports to College Executive Committee (CEC) and college leadership; and 5) Development of an Action Plan.

The guiding principles of an effective APR are that such critical self-study and analysis ensures linkage to the long-term institutional mission and priorities, and all relevant plans and policies. It is essential that the self-study is driven by faculty in order that the reflection, and subsequent responses and plans, are

authentic. The academic units – comprised of faculty – are in a position to determine their own goals, identified student learning outcomes, and measures within the context of the institution mission and core themes, and are expected to describe their programs with respect to both regional and national peers and norms. The descriptions and recommendations that emerge from unit self-studies are expected to be outcome-based in order to ensure the measurability of goals and quality of academic programming. Fiscal responsibility is also a necessary component of the review, connected to institutional budget processes. Library resources are also a necessary component of each unit’s reflection, and the self-study will make use of the knowledge and expertise of library faculty in describing and assessing the holdings and databases relevant to the program’s needs.

A review cycle is initiated by the CEC who will have established, in consultation with the college dean, a program review schedule for all units within the college. Further, the CEC will develop this schedule in consultation with the Associate Vice President for Institutional Effectiveness in order to maximize the impact of each APR and ensure sound linkage between program review and accreditation needs.

Overall, ISU is completing a large number of program reviews on a yearly basis. This yearly collection of data and statistics is crucial to the ongoing success of programs and requires centralized coordination. It would appear that as faculty have left the University and assessment coordinator positions have been passed to newer faculty, the University has lost some consistency among its departments and programs.

*Table 33: Number of Academic Program Reviews Conducted*

	FY2009	FY2010	FY2011	FY2012	FY2013
<b>Academic Program Review</b>	14	4	2	13	6

Each college and division within the University is charged with annually reviewing programs and making decisions based upon the data collected. Each college/division has an assessment coordinator, and the information collected is supplied to the Dean of the unit and then to Academic Affairs. While there have been some areas where this information has not been collected in the timely manner anticipated, ISU is aware of this and has made progress in attaining the appropriate indicators.

The Office of Academic Affairs, in conjunction with the Deans of the colleges and Division of Health Sciences, has developed a schedule for academic program review that is managed by the AVP for Institutional Effectiveness, and posted on the Academic Affairs website.

For academic and professional-technical certificate and degree programs, with specialized accreditation, they must be reviewed on a timeline required by the accrediting body. If the specialized accreditation is not outcomes based, outcome measures must be developed for the program, and provided to the Office of Academic Affairs as part of the institutional program review requirements.

Idaho State University has the highest number of programs with specialized accreditation in the state. In DHS, programs are reviewed annually by external, professional associations in addition to the assessment process within DHS. Each year, DHS collects data from each of its programs and compares the current data to past years in order to identify trends, progress on objectives, and make systematic improvements based upon the data.

The Office of Academic Affairs maintains, and posts on its website, a schedule of the colleges and Division programs that maintain specialized accreditation.

## **Program Prioritization**

In Summer 2013, the SBOE mandated that all universities in the state complete comprehensive reviews of all programs. With a mandate that universities utilize the model proposed by Robert C. Dickeson. This was the first comprehensive review of all programs at the University that included all stakeholders. Program Prioritization was vetted by the Deans' Council, the faculty senate and the data were elaborated upon by department chairs in association with their faculty constituents in the process of writing reports. While ISU does not anticipate completing the Program Prioritization process on a yearly basis, the dashboard created for Program Prioritization will now have annual data for programs to utilize. Program Prioritization was an arduous task, but yielded valuable data for program planning and reallocation of resources.

### *Academic Program Component of Prioritization Process*

#### *Goal:*

Support Idaho State University strategic initiatives, institutional mission, strategic plan and core themes through appropriation of resources based on prioritization of programs.

#### *Process and Rigor:*

The Office of Academic Affairs at Idaho State University has engaged in a twelve-month, data-driven analysis of all of its academic units and programs as outlined in its Program Prioritization process and timeline documentation. Its process utilized the Dickeson Model, as directed by the Idaho State Board of Education (the Board) in May 2013. The Office of Academic Affairs employed an evaluation and program scoring matrix based on the Dickeson criteria that was approved by the Faculty Senate, Deans' Council, and the Board. The Office of Institutional Research provided the project support for Program Prioritization in Academic Affairs, and additional resources were housed in Institutional Research to manage the considerable additional workload.

Academic Affairs utilized a continuous feedback model for the evaluation of the Program Prioritization data and report process:

Faculty Senate ranked the Dickeson Criteria during the week of September 2, 2013 and reported the results of their ranking to the Deans' Council on September 10, 2013.

The deans met with faculty and constituents during August to prepare to rank the criteria. The deans ranked the Dickeson Criteria during an Academic Affairs Program Prioritization workshop on September 3, 2013.

Faculty Senate leadership and the Deans' Council finalized the Program Prioritization Evaluation Matrix, scoring mechanism, and weights on September 10, 2013. The evaluation matrix was approved by the Board at their regular October meeting. Program Prioritization has been a standing agenda item at the weekly Deans' Council meetings since August 2013.

Academic Affairs created a database and web application titled Program Viability Report, utilizing staff in Institutional Research, to provide all of the program-level data needed for the evaluation matrix directly to program directors and chairs. The Viability Report System went live for log-in access in December 2013.

Following the approval of the matrix, Academic Affairs created a report template to be completed by each program. All Academic Affairs program directors and chairs were asked to complete the Program Prioritization Template (template and instructions included in Appendix 18) and to define the key linkages between the University's mission and Core Themes, and using the Viability Report System for data. This template was submitted to College Deans for analysis using a Score Sheet divided out by Department and Program (Score Sheet example included in Appendix 19). Deans were asked to enter a weighted average for all of the key areas (Demand – 30%, Quality – 30%, Revenue & Cost – 20%, and Impact & History – 20%) that resulted in a score (total amount possible was 100%).

Following the completion of the program reports, each program chair and/or director and dean scored the programs, and deans submitted the scoring sheets to Academic Affairs.

Colleges and programs provided an Action Plan for every low-scoring program.

Program reports, score sheets, and action plans were due to the Office of the Provost and Vice President for Academic Affairs on February 14, 2014.

The Provost, Vice Provost and Associate Vice Presidents reviewed and evaluated all of the reports, score sheets and recommendations during February and March 2014. A master quintiled list of all academic programs was created from the score sheets.

Academic Affairs aligned its budget process with Program Prioritization and presented its budget to the Special Budget Consultation Committee in early April 2014.

Academic Affairs presented its process and overview of its recommendations to the Vice Presidents, President Vailas, Faculty Senate, and the Deans' Council during March and April 2014.

Academic Affairs asked all academic units to provide additional information, cost savings, and feedback on the Academic Affairs recommendations in late April; these were due back to Academic Affairs in June 2014.

During June 2014, Academic Affairs compiled all of the additional information, feedback, and cost analyses and created a Program Actions Spreadsheet, based on the feedback from units, of all Program Prioritization recommendations.

#### *Results and Implementation:*

Idaho State University is on schedule with Program Prioritization. All programs have been analyzed using the viability indicators; all programs have been scored at the program and college/division level; programs have been quintiled; and programs have created action plans for every program in the fifth quintile. Program Prioritization recommendations have been collated, divided into three Phases based on approval timelines and catalog deadlines, and sent back to Colleges, Departments and Programs for cost analysis, program proposal development, and revision for final recommendations. All program proposals, cost analyses, and revisions were due to Academic Affairs on June 1, 2014 for preparation for submission to the Office of the State Board of Education.

Academic Affairs has generated the Program Actions Spreadsheet that will be used to implement the three-year, phased approach to Program Prioritization Action Plans. Academic Affairs hired a consultant to assist with implementation, beginning with the Deans' Retreat in July 2014.

#### *Non-academic Program Prioritization Process*

For the non-academic portion of campus a survey approach was used to assess key Program Prioritization factors. A questionnaire was developed uniquely adapted to the needs of ISU addressing the following six major areas:

- Key Goals and Objectives
- Key Services Provided to Customers
- Key Processes
- Organization Review
- Budgeting/Planning
- Opportunity for Savings or Additional Investments

Based on the six major areas above, the following five criteria and their respective weights were developed by the University and used to analyze, review, and rank non-academic programs into quintiles:

1. Cost Effectiveness (budget vs. actual, productivity, performance) (25% weight)
2. Importance to the Institution (mission, vision, core themes, strategic plan, mandates) (20% weight)
3. Demand (internal, external) (20% weight)
4. Quality (input, outcomes, how well delivered, research, student retention) (20% weight)
5. Opportunity (collaboration, resource sharing, savings, improvements) (15% weight)

The Program Prioritization process was comprised of three major steps – Program Analysis, Program Review, and Program Ranking.

1. Program Analysis – Each program director answered a series of questions addressing the six major areas and five measurement criteria for non-academic programs.
2. Program Review – Based on the questionnaire completed by program directors in step #1, each program director assigned a score to each program based on whether the program exceeds, meets, or does not achieve its measurement criteria. Each of the measurement criteria was weighted according to its relative importance to achieve a total weighted program score.
3. Program Ranking – Each program director used the weighted score(s) in step #2 above as a guide to rank and assign each of the programs to a quintile (1-5). The program directors' program rankings were reviewed and approved at each level of management until receiving final approval by the appropriate vice president. Results for each vice presidential unit were then reported to the President.

For each program identified in quintile five, the responsible vice presidential unit(s) created action plans including strategies to consolidate or eliminate programs and the quantified cost savings

identified for each action. On March 14, 2014, Program Prioritization materials summarized by vice presidential unit were presented in written form and through oral presentations by all university vice presidents to the President.

On April 1 and 2, 2014, the Special Budget Consultation Committee (SBCC) budget hearings were held where each Vice President presented his/her fiscal year 2015 proposed program-prioritized budget, including the results and savings identified from his/her Program Prioritization review.

Vice presidents are currently taking steps to implement the action plans and recommendations identified by Program Prioritization.

Indicator 1.2.4 is an indicator in ISU’s Strategic Plan supporting Goal 5: Stewardship of Institutional Resources, with a FY2014 benchmark that all academic, co-curricular, and non-academic programs/units will be reviewed at least once every five years. In addition to program review, many programs hold specialized accreditation that requires regular peer review and assessment.

**Indicator 1.2.5: Number undergraduate and graduate degrees awarded**

The population of students at ISU represent a largely non-traditional university. Many of the students who attend ISU commute from neighboring towns and most have families of their own as well as being employed while going to school. The average age of an undergraduate student at ISU is 26. The average age of a graduate student at ISU is approximately 35. More than half of ISU students are female, with the greatest responsibility of childcare generally falling to women. In addition, 53% of ISU undergraduate students are eligible for Pell grants, indicating that more than half of the students who attend ISU face economic hardship. Given this unique group of students who attend ISU, graduation rates speak to the quality of degrees being offered as well as the University’s ability to retain students until graduation. As evidenced by the table below, ISU has granted a relatively consistent number of degrees over the past several years, despite declines in funding and student enrollments.

Figure 12: ISU Degrees Awarded by Fiscal Year

Indicator 1.2.5 is an indicator in ISU's Strategic Plan supporting Goal 2: Access and Opportunity, with an FY2014 benchmark to increase undergraduate and graduate degree awards by five percent over the next three years.

**Core Theme Two—Access and Opportunity**

Objectives	Indicators
<p><b>2.1. Educational ladder – Access for student academic success</b></p> <p>ISU focuses on providing educational pathways with multiple access points and diverse opportunities for students to enter college and be successful in achieving their academic objectives.</p>	<p><b>2.1.1</b> Number of certificates, undergraduate and graduate degrees available</p>
	<p><b>2.1.2</b> Number of students enrolled in ISU’s Early College Program</p>
	<p><b>2.1.3</b> In-state tuition and fees are competitive with peer institutions</p>
	<p><b>2.1.4</b> Number of courses taught at outreach centers</p>
	<p><b>2.1.5</b> - Number of online courses taught - Number of courses offered at non-traditional times</p>
	<p><b>2.1.6</b> Number of Pell grants awarded</p>
	<p><b>2.1.7</b> Percent of financial aid awarded as a % of total eligible need</p>
<p><b>2.2 Student Support Services</b></p> <p>ISU recognizes students arrive with differing levels of college readiness, interests, and academic goals. Multiple initiatives support students’ academic progression.</p>	<p><b>2.2.1</b> Number of advisor contacts with students occurring through Central Academic Advising, TRIO Services</p>
	<p><b>2.2.2</b> Number of students employed on campus</p>
	<p><b>2.2.3</b> Examples of student support centers</p>
	<p><b>2.2.4</b> Undergraduate student retention and graduation rates</p>
<p><b>2.3 Broad range of opportunities</b></p> <p>ISU creates opportunities for students to cope with issues surrounding college life. Student support services are provided and utilized. Students participate in community and service learning projects and activities, student organizations, and/or learning communities.</p>	<p><b>2.3.1</b> Examples of diversity of populations served and programs offered</p>
	<p><b>2.3.2</b> Number of students participating in student organizations</p>
	<p><b>2.3.3</b> Number of First Year Seminar and College Learning Strategies Courses</p>
	<p><b>2.3.4</b> Number of Honors students</p>
	<p><b>2.3.5</b> Examples of post-college support through career services</p>

## Core Theme Two, Objective 2.1

Table 34: Objective 2.1

Core Theme Two: Access and Opportunity	
Objectives	Indicators
<p><b>2.1. Educational ladder – Access for student academic success</b></p> <p>ISU focuses on providing educational pathways with multiple access points and diverse opportunities for students to enter college and be successful in achieving their academic objectives.</p>	<p><b>2.1.1</b> Number of certificates, undergraduate and graduate degrees available</p>
	<p><b>2.1.2</b> Number of students enrolled in ISU’s Early College Program</p>
	<p><b>2.1.3</b> In-state tuition and fees are competitive with peer institutions</p>
	<p><b>2.1.4</b> Number of courses taught at outreach centers</p>
	<p><b>2.1.5</b> - Number of online courses taught - Number of courses offered at non-traditional times</p>
	<p><b>2.1.6</b> Number of Pell grants awarded</p>
	<p><b>2.1.7</b> Percent of financial aid awarded as a % of total eligible need</p>

### **Indicator 2.1.1: Number of certificates, undergraduate and graduate degrees available**

Idaho State University is proud to be one of the nation’s most unique postsecondary education institutions. Idaho State University offers more than 270 academic programs ranging from professional technical certificates to Ph.Ds. The University’s disciplinary breadth, combined with its unique degree mix, offers opportunity and access commensurate with the Idaho State Board of Education’s (the Board) mandate to serve its diverse, largely rural region, and to provide health care programming for the state. Regardless of one’s level of academic preparation, ISU has a program tailored to that student’s current situation and aspirations. Idaho State University’s Early College Program offers academic enrichment opportunities for qualified Idaho high school students. This program allows high school students the ability to earn college credit along with high school credit while continuing their other courses and activities. Idaho State University’s Early College Program can accelerate a student’s degree completion and help them adept early to the rigor of college level study. Idaho State University offers both Adult Basic Education and a Successful Transitions and Retention Track (START) program for high school graduates who need remedial education before undertaking an associate or baccalaureate degree program. Idaho State University’s START program provides social and academic support as students manage barriers while they pursue sustainable career and life goals. Idaho State University’s College of Technology provide significant opportunities for students who want to pursue a career that requires either a technical certificate or an associate’s degree. Extensive academic offerings in arts, sciences and professional areas for bachelor’s, master’s, and doctoral and professional degrees are also available. Idaho State University’s Continuing Education also provides a variety of opportunities for community members seeking personal enrichment.

Specifically, ISU offers 24 certificate programs, 245 undergraduate programs, and 90 graduate programs. Program offerings are dynamic as the University strives to provide relevant offerings for 21<sup>st</sup> Century learners. Since 2010, ISU has added 23 new programs ranging from: technical certificate in Energy Systems Technology, associate’s degree in Advance Manufacturing with specialized options, B.A. in Spanish in the Health Professions, B.S. in Emergency Management, to Ph.D. in Nursing.

In addition to extending the breadth of its programs, ISU also ensures the relevance of its offerings and alignment with its overall mission. In addition to the program review requirements, ISU conducted a systematic review of all academic programs *simultaneously*. The Office of Academic Affairs engaged in a twelve-month, data-driven analysis of all its academic units and programs. The process required the evaluation of each academic unit and program in relationship to its role in assisting the campus to achieve its mission and alignment with core themes. The “Program Prioritization” process was approved by the Faculty Senate, Deans’ Council, and the Board. In April, 2014, 90 preliminary recommendations were presented to the Deans’ Council.

Indicator 2.1.1 is an indicator in ISU’s FY2015-2019 Board approved Idaho State University Strategic Plan – Mapping Our Future: Leading in Opportunity and Innovation supporting Goal 1: Learning and Discovery, with a FY2014 benchmark that the number of new or expanded programs/degrees are in balance with the number of programs/degrees closed. Idaho State University will undergo campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan.

**Indicator 2.1.2: Number of students enrolled in ISU’s Early College Program**

The state of Idaho ranks among the worst states in the country for enrollment in postsecondary education. What’s particularly disappointing about that participation level is the fact that Idaho’s high school graduation rate is the 13th highest in the nation; 80% of Idaho’s public school seniors graduated in 2010, according to *EducationWeek*. However, Idaho ranks 45th for the percentage of high school graduates who continue their education. Only about 47% of Idaho’s young adults were enrolled in postsecondary education or had a college degree in 2012, nearly 10% lower than the national average.

The Board established a state goal 60% of Idahoans between the ages of 25 and 34 have a certificate or degree by 2020. Idaho State University’s Early College program has had a significant impact by providing high school students the opportunity to also earn college credits. Enrollment in ISU’s Early College program has seen considerable interest and growth. In the past six years, Early College enrollment has increased by 47%. While this program has seen significant growth, ISU does not anticipate an increase in participation in the years to come due to capacity and eligibility of qualified teachers in the high school.

Table 35: ISU Early College Enrollment

	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Change	% Change
<b>No. of students enrolled in ISU’s Early College Program</b>	1,436	1,588	1,434	1,669	1,914	2,111	675	47%
<b>No. of credits earned while in high school</b>	8,311	9,306	8,644	10,453	11,438	12,746	4,435	53%
<b>Average Credits per Student</b>	5.8	5.9	6.0	6.3	6.0	6.0	0	--

Indicator 2.1.2 is an indicator in ISU’s Strategic Plan supporting Goal 1: Learning and Discovery and Goal 2: Access and opportunity, with a FY2014 benchmark of 1,800 Early College students.

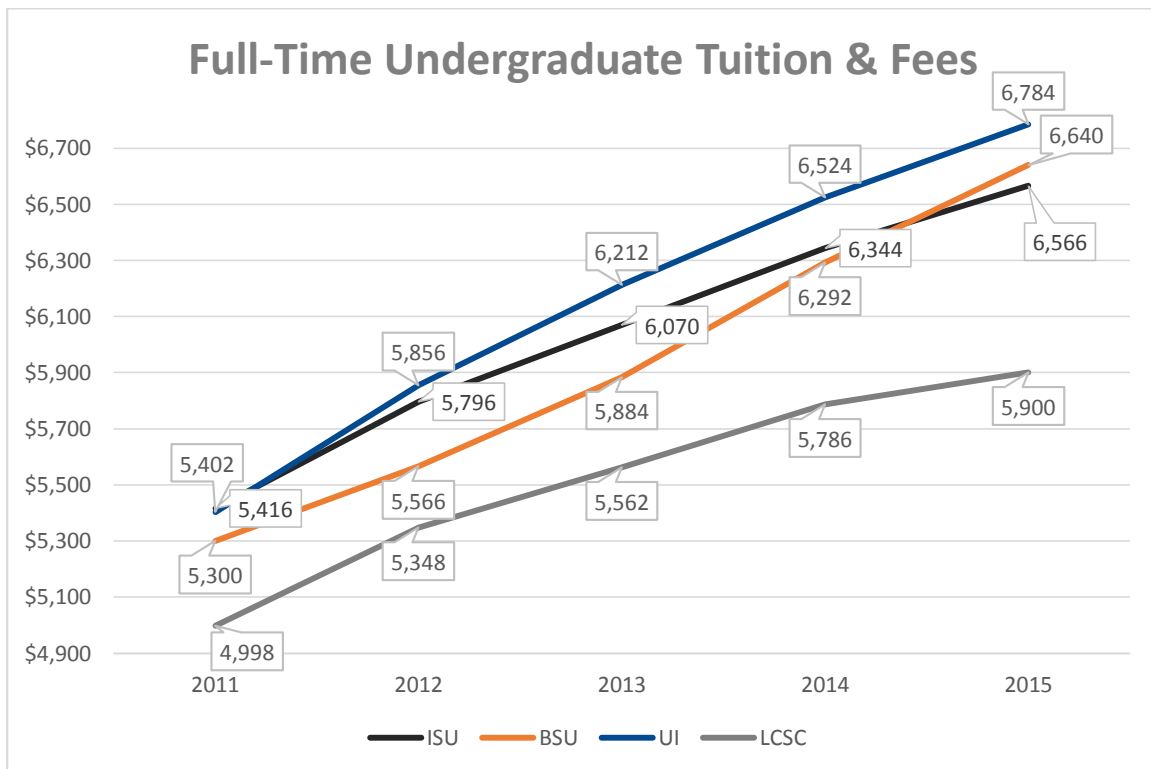

**Indicator 2.1.3: In-state tuition and fees are competitive with peer institutions**

Idaho State University has become a high quality, lower cost alternative for its students. In the upcoming school year, ISU will become the least expensive of the three public universities in the state of Idaho, and has consistently lowered its annual cost increase for the past five years, as indicated below. Undergraduate Tuition and Fees in 2014-15 will cost \$6,566 at Idaho State University, \$6,640 at Boise State, and \$6,784 at the University of Idaho. Since the 2010-11 school year, ISU has gone from the most expensive to the least expensive of the three public universities in Idaho.

Table 36: Full-Time Undergraduate Tuition and Fees

	2011	2012	2013	2014	2015
<b>Idaho State University</b>	\$5,416	\$5,796	\$6,070	\$6,344	\$6,566
<b>Boise State University</b>	\$5,300	\$5,566	\$5,884	\$6,292	\$6,640
<b>University of Idaho</b>	\$5,402	\$5,856	\$6,212	\$6,524	\$6,784
<b>Lewis-Clark State College</b>	\$4,998	\$5,348	\$5,562	\$5,786	\$5,900

Figure 13: Full-Time Undergraduate Tuition & Fees

That change has come about because ISU has committed to increasing tuition at a decreasing rate. By slowing the growth rate of education costs, ISU has reconfirmed its mission of providing access to higher education for Idaho’s qualified postsecondary students.

Table 37: ISU Increase in Tuition/Fees (2011-2015)

	2011	2012	2013	2014	2015
<b>Total Full-Time Undergraduate Tuition &amp; Fees</b>	\$5,416	\$5,796	\$6,070	\$6,344	\$6,566
<b>% Increase from Previous Year</b>	9.02%	7.02%	4.73%	4.51%	3.50%

Figure 14: ISU Increase in Tuition/Fees (2003-2015)

Idaho State University is also a great educational value when compared to its Board-approved peer institutions. As the chart below indicates, all of the four public campuses in Idaho, the University of Wyoming and the University of Montana have been less expensive than ISU’s other peers for its own residents.

Table 38: Peer Group and Idaho Public Institutions Comparison on Resident Tuition & Fees

Institutions	2009-10	2010-11	2011-12	2012-13	2013-14	Rate	2009-10 rank	2013-14 rank
U of Wyoming	\$3,162	\$3,927	\$4,125	\$4,278	\$4,404	8.6%	1	1
Lewis-Clark State College	\$4,596	\$4,998	\$5,348	\$5,562	\$5,786	5.9%	2	2
U of Montana	\$5,533	\$5,476	\$5,722	\$5,985	\$6,045	2.2%	8	3
Boise State U	\$4,864	\$5,300	\$5,566	\$5,884	\$6,292	6.6%	3	4
Idaho State U	\$4,968	\$5,416	\$5,796	\$6,070	\$6,344	6.3%	5	5
U of Idaho	\$4,932	\$5,402	\$5,856	\$6,212	\$6,524	7.2%	4	6
U of Nevada - Reno	\$5,031	\$5,561	\$5,630	\$6,602	\$6,610	7.1%	6	7
Montana State U	\$5,988	\$6,168	\$6,428	\$6,705	\$6,752	3.0%	9	8
Wichita State U	\$5,467	\$5,890	\$6,155	\$6,442	\$6,926	6.1%	7	9
U of North Dakota	\$6,726	\$6,934	\$7,092	\$7,254	\$7,508	2.8%	14	10
North Dakota State U	\$6,410	\$6,731	\$7,270	\$7,353	\$7,660	4.6%	11	11
South Dakota State U	\$6,155	\$6,444	\$6,887	\$7,404	\$7,713	5.8%	10	12
U of South Dakota	\$6,468	\$6,762	\$7,209	\$7,704	\$8,022	5.5%	12	13
Northern Arizona U	\$6,632	\$7,672	\$8,826	\$9,742	\$9,738	10.1%	13	14
U of Oregon	\$7,430	\$8,190	\$8,789	\$9,310	\$9,763	7.1%	15	15
Kent State U	\$8,726	\$9,030	\$9,346	\$9,672	\$9,816	3.0%	16	16
Northern Illinois U	\$10,180	\$11,676	\$12,422	\$13,066	\$12,976	6.3%	17	17

This is particularly relevant to the University’s mission because its core market for students, Southeast Idaho (Bannock, Bear Lake, Bingham, Bonneville, Caribou, Franklin, Idaho, Oneida, and Power counties), is below average socio-economically compared to the state of Idaho overall. According to the U.S. Census Bureau's most recent measures for per capita and household income, Southeast Idaho is below average in both. Its average per capita income of \$20,055 is 11% under the state average of \$22,581, and its median household income of \$45,247 is 4% under the state average of \$47,015. Idaho State University’s mission is one of providing access to higher education for students in Southeast Idaho and throughout the state.

Idaho State University has charged at about the median rate for non-residents among its peers, as indicated in the chart below. Five years ago, ISU’s non-resident tuition was the 7<sup>th</sup> lowest among its 17 peers. For the upcoming school year, its non-resident tuition will be the 9<sup>th</sup> lowest of the 17 campuses.

Table 39: Peer Group Comparison on Non-Resident Tuition & Fees

Institutions	2009-10	2010-11	2011-12	2012-13	2013-14	Rate	2009-10 rank	2013-14 rank
South Dakota State U	\$7,528	\$7,941	\$8,602	\$9,350	\$9,795	6.8%	1	1
U of South Dakota	\$7,841	\$8,259	\$8,924	\$9,650	\$10,104	6.5%	2	2
U of Wyoming	\$9,498	\$12,237	\$12,855	\$13,428	\$14,124	10.4%	3	3

While Indicator 2.1.3 is not an indicator in ISU’s Strategic Plan, it was determined that it was an important indicator for demonstrating greater access to quality education. This indicator further supports Objective 2.1 Educational ladder – Access for student academic success. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this and other metrics will be incorporated into that discussion.

**Indicator 2.1.4: Number of courses taught at outreach centers**

Outreach center program offerings allow place-bound and rural students opportunities to pursue an undergraduate or graduate education that may otherwise not be possible. In addition to the main campus in Pocatello, ISU has three outreach centers, Idaho Falls, Meridian, and Twins Falls, where undergraduate and graduate classes are offered.

This year ISU offered 534 undergraduate and 142 graduate courses in Idaho Falls; 241 undergraduate, 287 graduate courses and 56 professional courses in Meridian; and 43 undergraduate and 21 graduate courses in Twins Falls. Significant numbers of students took advantage of the opportunity to enroll in ISU courses outside of Pocatello. The unduplicated head count of students was: Idaho Falls 2,822; Meridian 1,198; and Twin Falls 424.

The chart below shows the time distribution of course offerings at the three outreach centers and the main campus in Pocatello. (Evening classes start no earlier than 4:30 p.m. and "Arranged/Online" are classes that do not have a scheduled meeting time, for example directed study courses and online courses.)

Table 40: Time Distribution of Course Offerings

Course Campus	Course Type	Morning	Afternoon	Evening	Arranged/Online	Grand Total
<b>Idaho Falls</b>	Remedial	12	3	9		24
	Early College	1	2	1		4
	General Education Prerequisite	14	7	5	2	28
	General Education	59	46	44	7	156

<b>Pocatello Total</b>		2,196	1,741	452	2,543	6,932
<b>% of Total</b>		<b>31.7%</b>	<b>25.1%</b>	<b>6.5%</b>	<b>36.7%</b>	<b>100.0%</b>

The April, 2014 recommendations from Program Prioritization emphasized the need to increase offerings at the three outreach centers – ISU Meridian Health Science Center, ISU-Idaho Falls, ISU-Twins Falls – and expand “select opportunities” in partnership with the College of Southern Idaho (a two-year institution) in Twins Falls. The Office of Academic Affairs will oversee the strategic expansion of course offerings at the three outreach centers to ensure it supports the campus’ mission.

While Indicator 2.1.4 is not an indicator in ISU’s Strategic Plan, it was determined that it was an important indicator for demonstrating greater access to rural and place bound students. This indicator further supports Objective 2.1 Educational ladder – Access for student academic success.

**Indicator 2.1.5: - Number of online courses taught  
- Number of courses offered at non-traditional times**

Like many of its peers, ISU has committed significant effort to increase its online academic offerings. The number of courses offered online has grown at an annualized rate of 17% from FY2009 to FY2013. The

University expects this growth will moderate in the next five years, but it still anticipates having 1,000 online course sections by 2015.

Table 41: Number of Online Course Sections

	FY2009	FY2010	FY2011	FY2012	FY2013	5-Year Growth
<b>No. of online course sections</b>	381	519	614	727	849	17%

A variety of other measures convey both the significant commitment ISU has made to online offerings and the student interest in those offerings. Today, there are 15 different programs that can be taken exclusively online. As for individual courses, ISU has put significant focus on increasing its online footprint, as the figures below indicate:

Table 42: Number of Online Course Sections and Number of Students Enrolled

Description	FY2012	FY2013	FY2014	3-Year Average
<b>Online course sections</b>	727	849	1,023	866
<b>Exclusively online students</b>	1,221	1,589	1,866	1,559
<b>Students enrolled in a 1+ online course</b>	6,436	7,079	7,999	7,171

Idaho State University, through the eISU Committee, has also initiated steps to insure the quality of its online offerings. Idaho State University is a Quality Matters (QM) subscriber. QM is a faculty-centered, peer review program offered to campuses nationwide that is designed to certify by a campus' own faculty the quality of online and hybrid courses. The QM rubric contains 41 specific standards, distributed across eight broad standards. In addition to the professional development opportunities offered by QM, ISU's Instructional Technology Resource Center (ITRC) offers a variety of QM courses to faculty year round. So far, approximately 80 ISU faculty, administration and staff have participated in QM related professional development activities. A group of those faculty are developing a review process for ISU online courses, with the intention of beginning to conduct peer-reviews of all online courses Fall 2015.

Indicator 2.1.5 online course offerings is an indicator in ISU's Strategic Plan, supporting Goal 1: Learning & Discovery, with a FY2014 benchmark to offer 900 courses online. The non-traditional course offering times, while not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating greater access non-traditional students. This indicator further supports Objective 2.1 Educational ladder – Access for student academic success.

**Indicator 2.1.6: Number of Pell grants awarded**

As discussed in Indicator 2.1.3, the southeast Idaho region's socio-economic level is below the state average, and this region is ISU's Board mandated primary service region for undergraduate and graduate education. Consequently, even with one of the lowest tuition rates in Idaho, a disproportionate number of ISU's students require federal financial assistance to attend ISU. For the last five academic years, between 5,500-7,000 students received a federal Pell grant; with the average award ranging from \$3,675-\$3,844 over that same time frame.

Nationally, access to federal financial aid opportunities, such as Pell grants, have declined in recent years. The decline at ISU mirrors a national decline in Pell grantees and awards. According to the NASFAA, “Pell Grant expenditures decreased from \$33.6 billion nationwide in 2011-12 to \$32.1 billion in 2012-13, following another \$2.1 billion decline in the previous year.” One source of the decline is the elimination in 2010 of the summer term Pell Grants. In addition, the following summer the federal government imposed a 600% lifetime limit on Pell grant recipients starting with the 2012-2013 academic year.

Table 43: Number of Pell Awards, Amounts, and Averages

	2010	2011	2012	2013	2014
<b>Pell Awards</b>	6,256	6,967	7,029	6,345	5,500
<b>Pell Amount</b>	\$23,178,200	\$26,783,113	\$25,837,098	\$23,786,899	\$20,706,987
<b>Average Pell</b>	\$3,705.96	\$3,844.28	\$3,675.79	\$3,748.92	\$3,764.91

In addition to Pell grants, all other sources of federal financial aid have been declining in recent school years. The number of students receiving federal financial aid has declined by 18%, in addition to federal financial aid dollars have declining 16%. These declines, coupled with more stringent financial aid regulations have had a significant adverse impact on ISU students’ ability to qualify for and received federal financial assistance.

Table 44: Number of Students Receiving Federal Financial Aid & Amount Received

	Federal Aid	Students	Aid
<b>2010-11</b>		10,165	\$105,828,634
<b>2011-12</b>		10,160	\$104,539,352
<b>2012-13</b>		9,396	\$97,709,607
<b>2013-14</b>		8,365	\$88,938,266
<b>Grand Total</b>		<b>38,086</b>	<b>\$397,015,859</b>

While a majority of ISU’s students still do qualify for federal financial assistance, most of them require substantial financial aid from non-personal sources to cover the cost of their education. For example, the average need for an ISU student on their FAFSA application for the current school year was \$11,293 vis-à-vis the resident undergraduate average cost of attendance of \$21,068. In other words, the typical undergraduate filing a FAFSA relied on financial aid to cover 53% of the cost of attendance.

Table 45: Undergraduate Federal Financial Need (Total & Average)

	2010-11	2011-12	2012-13	2013-14
<b>Undergraduate Student FAFSA Applications</b>	11,871	12,420	11,166	10,273
<b>Undergraduate Student FAFSA Total Need</b>	\$127,301,407	\$132,673,854	\$118,039,270	\$116,011,958
<b>Undergraduate Student FAFSA Average Need</b>	\$10,724	\$10,682	\$10,571	\$11,293

The data below demonstrates ISU’s uncharacteristically high percentage of students who are considered independent for purposes of financial aid. Across the country, the typical student body is made up of only about 20% independent students; at 51%, ISU’s independent student body is more than doubled the national average. While ISU’s percentage of independent students has been declining, this is likely due to decreasing access to federal financial aid and the need for independent students maintain employment on a full-time basis.

Figure 15: FAFSA Dependency Trend – Independent vs. Dependent Students

While Indicator 2.1.6 is not an indicator in ISU’s Strategic Plan, it was determined that it was an important indicator for demonstrating the significant financial need of ISU students. This indicator further supports Objective 2.1 Educational ladder – Access for student academic success.

**Indicator 2.1.7: Percent of financial aid awarded as a % of total eligible need**

While the federal government provides a substantial amount of the financial aid provided to ISU students, the campus itself has increased its financial aid support by an annualized rate of 1% over the past four school years (from \$6.868 million for 2010-11 to \$7.151 million for 2013-14.) However, the number of students receiving institutional financial aid has declined from 2,800 to 2,650 over those four school years. Consequently, the campus plans to increase its institutional financial aid budget by at least \$500,000 by the 2015-16 school year.

Table 46: Institutional Scholarship Financial Aid Award

Institutional Aid	2010-11	2011-12	2012-13	2013-14	Growth Rate
<b>Institutional - Annual/Expendable</b>	\$1,365,708	\$1,741,720	\$1,778,871	\$1,972,789	9.6%
<b>Institutional - Departmental</b>	\$2,164,691	\$2,383,737	\$2,612,534	\$2,606,614	4.8%
<b>Institutional - Endowed</b>	\$698,988	\$713,883	\$748,818	\$812,770	3.8%
<b>Institutional - Endowed</b>	\$698,988	\$713,883	\$748,818	\$812,770	3.8%
<b>Institutional - Grant</b>	\$1,994,588	\$1,863,710	\$1,704,060	\$1,379,914	-8.8%
<b>Institutional - 'I Love ISU'</b>	\$548,366	\$361,400	\$370,950	\$378,906	-8.8%
<b>Institutional Mixed</b>	\$96,000	\$114,000			
<b>Total</b>	<b>\$6,868,341</b>	<b>\$7,178,450</b>	<b>\$7,215,233</b>	<b>\$7,150,993</b>	<b>1.0%</b>

Table 47: Financial Aid Awarded as a Percent of Total Eligible Need

<b>Federal Aid</b>	<b>2010-11</b>	<b>2011-12</b>	<b>2012-13</b>	<b>2013-14</b>
<b>Students</b>	10,165	10,160	9,396	8,365
<b>Aid Awarded</b>	\$105,828,634	\$104,539,352	\$97,709,607	\$88,938,266
<b>Average Aid Award</b>	\$10,411	\$10,289	\$10,399	\$10,632
<b>Undergraduate Student FAFSA Total Need</b>	\$127,301,407	\$132,673,854	\$118,039,270	\$116,011,958
<b>Financial Aid Awarded as a % of Total Eligible Need</b>	83.1%	78.8%	82.8%	76.7%

Table 48: Percentage of FTE Students Receiving Financial Aid

	<b>FY2009</b>	<b>FY2010</b>	<b>FY2011</b>	<b>FY2012</b>	<b>FY2013</b>	<b>Growth Rate</b>
<b>Average amount of grant aid awarded</b>	--	4,086	4,951	5,011	5,226	6.3%
<b>Average amount of loan aid awarded</b>	--	5,511	6,608	6,242	6,033	2.3%

Several colleges have also made commitments to grow endowed/scholarship dollars through faculty named endowments and other forms of fundraisers.

While Indicator 2.1.7 is not an indicator in ISU’s Strategic Plan, it was determined that it was an important indicator for demonstrating the significant financial need of ISU students and ISU’s commitment to meeting this need. This indicator further supports Objective 2.1 Educational ladder – Access for student academic success. Similar to this metric, ISU’s strategic plan also has an indicator under Goal 2: Access and Opportunity that tracks the average amount of need-based and merit-based financial aid/scholarships awarded. The FY2014 benchmark had not been established as ISU is conducting further analysis.

## Core Theme Two, Objective 2.2

Table 49: Objective 2.2

Core Theme Two: Access and Opportunity	
Objectives	Indicators
<b>2.2 Student Support Services</b>  ISU recognizes students arrive with differing levels of college readiness, interests, and academic goals. Multiple initiatives support students' academic progression.	<b>2.2.1</b> Number of advisor contacts with students occurring through Central Academic Advising, TRIO Services
	<b>2.2.2</b> Number of students employed on campus
	<b>2.2.3</b> Examples of student support centers
	<b>2.2.4</b> Undergraduate student retention and graduation rates

### **Indicator 2.2.1: Number of advisor contacts with students occurring through Central Academic Advising, TRIO Services.**

The following chart, provided by Central Academic Advising, includes the number of Central Academic Advising advisor contacts with students since July 2010. The information is presented in three different ways: front desk check-ins include only one-to-one meetings between students and advisors in the office; inclusive contacts include the one-to-one meetings in addition to phone and email contacts; and the total contacts include all forms of intervention and student contact including bulk emails, Facebook postings, website views, and program attendance. In addition, colleges and department reach out to and make personal contact with students. Each personal contact with students provides additional guidance and information regarding their academic progress, ensuring that all students, regardless of their backgrounds and prior academic experience, receive information necessary to their success. Idaho State University's Strategic Plan Performance Measures Report indicates as a benchmark that ISU students "Maintain sufficient access to Central Academic Advising." Given the variety of types of communication and the volume, ISU is currently meeting that benchmark.

Table 50: Annual Advisor Contacts

Annual Contact Numbers		Inclusive	Front Desk	Total
<b>2008:</b>	<b>July 2008 - June 2009</b>	10,509	4,097	33,256
<b>2009:</b>	<b>July 2009 - June 2010</b>	7,327	4,864	94,122
<b>2010:</b>	<b>July 2010 - June 2011</b>	4,941	9,932	113,243
<b>2011:</b>	<b>July 2011 - June 2012</b>	8,552	5,152	286,059
<b>2012*:</b>	<b>January 2012 - December 2013</b>	7,887	4,735	303,659
<b>2013*:</b>	<b>January 2013 - December 2013</b>	8,492	5,228	462,266

*\*Changed to yearly reporting Jan - Dec*

TRiO serves both pre-college and college students through grant-funded programs. They have three pre-college programs (grants): Upward Bound (UB) serves 80 students; Upward Bound Math Science (UBMS) serves 60 students; and Educational Talent Search (ETS) serves 1034 students. In addition, they have one program (grant) that serves college students: Student Support Services (SSS) serves 250 students.

Table 51: 2013-2014 Advisor Contacts (through May 2014)

<b>Student Support Services</b>	1,350 contacts	713 hours
<b>Upward Bound</b>	1,329 contacts	561 hours
<b>Upward Bound Math Science</b>	1,422 contacts	1,400 hours
<b>Educational Talent Search</b>	10,214 contacts	3,241 hours

Note: The pre-college grants were down three staff members for half the year, resulting in lower numbers than normally expected.

Table 52: 2012-13 Advisor Contacts

<b>Student Support Services</b>	1,893 contacts	1,017 hours
<b>Upward Bound</b>	2,179 contacts	1,484 hours
<b>Upward Bound Math Science</b>	452 contacts	677 hours*
<b>Educational Talent Search</b>	12,239 contacts	19,860 hours

\*New grant this cycle; did not have advisor hired for first half of year

All TRiO programs are aimed at low-income or first-generation college students. Student Support Services also provides services to students with documented disabilities. These students are provided with assistance navigating through college, including help with registering for classes, orientations to campus, mentoring, and tutoring.

Both Central Academic Advising and TRiO serve ISU students in need of academic guidance. Each advisor contact provides the opportunity for students to receive additional support, which is especially vital for students with little or no knowledge of the university experience. Because students arrive at ISU with differing levels of college readiness, interests, and academic goals, these units provide students with advising that meets their specific needs. The large number of student contacts indicates that students are taking advantage of opportunities to seek advising, to build their plans of study, and to develop strategies to reach their academic goals. In addition to the support provided by these specific units, ISU is in the process of implementing DegreeWorks, which is already live in many departments. DegreeWorks, which is a degree audit system, allows students to check progress on their own, and it also assists faculty advisors who advise students on their major requirements. Advising is also provided by professional advisors who work in College of Education, School of Nursing, College of Business, and College of Pharmacy, and one Pre-Health advisor who works with students planning on pursuing future education in the medical fields. These programs in combination offer support to the entire student body, regardless of their background or needs, ensuring that students are developing plans that support their academic needs.

The College of Technology Student Services advisors and staff provide a high-touch academic advising model, coupled with a strong ethic of care and a vision for student success. College of Technology Student Services provides access and opportunity to students from a wide variety of backgrounds who are seeking applied degree and certificate programs. There were a total student contacts for Student services in FY2013 of 29,499 and FY2014 of 30,734.

Table 53: Total Student Contacts for Student Services Staff Members:

	FY2013	FY2014
<b>Student Contacts</b>	18,524	21,280

Table 54: Total Advising Contacts for Student Services Advisors:

	FY2013	FY2014
<b>Advising Contacts</b>	10,974	9,454

Indicator 2.2.1 is an indicator in ISU’s Strategic Plan supporting Goal 2: Access and opportunity, with a FY2014 benchmark to maintain sufficient access to Central Academic Advising.

**Indicator 2.2.2: Number of students employed on campus**

In FY2014 the University employed 1,323 student employees. Students are employed on campus through Federal Work-Study, the Career Path Internship (CPI) program, and through other positions. In FY2014, the University employed 1,323 students total in these three categories of positions. The CPI program is open to all students at ISU, and it allows students to gain experience working in a position connected to their majors, providing them with professional experience in their future fields. This program allows them to start to understand the specialized work done within their discipline, such as working in a lab under the supervision of a faculty member, assisting with the organization of an academic conference, compiling data for use in research, and other highly focused career training. Refer to 1.1.1 for additional data and analysis regarding the effects of the CPI Program.

The [Federal Work-Study program](#) “provides part-time jobs for undergraduate and graduate students with financial need, allowing them to earn money to help pay education expenses”. Although work-study positions may result in career-specific activities, it is not the norm. Most students in this program do more generalized work, such as assisting administrative assistants in departments with tasks like filing or photocopying, or working in facilities or maintenance around campus. Students must be eligible for Federal Financial Aid to qualify for these positions.

In addition to these special categories of student employment, students may also apply for any other positions that are available for a wide range of jobs around the University. All forms of student employment are vital to students, especially given the high number of ISU students receiving Pell grants (see information on Pell grants in Indicator 2.1.6). Through these work opportunities, students are better able to both support themselves and to stay on campus, thereby keeping them focused on studies.

While Indicator 2.2.2 is not an indicator in ISU’s Strategic Plan, it was determined to demonstrate the number of students employed on campus for purposes of supporting student access and connection to the campus community. This indicator further supports Objective 2.2 Student support services.

**Indicator 2.2.3: Examples of student support centers**

The University has a number of programs that provide students with a range of support services that assist students in their academic pursuits. These include University Counseling and Testing Service, ADA and Disabilities Services, Janet C. Anderson Gender Resource Center, Center for New Directions, Early Learning Center, Student Health Center, Career Services, Student Support Network (Student Life), and

University Tutoring. Idaho State University also recognizes and appreciates that its students come from a wide range of backgrounds and bring with them varied levels of preparation and understanding of college-level expectations. Consequently, it provides a range of learning opportunities to help all students succeed, regardless of their level of achievement at the time they arrive.

For those students who are underprepared for college (including those who have been out of school for a number of years or who were not particularly strong students in high school), ISU currently offers remedial coursework in English and mathematics. There are currently three remedial courses (one in English and two in mathematics), resulting in 3,915 student credit hours (Fall 2013). These courses provide students with the opportunity to practice lower-level skills in order to enter college-level courses fully prepared. As mentioned in 2.2.4, new courses are in development to allow students remedial support while enrolled in college-level courses. In addition, the Student Success Center offers several study skills courses (including a course in math study skills) to support those who need extra assistance transitioning into college, and they offer both a Writing Center and Math Center to assist students with one-on-one tutoring assistance. The Writing Center offers face-to-face tutoring in both Idaho Falls and Pocatello, the two locations where freshman writing courses are offered. They also offer an Online Writing Lab that students may access from any of ISU's outreach centers. The Math Center offers tutoring in Idaho Falls and Pocatello, where lower-division math courses are taught.

In addition to providing testing options for students, University Counseling and Testing also offers counseling for "students who are encountering personal, social and emotional difficulties while enrolled in at least one credit at Idaho State University" (<http://www.isu.edu/ctc/counselingservices.shtml>). Students may receive individual counseling, couple's counseling, or participate in group therapy to help with a wide range of difficulties. This counseling can provide students with stabilizing support in order to help them in all aspects of their lives.

[Disability Services](#) is one of the units responsible for "compliance with federal and state laws and regulations mandating equal opportunity and access for persons with disabilities". This center authorizes appropriate accommodations and services for students with disabilities, also assisting faculty in their efforts to provide accommodations. This center has a central role in providing a supportive and fair environment for students with disabilities, allowing these students to work toward academic success.

The [Janet C. Anderson Resource Center](#) "focuses on gender issues and brings education, training, and programming to the ISU campus. Each semester the center hosts lunchtime talks, workshops, film screenings, panel discussions, art shows and other interesting and relevant programming related to gender topics and issues to campus". Among the center's programs is the Green Dot Bystander Intervention Program that promotes conflict resolution and the prevention of violence. This center provides students with education and training that can benefit both their intellectual curiosity and their physical and emotional well-being.

Housed in the College of Technology, the Center for New Directions ([CND](#)) "assists individuals in transition to overcome personal and economic barriers to education and employment, [and] to access training". Open to ISU students and the entire community, CND provides career and personal counseling for free to those with educational goals. CND's broad accessibility ensures that potential students from any background and with a wide range of goals receive sufficient guidance to set themselves on productive educational and career paths.

Also in the College of Technology, the [Resource Center](#) offers services to professional-technical students, including peer tutoring, computer labs, and technical support to assist students in academic success. Computer Success Workshops are provided weekly to assist students in the skills necessary to use Moodle, word processors, PowerPoint, Excel, and basic computer skills. For those who require additional support, software is available to assist in enhancing methods of learning. This service is provided in the lab, as well as off campus.

The Early Learning Center provides childcare for the children of ISU students (in addition to faculty and staff). Pre-kindergarten children are provided full-day care, including focus on art, science, writing, and a variety of outdoor experiences. They also provide after-school care for students through 5<sup>th</sup> grade. Through this service, ISU students can be assured that their children are well cared for on campus while the students are in class or studying, thereby providing them with time to concentrate exclusively on school work or employment.

The Student Health Center serves ISU students by providing a wide range of medical services at a convenient on-campus site. In addition to standard medical office visits, the Student Health Center offers x-rays and ultrasound, a pharmacy, basic laboratory procedures, and a men's and women's clinic. By providing such services on campus, students can more easily be treated for any physical illnesses or conditions without losing significant time from school, and the combination of services prevents them from having to travel to several sites for medical care. Through this service, the health and welfare of ISU students is supported.

Career Services provides career counseling by licensed counselors, administers career assessment instruments, provides career and life planning classes, hosts a resource library and facilitates job shadowing opportunities in addition to oversight of the Career Path Internship Program.

The Student Support Network provides assistance and advice to students on University policies and procedures, grievances, appeals, and student rights and responsibilities.

University Tutoring includes the Writing Center, the Math, Center, Content Area Tutoring, and ESOL program. University Tutoring works with students at all levels of academic work, from students in remedial courses to graduate students, tailoring the tutoring to the needs of the individual students. Thus, an underprepared freshman may need significant help writing a 3-page essay, while a graduate student may be requesting input on a dissertation. Regardless of one's level of preparation or immediate academic goals, University Tutoring provides academic support needed by students.

This sampling of student support programs demonstrates the wide array of services provided to students to help them achieve their academic goals by supporting them in their intellectual and personal needs.

While Indicator 2.2.3 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates depth and breadth of student support services available. This indicator further supports Objective 2.2 Student support services.

**Indicator 2.2.4: Undergraduate student retention and graduation rates**

The table below uses information provided in the Strategic Plan Performance Measures Report FY2008 to FY2013.

Table 55: Undergraduate Student Retention

Class Level	FY2011	FY2012	FY2013
Freshman to Sophomore			
Full-time	61.2%	62.2%	67.2%
Part-time	48.3%	44.6%	46.8%
Sophomore to Junior			
Full-time	76.6%	77.2%	77.6%
Part-time	57.7%	60.0%	58.6%

Retention rates for full-time students have increased from FY2011. Although there is no one reason for the increase, there may be several contributors to this improvement. First, ISU changed the minimum credits required for a bachelor’s degree from 128 to 120 in 2011. With this decrease in requirements to be more in keeping with other universities around the country, students were able to see progress toward degree more quickly. In addition, since Idaho became a Complete College America state in 2010, increased attention has been paid at ISU to retention efforts. Among the changes that have come about are increases in intrusive advising as a means to keep students connected to the University and on track with their degrees, and the review of degree programs, often resulting in streamlining of requirements. These changes have encouraged students to persist in their programs, ultimately improving retention.

Graduation rates are listed below (Percent of full-time, first-time students from the cohort of new first-year students who complete their program within 1 1/2 times the normal program length). Information was taken from the Performance Measurement Report.

Table 56: Graduation Rates

Graduation Rates*	
FY2010	34%
FY2011	31%
FY2012	29%
FY2013	35%

\*(Percent of full-time, first time students from the cohort of new first-year students who complete their program within 1-1/2 times the normal program length). Information was taken from the Performance Measurement Report.

FY2013 saw the highest graduation rate in four years, likely the result, at least in part, of the decrease in credits required for graduation, and the faculty commitment to, and efforts to, retain students. Idaho State University faces challenges in graduation rates due to a variety of factors, including the large number of students who transfer out of ISU (approximately 23%) and the high percentage of part-time students (23% in FY2013) who may take significantly longer than the standard 6-year time toward degree and, thus, may not be included in these statistics. It is also worth noting that according to the Student Achievement Measure report, based on a cohort of first-time full-time bachelor’s degree-seeking students starting in 2007, 44% of these students graduated from ISU or another institution within 6 years. In addition, 63% of the cohort of full-time transfer students to ISU in 2007 graduated from either ISU or another institution within 6 years.

Idaho State University is continuing to work on a variety of initiatives to improve retention and graduation rates, and it is tracking this information as part of the strategic plan (Indicator 2.2). Most importantly, as part of an initiative originated through the Board, ISU is working on remediation reform. Remedial courses in mathematics and English are being reviewed to determine how to provide the remedial support where needed but simultaneously move students into credit-bearing classes. Two courses have already been piloted, and new course proposals are in development. Once put into place, students may no longer have to complete non-credit-bearing courses before enrolling in gateway, credit-bearing courses, and this will improve students' progress toward graduation, likely improving their retention and graduation rates. In addition, through a GPS-STEM grant, the College of Science and Engineering is looking at the possibility of developing meta-majors in order to get students into a focused track of coursework while they are deciding on specific fields of study. By drawing students into a specific course path, they will be more likely to have all necessary courses by the time they declare their official major, making it more likely that they will be on track for their ultimate graduation.

Indicator 2.2.4 is an indicator in ISU's Strategic Plan supporting Goal 2: Access and opportunity, with a FY2014 benchmark to positively impact retention rates by 5% over the next five years.

**Core Theme Two, Objective 2.3**

Table 57: Objective 2.3

<b>Core Theme Two: Access and Opportunity</b>	
<b>Objectives</b>	<b>Indicators</b>
<p><b>2.3 Broad range of opportunities</b></p> <p>ISU creates opportunities for students to cope with issues surrounding college life. Student support services are provided and utilized. Students participate in community and service learning projects and activities, student organizations, and/or learning communities.</p>	<p><b>2.3.1</b> Examples of diversity of populations served and programs offered</p>
	<p><b>2.3.2</b> Number of students participating in student organizations</p>
	<p><b>2.3.3</b> Number of First Year Seminar and College Learning Strategies Courses</p>
	<p><b>2.3.4</b> Number of Honors students</p>
	<p><b>2.3.5</b> Examples of post-college support through career services</p>

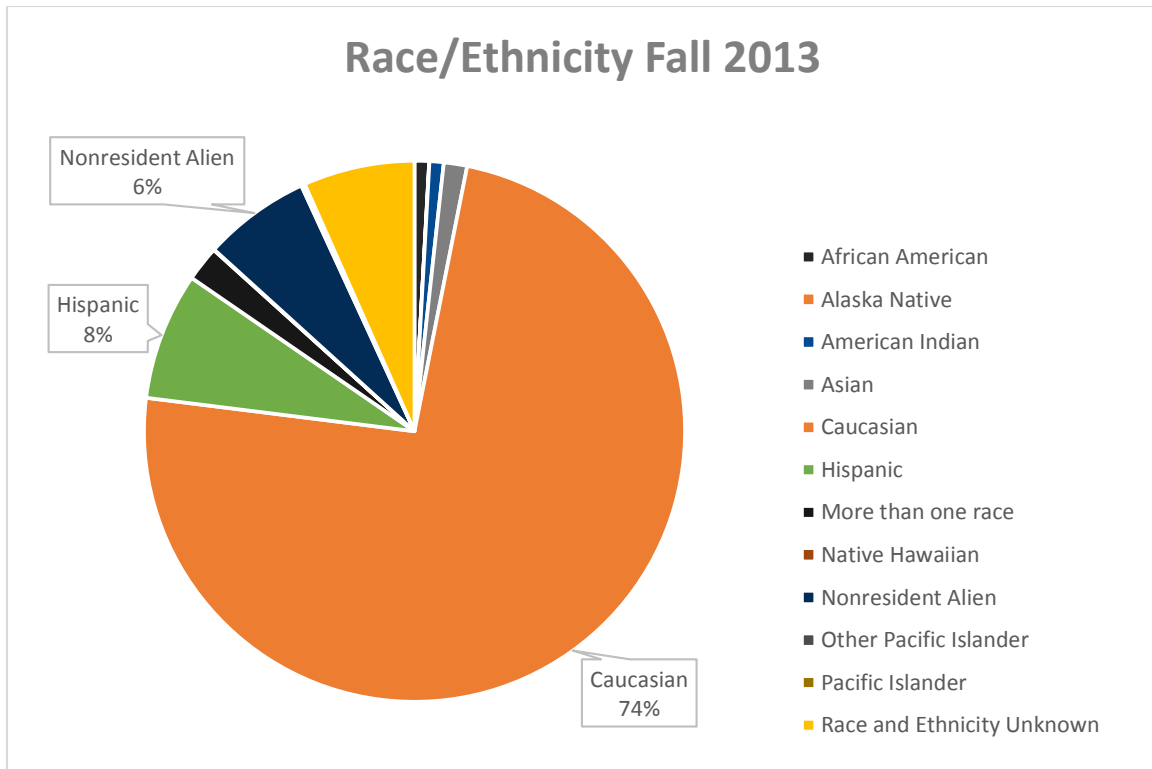

***Indicator 2.3.1: Examples of diversity of populations served and programs offered***

Idaho State University continues to become more diverse based on race/ethnicity. ISU’s international students comprised 6% of the total student population in Fall 2013 compared to 3% in Fall 2010. Additionally, Hispanics comprised 8% of the total student population in Fall 2013 compared to 5% in Fall 2010. In Fall 2013, students came from 62 countries, 45 states, and 42 of the 44 Idaho counties.

Table 58: ISU Student Profile

Race - Ethnicity	Fall 2013	Fall 2012	Fall 2011	Fall 2010	Latest Change	Latest % Change	Total Change	Total % Change
African American	126	138	165	150	-12	-8.70%	-24	-16.00%

Figure 16: ISU Race/Ethnicity Fall 2013

Through support programs such as the START Program, Diversity Resource Center, TRiO, International Programs Office, the Janet C. Anderson Resource Center, and Veterans’ Sanctuary, the University reaches out to a broad range of students to encourage diversity and create a supportive and multicultural environment, thereby helping students cope with issues surrounding college life.

The [Diversity Resource Center](#) serves the campus community by creating programs that enhance cultural diversity. More importantly, they “assist ethnic and international students and organizations. . . [and] seek both to enhance their experience at ISU and to assist them in contributing to campus diversity and cultural competency”. By fostering a positive multicultural community on campus, the Diversity Resource Center helps students who are part of these international and ethnic minority groups cope with the challenges of college life in the Pocatello community. Furthermore, the center provides orientations to expectations of college life at ISU, offering these students additional support. Because the majority of ISU students are Caucasian, the Diversity Resource Center serves as a location where the challenges students meet as ethnic minorities can be addressed with care and consideration.

As mentioned in 2.2.1, TRiO supports both pre-college and college students. Student Support Services serve low-income, first-generation, or disabled college students. Students receive assistance registering for classes, orientations to campus, mentoring, and tutoring. They also receive counseling for academics, personal matters, financial issues, and career paths, helping them adjust to college regardless of their level of preparation. Students in TRiO are able to develop strong relationships with their advisors in the program who fully understand the specific challenges these students face in college, ultimately helping them persist with their college education.

Successful Transitions and Retention Track (START), which is focused on retaining the at-risk, underrepresented student population, provides social and academic support, helping students to manage barriers they face in achieving higher education goals. START is a bridge program aimed at helping prepare these at-risk students for full entry into college by addressing their specific challenges to meeting their educational goals. The program's offerings include career and educational counseling, math workshops to help them prepare for college-level math courses, a "college success" preparation course, tutoring, workshops on the college application and financial aid processes, opportunities for scholarships, and emergency funds for help with childcare and transportation. Recognizing that many people in the community struggle both from financial need and a lack of strong academic preparation, START strives to assist these students to increase college readiness in order to succeed in college.

The International Programs Office ([IPO](#)) serves international students, and IPO "seek[s] to enhance our foreign visitors' stay in the USA, and particularly at ISU, by providing quality cultural, academic, regulatory, and social programs. The University also seeks to promote the functionality of U.S students in a global society." The number of international students continues to increase (1,116 in Spring 2014), making the work of this unit exceptionally important. IPO begins working with students when they apply for admission to ISU, ensuring that students understand all of the legal requirements for coming to the United States. The office then works to provide fall and spring orientations for students to help them understand expectations of higher education in the United States and specifically at ISU. IPO also communicates with the governments of other countries to help provide required information on behalf of students. Their work to increase diversity and to help acculturate international students serves all ISU students well.

The Intensive English Institute (IEI) serves international and domestic students who are learning English. IEI provides a series of intensive courses to help students develop fluency in English, thereby making them ready to pursue higher education or employment in the USA. Students work in small classes, gaining a lot of experience both with English and with American culture, thereby helping them acclimate to the larger community of Pocatello.

The Veterans Sanctuary serves military veterans, providing them additional support, including assistance with VA medical and education benefits, tutoring services, counseling services, orientation to campus, scholarships, advising, and career planning. The Veterans Sanctuary is also a physical space, where veterans can spend time out of class with other veterans. The support offered through this program benefits veteran students of all ages, by recognizing the unique experiences and challenges each comes to ISU with. Through this center, students who are veterans are better able to cope with issues related to college life.

Through these programs, ISU is able to serve a culturally diverse set of students who often face challenges not experienced by other students at the University. By providing directed support and helping students cope more effectively with the challenges of college life, these programs help make students' experiences at ISU more fulfilling and help students achieve their academic and personal goals.

While Indicator 2.3.1 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates the diversity of populations served. This indicator further supports Objective 2.3 Broad range of opportunities.

**Indicator 2.3.2: Number of students participating in student organizations**

According to the Strategic Plan Performance Measures Report, from FY2009 to FY2013 the number of students involved in student organizations has grown by nearly 900 students.

Table 59: Number of Students Involved In Organizations

	FY2009	FY2010	FY2011	FY2012	FY2013
No. of organizations	140	137	142	143	148
No. of students*	3,377	3,852	3,238	4,191	4,273

\*duplicated headcount as students can participate in multiple organizations

Students' connections to ISU are enhanced by their involvement in student organizations. Through student organizations, students collaborate on projects (such as the planning of the Idaho Business Leader of the Year Award dinner or Nepalese Night), raise funds for projects, and most importantly, develop relationships with other students at the University. These personal relationships help provide students emotional and academic support as they work toward their degree. According to Alexander Astin, author of *What Matters in College: Four Critical Years Revisited*, (Jossey-Bass, 1993) "student to student interaction has the strongest positive effects on leadership development, overall academic development, self-reported growth in problem-solving skills, critical thinking skills and cultural awareness." Astin also notes that students who are involved are less likely to be depressed and more likely to recognize their own self-worth.

Idaho State University's Strategic Plan has an established benchmark of 4,500 students participating over the next three years; given the recent student numbers (4,273 in 2013), ISU is on track to meet that goal of participation in student organizations. As the number of students involved in organizations increases, more students are becoming part of these student communities, thereby improving their chances of staying in college and progressing toward their degree. The commitment to the organization and the fellow students they work with gives student participants an additional reason to stay involved with the University. In addition, the variety of options available to students is impressive with 148 organizations in 2013, including such groups as the African Students Association, American Sign Language Club, Feminist Alliance, Hispanic Awareness Leadership Organization, Latter-Day Saint Student Association, and Sexuality and Gender Alliance. Students have ample opportunities to participate in organizations, helping them to develop both an appreciation for others and to develop as individuals.

Indicator 2.3.2 is an indicator in ISU's Strategic Plan supporting Goal 2: Access and opportunity, with a FY2014 benchmark to increase participation to over 4,500 students over the next three years.

**Indicator 2.3.3: Number of First Year Seminar and College Learning Strategies Courses**

New students are often encouraged to enroll in two support courses during their first year: ACAD 1101 (College Learning Strategies) and ACAD 1102 (First-Year Seminar). ACAD 1102 orients students to university culture and the expectations of college-level performance. Students learn about university services, meet faculty from different disciplines, and explore the University. They also participate in learning communities, forming relationships with other students from the beginning of their time in college. Furthermore, some sections of the course have participated in service-learning activities, working with community organizations, such as the Idaho Food Bank, to work together and help the larger

community. ACAD 1101 provides students with study skills necessary for success in college. These include time management, note-taking and test preparation. Through these two courses, especially encouraged for new freshmen and returning students, students are prepared to succeed in their courses and navigate the University effectively. In addition, starting Summer 2012, ACAD 1104 (Orientation to University) was created as a combination of 1101 and 1102, giving students the option of taking one of the courses as a one-credit course, or taking a combined 2-credit course. Below are listed the number of students enrolled in these two courses for the last four years.

Table 60: Number of Students Enrolled In First-Year Seminar

	FY2011	FY2012	FY2013	FY2014
First Year Seminar Enrollment	986	1,145	932	827

In FY2014 there was a very slight decline in enrollment, due to the smaller number of high school graduates in 2013. This 3% decline in enrollment from the prior year is the major factor in the decreased enrollment in these courses.

Indicator 2.3.3 is an indicator in ISU’s Strategic Plan supporting Goal 2: Access and opportunity, with a FY2014 benchmark to increase the percentage of full-time freshman participation to 50% or more over the next three years.

**Indicator 2.3.4: Number of Honors students**

For those students who are at a very high level of achievement upon entry at ISU, the University Honors Program offers students opportunities to be challenged to a greater level than the average student. Students in this program take a series of general education courses specifically for Honors students, courses where the level of discourse is more advanced and the pace is equal to these students’ level of inquiry. In addition, some of the other classes students enroll in will be taken as Honors credit by having the students do some additional projects developed in discussion with the professor. Finally, Honors students complete an Honors thesis or project as a senior capstone project, and they present the projects publicly. By providing a more advanced and challenging program for the strongest students, ISU appeals to a truly wide range of students.

Students in the University Honors Program represent the strongest students at the University. Over the last four years, the number of students seeking an Honors degree were as follows:

Table 61: Number of Honors Students

	FY2011	FY2012	FY2013	FY2014
Honors Students	176	233	231	232

Due to budgetary constraints, the program has limited itself to 50 new students each fall, which is why the program has remained steady over these years. Starting with Fall 2014, the number of new Honors students will double to approximately 100. Consequently, ISU will continue to see this program grow over the next few years. These students take several courses together, allowing them to develop a true learning community, supporting each other as they progress through their academic career. As the only

honors degree in the state, ISU also provides students an opportunity otherwise not available in Idaho, and the students are well supported by program advisors.

While Indicator 2.3.4 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates the high quality of students served and demonstration of diverse program offerings for students with varying levels of abilities. This indicator further supports Objective 2.3 Broad range of opportunities.

***Indicator 2.3.5: Examples of post-college support through career services***

Idaho State University provides numerous career services for its students. These begin early on as students can enroll in Career and Life Planning (COUN 1150) to help guide them toward their career and life goals. Many academic departments also provide opportunities either through Career Path Internships or through other internship opportunities for students to gain experience on the job. Whether it is a professional writing major interning for a government agency or a chemistry major working in a campus lab, students throughout the University gain professional experience through internships, and making themselves strong candidates for the job market.

As students approach the end of their time at ISU, they are provided career services to help them prepare for the job market. The Career Center on campus provides a wide range of services to help students and alumni prepare for the job market. Through a variety of presentations and workshops, the center teaches students how to write resumes and successful strategies for interviewing. The Career Center also offers assistance with finding the right career path for students and planning ahead. In addition to workshops, they also provide one-on-one assistance as students are developing their materials and planning their job searches. Several career fairs are also organized throughout the year, offering employers the opportunity to meet with students, and students the chance to learn more about a wide range of companies. Students may also apply for full-time or part-time jobs at the career fairs, allowing a supportive environment and the opportunity to learn about prospective employers.

In addition to the Career Center, which serves all current students and alumni, individual departments and colleges also incorporate various assistance with career planning and preparation. For example, the College of Business has a full-time director of professional development. In addition to collaborating with businesses regarding their hiring needs, this director assists students with preparing resumes, interviewing skills, business etiquette, and finding options for internships and other positions.

Through the colleges and through the Career Center, ISU provides students with opportunities and skills to prepare for life and careers after college.

While Indicator 2.3.5 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates ISU's support and recognition in helping students with career placement and planning. This indicator further supports Objective 2.3 Broad range of opportunities.

**Core Theme Three—Leadership in the Health Sciences**

Objectives	Indicators
<p><b>3.1 Health Professions Programs</b></p> <p>In its leadership role, ISU consistently offer Idaho’s broadest array of high-quality health professions programs. Idaho State University’s Division of Health Sciences (DHS) leads the state in the number of health sciences programs offered and number of health professionals produced. ISU’s health professions programming demonstrates high quality.</p>	<p><b>3.1.1</b> Number of health professions programs offered</p>
	<p><b>3.1.2</b> Number of health professions graduates</p>
	<p><b>3.1.3</b> Number of health professions programs at or near capacity</p>
	<p><b>3.1.4</b> Number of qualified student applications compared to the seats available</p>
	<p><b>3.1.5</b> Participation of faculty at the state or national level</p>
	<p><b>3.1.6</b> Number of students who have received national awards</p>
	<p><b>3.1.7</b> Pass rates on licensure and certification exams in the health professions</p>
<p><b>3.2 Delivery of Patient Care and Related Health Services</b></p> <p>ISU delivers health-related services and patient care in the state through its clinics and postgraduate residency training sites. ISU serves the state, the public, and its health professions students through its clinics and other community health venues.</p>	<p><b>3.2.1</b> Number of client visits to outpatient clinics</p>

	<p><b>3.1.7</b></p> <p>Pass rates on licensure and certification exams in the health professions</p>

**Indicator 3.1.1: Number of health professions programs offered**

Idaho State University has the distinction of being a research high, doctoral university as well as housing the College of Technology which offers a variety of health professions programs at the certificate and associate degree levels. Currently, the Division of Health Sciences (DHS) is the largest academic unit of the University, with a major presence in Pocatello, Idaho Falls, and Meridian. The Division of Health Sciences offers 33 degree bearing programs in addition to the Family Practice and Advanced Dental Residency Program. In addition to DHS degree programs, the College of Arts & Letters has three health-related programs: Clinical Psychology, Experimental Psychology, and Social Work; and the College of Technology offers eight degree programs in health related fields. With more than 40 degree programs, ISU has the highest number of health professions programs among the institutions in the state, supporting the Health Sciences Mission of the University as designated by the Board. Idaho State University provides necessary programs for 9 of the top 20 careers/professions as listed by [U.S.News 100 Best Jobs for 2014](#), among them: Nurse practitioner (#4), Pharmacist (#5), Physical Therapist (#7), Dental Hygiene (#10), Physicians’ Assistants (#13), and Occupational therapy (#14).

In addition to the sheer number of programs available, ISU is committed to quality in healthcare education and has earned several distinctions. Idaho State University’s B.S. in Health Sciences Degree is ranked as one of the best, earning a rank of 20 in the top 25 by Bestschools.org. This degree opens the door to numerous career and advanced education options in the health professions for both DHS and College of Technology graduates. The new psychiatric mental health NP offering, and Interprofessional Geriatric certificate in the DHS are directly tied to the needs of the state of Idaho. Similarly, the Spanish for Health Professions and program in the College of Arts and Letters complements the health professions offerings.

The mission of Clinical Psychology is to train competent clinical psychologists who can apply and adapt general conceptual and technical skills in diverse regional and professional settings. In 2008, the journal Psychological Reports ranked Idaho State University's Ph.D. program in clinical psychology first out of 207 programs nationwide and in Canada on its students' performances on the Examination for Professional Practice in Psychology, the national professional examination required for licensure. Subsequently, the program was recognized as one of the top ten programs for national licensure pass rates in the 2013 article in the journal Training and Education in Professional Psychology in a review of 233 programs.

Social work is often formally connected with the Health Sciences. A key purpose of social work as a profession is to increase the quality of life for all people, and this goal is inextricably linked to health sciences. Students work with individuals and families, groups, neighborhoods and communities to increase overall health and wellbeing. Medical social work is a well-established and growing area of the field. Recent national data from the Baccalaureate Educational Assessment Package show that 15% of bachelor-level social workers are employed in mental and behavioral health settings two years following their graduation, another 11% work in geriatric and aging services, and nearly 8% work in health and medical centers. Sociology has long had an important connection with the Health Sciences. Expertise is in the study of society and social behavior, groups, cultures, organizations and social institutions. Sociology thus contributes in important ways to the understanding of health related behavior, healthcare delivery, characteristics and dynamics of the health professions, cultural factors in health behavior, barriers to health care and health services, and other issues pertaining to health, illness, and health care.

The variety and quality of the health professions programs at ISU is a strong indicator that ISU is fulfilling its health Science Mission.

Indicator 3.1.1 is an indicator in ISU's FY2015-2019 Board approved Idaho State University Strategic Plan – Mapping Our Future: Leading in Opportunity and Innovation supporting Goal 3: Leadership in the Health Sciences, with a FY2014 benchmark to maintain the number of health professions programs offered, and to maintain enrollments at or near program capacity. Idaho State University will undergo campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan.

***Indicator 3.1.2: Number of health professions graduates***

As evidenced in the table below, despite economically challenging times and fluctuating student enrollment university-wide, DHS has continued to grow and graduate increasing numbers of students.

Table 63: Total Certificates and Degrees Awarded in Health Programs, FY2008-14

Degree Level	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Technical Certificate	44	39	49	42	59	44	47
Associate	77	97	98	98	102	118	105
Bachelor	241	278	276	263	275	275	309
Master	124	140	169	166	193	202	212
Doctorate	100	107	108	114	128	119	125
<b>Grand Total</b>	<b>586</b>	<b>661</b>	<b>700</b>	<b>683</b>	<b>757</b>	<b>758</b>	<b>798</b>

Figure 17: Total Certificates & Degrees Awarded in Health Programs, FY2008-14

Indicator 3.1.2 is an indicator in ISU’s Strategic Plan, supporting Goals 2: Access and Opportunity with a FY2014 benchmark to increase degree production by 5% over the next three years, and Goal 3: Leadership in the Health Sciences, with a FY2014 benchmark to maintain the number of health professions programs offered, and to maintain enrollments at or near program capacity.

**Indicator 3.1.3: Health professions programs at or near capacity**

The Division of Health Sciences data indicates that all programs are operating at or near capacity. All programs in the DHS are accredited by professional associations, in addition to university wide reporting and assessment. Accreditation of health professions programs includes annual data collection, self-study and site visits on various schedules. Much like the NWCCU, accreditation is a peer review process. Such accrediting bodies require varying levels of supervision of students. For example, the American Speech-Language and Hearing Association, Council on Academic Accreditation requires accredited programs to provide a minimum of 25% supervision to Speech-Language Pathology students as they engage in clinical

practicum. Such requirements dictate that the faculty to student ratio be such that supervision requirements can be fulfilled.

In addition, DHS heavily utilizes professional preceptors in the community who graciously allow ISU students to complete rotations in a variety of settings. These faculty preceptors provide a significant portion of a students' clinical training and are critically important community partners.

Within DHS, all programs are considered at or near capacity. Programs in Physical Therapy, Physician's Assistant Studies, Speech-Language Pathology, Counseling, Dental Hygiene, Dietetics, Health Care Administration, Medical Laboratory Science, Nursing, and Pharmacy are all operating at capacity. In addition, it should be noted that programs in Audiology, Healthcare Administration, Master of Health Education, and Physical Therapy all showed more than 20% growth in student enrollment in FY2012.

Figure 18: DHS Student Head Count (2008-13)

Indicator 3.1.3 is an indicator in ISU's Strategic Plan, supporting Goal 3: Leadership in the Health Sciences, with a FY2014 benchmark to maintain the number of health professions programs offered, and to maintain enrollments at or near program capacity.

**Indicator 3.1.4: Number of qualified student applications compared to the seats available**

Large applicant pools foster healthy competition and the ability for ISU to choose from the best and brightest of students. Continued demand for health programs, as evidenced by applicant numbers, demonstrates the need for such programs within the state, as well as nationally. Additionally, the demand further demonstrates the quality of ISU's programs and the University's continued service to the state, the public and its students in the health professions with robust health care programs, strong clinics, and community service.

The Clinical Psychology program is at capacity. The program receives up to 90 applications a year and admits approximately six (6) students each year. Currently the program is limited for growth due to physical space limitations and faculty size.

\* B.S. Completion Program: The application and program requirements were changed.

\*\*Masters/Post Masters: The creation of the D.N.P. program pulled the popular FNP option out of the Masters/post Masters programs.

\*\*\* Data not collected

The Division of Health Sciences Annual Report from 2012 indicates that of 2,938 applications were received to DHS programs, 1,754 were qualified applicants (copies of the 2012 and recently released 2013 DHS Annual Reports can be found in Appendix 21 and Appendix 22). There were 727 seats available, indicating an average of 2.41 qualified students for every available seat. While this is the average for DHS programs overall, several programs in DHS exceed this average. Program growth and interest has remained high. [Idaho is ranked 50<sup>th</sup>](#) for the number of primary care physicians (fewer than 80 per 100,000 people in 2013), and graduates of health care programs at ISU are critical to the health of the state's population. Outreach centers, telehealth, and clinics provide many necessary services to community members. The Division of Health Sciences plans to continue to strategically offer services and education to the people of Idaho, with a focus on expanding programs to reach even more rural areas in need. In the future, DHS will strive to grow programs with high demand to meet the needs of the state.

While Indicator 3.1.4 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates ISU's leadership and quality of programs in the health professions. This indicator further supports Objective 3.1 Health Profession Programs.

***Indicator 3.1.5: Participation of faculty at the state or national level***

In addition to providing high-quality, efficient education to future health professionals, the faculty of DHS are active participants at the state and national levels. Some examples of such service activity and national recognition are listed below.

Dr. John M. Batacan received the *College Educator of the Year* in 2012 by the IAHPERD.

Jody O'Donnell, Clinical Assistant Professor, Communication Sciences & Disorders, was awarded the *Nancy McKinley Leadership Award* from the Idaho Speech Language and Hearing Association (ISHA).

Dr. David Sorenson, Professor Emeritus, Communication Sciences & Disorders, received the *Fellowship of the Association*, from the American Speech Language and Hearing Association,

Deanna Molinari, School of Nursing, served as the President of the Rural Nurse Organization.

Cathy Arvidson, School of Nursing, served as the American Academy of Nurse Practitioners, Region 10 Director, Executive Board Member at Large.

JoAnn Gurenlian, Professor and Dental Hygiene Graduate Program Director, President of the International Federation of Dental Hygienists.

Idaho State University-Meridian's Ruth Schneider has been designated a fellow of the Academy of Nutrition and Dietetics, the world's largest organization of food and nutrition professionals.

Kandis Garland, Dental Hygiene, was appointed to the Peer Review Panel for Dimensions of Dental Hygiene.

While Indicator 3.1.5 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates ISU's leadership, dedication to service, and collaboration. This indicator further supports Objective 3.1 Health Professions Programs.

***Indicator 3.1.6: Number of students who have received national awards***

It can be said that a university is comprised of people, much more so than brick and mortar. In addition to the national recognition and involvement of ISU faculty in DHS, the students whom will eventually be colleagues have received national awards and honors as well. Some examples of such awards and recognition are listed below:

Three doctoral students from the Department of Counseling, Steve Moody, Rebecca Pender, and Rebecca Tadlock Marlo; were selected as Emerging Leaders by the Association of Counselor Education and Supervision in Fall 2011.

Within the 2013-14 academic year, four students in the Clinical Psychology program received awards and/or recognition for their work. One received \$10,000; another won the student poster award at the annual meeting of the Four Corners Association for Behavior Analysis; one was awarded the Sandra G. Wiener Student Investigator Award by the International Society for Developmental Psychobiology; and another won best poster award for Division 56 Trauma Psychology at the national conference of the American Psychological Association.

The Phi Upsilon Omnicron National Honor Society (Dietetics), ISU Beta Rho Chapter placed first in the regional award for Professional Project.

The Student Association of Health Care Administrators received \$500 from the American College of Healthcare Executives.

The National Student Speech-Language and Hearing Association (NSSLHA) awarded the ISU NSSLHA chapter with the [Charge Up Your Chapter](#) award for the Chapter with the most male students.

Idaho State University's student outreach project, *Operation Diabetes*, ranked #1 nationally by the American Pharmacists Association.

Dental Hygiene graduate student, Colleen Stephenson, received the *Future Leader Award* by the American Dental Hygienists' Association.

Dental Hygiene graduate student Catherine Beebe, received the *American Dental Educator's Association Crest Oral-B Scholarship for Future Educators*.

Family Practice Resident, Dr. John Fenstermaker, was selected to receive the *2012 American Academy of Family Physicians Award for Excellence in Graduate Education*.

ISU Meridian Health Science Center physician assistant student, Daria Kanevski, was selected as an Oral Health Champion by the Student Academy of the American Academy of Physician Assistants and the National Commission on Certification of Physician Assistant Health Foundation.

The high-quality students which graduate from ISU programs are already on their way to being leaders in the health professions. Idaho State University is proud of alumni who have achieved great things at such early stages of their careers.

While Indicator 3.1.6 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates ISU's leadership, and student dedication to service, the pursuit of knowledge and

subsequent application to society. This indicator further supports Objective 3.1 Health Professions Programs.

**Indicator 3.1.7: Pass rates on licensure and certification exams in the health professions**

High pass rates on national exams demonstrates ISU faculty are engaged and providing current, evidence-based practice in teaching; which translates into strong student performance on national exams. This further demonstrates the quality of ISU’s programs are meeting the national standards.

Table 66: Number of Graduates by Program and Performance on Nat’l Exams (2011-12)

Program	AY2012	AY2011	% Change AY2011	AY2008	% Change AY2008	% Student Pass Rate, Nat’l Exam
<b>Communication Sciences</b>						
<b>Audiology</b>	1	1	0%	2		100%
<b>SLP M.S.</b>	31	34	-10%	24	23%	94%
<b>Counseling</b>						
<b>Masters</b>	32	34	-6%	40	-25%	95%
<b>Dental Hygiene</b>						
<b>B.S.</b>	25	26	-4%	24	4%	100%
<b>M.S.</b>	NA	NA		1		
<b>Dental Sciences</b>						
<b>IAGD</b>	8	8	0%	8	0%	100%
<b>IDEP</b>	8	8	0%	8	0%	100%
<b>Family Practice Residency</b>	*	5	0%	6	0%	88%
<b>Dietetics</b>						
<b>B.A./B.S.</b>	14	18	-29%	17	-21%	NA
<b>Internship</b>	16	16	0%	18	-13%	92%
<b>Health Care Administration</b>	13	9	31%	12	8%	

The Division of Health Science has an average pass rate of 97% on national examination for licensure. While there is some variation in pass rates among the programs, the program with the lowest pass rate (Family Practice Residency) still has an 88% pass rate. The data indicates that DHS continues to offer excellence in the delivery of health care education, as students are readily meeting the requirements of examinations set by professional associations and licensure boards. Idaho State University pass rates on licensure exams are above national averages for all programs which report such measures.

College of Technology Health Occupations’ graduates maintain exemplary pass rates on national licensure and certification examinations in their respective fields. In the Associate Degree Registered Nurse, Practical Nursing, Physical Therapist Assistant, and Respiratory Therapy programs, the pass rates consistently eclipse the national averages in these professions and often exceed a 90% pass rate of those taking the examination for the first time.

The Clinical Psychology program students’ pass rate on the nation licensure exam (EPPP) is very high for those graduating in the last nine years, at 95%. The program has twice (in 2008 and 2013) been recognized as a top program nationally for student pass rates on the national psychology licensure exam.

Indicator 3.1.7 is an indicator in ISU’s Strategic Plan, supporting Goal 3: Leadership in the Health Sciences, with a FY2014 benchmark that pass rates are at or above the national average.

**Core Theme Three, Objective 3.2**

Table 67: Objective 3.2

<b>Core Theme Three: Leadership in the Health Sciences</b>	
<b>Objectives</b>	<b>Indicators</b>
<b>3.2 Delivery of patient care and related health services</b>  ISU delivers health-related services and patient care in the state through its clinics and postgraduate residency training sites. ISU serves the state, the public, and its health professions students through its clinics and other community health venues.	<b>3.2.1</b> Number of client visits to outpatient clinics
	<b>3.2.2</b> Examples of affiliation agreements
	<b>3.2.3</b> Examples of faculty volunteer hours in community health screenings

***Indicator 3.2.1: Number of client visits to outpatient clinics***

From FY2008- FY2012 there has been a steady increase in patient visits and clinical revenue for the Division of Health Science outpatient clinics. The total number of client visits to all ISU outpatient clinics in FY2013 declined slightly to 51,969 from 54,234 in FY2012. This is primarily due to the Family Medicine Residency Clinic transitioning to a federally qualified health center. Future benefits from changing to this status will be seen in patient numbers and reimbursement providing for mutual benefit. Active patient numbers differ from patient visit numbers and may be an indicator to incorporate as an additional measure to complement data interpretation. Redefinitions of “active patients” by the ISU Wellness Center may also factor in the numerical decline. The postgraduate dental residency program in FY2013 had 2,000 active patients accounting for 6,985 patient visits, as a numerical example of the repeat visits for these patients defined as active.

Figure 19: DHS Clinic Visits

The Division of Health Sciences currently offers 15 teaching clinics between Pocatello and Meridian, providing services to many individuals who lack financial access to treatment (see DHS Clinic Handout in Appendix 20). From the beginning of the formation of DHS, clinic infrastructure development has been a priority. This has consisted of electronic record implementation, billing and referral refinement, marketing and branding and HIPPA compliance standards. Clinic growth targets are established based on staff and faculty capacity. This capacity is evaluated with respect to DHS strategic plan goal achievement.

Figure 20: DHS Clinic Visits

An example of direct community benefit is derived from the write-offs in the sliding fees charged to uninsured or underinsured patients served by ISU’s Dental Residency Clinics in both Pocatello and Meridian. For the prior fiscal year, Pocatello provided \$862,815 and Meridian provided \$717,919 in direct public benefit, for a total direct patient dental benefit of over \$1.58 million in dental services.

The qualitative contribution of clinics is important to the mission of ISU and DHS. The Pocatello Free Clinic was the first interprofessional teaching site, an area of high emphasis for DHS, given its mission of collaborative research and practice in the health sciences. Other interdisciplinary clinic efforts are seen in the Balance Clinic jointly offered by the Doctor of Audiology and Physical Therapy programs. Idaho ranks low nationally for patient access to mental health care. The Counseling program has focused education in this specialty area to prepare clinicians to meet this need. Expansion of the postgraduate family practice residency program to Rexburg will expand the reach of ISU to more rural community health venues, fulfilling DHS mission of leadership in the delivery of rural health care. Through entrepreneurial efforts, Bengal Pharmacy LLC was created in 2013 to provide health care services beyond drug product distribution to the ISU community and beyond. This step broadens the previous student health pharmacy to allow for medication therapy management and reimbursement for cognitive services. Innovative telehealth technology has expanded those services to rural Arco, Idaho.

Clinics such as the Veteran’s Administration Hearing Clinic are contract clinical services and are not counted in this indicator but are a vital community service. Non- academic units such as the Idaho Center for Disability Evaluation hold contracts to assess adult and child participants for eligibility or community services. These assessment clinics partner with the Idaho Department of Health and Welfare. Other screening clinics are held yearly such as the ISU Meridian Health Science Center El Korah Shiner clinic that evaluates children for possible treatment of orthopedic and spinal cord injuries, burns, and cleft lip and palate. Clinics outside of DHS also exist such as the psychology clinic in Pocatello.

Family Medicine Research Clinics provide not only patient care but clinical research trial participation opportunities, allowing for the synergy of teaching, research and service, and DHS mission fulfillment in collaborative research and practice. This also supports DHS strategic plan goal 2 of creation of an environment conducive to inquiry. This is discussed further in Core theme 3.3 Health Sciences Research.

The Psychology Clinic is a training and behavioral health care center connected with the ISU Psychology Department. This treatment facility, which was established in 1978, provides training for doctoral students in the clinical psychology program as well as a low-cost treatment option for both children and adults living in Southeastern Idaho. The physical structure includes six standard treatment/consultation rooms, two testing areas, a child playroom, and several group/conference rooms, all equipped with standard observational facilities. The facility includes a computer lab and library for graduate student use, as well as video conferencing capabilities. Students in the clinical program are trained to provide professional, empirically-supported evaluation and treatment services as well as to conduct health-related research. Students are mentored by faculty in health-related research for their thesis and dissertation. They begin professional training in the University clinic, supervised by clinical faculty members. Students receive live supervision and training in provision of assessment (e.g., adult disability assessments) and treatment to community members. After building skills in the ISU Psychology clinic, students are placed in a variety of health agencies (hospitals, clinics, and state agencies) and receive supervision while providing services in southeast Idaho communities.

Table 68: ISU Psychology Clinic Evaluation and Treatment Sessions

	Evaluation Sessions	Treatment Sessions
<b>2013-2014 ESTIMATED</b>	393	396
<b>2012-2013</b>	374	499
<b>2011- 2012</b>	359	560

Objective 3.2: Delivery of Patient Care and Related Health Services is a central component of the Division of Health Science’s mission. A survey to assess DHS faculty and staff perception of mission fulfillment was conducted in 2014. The majority of respondents strongly agreed that DHS was fulfilling its mission in all nine areas surveyed.

Indicator 3.2.1 is an indicator in ISU’s Strategic Plan, supporting Goal 3: Leadership in the Health Sciences, with a FY2014 benchmark that the number of patient visits to ISU clinics will increase 5% over the next three years.

**Indicator 3.2.2: Examples of affiliation agreements**

Leadership in the health sciences is what distinguishes ISU from other state education institutions. The Division of Health Sciences offers 33 degrees distributed across 19 health professions. This accounts for 75% of professional health degree programs in Idaho. Affiliated partners numbering approximately 3,000 are mission related and defined as much by the breadth of their collaboration as sheer numbers. Affiliated partners, both internal and external strengthen DHS and are a major factor in DHS vision fulfillment to be a destination site for health profession education. They are also important for the University as a whole. For example, The College of Technology through its’ Department of Health Occupations offers clinical practicums in associate degree registered and practical nursing, physical therapy assisting, medical

assisting, massage therapy, health information technology, and respiratory therapy. Practicum sites include both larger hospital settings as well as community-based group practices, and the smaller critical access hospitals in a number of rural areas. Clinical practicums are offered in rural areas such as the West Valley Clinic in Parma and offers a geographic context unique to Idaho. This bilingual affiliated practice site served by faculty member Kelly Pesnell earned her the 2014 Idaho Nurse Practitioner of the Year and ISU Distinguished Service Award.

With 32% of ISU degrees awarded in health professions, a collaborative culture with public and private partnerships through affiliations is essential. Idaho State University Health education spans from professional technical education to doctoral level. All programs in DHS have advisory boards to provide two way feedback, quality assurance, and mutual benefit of the affiliation arrangements. Student-faculty ratios in health professions mandated experiential education are governed by specialized accreditation standards that necessitate diverse learning opportunities in closely supervised environments. Formal affiliation agreements are required for student placement in clinical practicum experiences. Currently this is tracked through the ISU legal department and yearly master lists are in place for each program. Preceptors associated with teaching affiliations are oriented to their responsibilities and recognized for their contributions at the program level. With ISU's growth in online education has come growth in affiliations beyond Idaho. Speech language pathology reaches students online in rural Idaho, other states, and Canada. The accredited nontraditional Pharm.D. was one of the first offered in the nation and enrolls students nationwide and beyond, necessitating widespread affiliations. An example of health sciences statewide footprint is the long standing affiliation and placement of ISU pharmacy faculty at Kootenei Medical Center in Coeur d'Alene. Idaho State University Meridian Health Science Center shares a physical building with the West Ada School District. This affiliation allows for seamless education provision. Dual enrolled high school students earn an associate of arts degree in general education and enter postsecondary education with junior class standing. Agreements with the Idaho Digital Learning Academy have allowed pharmacy students to reach home schooled students in rural Idaho with their drug abuse prevention education outreach. It is through community partnership and affiliations with Ada County, the Department of Health and Welfare, Central District Health, Unity Health Center, Family Medicine Residency of Idaho, Terry Reilly Medical Clinic, Friendship Clinic and Garden City Community that Community Health Screening events can succeed.

In July of 2014, ISU was granted a license to produce isotopes for medical purposes. It is one of only four or five institutions in the U.S. to hold such a license. Using novel physical approaches in the Idaho Accelerator Center, ISU has been able to produce significant amounts of isotopes, such as <sup>67</sup>Cu, that have never been available to the medical community. The University has partnered with an independent company, International Isotopes, to distribute these isotopes to its customers that include the Harvard Medical School, Fred Hutchinson Cancer Center, and the City of Hope Hospital in Los Angeles.

The College of Technology has established a working relationship with Portneuf Medical Center that provides for a certain number of health information technology students to participate in practicum rotations at the hospital while receiving stipends. Upon graduation, these students benefit from already having developed a pathway into full-time employment. The college's Physical Therapy Assistant program has a network of clinical rotation sites for students that includes 80 locations in five states. The DHS School of Nursing partnership with Portneuf has been in existence for over 50 years and has recently expanded to ISU's Family Medicine Residency Program. The Family Medicine Residency Program has trained over 40 physicians who are serving rural communities in the Intermountain West and just celebrated its 20<sup>th</sup>

graduating class. Idaho State University is the sponsoring institution for the Family Medicine Residency Program, and is a participant in the WWAMI network of Family Medicine residencies. This affiliation provides the Residency director with consultative services and network data helpful to the operation of ISU's program.

The College of Technology Health Occupations nursing programs have established a special working relationship with some of the smaller critical access hospitals in southeastern Idaho. For example, in cooperation with Bear Lake Memorial Hospital, an on-going external cohort of Practical Nursing students has been established that allows CNAs employed at the hospital to continue their education towards becoming LPNs by joining in didactic lectures remotely that emanate from the ISU Pocatello campus, while gaining their laboratory and clinical experience in their hometown. This collaboration has facilitated the development of a career track for individuals who otherwise would not have the time or money to further their education.

COT Health Occupations' students also have the unique opportunity to participate in cutting edge research projects that are seldom available to students enrolled in certificate and associate degree programs at other technical colleges in Idaho. For example, during the 2013-2014 academic year 160 Health Occupation department students joined with Boise State University nursing and respiratory therapy students in a research project that tested strategies to enhance the retention of CPR knowledge and skills in those who had previously been CPR certified, using a combination of computer-based refresher instruction and monthly skills practice using human simulators.

The Boise Veteran Affairs Medical Center with its long-standing affiliation with the College of Pharmacy and University of Washington Medical School is a model center of excellence site for patient centered medical home, medical practice training and postgraduate pharmacy residency education. Program integration has been recently demonstrated with incorporation of ISU nurse practitioners into this training.

Partnerships extend globally to Uganda, Ecuador, Ghana, and Peru through medical humanitarian trips by faculty and students to provide medical care across the world that evolve into international educational rotations. Recent presentations by Physician Assistant faculty in the Czech Republic used ISU as an example of how universities can maximize existing resources to ensure quality health profession education at affiliate campuses.

Idaho State University and the College of Idaho is a unique partnering of public and private university offering the two year Master of Physician Assistant program, while also addressing the growing need for primary health care providers in Idaho. This resulted from active monitoring of internal and external environments and the recognition that changing circumstances could impact the Division of Health Science mission. Many physicians practicing in Idaho earned their Bachelor's degrees at the College of Idaho, an asset for Physician Assistants needing clinical experience. The need for more clinical practicum sites was an additional factor that resulted in this partnership.

Social work students complete 400 hours of internship experience in a community agency setting. Students that are interested in working in health care settings are frequently placed in those settings. The University has partnerships with various health agencies within the community. The B.A. program in Sociology is very involved in the community, placing sociology students in internships in agencies and organizations with the region; graduates work in local and regional organizations, companies and

government agencies; and faculty members have conducted research and service projects in its communities. The Sociology program is part of a community-academic partnership project involving several major non-profit organizations in the area.

The ISU Clinical Psychology program partners with community agencies, hospitals and state agencies to provide services to citizens of southeast Idaho. Students provide testing services (e.g., disability assessments, neuropsychological assessments, forensic evaluations, and bariatric surgery preparedness assessments) and treatment services for children and adults for general mental health concerns such as anxiety, depression and other conditions. The Clinical Psychology program includes a fifth year which is a clinical internship at a member site of the Association of Psychology Postdoctoral and Internship Centers (APPIC) or an equivalent experience approved by the Clinical Training Committee. Students have been competitive and successful at attaining internship positions. To date, 92% (61 of 66) of APPIC applicants have been placed in APPIC internship sites during their first application year. This is compared to a 70% average nationally.

Affiliations may be the result of community engaged service, research, and teaching, or a combination of all three and are further described as a component of Core them 4.2 Community engagement.

Indicator 3.2.2 is an indicator in ISU's Strategic Plan, supporting Goal 4: Community Engagement and Impact, with a FY2014 benchmark that the number of partnerships will increase 5% over the next five years. Indicator 3.2.2 further supports DHS Goal 1: To provide high-quality programs that are efficient, cost effective, and student oriented.

***Indicator 3.2.3: Examples of faculty volunteer hours in community health screenings***

The concept of the Community Health Screening events between ISU Meridian Health Science Center and Ada County stemmed from the county's need to reduce cost to taxpayers by providing better medical care access and preventive treatment to the growing indigent population. Idaho State University Meridian Health Science Center faculty saw this as an opportunity to lead by example and assist the community, all the while developing an innovative health experience for learners in an interdisciplinary environment. One of DHS's core values includes a holistic approach to health, emphasizing a comprehensive view of human health, including curative and preventive dimensions. For 2012—2013 between 500–600 hours in preparation and execution of the community screenings were logged by faculty, not including administration and staff time. Nine core faculty and two co-directors are devoted to the six annual screenings. These faculty activities are in addition to their academic and clinical workload. For FY2013, 139 students assisted with at least one screening and 61 attended multiple events for approximately 950 hours of donated student time. Productivity measures are correlated to determine program viability and sustainability. Community Health Screening planning is informed by data collection, presented, and tracked in yearly reports.

Through a partnership with the University of Washington/Northwest AIDS Education and Training Center, ISU employs one program coordinator to provide statewide HIV and AIDS medical training. Free HIV and Hepatitis C screening is provided at Community Health Screening events.

In Pocatello, the ISU Health Fair in its 33<sup>rd</sup> year, annually features around 70 learning centers and health screening opportunities. Community Health Screening events are held in Pocatello as well.

AmeriCorps members in programs administered by ISU annually contribute more than 64,000 hours of service work to communities throughout Idaho. The two programs are Idaho Health Care for Children and Families Program and Idaho Community HealthCorps program. The former has 10 stipend members that each provide 1,700 hours annually. There are 22 education-award-only members who contribute 450 hours per year, and three education-award-only who provide 675 hours annually. The HealthCorps program has 21 full-time members each providing 1,700 hours annually. In a study released December 2013, the Corporation for national and Community Service and the National Conference on Citizenship ranked Idaho third among the states for volunteerism and civic engagement. These volunteers are meeting local needs and strengthening communities.

Family Medicine Residency Program provides medical services to the underserved populations in Pocatello and Southeast Idaho. Residents serve one-month rural rotations in 15 communities statewide. They also staff the Pocatello Free Clinic which sees 15,000 patients per year and provides medical services to inmates in the Pocatello Women's Correctional Center, resulting in treating diverse patients and educational opportunities that otherwise may not be realized.

Other services include providing prenatal care, pediatric care for incarcerated minors, and physicians' services to the Bannock County Health Department. Clinical pharmacy services at the Family Medicine Residency Program include obtaining medications for some 250 indigent patients who do not have insurance for prescription medications.

College of Technology Health Occupations faculty are known for their generosity in the provision of time and money in professional service to their communities and professional organizations. It is not uncommon to find these faculty volunteering at food banks, shelters, blood drives, free clinics, schools, and neighborhood organizations. It is also not uncommon to find these same dedicated faculty members in leadership positions within the executive councils of their state and national professional organizations.

While Indicator 3.2.3 is not an indicator in ISU's Strategic Plan, it was determined to be a valuable indicator that demonstrates ISU's commitment to integrate teaching, clinical practice and service that provides professional development opportunities, strengthening faculty credentials and expertise as they role model clinical service. This indicator further supports Objective 3.2 Delivery of Patient Care and Related Health Services.

### Core Theme Three, Objective 3.3

Table 69: Objective 3.3

Core Theme Three: Leadership in the Health Sciences	
Objectives	Indicators
<b>3.3 Health sciences research</b>  ISU contributes to the development of new knowledge in the biomedical and pharmaceutical sciences, rural health, clinical research studies, and professional research. ISU faculty and students engage in basic and clinical research in the health sciences.	<b>3.3.1</b> Examples of (faculty) peer reviewed publications, professional publications, and other publications
	<b>3.3.2</b> Number of health professions students who are participating in research
	<b>3.3.3</b> Dollar amount of extramural support in the health sciences

#### **Indicator 3.3.1: Examples of (faculty) peer reviewed publications, professional publications, and other publications**

The Division of Health Sciences 2012 Annual Report provides examples of select publications. From 2011 to 2012 there was a doubling in numbers of presentations, referenced articles published and book chapters published in total for DHS as displayed in the table below. The papers published and presentations by program for FY2012 are also included. The national presence of ISU can be noted by viewing the presentation location.

Table 70: DHS Publications

With the 2013 implementation of Activity Insight, ISU can quantitatively assess with more precision the number of publications by unit in DHS as represented below. Efforts to refine this new report methodology will serve DHS well and create an indicator for future incorporation and benchmark development. A distinction between DHS publications and publications in other ISU colleges warrants this separate indicator. Many professional publications are also peer reviewed and other intellectual contributions captured through Activity Insight can be measured and assessed without duplicative counting, adding credibility to the reports. Dissemination of scholarly work is a requirement of all DHS Faculty and reflected in promotion and tenure guidelines. Scholarly presentations between the campuses are also important and accomplished through annual DHS Research Day. For Research Day 2014, 73 posters were showcased reflecting 200 faculty, student and outside contributors to 450 attendees.

High-quality research is represented and tracked across campus. Indicator 1.2.1 quantitates the total number of publications for ISU, and Indicator 1.1.7 provides additional qualitative examples of outstanding research and innovation taking place across the entire ISU campus.

\*The blank entries are those that have a department and a publication type specified but do not have a publication year specified.

Qualitative listing of DHS Intellectual Contributions for FY2013 by unit is included in the Mission Fulfillment, Adaptation, and Sustainability Appendix 30.

Indicator 3.3.1 supports Goal 1: Learning and Discovery in ISU's Strategic Plan. This is a new indicator and therefore no benchmark has been established. This indicator further demonstrates the University community's dedication to the pursuit of knowledge, to the dissemination of knowledge, and to improving lives and solving society's most pressing issues.

***Indicator 3.3.2: Number of health professions students who are participating in research***

For student participation in clinical/applied research as part of their degree program in Health Sciences the ISU strategic plan performance measure for FY2013 is at 706, slightly down from 727, with a FY2014 benchmark to increase to 750 students over the next three years. Student research presentations are part of DHS annual Research Day agenda. The indicator data source is 5000 level coursework so research participation may be undertracked and the actual number of students participating in research may need a more refined metric. Human subject committee submission reports may be utilized in the future as an additional quantitative metric. Some of the research conducted by DHS's students is co-curricular, not funded and not associated with credit. Graduate coursework by dental hygiene, counseling, audiology, occupational and physical therapy as examples culminates in scholarly work at the thesis level. The launch of annual lectureships such as the Dr. David Chu Lectureship in 2013 has a goal of stimulating research interest in students. Revitalization of the Biomedical Sciences graduate program with strategic hires based on research is an effort to enhance student research and graduate education. The Division of Health Sciences has implemented student competitive awards to recognize research excellence which is hoped to stimulate research interest as well. Though the focus of Community Health Screenings is patient care, Community Health Screenings events as an example provide two foci of research: program development and educational outcomes. Career Path Interns on the Community Health Screenings team collected data and assisted with analysis that resulted in 16 presentations and posters in 2012-2013. Career Path Internship funding and opportunities in DHS has increased and may be a surrogate measure of enhanced student research participation. For FY2011-12 there were 27 Career Path Internships, increasing to 38 in FY2013-14. Consistent access to travel funds for students to travel to disseminate results of their research is a positive stimulus for student research participation.

Indicator 3.3.2 is an indicator in ISU's Strategic Plan, supporting Goal 3: Leadership in the Health Professions, with a FY2014 benchmark to increase to 750 students participating in clinical/applied research as part of their degree program, over the next three years. Indicator 3.3.2 further supports DHS Goal 2: To create an environment conducive to inquiry.

***Indicator 3.3.3: Dollar amount of external (extramural support) funding in the Health Sciences***

One of the ISU Strategic Plan performance measures is faculty and student engagement in basic, translational, and clinical research in the health sciences as evidenced by the number of faculty engaged in health sciences/biomedical research (PI's and co PI's). FY2012 saw an increase in numbers of faculty participating to 78 from 39 the year prior. FY2013 number is 65 with a FY2014 benchmark to 80 over the next 3 years. The performance measure for amount of external funding received increased from FY2013 to \$6.2 million from \$4.0 million with a FY2014 Benchmark to increase 3% per year. Publications, some

of which resulted from external funding are included in Indicator 3.3.1 and Appendix 30. The tables below describe the number of grants submitted as well as awarded and includes the funding source. In a growing research enterprise such as ISU it is vital to recognize effort in addition to funding success.

Figure 21: Total DHS Grants & Contracts Submitted/Awarded

Figure 22: Total DHS Grants & Contracts Dollars Awarded

Figure 23: DHS Grants & Contracts Submitted/Awarded by Unit

The Idaho Center for Health Research was formed as part of DHS’s reorganization and has evolved to be the foundational infrastructure for research in DHS. In the last year Idaho Center for Health Research assisted with submitting 27 grant proposals totaling \$4.8 million. This office assists scholars in identifying research opportunities, collaborators, and securing resources. The Division of Health Sciences specific tracking of research pertinent metrics will be enhanced through this office. This is in addition to University level support through the Office of Research and Economic Development. Idaho State University strategic plan performance measures for faculty and student engagement in research/creativity are not unique to DHS and extend to the University in total. The University Research Council includes Division of Health Sciences membership and offers research support as well.

A qualitative discussion of DHS research efforts and progress follows. The Division of Health Sciences’ research can be described as basic, translational and clinical. Research is required of all DHS faculty and reflected in workload assignments. Functional research working groups are now in place and fund source scouting methods established. First Friday and Third Thursday faculty meetings in DHS allow for collaborative sharing of ideas.

During the Division of Health Sciences Research Day networking also occurs. For Research Day 2014, invited speakers from the Mountain West Clinical Translational Research center met with faculty to further, focused research on topics that address health issues in the western U.S. ISU is a partner university with the Mountain West Clinical Translation Research Center on a \$20 million dollar NIH grant focusing on geographic healthcare needs.

The Division of Health Sciences' research teams in collaboration with state health care systems conduct research on important issues such as Idaho drug abuse patterns that provides data for state and policy and guideline development. At the federal level, NIH funding has been received to measure antibiotic use in hospitalized patients and decrease antibiotic resistant infections in hospitals nationwide. As a result antibiotic stewardship standards can be implemented and used by hospital accrediting bodies, the Centers for Disease Control or the Center for Medicare Services.

The Biomedical and Pharmaceutical Research Department is restructuring to focus on structural biology and drug discovery research with investigators funded by Skaggs Alsam Foundation. The College of Pharmacy has recently secured a contract with MedImpact to develop drug monographs to support formulary selection by insurance companies.

The Statewide Idaho IDeA Network of Biomedical Research Excellence, or INBRE is receiving a \$16.3 million, five year renewal grant from the NIH for 2014-2019. Idaho State University will get \$1 million of this. This will support 10-15 undergrads per summer as research fellows, two to three graduate doctoral students per year, biomedical research equipment and fund seed and start-up grants for faculty.

Medical multicenter research trial participation in landmark published studies such as ACCORD assure that faculty are involved in research that is changing health care. This is possible through the Clinical Research Center, a unique component of the Family Medicine Residency Program. Research breadth goes beyond numeration. Through the Clinical Grants Division of Family Medicine Residency Program, funding from federal grants and appropriations has provided maternity care for migrant and seasonal farm worker families, gynecological procedures to prevent cervical cancer in poor, uninsured rural women, and primary care for people living with HIV infection. Family Medicine Residency was awarded 2011-2016 Primary Care Training and Enhancement Title VII HRSA, "Baby Boomer Medical Home Project," award of \$1,123,155. In 2011 funding was obtained to expand graduate medical education slots from 13.5 FTEs to 22 FTEs. Residency redistribution requests have been funded to increased rural training tracks.

The Institute of Rural Health at ISU has a consistent track record for funded research for Traumatic Brain Injury (TBI) patients. This has resulted in the TBI Virtual Program Center and Grand Rounds approach to public education and brain injury training serving all areas of Idaho. Idaho's challenge is to identify community resources to assist TBI patients after they leave acute care facilities and return home to live. The most recent HRSA funding was earned when Idaho ranked 8<sup>th</sup> of the 20 states funded with a score of 95 of 100.

The Meridian CORE is an economic development corridor that creates core competencies in the state for health and health related research. Idaho State University Meridian Health Science Center is the educational anchor for this corridor. It's location in the population and political center of the state provides for high visibility. The CORE members are interested in creating start-ups and in licensing new technology in tandem with the Idaho Department of Commerce which is central to the formulation of tech transfer relationships.

One of the goals of the newly ground broken Treasure Valley Anatomy and Physiology Laboratories at the ISU Meridian Health Science Center is to serve as a foundation for distributive medical education and research inherent in medical graduate education.

Evidence based decision making is a fundamental core of health sciences in patient care and research. Likewise it is applied in strategic planning to assure that meaningful results are generated. Core theme 1 Indicator 1.1.4 assessing the number of students employed to work with faculty in research projects and 1.1.5 number of thesis and dissertations completed, is inclusive of DHS students and complements the discussion presented here.

Indicator 3.3.3 supports multiple indicators in ISU's Strategic Plan – Goal 1: Learning and Discovery, with a FY2014 benchmark to increase amount of funding by 3% per year for the next five years; and Goal 3: Leadership in the Health Professions, with a FY2014 benchmark to increase funding by 3% per year. Indicator 3.3.2 further supports DHS Goal 2: To create an environment conducive to inquiry.

**Core Theme Four—Community Engagement and Impact**

<b>Core Theme Four: Community Engagement and Impact</b>	
<b>Objectives</b>	<b>Indicators</b>
<p><b>4.1 Economic Impact</b></p> <p>ISU contributes to the intellectual and financial capital, and provides infrastructure resources, to support the present economic development of the state. ISU directly contributes to the economic development of the state, region, and community.</p>	<p><b>4.1.1</b></p> <p>Estimates of economic impact</p>
	<p><b>4.1.2</b></p> <p>Amount of university spending from non-state funding sources</p>
	<p><b>4.1.3</b></p> <p>Number of student volunteer clinical services</p>
	<p><b>4.1.4</b></p> <p>Net contribution to Idaho by non-resident students and their families</p>
	<p><b>4.1.5</b></p> <p>Examples of ISU healthcare professional graduates</p>
	<p><b>4.1.6</b></p> <p>Number of individuals served through Workforce Training</p>
<p><b>4.2 Community Engagement</b></p> <p>ISU is a unique reflection of the community it serves. ISU engages and supports the communities it serves, and those communities return that support.</p>	<p><b>4.2.1</b></p> <p>Examples of active ISU formal partnerships, collaborative agreements, and contracts with public agencies and private entities</p>
	<p><b>4.2.2</b></p> <p>Examples of activities/events that meet the local and regional needs/ interests</p>
	<p><b>4.2.3</b></p> <p>Number of clinic participants who are served</p>
	<p><b>4.2.4</b></p> <p>Examples of continuing education and professional development</p>
	<p><b>4.2.5</b></p> <p>Examples of campus resource conservation efforts</p>

**Core Theme Four, Objective 4.1**

Table 73: Objective 4.1

<b>Core Theme Four: Community Engagement and Impact</b>	
<b>Objectives</b>	<b>Indicators</b>
<b>4.1 Economic Impact</b>  ISU contributes to the intellectual and financial capital, and provides infrastructure resources, to support the present economic development of the state. ISU directly contributes to the economic development of the state, region, and community.	<b>4.1.1</b> Estimates of economic impact
	<b>4.1.2</b> Amount of university spending from non-state funding sources
	<b>4.1.3</b> Number of student volunteer clinical services
	<b>4.1.4</b> Net contribution to Idaho by non-resident students and their families
	<b>4.1.5</b> Examples of ISU healthcare professional graduates
	<b>4.1.6</b> Number of individuals served through Workforce Training

**Indicator 4.1.1: Estimates of economic impact**

Idaho State University is a vital part of the economy, not only in the communities it serves, but throughout the state. Annually, the indirect and induced economic output from operations, employee, student and visitor spending is estimated to be \$311.9 million. Idaho State University alumni living and working in Idaho contribute an estimated \$873.8 million into the economy each year. The University is the largest employer of Bannock County residents, and 3,895 people are employed by ISU in Pocatello, Meridian, Idaho Falls and Twin Falls. Economic Impact studies have been conducted for the University as a whole and for the Division of Health Sciences (copies of which are included as Appendix 23 and Appendix 24).

The Division of Health Sciences (DHS) is the largest division within ISU, graduating 32% of ISU students. The Division of Health Sciences 2012 Annual report shows that of DHS graduates, 185 gained first employment within the state of Idaho, compared to 100 who left the state. This demonstrates that the state of Idaho benefits from the students who are educated in health care at ISU. These graduates contribute to the ambitious goal of the SBOE that “60% of Idaho residents between the ages of 25-34 will have a degree or certificate by 2020.” Those alumni provide impact both fiscally, as well as socially and educationally within the state. The Board, in conjunction with their partnership as a Complete College America state, have identified the following reasons for educating the Idaho populace:

- Idaho must grow talent within the state to fuel innovation and economic competitiveness.
- Increased education attainment improves the quality of life for Idahoans and drives a vibrant, diverse economy.
- Idaho’s increased education attainment must be responsive to businesses that will employ the workforce of the future.
- It is imperative we commit to efficiently and effectively increase postsecondary degrees and certificates.

While ISU graduates from all colleges help to fulfill this goal, DHS is the largest body with the most complete data sets.

The Office of Research and Economic Development has primary responsibility for these aspects of technology development and transfer.

- Promotes the creation of knowledge through the research programs at Idaho State University
- Assists the knowledge creators and the University to “package” such created knowledge into manageable units (intellectual property)
- Provides expertise to the University on actions appropriate to protect the University’s ownership of such intellectual property
- Identifies and implements opportunities for extracting value by the successful commercial exploitation of such intellectual property, through such vehicles as licensing, start-up companies, joint programs with existing companies, and other commercially available arrangements

Idaho State University assists research personnel to complete the Intellectual Property Disclosure Form. It coordinates the internal review of the created material with the Intellectual Property Advisory Committee (comprised of the President, VP Finance & Administration, VP Advancement; VP Research & Economic Development, and the General Council). It also collaborates with appropriate outside technical and legal assistance to perform market structure analysis and manage patent applications. It markets the technology to move it into the commercial sector, and it assists in negotiating licensing arrangements with existing or start-up companies. The University may provide assistance to university-related companies pursuing SBIR/STTR grants (ISU is not eligible to apply for these, and many other types, of research commercialization grants).

The overall goal of the office is to promote the development of such intellectual property and to enable the maximum value therein to be transferred to the commercial and economic community within the state. Recapture of economic or monetary value to the University is important, as such recaptured value enables the growth and expansion of funded research activities; however, it is of lesser value than the maximization of university contributed economic impact.

**\*\*B.S. Dietetic students go on to internship before employment**

Idaho State University students and graduates are crucial to the state's health care resources, and the mission to educate a larger portion of Idahoans. While it is relatively easier to focus on economic impact, there are also social, educational, and cultural benefits indicated by Alumni of ISU.

Indicator 4.1.1 is an indicator in ISU's FY2015-2019 Board approved Idaho State University Strategic Plan – Mapping Our Future: Leading in Opportunity and Innovation supporting Goal 4: Community Engagement and Impact, with a FY2014 benchmark that total economic impact will increase by 5% over the next five years. Idaho State University will undergo campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan.

#### **Indicator 4.1.2: Amount of university spending from non-state funding**

As demonstrated in Figure 24: Fiscal Year 2013 Source of Funds, 32.3% of ISU's budget comes from state appropriated funding that includes general funds, and endowments. The remainder of University spending (61.6%) comes from a variety of other sources, including grants, contracts, student tuition and fees, and other course and professional fees.

Figure 24: FY2013 Source of Funds

The breakdown for each of the categories contained in Figure 24 can be found in the ISU audited FY2013 Annual Financial Statements in Appendix 14.

The percentage of state funding has continued to decline over the past several years, with many colleges operating with a budget of only 2-3% state funding for anything other than personnel costs. Local accounts have continued to be relied upon as funding for even basic necessities.

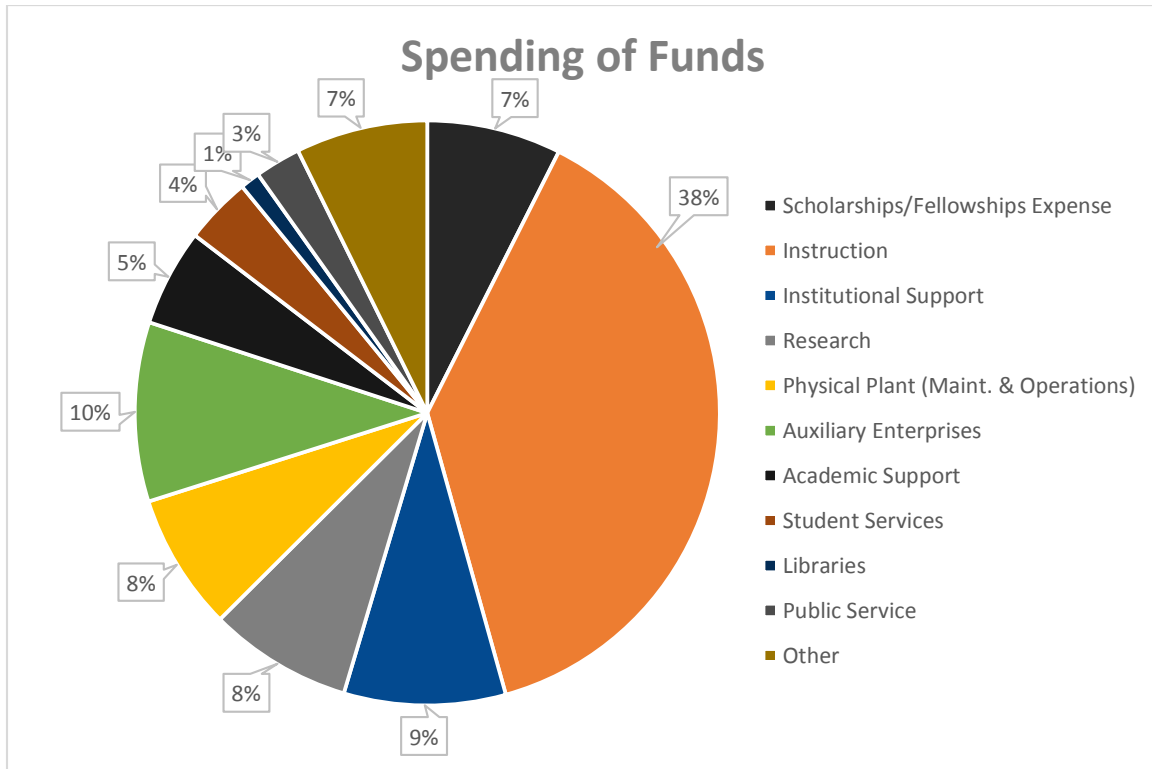

Table 75: Percent of State-Appropriated Funds Allocated for Personnel

Program	FY2010	FY2011	FY2012	FY2013
Pharmacy	100.0%	100.0%	100.0%	100.0%
Business	96.4%	96.1%	96.6%	98.9%
Summer Session	97.3%	97.2%	98.9%	98.9%
Intercollegiate Athletics	94.6%	94.6%	100.0%	96.0%
Health Professions	95.7%	95.5%	96.2%	95.8%
Research	91.6%	92.9%	94.7%	95.3%
Education	93.0%	93.6%	95.3%	95.2%
Arts & Letters	92.4%	93.1%	93.3%	93.4%
College Of Technology	89.9%	89.7%	92.2%	92.5%
Science & Engineering	95.0%	92.2%	92.4%	92.4%
Student Services	85.7%	82.8%	86.8%	87.1%
Institutional Support	81.3%	80.7%	82.9%	84.3%
Academic Support	80.1%	70.1%	71.6%	73.7%
General Instruction	65.2%	70.7%	63.2%	65.0%
Graduate School	65.4%	63.9%	62.7%	60.9%
Library	49.2%	48.9%	48.7%	47.3%
Physical Plant	36.5%	35.9%	34.7%	36.0%

While the largest portion of the University spending supports instruction, the University has committed significant support to Scholarships/Fellowships, Research, Auxiliary Enterprises, Maintenance and Operations, and Academic Support.

Figure 25: ISU Spending FY2013

The breakdown for each of the categories contained in Figure 25 can be found in the audited ISU FY2013 Annual Financial Statements in Appendix 14.

Facing continued declines in funding from state and federal levels, ISU has been proactive in finding revenue streams to support the educational mission from a variety of grants, contracts, partnerships and clinical services.

While Indicator 4.1.2 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating the non-state appropriated resources committed by the University that contribute to the growth of the local and state economy, thereby generated new revenue. This indicator further supports Objective 4.1 Economic Impact. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

**Indicator 4.1.3: Number of student volunteer clinical services**

In 2011, DHS students performed a total of 5,242 hours of volunteer services that contributed an estimated \$201,249 to the economy of Idaho. These volunteer service hours come in the form of a variety of community health screening events in the state.

The ISU Meridian outreach center partnered with Ada County in 2010 to devise a way to reach more of the indigent population’s health care needs, while reducing the burden to taxpayers. This partnership yielded health screenings held throughout the year to provide community members a better understanding of their health and to connect individuals with follow-up care within the community. The majority of those served in this capacity do not have access to insurance. Students and faculty from Nursing, Counseling, Dietetics, Audiology, Dental Residency, Medical Laboratory Science, Public Health, Pharmacy, and Physicians’ Assistant Studies Program volunteered hundreds of hours annually. Since the program’s inception, 26 community health screenings have been held, serving 820 community members.

Table 76: Number of Students Involved In Community Health Screening Events

	10/4/2012	11/1/2012	12/6/2012	2/7/2013	3/7/2013	4/11/2013
<b>Accelerated Nursing</b>	4	4	4	4	7	8
<b>CSD/SLP/Audiology</b>	3	3	7	5	4	5
<b>Counseling</b>	3	4	5	4	5	3
<b>Dental Residency</b>	2	3	1	1	2	0
<b>Dietetic Internship</b>	4	4	4	4	4	4
<b>Medical Laboratory Sciences</b>	6	6	7	4	4	4
<b>Nursing Practice</b>	4	4	2	4	4	4
<b>Public Health</b>	0	2	1	2	1	1
<b>Pharmacy</b>	8	6	5	4	4	6
<b>Physician Assistant</b>	4	4	7	7	6	3
<b>Total</b>	<b>38</b>	<b>40</b>	<b>39</b>	<b>39</b>	<b>41</b>	<b>38</b>

In Meridian, the following table demonstrates the need for health care services, as 89% of attendees reported no health care coverage.

Table 77: Current Health Care Access

Evidence of Need	N	Percent
<b>No Health Care Provider</b>	150	80%
<b>No Insurance</b>	163	89%
<b>Called 911</b>	6	3%
<b>Visited the ED</b>	47	23%

Differences in percentage due to missing data

In addition to the accessible, low cost clinical services offered through community health screenings and the like listed above, students enrolled in programs in DHS also earn credits and grades for internships and rotations within community hospitals, clinics, schools, and private practices. The following table indicates how many student credit hours (SCH) were earned as students worked with professional preceptors in the community. Idaho State University values service learning and the vast majority of the hours earned in clinical practica are unpaid hours for the students and the preceptors who graciously agree to teach them.

Table 78: Student Credit Hours Earned In Clinical Practica

Fiscal Year	Student Credit Hours
<b>2011</b>	7,668
<b>2012</b>	10,820
<b>2013</b>	11,060
<b>2014</b>	11,474

Students and faculty at the main campus in Pocatello likewise contribute to the state by providing a number of services at community health care screenings. Idaho State University hosts an annual health fair which provides dietetics counseling, diabetes counseling, pharmacy information and services, blood draws, hearing screenings, occupational and physical therapy screenings. These services are unpaid, and provide valuable service to a number of individuals. Idaho State University also has agreements with local schools to provide some of these services as well. For example, the Pocatello School District has only one Audiologist. Students from the Audiology and Speech Language Pathology are involved in hearing and speech and language screenings within the schools. Idaho State University Meridian Health Science students provide the vaccines for staff and students of the West Ada School District. These services are valuable to the district, as they also operate in a declining financial situation.

In a typical year, students perform a total of about 23,587 clinical hours of service out of which about 20,157 hours are unpaid. These clinical service hours are obtained as students work with preceptors in the field. Students practice under the supervision of the preceptor, completing professional services in a variety of hospitals, Skilled Nursing facilities, private clinics and school based settings. Idaho State University values service learning and requires that students take part in clinical rotations as well as volunteering in community screenings. These unpaid services result in an economic impact of about \$12.6 million annually.

While Indicator 4.1.3 is not an indicator in ISU's Strategic Plan, it does fit within the Division of Health Science's Strategic Plan under Goal 1: To provide high-quality programs that are efficient, cost effective, and student oriented; under Objective 1.3: Student Oriented. It was also determined that it was an important indicator for demonstrating the University's commitment to outreach and serving the community. This indicator further supports Objective 4.1 Economic Impact. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

***Indicator 4.1.4: Net contribution to Idaho by non-resident students and their families***

The following figures demonstrate that in the 2014 academic year, non-resident students contributed over \$13 million to the local economy as they incurred living expenses within the community. International students contribute nearly \$13 million as well to the local economy in addition to paying for tuition and fees. In the rural communities ISU serves, this is valuable revenue which is added to the local economy.

Figure 26: Non-Resident and International Fiscal Contribution

Figure 27: Full-Time Student Body by Resident Type

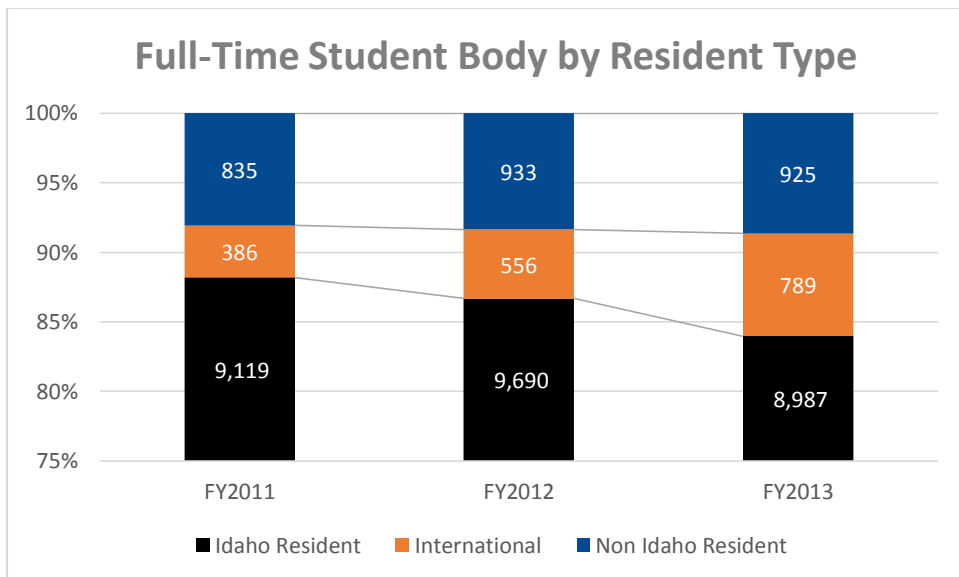

Figure 28: Tuition Revenues Generated by Full-Time Resident Type

In addition to the financial contributions, out-of-state and international students bring valuable social, cultural, and educational opportunities to the region. Many student organizations participate in events such as “Africa Night” which bring food, dance, music and cultural awareness to the in state students. Idaho is not inherently a very culturally diverse state, the out-of-state and international students are important for bring a sense of the “universe” to the University.

While Indicator 4.1.4 is not an indicator in ISU’s Strategic Plan, it was determined that it was an important indicator for that the University has become a destination institution for many non-resident and international students, thereby contributing to the cultural and financial growth of the community. This indicator further supports Objective 4.1 Economic Impact. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

**Indicator 4.1.5: Examples of ISU healthcare professional graduates**

Idaho ranks at the bottom of the 50 states and the District of Columbia for:

- The number of primary care physicians per capita
- The number of internists per 100,000 population
- The number of active pediatricians per 100,000 population, and
- The number of psychiatrists per 100,000 population

Idaho also ranks second to last in the nation for the number of physician residents overall and the number of physician residents in primary care; and 47<sup>th</sup> for the number of active obstetricians and gynecologists per 100,000 population. Retention of graduates from the ISU health profession programs is critical to meeting the workforce demand for health care providers.

The 2012 DHS annual report indicated that 64.9% of DHS graduates were employed within the state in their first year after graduating. This exemplifies a high return on investment for the state as Idaho reaps the rewards of strong health care providers in a state which desperately needs them. Idaho State University graduates report working in rural settings more often than urban and provide much needed services to remote individuals who would otherwise not have access to health care. With the exception of Ada County, all Idaho communities are designated as rural and are often lacking enough physicians, speech pathologists, pharmacists, and nurses. Idaho State University health programs are continuing to grow, with an eye toward providing all citizens of the state with more adequate health care through educating the populace.

In addition, the educated citizens who stay in Idaho upon graduation contribute to the Board’s goal that 60% of Idaho residents between the ages of 25-34 have a degree or certificate by 2020.

While Indicator 4.1.5 is not a specific indicator in ISU’s Strategic Plan, it aligns closely to support Goal 3: Leadership in the Health Sciences, Objective 3.1; as well as fit within the Division of Health Science’s Strategic Plan under Goal 1: To provide high-quality programs that are efficient, cost effective, and student oriented; under Objective 1.3: Student Oriented. It was also determined that it was an important indicator for demonstrating the University’s commitment to outreach and serving the community. This indicator further supports Objective 4.1 Economic Impact. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

***Indicator 4.1.6: Number of individuals served through Workforce Training***

Workforce Training operates through the College of Technology and provides relevant training to a variety of people in the community. Workforce Training provides a way for individuals to increase current knowledge and skills to gain an advantage in the job market. The Workforce Training program serves individuals from the community who are looking to improve their job skills through regularly scheduled catalog courses and industry specific customized trainings. Additionally, Workforce Training provides personal enrichment courses as part of their regularly scheduled catalog offerings.

*Table 79: Workforce Training Participation*

	<b>FY2011</b>	<b>FY2012</b>	<b>FY2013</b>
<b>Number of Students</b>	10,688	10,621	8,723

As the numbers above demonstrate, a large number of individuals participate in Workforce Training, indicating that it is a well-used resource within the community. The drop in participation numbers between 20012 and 2013 was the result of a staff retirement whose primary responsibility was recruitment and expansion, as well participation declining in the annual Safety Fest event. Regularly

scheduled classes maintained their typical enrollment numbers, and the program revenues were up slightly from the previous year due to securing large customized training contracts.

The Department of Sociology, Social Work, and Criminal Justice sponsored and organized this past year the Humanities Café which was a series of lectures and discussions open for the public. There were six sessions of the Humanities Café held at the Pocatello Portneuf Brewery from October 2013 through April 2014, providing opportunities for personal enrichment and enhancing the intellectual capital in the area.

While Indicator 4.1.6 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating the University's capacity to provide continuing education opportunities, as well as opportunities for personal and professional enrichment. It further demonstrates the University's contribution to intellectual and financial capital within the community. This indicator further supports Objective 4.1 Economic Impact. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

**Core Theme Four, Objective 4.2**

Table 80: Objective 4.2

Core Theme Four: Community Engagement and Impact	
Objectives	Indicators
<p><b>4.2 Community Engagement</b></p> <p>ISU is a unique reflection of the community it serves. ISU engages and supports the communities it serves, and those communities return that support.</p>	<p><b>4.2.1</b></p> <p>Examples of active ISU formal partnerships, collaborative agreements, and contracts with public agencies and private entities</p>
	<p><b>4.2.2</b></p> <p>Examples of activities/events that meet the local and regional needs/interests</p>
	<p><b>4.2.3</b></p> <p>Number of clinic participants who are served</p>
	<p><b>4.2.4</b></p> <p>Examples of continuing education and professional development</p>
	<p><b>4.2.5</b></p> <p>Examples of campus resource conservation efforts</p>

***Indicator 4.2.1: Examples of active ISU formal partnerships, collaborative agreements, and contracts with public agencies and private entities***

Idaho State University’s research vision includes robust private-public relationships and partnerships. While the University has many hundreds of partners, it is actively engaged in increasing the number of partnerships with Idaho companies to protect and grow jobs and drive economic development in the region and state. The Division of Health Sciences holds more than 3,000 Affiliation Agreements with private and public agencies which host ISU health profession’s students in a variety of clinical rotations. This successful partnering yields valuable collaborations between community health care providers in Idaho as well as neighboring states. Affiliations within DHS represent training partnerships with government agencies, private groups, clinics, hospitals, pharmacies, rehabilitation facilities and skilled nursing centers.

Bengal Pharmacy, LLC, owned by the Idaho State University Foundation, opened Idaho’s first-ever full-service telepharmacy on June 20, 2014 in Arco, Idaho. The pharmacy, in partnership with the Lost Rivers Medical Center, will utilize innovative technology to provide critical health care access to one of the state’s many rural communities, while also providing hands-on experience for ISU’s pharmacy students.

The School of Rehabilitation and Communication Sciences houses the Veteran’s Administration (VA) Hearing clinic and is an authorized provider of assessment of hearing acuity and provision of hearing aids and services through their contract with the VA. This partnership allows Veterans to receive services without traveling to the nearest VA Medical Center in Salt Lake City, UT.

The Vice President for Research & Economic Development represents ISU in the Higher Education Research Council, Idaho Global Entrepreneurial Mission, Center for Advanced Energy Studies (Steering Committee), Idaho National Laboratory, Idaho Regional Optical Network (elected President and CEO of the Board of Directors; July 2014), Idaho Technology Center (Board of Directors), Bannock Development Corporation (Board of Directors), Pocatello Chamber of Commerce (Board of Directors), and for the Association of Public and Land Grant Universities Commission on Commercialization, Innovation, and

Economic Prosperity and appointed to Governor Otter's Leadership in Nuclear Engineering Commission. Research and scholarship at ISU is rooted in nuclear energy, clean energy and technologies, the environment, and human health. Through the Center for Advanced Energy Studies, ISU faculty engage in state of the art research that contributes to the nation's economic stability by developing technologies that ensure a stable and secure energy infrastructure. Idaho State University has focused with success on securing major grants and will continue to do so. In the past year, the University has successfully attracted a National Science Foundation grant for \$3.8 million, a National Institute of Health grant for \$1.8 million, and a grant from the Office for Naval Research for \$2.2 million. The University has over ten multi-million dollar grants under development to a variety of federal agencies.

Idaho State University has developed a new suite of metrology analytical capability (the ability to analyze nanomaterial's for manufacturing integrity, quality control, and product enhancement). The metrology suite has allowed us to develop a partnership with ON semiconductor for analytics that had previously been out-sourced. Additional partnerships are being developed with other Idaho companies and several new jobs are being created as a result of these public-private partnerships.

The Office for Research and Economic Development (ORED) has offered a variety of workshops and seminars to build faculty participation in both generating grant proposals that seek large funding levels. In addition, ORED has fostered several collaborative interdisciplinary team building exercises that have already led to a large, first "ensemble science" grant from the National Science Foundation. Several more proposals are under development. Furthermore, ORED is reinvesting a significant amount of funds obtained through existing grants (indirect cost recovery) and building additional interdisciplinary team efforts.

Idaho State University has engaged in many high level discussion with the Idaho National Laboratory (INL) and now has multiple efforts underway to enhance its educational programs to better meet the workforce needs of the Idaho National Laboratory; identifying and pursuing new collaborative research projects across the two entities; re-inventing the core function of the Center for Advanced Energy Studies (CAES) and expanding CAES into regional collaborations; and developing new foci based on the intersection of the LINE 2.0 (Leadership in Nuclear Engineering) commission, the national priorities as set forth by the Department of Energy and the National Nuclear Security Agency, the INL, and ISU. The Idaho National Laboratory and the Idaho Center for Advanced Energy Studies contributed an IQ-station (Inexpensive Interactive Immersive Interface), which is a virtual reality tool by which researchers can interact with complex datasets in three dimensions. This brought images fully into the 3D visual environment. By strategically aligning its research efforts with state and national targets, ISU will achieve a much higher success rate moving forward.

Idaho State University has successfully overcome several technical barriers that have impeded the production of an important medical isotope ( $^{67}\text{Cu}$ ) that may lead to new, improved treatments in several human cancers. By partnering with an Idaho company (International Isotope, Inc.) for distribution and by identifying four customers (Harvard Medical School, City of Hope Hospital, Fred Hutchinson Cancer Research Center, and Southwestern Medical Center), ISU is developing further partnerships that will lead to the development of new cancer treatments.

There is a powerful commitment to moving research from "bench to market" in innovative ways that bolster economic development in the state, nation, and globe. Idaho State University is contributing technologies that will lead to innovations in nano-manufacturing, detection of mechanical stress in

materials subjected to harsh environments, and the development of new materials capable of producing far more power for longer periods of time than any existing battery technology. These technologies, as they move from the laboratory to the market place, serve as an engine for economic development in Idaho.

The College of Science and Engineering (CoSE) has historically and continues to be extensively engaged in the community, region and nation, with plans to enhance community and regional relationships in the coming years as part of their strategic initiative. Examples of active formal collaborations include joint ventures with the following groups: International Isotopes of Idaho Falls, the Idaho National Laboratory, the Pacific Northwest National Laboratory, The Sandia National Laboratory, The Thomas Jefferson National Accelerator Facility, The Lawrence Berkeley National Laboratory, The Lawrence Livermore National Laboratory, The Battelle Energy Alliance, RadiaBeam Technologies, Niowave Inc., Kirkland Air Force Base/ Air Force Research Laboratory, L-3 Applied Technologies – Pulsed Power Systems, AREVA Inc., The Idaho Department of Justice, The City of Pocatello, Northwind Inc., The S.M. Stoller Corporation, The Idaho Department of Environmental Quality, and the Novatech Professional Corporation to name just a few. The College of Science and Engineering also participates in a myriad of informal but reoccurring partnerships such as our annual sponsorship of the Math Counts Competition, and the countless science demonstrations at local schools.

The Idaho Accelerator Center is a collaborative effort between the Idaho National Laboratory, ISU, and the DOE (Department of Energy) and allows the placement of DOE owned equipment at ISU. The MOU provides for a relationship under which the Idaho Accelerator Center houses the DOE owned equipment, but uses ISU facilities and personnel for operation, maintenance and health and safety guidance. A significant advantage of this agreement is easy access to this equipment and university owned equipment by universities, government agencies, and the private sector in a unique research environment. This environment centralizes equipment in a convenient location fostering inexpensive research and development and rapid testing for integrated demonstration development and transfer of technology. Idaho State University has strategically repositioned the IAC in the past year with an emphasis on becoming a DOE national user facility, increasing the infrastructure in pulsed power applications for both imaging purposes and testing of national stockpiles of nuclear materials via an expanded network with other DOE national laboratories.

Working with the Idaho Department of Commerce, faculty in several units, Boeing Insitu, and Advanced Aviation Solutions, ISU is advancing towards a broad partnership with the private sector around emergent opportunities in unmanned aerial vehicles. Idaho State University is supplying research expertise in spectral, hyperspectral, GIS imaging, and advanced visualization analysis for this team. Additionally, Boeing Insitu has been engaged in discussions about alternative power devices for UAV's that ISU is developing.

Boise Center Aerospace Laboratory (BCAL) was established in 2004 at Idaho State University with a grant from the National Oceanic and Atmospheric Administration (NOAA) and primarily focused on hyperspectral and LiDAR image processing. Since then, BCAL has expanded through funding from numerous federal and state agencies. BCAL's remote sensing research covers all spectral and spatial scales and integrates interdisciplinary research to promote sustainable environments.

The GIS (Geographic Information Systems) Training and Research Center (GIS TRc) is a University-wide facility administered by the Office of Research serving all colleges and departments at Idaho State

University as well as the GIS community of east Idaho. The GIS Center is receiving national attention as they have just made available a new web based application that allows fire fighters to predict and mitigate forest fire damage in real time. Indeed, it was awarded a prestigious “Exemplary Systems in Government” in July of 2014 for this project entitled RECOVER: Rehabilitation Capability Convergence for Ecosystem Recovery.

Idaho State University is a member of the CORE, in Meridian; an Idaho business coalition for innovation in health care, research, and technology. It is dedicated to creating core competencies in health care and medical technology. The CORE’s Mission is to promote the fusion of health sciences, research and technology to drive innovation and sustainable economic growth. The CORE is focused on fostering a vibrant ecosystem where entrepreneurs, educators, researchers and professionals will collaborate, create, and showcase technology assets. This diverse group of partners will deliver long-term and lasting benefits to the community by sustaining and creating new jobs that cannot be outsourced. In addition to ISU, the CORE includes: Boise State University, University of Idaho, AceCo, Ada County Commissioners, Bank of the Cascades, Blue Cross of Idaho, CenturyLink, City of Meridian, Dave Sanna - RBC Wealth Management, Eagle Road Professional Center, Gardner Company, Hawley Troxell, Idaho Council of Governments, Idaho Global Entrepreneurial Mission, Idaho Technology Council, Idaho Urologic Institute, Jay Lugo, Johnson Brothers Hospitality, Matt Joyce, MD PA, West Ada School District, MWI Veterinary Supply, Saint Alphonsus Regional Medical Center, St. Luke's Regional Medical Center, Washington Trust Bank, West Valley Medical Center, West Vet Animal Emergency & Specialty Center, and Zona Health.

The Idaho Museum of Natural History embraces relationships with The Smithsonian Institution, the Burke Museum, the Canadian Museum of Civilization, and through partnerships with the Port Townsend Marine Science Center and the Sitka Sound Science Center. The museum possesses the finest image capture and processing capabilities for 3-D imaging of natural history specimens. This project is on the forefront of national efforts at NSF for the democratization of science and will lead to unprecedented access for K-20 education.

The College of Arts and Letters collaborates with its Deans’ Advisory Board which is a group of alumni and friends of the College of Arts & Letters who volunteer their time to assist the Dean and faculty in their efforts to expand the College and make programs more attractive to prospective students. The college has a collection of dedicated volunteers on the board that have helped in the development of the college. Correlates of this group’s efforts can be found in each of the colleges/divisions at ISU.

The mission of the Idaho State University Alumni Association is to promote the welfare and to advance the objectives of Idaho State University through the sustained involvement of its alumni by providing philanthropic, intellectual, and social opportunities.

The College of Education boast valuable partnerships with local and state public school districts where students are able to complete student teaching internships. Through STEM (Science, Technology, Engineering and Mathematics) programs, the college has partnerships with the Association of Physics Teachers, as well as preceptors for the Master of Athletic Training.

The College of Business has active affiliations with the Small Business Development Center, Eastern Idaho Development Corporation, and Techhelp: Solutions for Manufacturing in Idaho. The Wells Fargo Speaker Series brings entrepreneurs to speak to business students regularly.

The College of Technology has affiliations with many industry partners, such as Western Aircraft, Williams-Northwest Pipeline, Chevron, Caterpillar, Western States Equipment, and the Newmont Mining Company which provide students scholarships. All applied associate degree and certificate programs maintain close ties with business, industry, and key workforce development constituents. Technical advisory committees consist of local and regional employers who provide valuable input to ensure College of Technology curriculum remains relevant to industry needs.

As is evidenced by the examples above, each college and division within ISU has valuable connections with a variety of agencies both public and private. These mutually beneficial partnerships allow students and community members to experience current technology and workplace practices prior to their first employment. Additionally, it is through the support and collaboration of many agencies that ISU is able to garner valuable data and facilities for research in a variety of scholarly pursuits. Idaho State University's current repertoire of collaborations appears appropriate to meet the needs of the University, though it is recommended that ISU continue to engage both local and national partnerships to secure ISU's future growth.

Indicator 4.2.1 is an indicator in ISU's Strategic Plan supporting Goal 4: Community Engagement and Impact, with a FY2014 benchmark that collaborative agreements, and contracts will increase by 5% over the next five years. Idaho State University will undergo campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan.

***Indicator 4.2.2: Examples of activities/events that meet the local and regional needs/interests***

The main venue at ISU is the L.E. and Thelma E. Stephens Performing Arts Center. This venue is unique in the Intermountain West and enriches the cultural life of southeastern Idaho.

Idaho State University offers a variety of events and activities which meet local and regional needs and interests. Whether one appreciates the arts, cultural events, sports, or science and engineering, community members have access to a number of opportunities which would otherwise not be available in this rural area. Below are some examples of the community programming offered at ISU:

**Cultural Events** – ISU's International Student Organizations are active on campus and in the community, sharing cultural practices such as food, song, dance, and storytelling. Thousands of community members have participated in various 'nights,' which annually bring the 'world' to Southeast Idaho. Some examples of such events are:

- African Night
- Chinese New Year
- Taste of France
- Nepalese Night
- Saudi Night

**Communiversality**, a unique 'town and gown' outreach is a collaboration between the community and the University. Spearheaded by the alumni association, Communiversality has two annual events where community members have an opportunity to learn more about the various programs and opportunities at ISU while engaged with faculty and students as well as various vendors and service providers in town. The two events are:

- Welcome Back Orange and Black (held in old town Pocatello each fall semester)
- Celebrate Idaho State, where 4,000 people attended in 2014 (held at the Student Union Building in Pocatello each spring semester)

**Stephens Performing Art Center (SPAC)** was recently noted as No. 4 on a list of "The 25 Most Amazing University Performing Arts Centers" by the national website [bestvalueschools.com](http://bestvalueschools.com). The SPAC hosts a variety of events throughout the year, some of the regular events are listed below. Thousands of people have attended performances, and are always impressed with the beauty of the facility. In Spring 2014 ISU performing arts was able to present 'James and the Giant Peach' to over 1,000 elementary school children in the area. Events such as these are a treasure to the community.

- Idaho State Civic Symphony
- Season of Note
- ISU Choral Programs
- ISU Performing Arts

**Science Education Outreach** – ISU is aware of the growing need for science education among the general population and offers several events to engage children as well as adults in science based activities. Examples of events are as follows:

- K-12 Science Olympics
- Idaho Science and Engineering Festival
- Idaho Museum of Natural History:
  - Classes for all ages – Science Trek, Summer Safari, Forays into the Field
  - IMNH 'mobile museum' brings natural history to schools in the area

**The Bioskills Learning Center** is a facility related to the *Treasure Valley Anatomy and Physiology Laboratories* at the ISU Meridian Health Science Center that has a dual role in both instruction and research for the University and a continuing educational role for practicing medical professionals. It provides a location for medical technology companies to demonstrate new and emerging technologies to physicians, surgeons and professors. University personnel can utilize the Labs to present research results to private companies with the objective of commercializing new products and methods in the local area to support economic development. Courses and workshops may be scheduled in the **Bioskills Learning Center** as desired, particularly for demonstrations to be transmitted to remote locations.

**New Knowledge Adventures** – Among ISU's offerings is a program specifically designed with the retiree in mind. The New Knowledge Adventures courses provide enrichment for the retired among us. Topics include everything from gardening, cooking, current social topics, hikes and other outdoor experiences, and more. With an influx of retired people moving to the state, this has become a popular choice.

**Sports and Performance Camps and Lessons** – ISU is proud to share the skills of its athletes, coaches, and performance artists. Throughout the year, specialty camps are held for children in the community to learn more about a sport or instrument of their choice. Idaho State University students majoring in music offer guitar, piano, voice, and other lessons to community members and their children. A few of the sports below hold annual 'camps' where children can spend several days working on new skills.

- Soccer
- Football

- Cheerleading/dance
- Volleyball

**Bengal Warrior Boot Camp (BWBC)** – In the past four years, BWBC previously only invited students (high school and pre-college) from the Ft. Hall Reservation's Summer Youth Program. This year, ISU's Native Americans United student organization and Native American Student Services in Central Academic Advising extended the invitation to any high school/pre-college Native American student in the state. BWBC includes two days of activities include: the ISU Alpine Challenge Tower, the Warrior Team Race Obstacle Course, along with a variety of presentations on leadership, careers, and college planning, with the primary goals:

- To discuss the need for effective leadership by and for Native Americans and how to take charge of one's own education
- To provide the opportunity for participants to get information relating to higher education
- To provide access to professionals presenting on a variety of career options and the ways to achieve success in a given profession or trade
- To provide moderately challenging physical activities to build individuals' self-esteem and foster leadership skills

**Tech Expo** – For 13 years, the College of Technology brings local and regional employers and educational programs together to showcase the limitless opportunities available to thousands of high school students, the ISU community, and residents of Southeast Idaho. This large, interactive event brings together ISU programs and majors with business and industry partners to emphasis career pathways available to ISU graduates.

**Alumni Outreach Events** – ISU Alumni Association's mission is to "promote the welfare and to advance the objectives of Idaho State University through the sustained involvement of its alumni by providing philanthropic, intellectual, and social opportunities. Examples of 2013-14 Outreach Events include:

- Legislative Reception – January 2014. There were 196 in attendance (143 attended in 2013), 43 were legislators (34 in 2013), and three Constitutional Officers (none in 2013).
- Boise Alumni Mixer – new event is January 2014. More than 73 guests, many of whom were first-time alumni guests and second generation alumni.
- Alumni Ski Tours – new events in 2014. More than 500 alumni visitors at three venues (Boise – Bogus Basin, Idaho Falls - Pomerelle, Pocatello – Pebble Creek).
- Pocatello Alumni Basketball game – new event in 2014. Partnership with ISU Athletics (Men's basketball game). More than 290 attended.
- Boise Alumni Hockey Game – new event in 2013. More than 40 alumni attended Steelheads hockey game in Boise.
- Alumni Basketball game – ISU vs. UI - in Boise - had 8 tables (of 8) sold for game to alumni plus 15-20 additional tickets purchased by alumni.
- Sports Hall of Fame- largest attendance (ever) with more than 200 guests for ceremony and luncheon
- Homecoming- largest attendance (ever) with 278 guests attending President's Alumni Recognition Dinner
- Summer outreach concert- Boise- Eaton & Sanders in Concert- 218 guests attended. Increase of 13 over previous year

- Alumni Golf Scramble- Jerome, Idaho- more than 80 golfers participated from Magic Valley area. Similar number to 2012.
- Golden & Silver Bengals- reception and ceremony resulted in 23 alumni returning to campus from 25 and SO year graduates. Previous year attendance 16.
- Annual Professional Achievement & Outstanding Student Awards programs- 23 award recipients annually receiving recognition for engagement and future outreach

**Online outreach:**

- Facebook- now have 2,250 likes; 526 average engaged users monthly; monthly total reach 2,709. Began FB contests for outreach and engagement with more being planned.
- Alumni website- completely re-done in 2013. Increased page views by 14.5%, unique page views by 11.67%, increased average time on page by 14.32%, increased entrances (to other locations within website) 21.55%. Decreased bounce rate by 3.44%.
- Alumni membership has increased by 69% with online purchase resulting in increased income YTD of \$5,370

**Other areas of outreach:**

- Direct mail campaign to 28,600 alumni of which 6,500 were pre-qualified for JSU Credit Union Alumni Affinity MasterCard. Resulted in 208 new alumni accounts opened, 172 used with balance of \$963,326 and royalty accrued income of \$124,812. Former affinity credit card relationship had expired 2 + years previously.
- Expanded outreach with Liberty Mutual (Affinity Insurance partner) with 2 tailgate events in 2013 (none previously) October and November 2013. Did 3 additional FB posts and one email blast (24,000) for Quote for Scholarship campaign (to drive viewers to alumni website)
- Expanded role with Ad missions and Recruitment providing alumni incentive gifts for ISU Information Nights at all locations, ISU pins for alumni parents of future students in addition to expanded alumni board member participation at these events.
- Board and staff participation in Communiversities events- Welcome Back Orange & Black and Celebrate Idaho State-2,500 to 3,000 participants
- Hosted Holiday Open House @ Maguson Alumni House annually for area partners and alumni guests- averaging 50-60 guests
- Hosted Pocatello Chamber After Hours @ Homecoming ng annually for community and Alumni - attendance exceeds 200 guests

While Indicator 4.2.2 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating community engagement and ISU's ability to provide services that support the local needs. This indicator further supports Objective 4.2 Community engagement. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

***Indicator 4.2.3: Number of clinic participants who are served***

Idaho State University has a robust slate of health care clinics which provide low cost evaluation and treatment to the community as well as students, faculty, and staff. In 2011-12, 54,234 visits were logged in 12 clinical settings reported (DHS 2012 Annual Report) between the ISU campus and the Meridian Health Science Center. Clinical services at ISU are often provided at very low cost to serve the community.

Health care is expensive, and many who utilize the ISU clinics are those who have an annual income which precludes services such as Medicaid, but are not able to afford health care out of pocket. Some examples of clinical services and specialties are noted below:

- Audiology Clinic (public) – boasting the only Cochlear Implant Clinic in Southeastern Idaho, community members must drive to Boise or Salt Lake City for comparable services.
- VA Hearing Services Clinic
- Dental Clinics: dental hygiene, family dentistry (Meridian and Pocatello)
- Medical Clinics: Pocatello Family Practice, Student Health Center (Idaho Falls and Pocatello)
- Mental Health Clinics:
  - Center for New Directions, counseling for those community members seeking new careers or retraining
  - Counseling and Testing – providing services to students and community members
  - ISU Counseling Clinics (Meridian and Pocatello)
  - Psychology Clinic
- Physical and Occupational Therapy Clinics
- Speech Language Pathology Clinics (Meridian and Pocatello)
- Wellness Center – offering nutritional and fitness assessments

While Indicator 4.2.3 is not a specific indicator in ISU's Strategic Plan, it aligns closely to support Goal 3: Leadership in the Health Sciences, Objective 3.2, as well as fits within the Division of Health Science's Strategic Plan under Goal 1: To provide high-quality programs that are efficient, cost effective, and student oriented; under Objective 1.3: Student Oriented. It was also determined that it was an important indicator for demonstrating the University's commitment to outreach and serving the community. This indicator further supports Objective 4.1 Economic Impact. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

#### ***Indicator 4.2.4: Examples of continuing education and professional development***

Continuing education (CE) and continuing professional development (CPD) provision and hosting is an integral example of leadership provided in the Health Sciences to Idaho and beyond. Continuing education and continuing professional development are lifetime commitments to health professionals and this is a value ISU instills strongly in its graduates. It benefits not only the provider of the education, but the audience and the community who enjoy the benefits of health professionals who are up to date in their education, providing medical care at the highest level and working at the top of their license level. Live CE is a networking opportunity and offers the chance to serve alumni of ISU. The University offers Simulation Centers in Pocatello and Meridian that serve the public through simulation learning continuing education activities. Additional examples include Pharmacy continuing professional development that is accredited by Accreditation Council for Pharmacy Education (ACPE) and continuing medical education required by physician assistants is a new DHS offering, with room for expansion and growth. The Treasure Valley Anatomy and Physiology Laboratories will offer contemporary state-of-the-art educational offerings in skill labs. Current initiatives are in place to develop an interprofessional focus for CPD. Examples of ISU hosted events include the Annual Geriatrics Symposium broadcast through distance learning technology to a broad audience.

Idaho State University is committed to excellence in education and offers a variety of professional development opportunities throughout the year. Continuing Education (CE) and Continuing Professional Development (CPD) provision and hosting is an integral example of leadership provided in the Health Sciences to Idaho and beyond. CE and CPD are lifetime commitments to health professionals and this is a value ISU instills strongly in its graduates. It benefits not only the provider of the education, but the audience and the community who enjoy the benefits of health professionals who are knowledgeable regarding best practices health care. The ISU [Division of Continuing Education](#) offers hundreds of non-credit professional development and personal enrichment courses covering every topic from Anatomy and Physiology to HIPAA Compliance or Medical Coding. Below are some examples of ISU continuing education and professional development:

- **The Intermountain Center for Educational Effectiveness** - Hosted in the ISU College of Education, the ICEE provides in-service teachers (those graduated, certified, and/or currently employed as teachers and administrators) in developing research-based methods and content for their own professional growth. The ICEE works closely with school districts, administrators, and even pre-service teachers (as undergraduates) in developing the standards required by the profession. Courses range from science, math and literacy to addressing the needs of students with disabilities in the classroom, and computer technology. Courses are offered at various locations around the state, as well as online.
- **The College of Nursing** is an accredited provider of Nursing Continuing Education by the Northwest Rural Nurse Residency. The Nursing office of professional development provides continuing education to a national audience of nurses. Quantitatively they have provided 49 courses for a total of 2095.5 nursing contact hours in the last year.
- **The Department of Counseling** offers continuing education for Mental Health and Counseling Issues for Counselors, Psychologists, Social Workers, Marriage and Family Therapists, and other Mental Health Professionals. Topics in the 2013-14 year ranged from eating disorders, clinical supervision, to ethics and decision making. These courses are affordable and contribute greatly to the professional community in Idaho.
- **Pharmacy Continuing Education** - As one of only two ACPE accredited providers in Idaho, ISU's ultimate aim is to provide a variety of courses that offer high quality, unbiased, and up-to-date educational experiences for pharmacists and other health care professionals. Currently the College offers CE programs in two formats; live presentations, and home correspondence. In 2013 these offerings consisted of 6540 hours, not counting Idaho State Board of Pharmacy approved CE.
- **Rocky Mountain Learning**, is a part of the Idaho State University Institute of Rural Health. RML utilizes 3D virtual worlds, webinars, and videoconferencing to provide quality distance education to a national audience. By combining multiple distance learning delivery methods and adapting them to meet client needs, RML is able to provide superior distance learning.
- **The Idaho Health Sciences Library (IHSL)** is a unit of the Eli M. Oboler Library. It was formed in 1992 in response to the Idaho State Board of Education's (the Board) designation of ISU as the state's lead institution for education in the health professions. The mission of the IHSL is "to advance education, research, and patient care by providing publication-based information to the university community and Idaho health care providers." In addition to the services it provides to the university community, the IHSL provides database searches, document delivery, interlibrary loan, and journal issue table of contents delivery to three local hospitals, as well as to Idaho unaffiliated health care professionals, on a cost recovery basis.

While Indicator 4.2.4 is not an indicator in ISU's Strategic Plan, it was determined that it was an important indicator for demonstrating ISU's commitment to professional development opportunities. This indicator further supports Objective 4.2 Community engagement. As ISU undergoes its campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan, the long-term inclusion of this metric will be incorporated into that discussion.

***Indicator 4.2.5: Examples of campus resource conservation efforts***

Idaho State University is committed to campus resource conservation efforts at the University, for the betterment of the University and the community. A unique aspect of the ISU recycling program is that it is a joint venture with Belmont Management, a Pocatello group that provides care to persons with developmental disabilities in facility and residential settings. Belmont residents with developmental disabilities, their supervisors and ISU student volunteers make about 65 pickup stops daily Monday through Friday at 50 different buildings on the ISU Pocatello campus. The residents of Belmont receive all revenues collected for the recyclable materials, about \$12,000 to \$15,000 annually, providing them with a revenue source.

As stewards of the state's resources, ISU is committed to taking care of the environment. Idaho State University has steadily implemented campus resource conservation to improve conditions at the University with an eye toward protecting valuable natural resources.

In 2008-09, ISU replaced 5 gasoline trucks with electric vehicles. This not only saved the University money in fuel, but also increased the air quality and reduced noise pollution.

In 2010, ISU stopped burning coal, known to be a major contributor to poor air quality.

In 2011, ISU entered into the production of biodiesel and increased the sustainability of the ISU recycling program. A unique aspect of the ISU recycling program is that it is a joint venture with Belmont Management, a Pocatello group that provides care to persons with developmental disabilities in facility and residential settings. Belmont residents with developmental disabilities, their supervisors and ISU student volunteers make about 65 pickup stops daily Monday through Friday at 50 different buildings on the ISU Pocatello campus. The residents of Belmont receive all revenues collected for the recyclable materials, about \$12,000 to \$15,000 annually, providing them with a revenue source. In the 2011-12 year, ISU recycled 208 tons of trash.

Idaho State University has installed 17 new water fountains which are compatible with refilling water bottles, thereby decreasing waste.

Idaho State University has engaged in 8 various lighting projects which have resulted in 338,039 kWh reduction in energy use. This translates into a decrease of \$19,872 per year in energy costs. High efficiency hand dryers are now being used and LED retrofit kits have been used to replace fluorescent bulbs.

Idaho State University has an ongoing commitment to stewardship of both natural and financial resources.

Indicator 4.2.5 is an indicator in ISU's Strategic Plan supporting Goal 4: Community Engagement and Impact, with a FY2014 benchmark that ISU's efforts to conserve campus resources will continue to be

developed. Idaho State University will undergo campus-wide strategic planning beginning January 2015 to update and develop a new institutional strategic plan.

*Standard 4.B Improvement*

4.B.1.	Results of core theme assessments and results of assessments of programs and services are: a) based on meaningful institutionally identified indicators of achievement; b) used for improvement by informing planning, decision making, and allocation of resources and capacity; and c) made available to appropriate constituencies in a timely manner.
4.B.2.	The institution uses the results of its assessment of student learning to inform academic and learning-support planning and practices that lead to enhancement of student learning achievements. Results of student learning assessments are made available to appropriate constituencies in a timely manner.

Based on ISU’s definition of mission fulfillment and informed by the results of the University’s analysis of accomplishment of its core theme objectives, the institution develops and publishes evidence-based evaluations regarding the extent to which it is fulfilling its mission. The University regularly monitors ISU’s internal and external environments to determine how and to what degree changing circumstances may impact its mission and its ability to fulfill that mission. It demonstrates that it is capable of adapting, when necessary, its mission, core themes, programs, and services to accommodate changing and emerging needs, trends, and influences to ensure enduring institutional relevancy, productivity, viability, and sustainability.

Based on the University’s Strategic Plan, Performance Measure Reports, Program Prioritization, and analysis conducted as part of the NWCCU accreditation standards, ISU has identified areas within the Core Themes to be addressed. They are discussed in further detail below. Idaho State University will continue working to improve upon the University’s four core themes, by reviewing and applying the feedback and recommendations received from the Northwest Commission on Colleges and Universities. The Office of Academic Affairs solicited feedback from the President, Vice President, and Deans in identifying areas of improvement, and the University looks forward to receiving feedback from the Northwest Commission on Colleges and Universities.

## **Core Theme One—Learning and Discovery**

Idaho State University continues its commitment to improving and expanding opportunities for learning and discovery as the University continues to expand the innovative Career Path Internship program (CPI). A program the University began in FY2011 with a modest budget of \$300,000 has grown to more than \$1.7 million. The CPI program provides students with the opportunity to obtain paid professional experience, both on and off campus, while offsetting the cost of earning a degree. The CPI program continues to be a university priority and the administration has developed opportunities for students and departments to increase professional assistance while offering students experiences to develop their skills and marketability. Not only will students participate in positions directly related to their career ambitions, they will take part in other activities to develop their critical thinking abilities and provide overall transferable skills.

Over a year ago, the Vice President for Research & Economic Development reorganized the office to reflect the three basic missions: 1) facilitation and implementation of attracting new funding (the Division for Research Development), 2) operating all aspects of research and scholarship holding to the highest standards of research integrity and to remain compliant with all federal and state requirements (the Division for Research Integrity), and 3) to optimize the transfer of research from bench to market (the Division for Innovation). There is solid leadership in each of these divisions, and they work cooperatively across this unit and other units on campus. In addition, the Office for Research & Economic Development has purchased and is implementing web-based protocols for proposal generation, submission, and subsequent grant management. The Office of Research & Economic Development will pilot the generation and submission protocols in late summer and implement in Fall, 2014. The grant management protocols will follow afterwards. Idaho State University faculty eagerly anticipate this implementation, as the current processes are paper-based and exceedingly cumbersome.

The Office for Research & Economic Development also worked with the University leadership to change the indirect cost distribution formula to become more strategic in its use of a limited resource. Together, these changes have allowed the Office of Research and Economic Development to develop new initiatives to drive culture change and to move the University toward a platform of increased research funding. With these funds, ISU has initiated a grant writing support program, initiated several internal grant opportunities with the express purpose of leading to extramural support, and initiated new programs to encourage ensemble science and large interdisciplinary funding opportunities.

The Office for Research & Economic Development is changing the culture and direction of the Research Park/RISE/Idaho Accelerator Center. The University has obtained excellent new leadership for Technology Operations for the Research Park, and with these changes, ISU is poised for a rapid turnaround, building on the rapid progress already made in a very short time. The Office of Research and Economic Development has primarily focused the RISE on one technology – the actinide dioxide crystal. It has two applications: one as a semiconductor that can be deployed in harsh environments and the other as a power generator of unparalleled performance. The RISE has secured a contract for \$4.1 million with the first year of funds on site (\$500,000) and another contract for an additional \$500,000. One more grant was secured in the third week of March, 2014 (for \$100,000 from ScanTech). There is one additional proposal pending for \$2.99 million with DARPA. The Office of Research and Economic Development is working with Lockheed-Martin, BEA, and Areva on commercialization aspects, but need a functional prototype (expected in late 2014). Altogether, there are 28 active prospects underway and would expect a minimum of 20% of these to be successful as a worst case scenario.

The Office of Research and Economic Development has made a bold move by moving the pelletron to the RISE and coupling it to a dual beam Focused Ion Beam microscope. This is being done to enable ISU to compete for a DOE national user facility that will bring both revenue and enormous visibility to the RISE and ISU. The University is partnering with the INL on this project and leveraging assets for mutual benefit. Additionally, the Idaho Accelerator Center has developed a strong 10 year vision based on pulsed power and plasma physics, two areas expected to grow significantly in funding levels over the next decade. The Office of Research and Economic Development has worked very hard to develop a spirit of camaraderie and collaboration at this facility. While more needs to be done, the response has been very good and a tremendous amount of progress has been made.

Activity Insight, by Digital Measures, was launched at Idaho State University during Summer 2013. The Activity Insight database grows as ISU grows. It currently has over 550 full time and visiting faculty members using this web-hosted service. Activity Insight's strength is that it allows faculty to enter data once, but use it many times. Over the course of the last year the ISU faculty have accessed Activity Insight over 35,000 times to perform a number of activities. Activity Insight allows each faculty member to easily enter or import from scholarly databases their publications. Faculty can create their curriculum vitae, annual performance evaluation or create a biographical sketch for an NIH or NSF grant application electronically. Another benefit of Activity Insight is that it makes the process of tenure and promotion more efficient. In addition to the standard type of data Activity Insight provides, faculty have used the publications data to write grants, and create an exhibit showing the writing activities of ISU faculty over the course of the last year. Administrators have also benefited from Activity Insight. Administrators can access the annual evaluation of each faculty member, the Faculty Workload information from one faculty member, or receive analysis regarding the entire department or college. Administrators can also run numerous ad hoc reports on any data variables entered into Activity Insight. In 2013-2014 there will be a report created using Activity Insight data to assist the tenure and promotion process, a report to assist with faculty workload analysis, and several other reports. In addition to these reports, the University is planning to push Activity Insight data automatically to department websites for faculty profiles. When implemented this feature will automatically update a faculty member's web profile when the data are entered into Activity Insight, for example, when a new publication is entered.

Idaho State University is dedicated to program review and assessment of course and program outcomes. While course and program review and assessment occur across campus at varying levels, there has been an increased effort in recent years to establish more uniformity and consistency in processes and procedures. The Deans' Council recently approved and supported the institutional plan and guidelines for program review. A key component of this framework requires that all academic and professional-technical certificate and degree programs have meaningful, assessable outcome measures, and all courses have measurable learning outcomes. All academic and professional-technical certificate and degree programs, without specialized accreditation, must be evaluated at least once every five years, based on the timeline of the accrediting body, with the requirement that for specialized accreditation that is not outcomes based, outcome measures must be developed for the program, and provided to the Office of Academic Affairs as part of the institutional program review requirements. In addition, the Office of Academic Affairs has identified the need for formal policy establishing the framework for a review mechanism that is ongoing and cyclical. It is the intent of the Office of Academic Affairs that a draft policy will be presented to the faculty for their input and recommendations when they return in Fall 2014.

Idaho State University is committed to increasing degree production. It continues to partner with the West Ada School District, the largest school district in Idaho, to provide associate degree options to students concurrently enrolled in the Renaissance High School. In academic year 2013-2014, eighteen students from Renaissance High School graduated from ISU with an associate degree – doubled from the prior year. Half of these students earned honors or high honors recognition at the collegiate level. In addition, there is an increased focus at the college level regarding recruitment and retention. Each college is developing recruiting and retention plans. Additionally, ISU continues its focus on reforming remediation education in conjunction with the Board's 60% goal.

Learning and Discovery is at the core of the Library's mission. The University is continually evaluating its offerings and services through both generally recognized national surveys of library effectiveness as well as feedback from users. Through ISU's library liaison system, bibliographers interact on a regular basis with faculty to obtain feedback on what should be added to the collections. Idaho State University also has a University library committee of faculty who meet regularly with library administration to provide feedback on library services and collections. As a result of these varied inputs, the Library is consistently working to improve the physical facility, intellectual offerings, and the services provided to users. The University is currently involved in various efforts, which include physical enhancements such as a carpet and furniture replacement in public areas; restructuring of the budgets to be more sustainable; increasing the number and diversity of electronic resources; and better outreach to campus and community through instructional program and public events.

The College of Science & Engineering (CoSE) was created in 2010 to promote a culture of research and teaching excellence. As reflected in newly adopted college policies (promotion, tenure, sabbatical, workload, space), CoSE fosters a faculty that delivers quality and rigor to the classroom. Faculty are provided the time and workspace to develop active, well-funded research programs. The college provides small grants (\$2,000 each - \$20,000, with three RFPs each year- all funded by indirect returns) to support travel/conference/publication costs. Untenured professors are mentored by senior faculty. Most importantly, this research culture is leveraged to enhance student education and training. Research labs become teaching labs for graduate and upper-class students, generating large numbers of thesis and dissertations. Hundreds of undergraduates are paid to join research teams, gaining hands-on experience that translates directly to the Idaho workforce. Faculty remain current in their discipline and deliver that expertise to students through lectures and innovative lab exercises. With significant faculty input, CoSE administrators continually evaluate the Science & Engineering curriculum. Outcomes are written and posted for every college course and degree program, and student learning is assessed and used to modify those outcomes. Program reviews are conducted by external agencies (e.g. ABET for Engineering and certain Applied Science Programs) or internally (for math and science degrees). To improve student retention and graduate rates, CoSE participates fully in the Complete College Idaho initiative, leading us to (1) create and post 4-year degree plans for all baccalaureate degrees, (2) plan significant revisions to the remedial and general education math curriculum, and (3) implement by Fall 2015 semester an "intrusive" advising plan for CoSE majors. Finally, Recruitment is a priority in CoSE's 5-year Strategic Plan such that the College is devoting new resources toward attracting even more high-quality students from Idaho, other states, and abroad.

## **Core Theme Two—Access and Opportunity**

One central aspect for ISU's focus on increasing student completion data involves student retention. To provide greater access and opportunity ISU is focused on the following key areas:

- Expansion of the Bengal Bridget Program for first generation, limited income, at risk students. Idaho State University's Bengal Bridget Program has shown great success in retaining these students through the following semesters.
- Increasing financial support for the Career Path Internship Program.
- While ISU's Early College Program is likely nearing capacity, there is an increased focus on maintaining the high level of performance in the Early College Program, and it are implementing measures to make it even easier for Early College students to matriculate to ISU programs upon high school graduation.
- Expansion of the number of students and credentials in ISU's Honors Program. In the 2014-2015 academic year, ISU doubled the size of the incoming freshman in this program.
- Continue to operationalize full capability of ISU's Degree-Audit System that provides faculty and students with real-time, individual query access to student progress on General Education requirements and degree plans.

Idaho State University will continue to work toward improving successful integration of international students. To that end, beginning Fall 2014 semester, ISU will begin its Intensive English Institute (IEI) that will provide English language instruction for international students who wish to study in a comprehensive, academically rigorous program. The focus of the IEI will be on English for Academic Purposes (EAP); it is expected that most of the students who enroll at the IEI will be preparing for further study in academic or technical programs at North American universities.

Idaho State University has continued to strengthen and invest in its commitment to the Complete College Idaho (CCI) plan and the key strategies it contains. One such key strategy within the CCI plan is the transformation of remediation. Our mathematics and English departments have both increasingly implemented models, which replace remedial courses with co-requisite credit-bearing courses. Thus, students who test into remedial math and English now have the ability to enroll in courses where they receive college credit and "just in time" support to help ensure retention and continued success. ISU has further actively participated in the Idaho College Readiness Policy work group meetings with participants from across the state. This working group includes Idaho educators and administrators from secondary and post-secondary educational institutions. A draft College Readiness Framework/Policy is in the final stages of development and will be submitted to the Idaho State Board of Education for comment, revision, and approval during the fall semester.

Idaho State University will continue its efforts to revise and improve its policies and procedures. In particular, several student affairs policies related to the student experience and the student handbook are undergoing revisions. The Office of Academic Affairs has identified policies that need to be updated and modified and plans to work with faculty when they are back on campus in the fall. Other units within the University are also reviewing policies and procedures for which they have oversight. These reviews will take place within the framework and process overseen by the Office of General Counsel.

Idaho State University is undergoing the centralization of student enrollment management functions through the creation of a student enrollment management unit. This new unit will be overseen by an associate vice president for enrollment management and will report to the Provost and Vice President for

Academic Affairs. The centralization of undergraduate admissions and recruiting (including international admissions and recruiting), central academic advising, registrar, and financial aid within a single unit will provide more effective and streamlined processes related to student recruitment; admission; advising; financial aid and scholarships; international recruiting; admissions, and student services, and records management.

Beginning in Fall 2014, the Graduate school will implement the Comprehensive Recruitment Opportunity Plan (CROP) to improve recruitment, applicant completion, and an increase in both quality and quantity of applicants, as well as enrollees, to the Graduate School. The CROP is an open based forum for graduate program directors or program staff directly related to graduate program recruitment to attend sessions, workshops, training, and roundtables to discuss, review, learn, and present opportunities to grow their graduate programs by quality, quantity, or both. The mission of CROP is to provide graduate program directors with timely information, support and a forum to learn and grow in their recruitment tasks and better their ability to grow their programs in quantity/quality. The initiative will begin Fall 2014 and continue during the fall and spring semesters with a minimum of one monthly meeting with a designated topic to discuss and expound upon. Topics will include: Best Practices in Graduate Recruitment and Communication, Customer Service and Response times, Differentiating ISU Graduate Programs from other Universities, Communication Plans, Data Management and more. A Moodle group has already been designated to communicate with the graduate program directors in a more succinct fashion to help keep the information streamlined and maintain an open dialogue regarding the improvement of their recruitment and application processes. In addition, a [survey](#) will be disseminated to the graduate program directors to allow the Graduate School to help align individual program goals to the overall prioritizations of the Graduate School in the efforts of recruitment and applicants who are admitted and enroll.

### **Core Theme Three—Leadership in Health Sciences**

As the lead institution for programs in the health professions, ISU is dedicated to fulfilling its mission for providing quality health care training to Idaho students and meeting the health professions workforce needs in Idaho. The University officially broke ground in June 2014 on The L.S. and Aline W. Skaggs Treasure Valley Anatomy and Physiology Laboratories (TVAPL) at the ISU Meridian Health Science Center. This facility will be the first of its kind in Idaho, ensuring the highest level of health-science education for students while opening new doors to medical research. The TVAPL will include a cadaver laboratory with 12 gurney stations and virtual anatomy and physiology labs, and Bioskills learning center totaling 18,000 square feet. Through distance-learning technology and the Idaho Education Network, ISU will be able to provide anatomy and physiology presentations to high schools across the state. Lessons could include virtual tours of the human body and sessions in forensics, sports medicine, nutrition and healthy lifestyles. The facility will be open to hospitals, clinics, law enforcement and emergency services agencies for specialized training.

The TVAPL is an essential teaching tool for ISU students in other programs of study, too, including Pharmacy, Speech-language Pathology, Paramedic Science, and the Advanced General Practice Dental Residency (as well as the Idaho Dental Education Program if and when the program is moved to Meridian) and it will also will provide support for Advanced Nursing. In the future and in accordance with the SBOE 5-year Plan, the TVAPL is vital to the expansion of the Physical Therapy (D.P.T.) program to ISU Meridian Health Science Center in 2016 and Occupational Therapy in 2018 (M.O.T.) and Dental Hygiene (B.S.) anticipated to expand to SW Idaho in 2014 (program split of 18 students at the Pocatello campus and 12 students at Meridian as per Program Prioritization). This kind of training is significant in terms of providing health care professionals for the workforce, given the aging of the population that will increase the number of persons with chronic and complex conditions, and the aging of health practitioners statewide, e.g., physician assistants and nurse practitioners to help fill the gap in primary care providers in Idaho, and additional physical and occupational therapists to address shortages (25,000 PTs by the year 2020) and the reality of PT and OT professionals retiring in ever larger numbers over the next 10 to 15 years.

In fulfillment of its health care mission, ISU strives for a continued presence in all ISU's communities. The University continues to host annual health fairs, health screenings geared toward the underserved and underinsured adult populations, wellness workshops, immunization clinics, exercise programs, and tobacco cessation programs.

Idaho State University is providing continued attention to increasing enrollment and capacity in all Health Science programs. This requires a continued effort at expanding the ISU Division of Health Science's image, presence, and influence across the state. The recent Program Prioritization exercise within DHS resulted in several recommendations that are consistent with the strategic goal one of DHS to be high quality, cost effective, and student centered. The Baccalaureate degree in Nursing was reviewed by a nursing educator/consultant during Spring 2014. Curricular changes will move forward for institutional approval during the 2014-15 academic school year. The changes will streamline the baccalaureate completion program which has dropped enrollment due to its heavy credit hour requirement vis a vis comparable programs at other in-state institutions. The planned adjustments in the B.S.N. completion curriculum will facilitate the access to associate degree prepared RNs across the states as the program is online, except for one clinical rotation that can be completed in the community where the student lives with a qualified preceptor.

Program Prioritization also resulted in identifying the Medical Lab Science program as one with potential for expansion to additional campus sites (Idaho Falls). Expansion will require one additional staff position to facilitate and coordinate clinical placements and some equipment expansion and updating.

Idaho State University's Division of Health Science is working on incorporating more interprofessional education which is being driven by individual unit, specialized accreditation bodies and the current state of health care. Increased incorporation of interprofessional education has potential to provide efficiencies in teaching that open the door for more faculty to spend more time in scholarly endeavors.

The Division of Health Science (DHS), in AY2013-2014, conducted their first, in a series of on-going semi-annual faculty, staff and student surveys. Faculty and staff surveys are conducted online using Qualtrics at the end of each semester. At the end of the fall semester, questions are asked about the Division's effectiveness in meeting its strategic goals. At the end of the spring semester, faculty are questioned about their own effectiveness in meeting the strategic goals of DHS. Once the survey results are compiled, the Administrative Council and Executive Committee review the results and determine an action plan to address any issues. For example, faculty responses to the fall survey concerning collaborative clinical practice suggested this was an area that could be improved. The Division of Health Sciences interprofessional committee responded by developing additional interprofessional clinical activities for both faculty and students. During the Spring 2014 semester, an interprofessional component was added to the annual DHS Health Fair. Student Surveys are administered at the end of each semester. The surveys are sent out and compiled at the departmental level. Department chairs/program directors and faculty review the survey results and take appropriate action. For example, faculty in the Dental Hygiene program developed integrated faculty in-services to discuss clinical teaching strategies, based on student feedback at the end of the Fall 2013 semester.

Goal 2 of the Division of Health Sciences (DHS) strategic plan is to "create an environment conducive to inquiry." In 2011, Divisional leadership created an office, the Idaho Center of Health Research (ICHR), to invest in the faculty research enterprise across the Division's 19 academic programs. The ICHR provides assistance with pre-award and post-award activities as well as providing a liaison role to collaborators and identifying potential funding sources. This emphasis has resulted in significant increases in grant applications. For example, the ICHR has created linkages with the Mountain West Clinical and Translational Research Infrastructure Network (CTR-IN), a 7-state, NIH-funded consortium designed to enhance research opportunities and collaborations across the region. In the past year, 3 ISU health researcher teams have received over \$200,000 in pilot grant funding from the CTR-IN. Most of these projects involve students and interdepartmental or external collaborations.

There are several groups in DHS who have developed research foci to meet the goal of improving human health while addressing health disparities and improving care delivery. Since 1995, the Department of Family Medicine's Clinical Research Center has participated in many multi-center trials funded by both the National Institutes of Health (NIH) and industry. These trials have generated important data in the treatment of diabetes, high blood pressure, and high cholesterol. Papers from these trials have been published in prestigious medical journals like the *New England Journal of Medicine*, the *Journal of the American Medical Association*, and *The Lancet* among others. The School of Rehabilitation Sciences has several active researchers in audiology and speech pathology evaluating speech development in children while the College of Pharmacy has funded programs in drug discovery, pharmaceuticals, and infectious diseases therapeutics. The Department of Dietetics has garnered funding for work related to the

relationship between iron deficiency and cognition, and the importance of gut bacteria to health. This has culminated with a professor receiving a 2014 Fulbright Scholarship to further her work. The Institute of Rural Health has a 20-year history of continuous funding with variety of projects that address rural health care delivery including strategies to improve care for patients living with traumatic brain injuries and evaluations of the use of electronic health records in primary care among other important topics. Interdepartmental teams from DHS are working on research related to cardiovascular health and environmental influences of obesity.

Clinical placements are a challenging issue across the health professions. Volunteer supervisors in community settings become affiliate faculty with privileges as noted on the Idaho State University Affiliate Faculty Member information sheet available through the office of Academic Affairs such as: library, computer, recreation use, and parking.

In addition to the University privileges afforded affiliate faculty, DHS provides continuing professional education for its supervisors. Most health professions require documentation of continuing education as a prerequisite of licensure renewal. The Division of Health Sciences CE program provides convenient opportunities to its volunteer faculty to meet their CE requirement. For example, annually the College of Pharmacy runs seminars at multiple sites for clinical preceptors. The University is seeking [joint accreditation](#) for the professions of Medicine, Pharmacy, Nursing, and Dentistry. Such status will allow us to provide CEU's and CME's to preceptors who attend continuing education events.

The health care organizations with whom ISU has institutional affiliations will benefit from the development of its Anatomy and Physiology Laboratory and Bioskills facility. The University will open this facility to the employees of its institutional affiliates as a venue for their own CE programs. This opportunity will assist its affiliate organizations to update their own employees in an efficient and cost effective manner.

Idaho State University continues to expand clinical opportunities for students, and maintains this as one of the goals in the Division of Health Science Strategic Plan. In May 2013, in partnership with the ISU Foundation, the University opened Bengal Pharmacy: a full-service pharmacy designed to offer clinical experiences for students. The University is focused on providing greater clinical opportunities for students, and demonstrating its role as the leader in translational research in clinics. The University's leadership provides access to those in rural communities who would not have access to these services, and continues to support increased access.

## **Core Theme Four—Community Engagement and Impact**

Idaho State University is committed to providing access and serving all communities for which it has regional responsibilities, including Twin Falls, Meridian, Idaho Falls, and Pocatello. As a result of the 12-month data-driven Program Prioritization process, ISU has determined to expand access and narrow the focus the Meridian Health Science Center programs to only health-related programs. With regard to the Idaho Falls outreach center, ISU will work toward greater access to upper division undergraduate and graduate level programs; increase and expand partnerships to meet programmatic needs within that community. Idaho State University identified that the Twin Falls community was significantly being underserved in the area of upper division undergraduate and graduate education. Idaho State University identified the need to explore space and access issues as well as expansion of programs in all areas.

In addition, ISU will continue its support and presence in all ISU's communities in all health related areas; including, but not limited to: wellness workshops, immunization clinics, health screenings, exercise programs, tobacco cessation.

Research and scholarship at ISU is rooted in nuclear energy, clean energy and technologies, the environment, and human health. Through the Center for Advanced Energy Studies, ISU faculty engage in state of the art research that contributes to the nation's economic stability by developing technologies that ensure a stable and secure energy infrastructure. Idaho State University is advancing to further expand its research enterprise. The Office of Research and Economic Development has identified five goals, as follows.

1. To increase the diversity of the University funding portfolio and, in particular, to develop significant collaborations with the defense department,
2. To facilitate and incentivize faculty to obtain larger grants (from thousands to millions of dollars)
3. To develop innovative approaches to increase the number of "ensemble science" grants focusing ISU's efforts on larger grants that offer suites of solutions to pressing national and local needs
4. To increase the level of collaboration, both in terms of quality and volume, with the Idaho National Laboratory to enhance both organizations and the pursuit of ground-breaking science to advance the national agenda.
5. To significantly increase ISU's collaboration with the private sector, especially Idaho companies, to keep Idaho jobs growing and building the economy.

Substantial progress has been made on each of these five goals. The University has added several new federal funding sources to ISU's portfolio and, importantly, have established new and powerful connections with various defense agencies. With innovative research focused on developing novel semiconductors that can be deployed in harsh environments (extreme heat, extreme cold, high pressure, etc.), and a novel nanotechnology advancement that allows the generation of extraordinarily high amounts of power over a long time frame. These innovations have, in just the past few months, allowed ISU to initiate new relationships with the Office for Naval Research, an "unnamed government agency," NASA, Defense Advanced Research Projects Agency, and the Army.

As identified in Core Theme One, ISU continues its commitment to improving and expanding opportunities for learning and discovery as the University continues to expand the innovative Career Path Internship program (CPI). The CPI program provides both a benefit to the student and the community.

The Student Activities Board and the Student Union Board plan a variety of activities that appeal to and are attended by the greater community including movies, theatrical productions, speakers, comedy and musical performances throughout the academic year.

Each year, the LEAD Center facilitates student service in ISU's communities. During the 2013-14 academic year, at least 7,704 hours performed during 115 projects, unrelated to their academic major, requirements or a course, were donated to ISU's communities.

An important component of the College of Technology is its role in workforce training, focusing on short-term training for adults to upgrade skills to meet labor market demands. A qualified, high-skilled workforce is essential to economic development and growth. Professional-technical education is the delivery system that focuses on meeting the immediate needs of a skilled workforce through non-credit and credit bearing courses. From training workers already in the workplace to those seeking short-term certificates and associate degrees, this applied learning provides students with technical skills, knowledge and attitudes necessary for successful performance in a highly effective workplace. Courses range from a few weeks of online or evening instruction offered through Workforce Training to a three year associated degree offered for credit. The professional-technical delivery system at the College of Technology provides hands-on opportunities to gain high-demand skills in apprenticeship programs, health occupations, energy careers, advanced manufacturing, trades, technical fields, and the business & service sector. Short –term courses offered through Workforce Training in business, computer instruction, and professional development provide instruction for specific skill sets. Customized on-site training is available at the request of employers to fill the skills gaps in local industry. Workforce Training offers a training survey and gap analysis for businesses.

## **Mission Fulfillment, Adaptation, Sustainability**

### *Executive Summary of Eligibility Requirement 24*

#### ***Eligibility Requirement 24: Scale and Sustainability***

Idaho State University demonstrates that its operational scale is sufficient to fulfill its mission and achieve its core themes in the present and will be able to continue to do so in the foreseeable future.

*Standard 5.A. Mission Fulfillment*

5.A.1	The institution engages in regular, systematic, participatory, self-reflective, and evidence-based assessment of its accomplishments.
-------	---

Idaho State University has defined clear measures that demonstrate success in its four core themes: Learning and Discovery, Access and Opportunity, Leadership in the Health Professions, and Community Engagement and Impact. These are described throughout the accreditation report and are articulated in detail in the qualitative and quantitative indicators outlined under Standard 4. These indicators provide feedback to the University’s faculty, students, and staff at many levels and through diverse channels. At an institution-wide level, assessment is linked to a continual process of strategic planning and analysis about future directions and initiatives, as described under Standards 4.B. and 5.B. In addition to the indicators addressed in Standard 4.A., institution-wide assessments take place that provide both external and internal feedback to ISU leadership and the University as a whole.

Evaluation and assessment of institutional performance takes place both externally and internally. Idaho State University has the largest number of degree programs with specialized accreditation among the state institutions. Externally, professional and clinical programs at ISU undergo a rigorous assessment and review process through specialized program accreditation and program licensure and certification. Leadership at the program, department, and administrative level are engaged in and participate in this process. Idaho State University’s institutional accreditation through a regional accrediting body is a campus-wide comprehensive assessment that reviews institutional performance on a continued cyclical basis.

Internally, ISU undergoes annual strategic planning and performance reporting to the Board. Idaho State University invested significant resources into the Program Viability database and web application that will be used to support strategic and core theme planning, and budget decisions. The Program Viability data provides immediate, on-demand access of program performance and financial data to Deans and Chairs. For programs that do not undergo specialized accreditation, ISU engages in a five-year, comprehensive program review of all academic programs.

Student Affairs completed program reviews for all student affairs supervised services during the 2012-13 AY. These program reviews identified learning objectives and outcomes. Programs were evaluated using Council for the Advancement of Standards for Higher Education (CAS) and comparisons to ISU’s benchmarks. This information was used to inform the Program Prioritization process. In addition, each program has identified learning outcomes and established timetables for assessment. These are included in Appendix 25.

The Division of Student Affairs administered the Noel Levitz Student Satisfaction Survey in Spring 2013 and is currently evaluating the results of those data, and formulating follow-up action items.

The ISU Career Center began tracking graduates in November 2012 to determine details on their status after graduation. Information was gather through the use of an emailed survey using Qualtics. They survey was emailed out six months after graduation with a response rate of the Spring 2012 First Destination Survey at 34.8% (33% fully completing the survey), with 991 students having been sent the survey. The survey yielded valuable information and will continue to be administered in the coming years. Results of the survey can be found in Appendix 26.

In FY2011, Idaho State University began a comprehensive renovation and updating of its policies and procedures. A policy committee was established to develop a process and structure that would result in a centralized repository of updated and reformatted policies and procedures for the entire University community. All faculty, staff, and students have access up-to-date, single source for information, direction, and guidance on the operations and activities of the University through the Idaho State University Policies and Procedures (ISUPP) web interface. The ISUPP is organized according to major functional areas. With some exceptions, these functional areas reflect the sphere of responsibility of the President and/or his Vice Presidents. Accordingly, the President, Vice Presidents, and in certain cases, a designated position, are considered the “Responsible Executive” for their respective policies. The major functional areas currently defined are:

The Office of the President	Finance and Administration
Human Resources	Academic Affairs
Student Affairs	University Advancement
Research	Athletics
Public Safety & Parking	General Counsel & Compliance

A three-phase plan was developed for completing the ISUPP project. The three phases include migration, formatting, and updating. Each phase is described briefly below:

**Migration** – Involved moving existing policies from the Manual of Administration Policies and Procedures (MAPP) or the Faculty/Staff Handbook into the appropriate major functional area of the ISUPP, thus centralizing the policies in one location. Based upon subject matter, each Vice President or Responsible Executive validated the list and made suggestions relative to the sequence and/or grouping of policies. This phase is now complete

**Formatting** – This phase involves changing the migrated policies to reflect the official format to be used for all ISUPP. This step only includes formatting; it does not involve changes or revisions to content. The Formatting phase will require each responsible executive to assure that all of their policies are modified to reflect the ISUPP format. This phase is partially complete.

**Updating** – The updating phase requires each Responsible Executive to ensure all policies under their jurisdiction are reviewed and updated. This phase involves more effort and time than the first two phases. It is subject to an approval process that includes final sign-off by the Responsible Executive and the President. To ensure its policies are as complete and comprehensive as possible, each Responsible Executive is required to not only ensure existing policies are updated, but also to consider what policies or procedures may need to be added to the ISUPP. This phase is ongoing.

This was, and continues to be, a major undertaking. It requires effort and resource commitments from all involved. However, significant progress has been made. Each responsible Executive has designated an ISUPP contact person to work with the committee to complete the necessary tasks. As indicated earlier, all policies have been migrated and many have been formatted and updated. The first policy to be completed was Policy Development and Administration. The primary objective of this policy was to provide a uniform process and format for the development and implementation of all University policies.

It details the policy process and provides templates and guidelines on how each major functional area is to accomplish their task.

To date, the University has completed all three phases of the ISUPP project on 96 policies and procedures. In addition, 11 policies were removed from publication, one is currently in the 30-Day comment period, and another 18 are in various stages of development or draft.

The University knows and understands that clear, comprehensive, and up-to-date policies and procedures are essential to achieving excellence in the operation of any institution of higher education and make it easier for all to fulfill its responsibilities in a consistent manner that reflects the direction and mission of the institution. Idaho State University remains committed to this goal.

5.A.2	Based on its definition of mission fulfillment, the institution uses assessment results to make determinations of quality, effectiveness, and mission fulfillment and communicates its conclusions to appropriate constituencies and the public.
-------	--

Responses to Standards 4.A and 4.B demonstrate how specific indicators allow for meaningful assessment and feedback of activities across the University, demonstrating areas of excellence as well as areas of investment. The use of quantitative and qualitative assessment of core theme objectives and indicators are part of the regular strategic planning process that takes place across campus. As indicated in Standard 3.A., Board policy requires ISU's strategic plan be in alignment with the Board's statewide strategic plan, and that the plans be submitted annually in accordance with a schedule established by the Executive Director of the Board. Strategic plans are made available to the appropriate constituencies through the Board's [website](#), state of Idaho's Division of Financial Management's [website](#), as well as the institution's website.

Idaho State University has maintained an ongoing strategic planning process within the parameters of the Board requirements for several decades. The current strategic plan has been a rolling strategic plan, as required by the Board, and has undergone significant updates annually since 2010. The use of quantitative and qualitative data provides the tools to determine quality, effectiveness, and mission fulfillment. Idaho State University has provided increased focus on making assessment resources available to faculty and departments, assisting with communication that spans the various organizational units, and providing strategic direction setting for the institution as a whole. The Board mandated Program Prioritization process was demonstrative of inclusive engagement from staff to faculty to administrators, and across academic and non-academic units.

As part of a Board mandate, ISU undertook Program Prioritization of both academic and non-academic programs as an opportunity to comprehensively assess quality, effectiveness, and the alignment of the University's core themes with mission fulfillment.

Idaho State University's Office of Academic Affairs approached academic program prioritization with the goal of supporting Idaho State University's strategic initiatives, strategic plan, and institutional mission and core themes through appropriation of resources based on prioritization of programs. The intent of our process was to strengthen programs and enhance student opportunity.

The Office of Academic Affairs engaged in a twelve-month, data-driven analysis of all academic units and programs as outlined in its Program Prioritization process and timeline documentation. Our process utilized the Dickeson model, as directed by the Board in May 2013. The Office of Academic Affairs employed an evaluation and program scoring matrix based on the Dickeson criteria that was approved by the Faculty Senate, Council of Deans, and the Board. The Office of Institutional Research provided the project support for Program Prioritization in Academic Affairs, and additional resources were housed in Institutional Research to manage the considerable additional workload of building a database system (see Appendix 27 for details on the Program Viability System) that will be used on-going, beyond the Board mandate of Program Prioritization. Key process documents, including templates and surveys, used to collect the data are provided in Appendices 18: Definition & Instructions, Appendix 19: Score Sheet for Academic Programs, and 27: Program Viability Details.

Academic Affairs utilized a continuous feedback model for the evaluation of the Program Prioritization data and report process. This process began September 2, 2013, when Faculty Senate ranked the Dickeson Criteria and reported the results of their ranking to the Deans' Council on September 10, 2013 at which time Faculty Senate leadership and the Dean's Council finalized the Program Prioritization Evaluation Matrix, scoring mechanism, and weights. The evaluation matrix was approved by the State Board of Education at their regular October meeting. Program Prioritization has been a standing agenda item at the weekly Deans' Council meetings since August 2013.

Following the approval of the matrix, Academic Affairs created a report template to be completed by each program. All Academic Affairs program directors and chairs were asked to complete the Program Prioritization Template (template and instructions included as Appendix 18) and to define the key linkages between the University's mission and Core Themes, and using the Viability Report System for data. The unit/level of analysis generally took place at the college and programmatic level, with some programs further refining the level of analysis to the degree level. Some programs were combined into a single unit because of budgets and the challenges of separating budgets.

The analysis consisted of a three-tiered process as follows:

- (i) Program Chairs/Directors completed the program reports and the initial scoring.
- (ii) Deans evaluated the Chairs/Directors recommendations and then provided the second scoring. Included in the analysis, colleges and programs provided an action plan for every low-scoring program.
- (iii) The final review and analysis of the prior recommendations from the Chars/Directors and Deans as well as a review of the program-level data was conducted by the Provost, Vice Provost and Associate Vice Presidents during February and March 2014.

This then resulted in Preliminary Program Prioritization Recommendations that were delivered to the Council of Deans for the feedback and response. Academic Affairs aligned its budget process with Program Prioritization and presented its budget to the ISU Special Budget Consultation Committee in early April 2014. Academic Affairs asked all academic units to provide additional information, cost savings, and feedback on the Academic Affairs recommendations in late April; these were due back to Academic Affairs in June 2014.

Program Chairs/Directors completed the program reports and the initial scoring, then the Deans evaluated the Chairs/Directors recommendations and then provided the second scoring. Included in the analysis, colleges and programs provided an action plan for every low-scoring program. The final review and analysis of the prior recommendations from the Chairs/Directors and Deans as well as a review of the program-level data was conducted by the Provost, Vice Provost and Associate Vice Presidents during February and March 2014. This then resulted in Preliminary Program Prioritization Recommendations that were delivered to the Council of Deans for the feedback and response. Academic Affairs aligned its budget process with Program Prioritization and presented its budget to the ISU Special Budget Consultation Committee in early April 2014. Academic Affairs asked all academic units to provide additional information, cost savings, and feedback on the Academic Affairs recommendations in late April; these were due back to Academic Affairs in June 2014.

Idaho State University evaluated 270 academic programs. All programs were evaluated and none were held harmless. As part of the program review and analysis process, academic programs were combined into 177 individual program-level evaluations. This resulted in programs being divided into the following five quintiles: Q1) 36, Q2) 35, Q3) 35, Q4) 35, and Q5) 36. Results of which quintile a program was placed was determined based on the quantitative and qualitative assessment conducted by the colleges. The academic programs utilized a scoring matrix that included the following categories and weighting: Demand (30%), Quality (30%), Revenue and Cost (20%), and Impact & History (20%), which resulted in a score (for a total amount possible 100%). The descriptors for each of the categories in the matrix can be found in Appendix 18.

Academic Affairs also evaluated its non-academic programs, which included the Office of Institutional Research, Office of the Registrar, Library, Graduate School, Early College, Museum, Wellness Center, and the Student Success Center (University Honors Program, TRIO, University Tutoring, Disability Services, and Central Academic Advising). These units used the ISU Non-Academic Programs Analysis Template, and made recommendations for changes to Academic Affairs in February 2014. These recommendations have been analyzed and will be folded into the Academic Affairs implementation plan for the academic program recommendations.

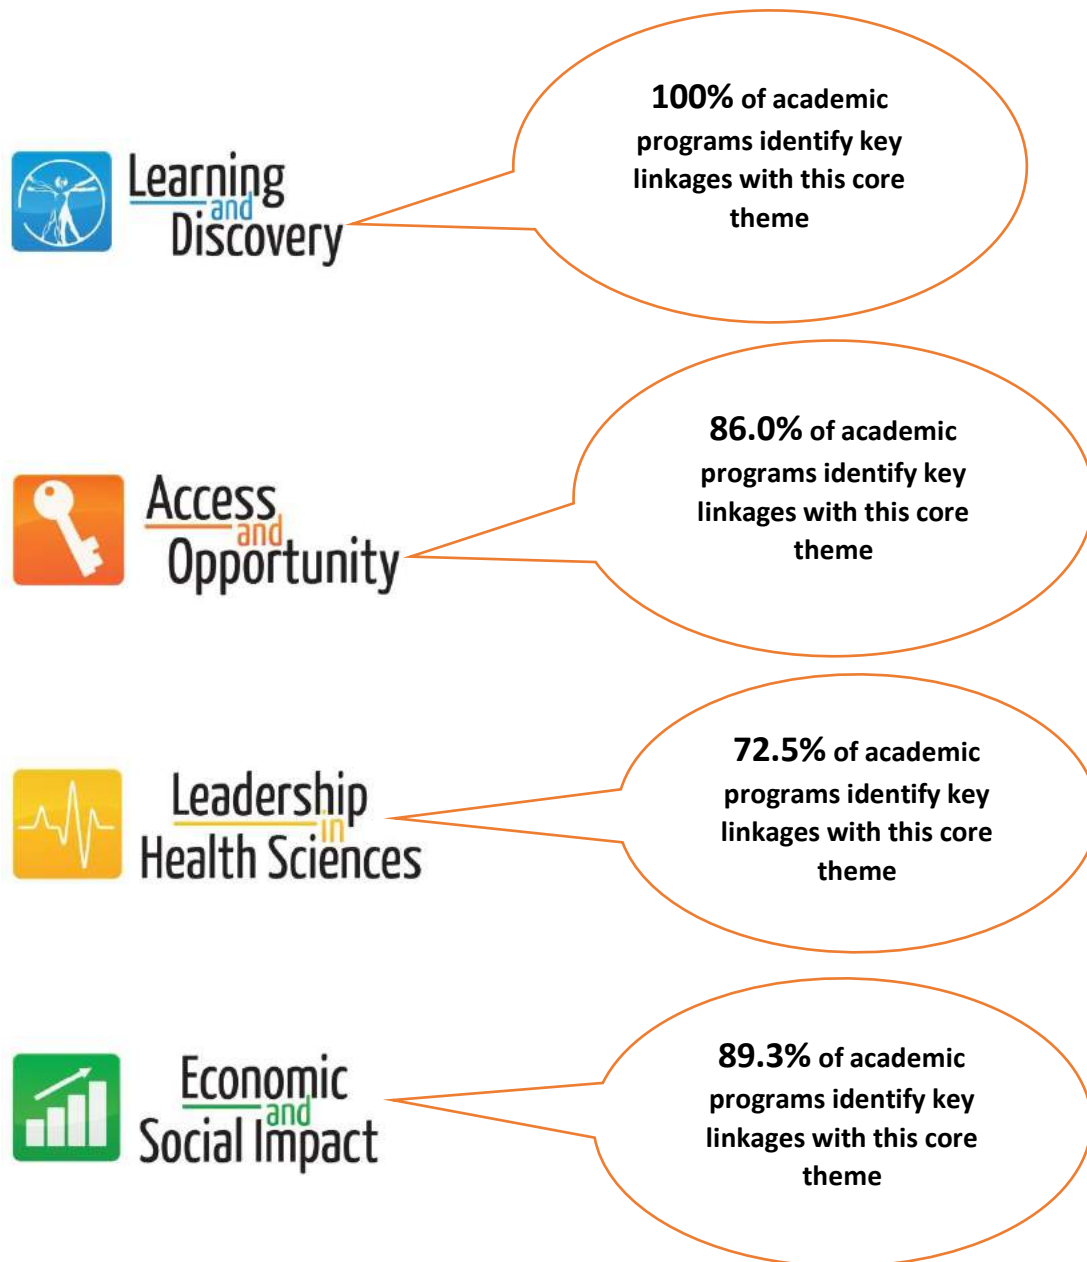

The final analysis and recommendations for academic programs included identification of 75 low quintile programs with required Action Plans (program consolidations, restructures, or eliminations), and four (4) Improvement Plans for low quintile programs. In addition, there were eight (8) expansions identified, and the creation of four (4) new programs – for more than 90 programmatic recommendations. Since the internal deadline of February 14, 2014, there have been an additional 29 program changes identified and requested, bringing the current total to 104 programmatic changes.

Timeline and next steps follow a three-phased approach to accomplish the results and recommendations of Program Prioritization. Items identified under Phase I may require minor approvals, which will be sought during the FY2015 year for implementation in the 2015-2016 catalog year. Phase II requires approval by multiple agencies (SBOE, NWCCU) and approvals will be sought during FY 2015 and 2016 for implementation during the 2016-2017 catalog year. Phase III requires approval by multiple agencies (SBOE, NWCCU) and approvals will be sought during FY 2016 and 2017 for implementation during the 2017-2018 catalog year. The Office of Academic Affairs generated the Program Actions Spreadsheet, based on the State Board of Education's Five Year Plan format, which will be used to implement the three-year, phased approach to Program Prioritization Action Plans (see Appendix 28).

The Office of Academic Affairs hired a consultant to assist with implementation of the Program Prioritization recommendations. This work began with the Deans' Retreat in July 2014. As part of that retreat, there were three areas of focus: Session I: Exploring Program Prioritization- ISU & WSU, Session II: Framing the Future, and Session III: Leading ISU Forward.

The results of the retreat have provided a framework moving forward with proposed changes at the campus, college, and program level. These efforts have formed the basis for Idaho State University's strategic planning process for its revised strategic plan, which will launch in January 2015. The Program Viability System will assist colleges and Academic Affairs in conducting on-going assessment of program productivity, demand, and highlight areas of need.

Figure 29: Academic Programs, Percent Identified as Aligned with Core Themes

Non-academic program prioritization, while being conducted simultaneously with the academic program prioritization, utilized a different methodology. For non-academic programs, the Program Prioritization process was comprised of three major steps: program analysis, program review, and program ranking. This approach was used for the Office of Finance and Administration, University Advancement, Athletics, the Office of Research and Economic Development, and Student Affairs. According to Dickeson, a program is defined as any activity or collection of activities that consumes resources (dollars, people, time, space, or equipment). Non-academic program directors identified each budget in his or her reporting area and the services, programs, and activities that make up each budget. In some cases, these activities themselves may be subdivided further into additional programs. Then, the program directors identified the major and significant activities that consume resources as advised by the Methodology for Quintiling Non-Academic Programs document (included as Appendix 29). Each program director also used their professional judgment in determining which activities were major and significant to identify programs. The program directors' identification and selection of programs was reviewed and approved at each level of management until receiving final approval by the appropriate vice president and, ultimately, the President.

#### Measurement Criteria Used for Analyzing, Reviewing, and Ranking Programs

For non-academic programs, in an assessment of the experiences of five other higher education institutions, we found that surveys were used to assess key non-academic Program Prioritization factors. The approach of one of these institutions, Seattle Central Community College, was specifically endorsed by Dickeson. The survey approach developed at ISU was uniquely adapted to the needs of ISU and addresses the following six major areas:

- Key Goals and Objectives
- Key Services Provided to Customers
- Key Processes
- Organization Review
- Budgeting and Planning
- Opportunities for Savings or Additional Investments

Based on the six major areas above, the following five criteria and their respective weights were developed by the University and used to analyze, review, and rank non-academic programs into quintiles:

1. Cost Effectiveness (budget vs. actual, productivity, performance) (25% weight)
2. Importance to the Institution (mission, vision, core themes, strategic plan, mandates) (20% weight)
3. Demand (internal, external) (20% weight)
4. Quality (input, outcomes, how well delivered, research, student retention) (20% weight)
5. Opportunity (collaboration, resource sharing, savings, improvements) (15% weight)

In addition, Student Affairs used the following criteria for ranking programs:

- Federal, state, local laws or statutes; SBOE Policy; NWCCU Mandates
- Services that directly contribute to recruitment, admission, retention, and graduation as measured by the number of students served

- Services that provide an essential life function or need, e.g., health, safety, shelter (Maslow’s Hierarchy), contiguous to campus and non-mobile students
- Services that help students pay for their education
- Services that enhance co-curricular learning and engagement beyond the classroom
- Services that eliminate barriers to enrollment
- Services that provide educational outreach to the greater Southeastern Idaho community
- CAS (Council on the Advancement of Standards for Higher Education) standards of best practice for student affairs (<http://www.cas.edu/standards>)

Regardless of the quintile score computed, if programs are required by federal or state mandates, then that program was held harmless from elimination and could not be ranked in quintile five. However, this did not preclude the program from going through the Program Prioritization analysis, review, and ranking process to attempt to identify opportunities for efficiency, effectiveness, and improving demand and quality. None of the University’s programs conducted within the authority of the non-academic vice presidents were excluded from this process.

All of the non-academic programs identified by ISU were assigned to one of the five quintiles. Programs were assigned a higher (or top) quintile ranking generally due to the following factors: 1) programs classified as essential to the University’s mission, 2) required by either NWCCU, federal, state, SBOE policy, or local mandates, 3) in high demand, 4) cost effective, or 5) non-financial factors (e.g. quality). For example, programs such as payroll processing, building maintenance, and IT security were considered essential to the University’s mission and in high demand, and, as a result, were ranked in the top quintile.

Programs were assigned a lower (or bottom) quintile ranking generally due to the following factors: 1) programs considered non-essential to the University’s mission, 2) not required by NWCCU, federal, state, or SBOE mandates, 3) in low demand, 4) not cost effective, or 5) responsibilities could be shifted to other programs to eliminate redundant programs, duplication of effort, or to achieve operational efficiencies. For example, the intracampus mail center was ranked in the bottom quintile as its costs exceeded its revenues and, therefore, the decision was made to merge the mail center with the Total Copy Center to achieve operational efficiencies and an immediate cost savings.

*Table 81: Number of Non-Academic Programs Reviewed and Placed In Quintiles*

<b>Vice Presidential Unit</b>	<b>Number of Programs</b>
Office of Finance and Administration	104
Athletics	5
University Advancement	30
Student Affairs	35
Research and Economic Development	5
Academic Affairs Non-Academic Programs	18
<b>Total Number of Programs Evaluated and Placed in Quintiles</b>	<b>197</b>

For each program identified in quintile five, the responsible vice presidential unit(s) created action plans including strategies to consolidate or eliminate programs and the quantified cost savings identified for each action. On March 14, 2014, Program Prioritization materials summarized by vice presidential unit

were presented in written form and through oral presentations by each of the university vice presidents to the President.

On April 1 and 2, 2014, the Special Budget Consultation Committee (SBCC) budget hearings were held where each vice president presented his/her fiscal year 2015 proposed program-prioritized budget including the results and savings identified from his/her Program Prioritization review.

ISU identified 16 non-academic programs for potential program prioritization actions. If fully implemented, these actions may result in cumulative savings of over \$760,000 for the University during the three fiscal years from 2015 through 2017. To date, Finance and Administration has identified over \$360,000 of potential cost savings expected to be sustainable for the foreseeable future. The Assistant Director of Financial Aid position in Idaho Falls has been eliminated and the person in that position has retired. The Idaho Falls reporting structure has been revised in that the financial aid staff reports directly to the Director of Student Services, and professional coverage is being provided by a staff member from Pocatello once per week.

In Information Technology, personnel position eliminations in three vacant ERP training positions have been completed. Electronic Repair and Services's telecommunications responsibilities have been shifted to NeTel and Electronic Repair and Services has been merged with the Total Copy Center.

The intracampus mail service and Total Copy Center responsibilities have been merged and are now under one manager.

As a result of Program Prioritization, Student Affairs is now more closely monitoring attendance at University sponsored community events for the public to determine the need and interest for these events. Student Affairs also has established revenue-generating goals for its quintile five programs.

In Finance and Administration, the Campus Cable infrastructure in IT is no longer being actively supported, which should result in annual maintenance cost savings. When the equipment is no longer operational, it is not expected to be replaced. A proposal was made in March to close down the Twin Falls video classrooms and computer lab that were expected to yield savings from materials and supplies. However, that proposal was not implemented because it was determined that Twin Falls is an essential market for the University's plans to increase student enrollment and plans are currently underway to expand our educational offerings in that location. In addition, IT may also discontinue its security awareness program, resulting in materials and supplies savings, but the decision was made to postpone this reduction at this time and will be further analyzed and reviewed.

At present, Purchasing Services and Facilities Services both employ a storekeeper. It was proposed in March to consider moving all University Stores operations to Facilities Services, resulting in savings through the reduction of one storekeeper position. This proposed action is contingent upon further analysis and review.

In March, a proposal was made to eliminate the energy and sustainability program in Facilities Services resulting in a potential materials and supplies savings. This proposed action is contingent upon further analysis and review.

The Diversity Resource Center is expected to be merged into the Gender Resource Center increasing operational efficiencies and resulting in savings in materials and supplies when the merger is fully implemented.

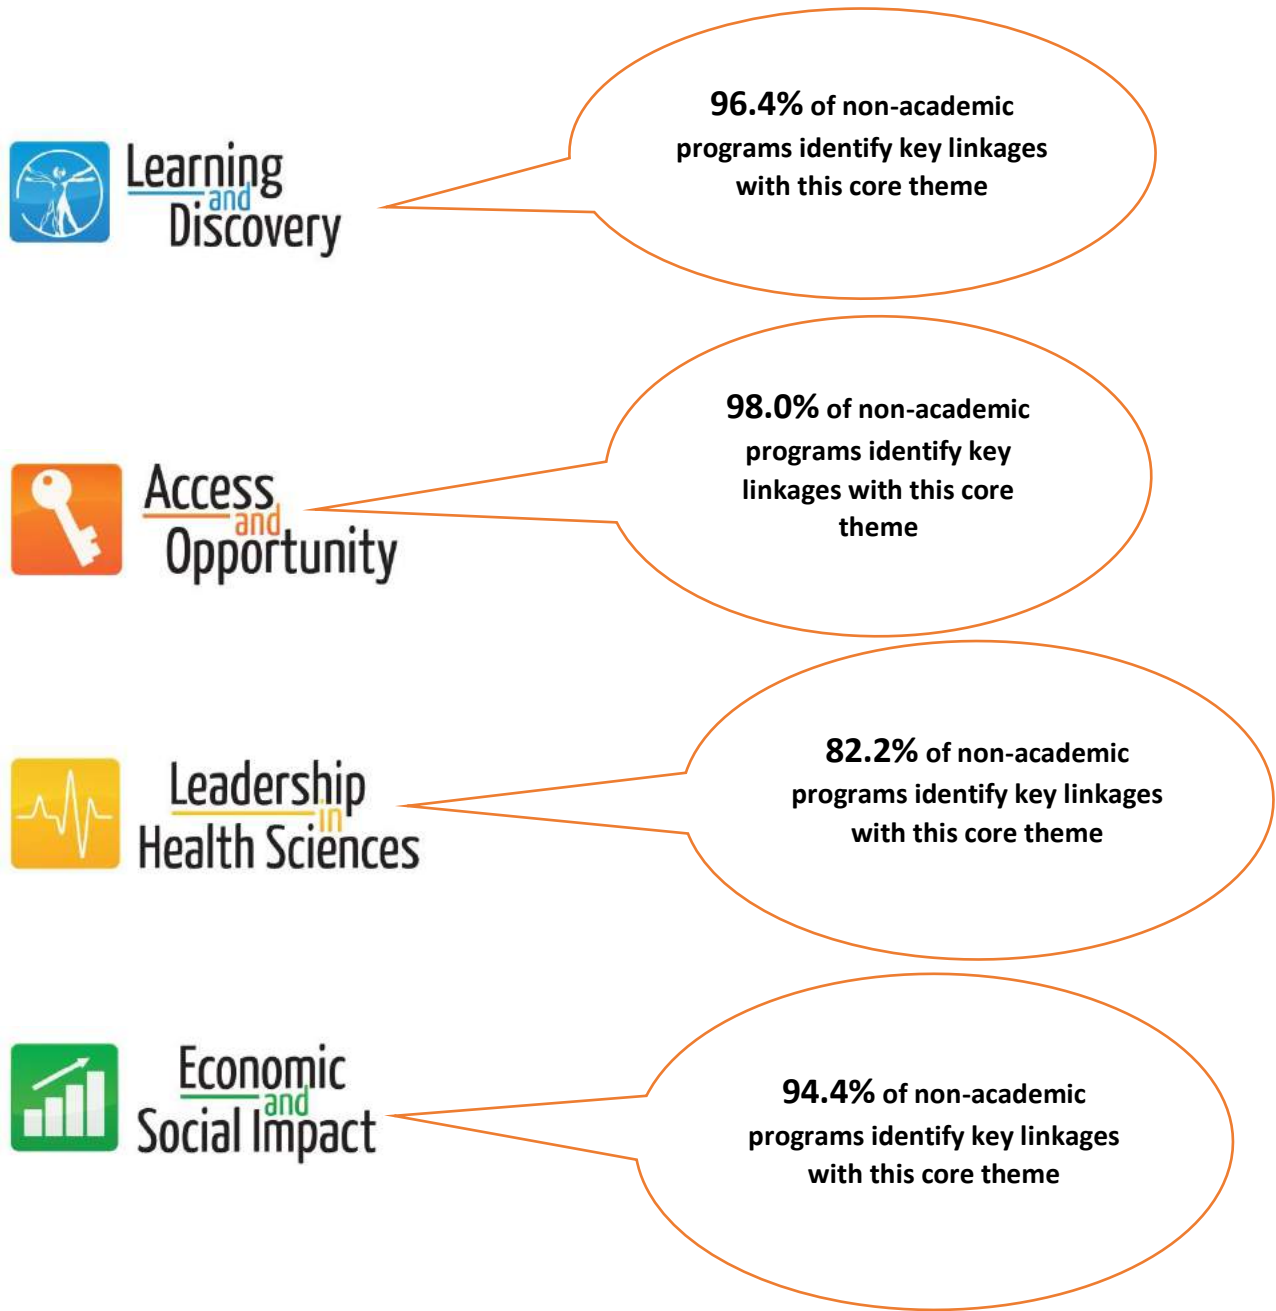

Student Affairs has indicated some of its quintile five programs (Bengal Newspaper, KISU-FM, the Bengal Dancers, and Summer Activities) were targeted for further analysis and review. Consultation with and input from newly elected ASISU student leaders is necessary before identifying the next steps in the review process.

In Finance and Administration, the actions implemented in Financial Aid will provide a clearer reporting structure and better management oversight of the federal Quality Assurance process, consolidation of the outreach efforts to local high schools, and bring the processing of consortium agreements fully into the Pocatello office. In addition, a formal plan is being developed in Information Technology for transitioning away from computer labs.

At a university-wide level, Program Prioritization can help ISU to manage and allocate its financial resources in ways that will best meet the needs of our students and community. It can provide data for better program planning and funding allocation decisions, integrate planning efforts, and reallocate resources from lower to higher priorities, thereby making institutional and State of Idaho missions operational. This process can create an environment of accountability at the departmental level, encouraging department heads to deliver process improvement and cost savings ideas from the bottom-up. It emphasizes the importance of using a range of metrics in measuring program performance and can support our efforts to commit funds to projects and programs with the highest potential return on investable dollars. Further, it reinforces the concept of fiscal discipline across the institution and the understanding that funding for additional resource requests will need to come from a reallocation of existing resources.

The University will continue to refine its institutional expectations for Program Prioritization in the years ahead, utilizing the tools and resources to integrate in and enhance current processes. Program Prioritization provides a means for a greater infusion of performance metrics into institutional budgeting decisions. Program Prioritization also provides a means to allow the institution to make its programs self-supporting and to adjust funding levels as necessary as demand increases or decreases for the programs. It was further noted that some units looked at Program Prioritization as a cost cutting exercise, while others viewed it strictly as a review to reallocate current programs without cost cutting. In summary, the Program Prioritization exercise provides a constructive and consistent way to assess the effectiveness, efficiency, and alignment with core themes and mission of programs across department and division boundaries. A continued use of Program Prioritization will enforce the need to continually assess the quality and necessity of University programs for the benefit of the State of Idaho and its citizens.

Figure 30: Non-Academic Programs, Percent Identified as Aligned with Core Themes

## *Standard 5.B Adaptation and Sustainability*

5.B.1	Within the context of its mission and characteristics, the institution evaluates regularly the adequacy of its resources, capacity, and effectiveness of operations to document its ongoing potential to fulfill its mission, accomplish its core theme objectives, and achieve the goals or intended outcomes of its programs and services, wherever offered and however delivered.
-------	--

As demonstrated in response to Standards 3.A., 3.B., 4.A., 4.B., and 5.A., the institution regularly evaluates the adequacy of its resources, capacity, and effectiveness of operations to document its ongoing potential to fulfill its mission and accomplish its core theme objectives. Despite negative outlooks for much of U.S. higher education, ISU has a healthy overall financial profile and has not had any layoffs, furloughs, or salary reductions. The University ensures it has sufficient resources to address change and continues to make strategic steps, supported by sound data and analysis, towards financial and academic excellence by fulfilling its mission through vigilant management of strategically aligned expenditures.

The year-end financial results reflect an \$11.3 million improvement in the University's net position despite pressures on all key revenue sources and weak economic conditions. Total assets increased by \$7.6 million to \$308.3 million, driven largely by a significant increase of \$11.6 million in cash and investments. As part of the ongoing efforts to reduce costs, ISU issued Series 2012 and Series 2013 refunding bonds to take advantage of record-low interest rates and save approximately \$3.5 million in interest expense over the next 10 years. Key financial ratios measuring the institution's overall financial health continued to reflect sound performance with all but one ratio significantly above industry benchmarks. The positive trend in these ratios demonstrate the University's ability to operate within available resources, manage its debt strategically, invest in assets that generate resources, and position itself to invest in mission-critical initiatives.

The University is also undergoing a resource allocation and prioritization process to provide a greater infusion of performance metrics into institutional budgeting decisions. It will provide data for better program planning and funding allocation decisions, integrate planning efforts, and reallocate resources from lower to higher priorities, thereby making institutional mission operational. This initiative will help the University manage and allocate its financial resources in ways that will best meet the needs of its students and community.

Also of significance, in continued recognition of the dedicated work and contributions university team members have made toward achieving excellent financial performance, the institution was able to supplement a 2% employment compensation increase from the state of Idaho to achieve an average 4.5% merit/equity/retention based compensation increase for faculty and staff, the largest increase of any college or university in the state. At the same time, this increase allowed us to bring all employees to a compensation level at least 3% above the poverty line, reduce the pay gap between entry pay levels of classified staff and the pay grade mid-point for those jobs, and eliminate or reduce the number of pay inequity situations.

Idaho State University has demonstrated it is flexible enough to adapt to changing environments. An example of this flexibility and adaptability was the reform of general education to objectives and learning outcomes. This work took place ahead of work happening at the state-level that better positioned ISU to respond to the new Board policy.

5.B.2	The institution documents and evaluates regularly its cycle of planning, practices, resource allocation, application of institutional capacity, and assessment of results to ensure their adequacy, alignment, and effectiveness. It uses the results of its evaluation to make changes, as necessary, for improvement.
-------	---

Idaho State University has maintained an ongoing strategic planning process within the parameters of the Board requirements for several decades. The current strategic plan has been a rolling strategic plan, as required by the Board, and has undergone significant updates annually since 2010. The first series of updates included the addition of ISU's core themes, with yearly changes mandated by the Board based on their yearly review and changing priorities. In April 2012, after the Board approved ISU's revised mission and core themes in February 2012, Academic Affairs leadership in conjunction with the vice presidents, the deans, and Accreditation Steering Committee revised its strategic plan to align with the mission, core themes, and the Board's strategic plan. A timeline of this work appears in Table 20 above.

The University regularly and systematically collects data related to clearly defined indicators of achievement, analyzes those data, and formulates evidence-based evaluations of the achievement of core theme objectives. This analysis is intimately tied to strategic planning review and analysis which takes place on an annual basis in conjunction with regular review and input at the April and October Board meetings. As discussed in Standard 3.A. above, ISU demonstrates clearly defined procedures for evaluating the integration and significance of institutional planning, the allocation of resources, and the application of capacity in its activities for achieving the intended outcomes of its programs and services and for achieving its core theme objectives. Idaho State University disseminates assessment results to its constituencies and uses those results to effect improvement.

In conjunction with Strategic Planning, ISU's budget process is designed to allow extensive participation by all constituents. Collaboration is encouraged throughout the departments and college units, as well as University-wide, to build an effective understanding of college and unit goals, and the relationship between budget planning and prioritizing. Idaho State University works to ensure significant participation by faculty and staff within each of the academic units. The budget development schedule for FY2015 was also designed to be consistent with the program prioritization schedule (this information is included in the Appendix 17). Additionally, in line with the Program Prioritization initiative, it was determined budget adjustments would be based upon the following five criteria:

1. Cost Effectiveness (budget vs. actual, productivity, performance)
2. Importance to the Institution (mission, vision, core themes, strategic plan, mandates)
3. Demand (internal, external)
4. Quality (input, outcomes, how well delivered, research, student retention)
5. Opportunity (collaboration, resource sharing, savings, improvements)

The Office of Finance and Administration has developed a consistent process with consistent forms and timelines for budget planning that is applied across campus. As discussed in Standard 2.F.3, ISU has established a Special Budget Consultation Committee appointed by the Vice President for Finance and Administration that consists of three faculty members, two representatives from ISU's Staff Council, three student leaders from ASISU, a senior staff member from the Office of Academic Affairs, the Vice President

for Finance and Administration, and two university business officers, all supported by other staff from the Office of Finance and Administration. The Special Budget Consultation Committee hears presentations from all institutional units that outline the unit’s proposed budget for each of the required scenarios. Following these presentations and additional meetings, the committee considers how best to meet the University’s budget requirements for the fiscal year, and recommends a budget for each unit based on the presentations and other information provided. The budget recommendations of the Special Budget Consultation Committee are reviewed with the institution’s vice presidents and the President. Each component of the University’s budget is revised as necessary to reinforce and support ISU’s overall resources, goals, and strategies, in particular its primary mission of health sciences education.

Program prioritization provided the impetus for ISU to holistically re-evaluate its planning processes, resource allocation, application of institutional capacity, and assessment. Both academic and non-academic programs are now supported by a greater infusion of data analysis as part of the budget and resource allocation process. Of significance, as a result of Program Prioritization, ISU has the beginnings of a new strategic planning process. The results of this analysis identified areas of strength and areas of weakness. The analysis provided the depth and breadth of data to make meaningful decisions, as opposed to across the board cuts which tends to make all programs mediocre. One central aspect of this analysis tied to identification of core theme support and alignment at both the academic and non-academic programmatic levels.

5.B.3	The institution monitors its internal and external environments to identify current and emerging patterns, trends, and expectations. Through its governance system it uses those findings to assess its strategic position, define its future direction, and review and revise, as necessary, its mission, core themes, core theme objectives, goals or intended outcomes of its programs and services, and indicators of achievement.
-------	--

Idaho State University monitors its internal and external environments through a variety of mechanisms. The Board plays a key role in defining the future direction of the public colleges and universities in Idaho. One example of this effort is the Complete College Idaho Plan: A Plan for Growing Talent to Fuel Innovation and Economic Growth in the Gem State. The State Board has set an ambitious goal that 60% of Idahoans ages 25-34 will have a degree or certificate by 2020. The Board recognizes that Idaho must grow talent within the state to fuel innovation and economic competitiveness, and that increased education attainment improves the quality of life for Idahoans and drives a vibrant, diverse economy. A significant component of the plan requires that Idaho’s increased education attainment must be responsive to businesses that will employ the workforce of the future. The Board identified five key strategies to meet the 60% goal, and which institutions are required to report to the Board and align line item funding requests with.

Figure 31: Board's Complete College Idaho Key Strategies

<b>STRENGTHEN THE PIPELINE</b>	<ul style="list-style-type: none"> <li>• Ensure College and Career Readiness</li> <li>• Develop Intentional Advising Along the K-20 Continuum that Links Education with Careers</li> <li>• Support Accelerated High School to Postsecondary and Career Pathways</li> </ul>
--------------------------------	--

<b>TRANSFORM REMEDATION</b>	<ul style="list-style-type: none"> <li>• Clarify and Implement College and Career Readiness Education and Assessments</li> <li>• Develop a Statewide Model for Transformation of Remedial Placement and Support</li> <li>• Provide three options: Co-requisite model, Emporium model, or Accelerated model</li> </ul>
<b>STRUCTURE FOR SUCCESS</b>	<ul style="list-style-type: none"> <li>• Communicate Strong, Clear, and Guaranteed Statewide Articulation and Transfer Options</li> </ul>
<b>REWARD PROGRESS &amp; COMPLETION</b>	<ul style="list-style-type: none"> <li>• Establish Metrics and Accountability Tied to Institutional Mission</li> <li>• Recognize and Reward Performance</li> <li>• Redesign the State’s Current Offerings of Financial Support for Postsecondary Students</li> </ul>
<b>LEVERAGE PARTNERSHIPS</b>	<ul style="list-style-type: none"> <li>• Strengthen Collaborations Between Education and Business/Industry Partners</li> <li>• College Access Network</li> <li>• STEM Education</li> </ul>

Idaho State University’s system of leadership encompasses administration on both the university level and the division/college (local) levels. Administrators at each level are charged with planning, organizing, and managing their units, as well as assessing their unit’s achievements and effectiveness. At the university level, the president and vice presidents have the responsibility and accountability for planning, organizing, and assessing institutional achievements and effectiveness. The president meets weekly in consultation with the vice presidents and is also advised by members of the President’s Cabinet.

Another avenue in which the University manages internal and external environments is through the process of specialized accreditation. Many undergraduate and graduate programs maintain specialized professional accreditation. The Office of Institutional Research maintains the most up-to-date list of ISU programs with specialized accreditation. The following programs have received specialized accreditation by the following organizations:

**College of Arts and Letters**

- American Psychological Association (APA)
- Council on Social Work Education (CSWE)
- National Association of Schools of Music (NASM)
- National Association of Schools of Theatre (NAST)

**College of Business**

- Association to Advance Collegiate Schools of Business (AACSB)

**College of Education**

- Commission on Accreditation of Athletic Training Education (CAATE)
- National Council for Accreditation of Teacher Education (NCATE)

**Division of Health Sciences**

- Accreditation Council for Education in Nutrition and Dietetics (ACEND)

- Accreditation Council for Occupational Therapy Education (ACOTE)
- Accreditation Council for Pharmacy Education (ACPE)
- Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)
- American Speech-Language-Hearing Association (ASHA)
- Commission on Accreditation in Physical Therapy Education (CAPTE)
- Commission on Collegiate Nursing Education (CCNE)
- Commission on Dental Accreditation (CODA)
- Council for Accreditation of Counseling & Related Educational Programs (CACREP)
- Council on Education for Public Health (CEPH)
- Joint Review Committee on Education in Radiologic Technology (JRCERT)
- National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)
- National Council for Accreditation of Teacher Education (NCATE)

### **College of Science and Engineering**

- Accreditation Board for Engineering and Technology (ABET)

### **College of Technology**

- Accreditation Board for Engineering and Technology (ABET)
- Association of Technology, Management, and Applied Engineering (ATMAE)
- Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)
- Commission on Accreditation of Allied Health Education Programs (CAAHEP)
- Commission on Massage Therapy Accreditation (COMTA)
- National League for Nursing Accrediting Commission (NLNAC)

Another example of the way in which ISU manages and monitors its internal and external environments to identify current and emerging patterns, trends, and expectations is the work of ISU's Office of Marketing and Communications. Idaho State University has prepared an integrative marketing communications (IMC) plan, based on a mixed methods research approach including document analysis and constituent focus groups. The plan will streamline ISU's messaging and secure the University's brand positioning within the state and the region. Ultimately, the results will be seen in the University's bottom line in the form of increased enrollment, research grants, and private fundraising. The plan focuses on several target audiences, primarily prospective students and their parents. It also includes alumni, current students, community members, parents of current students, faculty and staff, and educators (high school and community college). The plan's objectives and strategies represent three-to-five year goals, with many resulting in an immediate return on investment. These goals include enhancing internal and external communications, solidifying the University's brand identity, expanding community relations and supporting institutional enrollment initiatives. Finally, the plan includes a reevaluation and redesign of institutional web sites with a focus on user access, consistency and responsive design. Ongoing data analysis will be conducted to help redefine and redirect, as needed, the University's marketing efforts.

The University has established several interdepartmental committees designed to increase collaboration and message consistency. The "key communicators" group, which meets monthly, includes

representatives from across the University and all four campuses. This group will be charged with implementing the IMC plan and messaging strategies.

In fulfilling the University's objective to revamp ISU's web presence, the Office of Marketing & Communications is evaluating web analytics to determine user interactions and search modes to create a baseline for redesign and possible reorganization of information architecture. The implementation of a new content management system and potential reorganization of architecture will serve as a foundation for ongoing, future content assessment. In addition, the implementation of a customer relationship management system will enable the University's marketing & communications and enrollment teams to develop a strategic recruitment communications plan. Initial, electronic steps in this plan will be assessed using Google Analytics to track conversion rates.

Idaho State is currently searching for a new web manager to lead the University's web efforts. This individual will be responsible for management of the central University website (isu.edu), including content production, information architecture, user experience, interactive/responsive design and analytics/testing. Based on the evaluation of the current web site's analytics, the web team will be responsible for proposing necessary architectural and design changes, with a focus on user accessibility and responsive design.

Internally, ISU's on-going program review efforts require that all academic and professional-technical certificate and degree programs, without specialized accreditation, must be evaluated at least once every five years. All academic and professional-technical certificate and degree programs, with specialized accreditation, must be reviewed on a timeline required by the accrediting body. If the specialized accreditation is not outcomes based, outcome measures must be developed for the program, and provided to the Office of Academic Affairs as part of the institutional program review requirements. Additionally, all academic and professional-technical certificate and degree programs must have meaningful, assessable outcome measures.

Longitudinal program data are available in the Program Viability web application managed by the Office of Institutional Research, as one component of program review. The following reports are currently available in the Program Viability web application:

- Delaware Instructional Courseload
- Majors by Fall Term
- Minors by Fall Term
- Degree Production
- Double Major Degrees
- Minors Awarded
- Class Information
- Financial Information
- Net Income
- Unduplicated Student Headcount by Subject
- Special Accreditations
- Fall to Fall Retention
- FY Student Credit Hour Production

- Georgetown Study Idaho Jobs
- Crosswalk CIP Codes
- Course List by CIP Code
- Faculty SCH Rank

The colleges/division have responsibility to determine how to conduct their program reviews; however, the program review must include a minimum of the following:

- Description of the process used to evaluate the program
- List of current outcome measures and how these were assessed
- Findings from the current assessment of the outcome measures
- Discussion of how program faculty will use the findings to improve the program, as well as recommendations from the dean regarding continuation/modification/expansion/ closure of the program
- Discussion of the findings from the last program evaluation and what actions were taken to address the findings, as well as the impact of changes made

Program prioritization provided the impetus for ISU to holistically re-evaluate its planning processes, resource allocation, application of institutional capacity, and assessment. This was both driven externally by the Board, but managed and guided internally through the many advisory councils that exist on campus, as referenced above in Standard 2.A. Governance. Both academic and non-academic programs are now supported by a greater infusion of data analysis as part of the budget and resource allocation process. Of significance, as a result of Program Prioritization, ISU has the beginnings of a new strategic planning process. The results of this analysis identified areas of strength and areas of weakness. The analysis provided the depth and breadth of data to make meaningful decisions, as opposed to across the board cuts which tends to make all programs mediocre. One central aspect of this analysis tied to identification of core theme support and alignment at both the academic and non-academic programmatic levels.

This was the first comprehensive review of all programs at the University that included all stakeholders. Program Prioritization was vetted by the Deans' Council, the faculty senate and the data was elaborated upon by department chairs in association with their faculty constituents in the process of writing reports. While ISU does not anticipate completing the Program Prioritization process on a yearly basis, the dashboard created for Program Prioritization will now have annual data for programs to utilize. Program Prioritization was an arduous task, but yielded valuable data for program planning and reallocation of resources.

#### *Academic Program Component of Prioritization Process*

##### *Goal:*

Support Idaho State University strategic initiatives, institutional mission, strategic plan and core themes through appropriation of resources based on prioritization of programs.

##### *Process and Rigor:*

The Office of Academic Affairs at Idaho State University has engaged in a twelve-month, data-driven analysis of all of its academic units and programs as outlined in its Program Prioritization

process and timeline documentation. Its process utilized the Dickeson Model, as directed by the Idaho State Board of Education (the Board) in May 2013. The Office of Academic Affairs employed an evaluation and program scoring matrix based on the Dickeson criteria that was approved by the Faculty Senate, Deans' Council, and the Board. The Office of Institutional Research provided the project support for Program Prioritization in Academic Affairs, and additional resources were housed in Institutional Research to manage the considerable additional workload.

Academic Affairs utilized a continuous feedback model for the evaluation of the Program Prioritization data and report process:

Faculty Senate ranked the Dickeson Criteria during the week of September 2, 2013, and reported the results of their ranking to the Deans' Council on September 10, 2013.

The deans met with faculty and constituents during August to prepare to rank the criteria. The deans ranked the Dickeson Criteria during an Academic Affairs Program Prioritization workshop on September 3, 2013.

Faculty Senate leadership and the Deans' Council finalized the Program Prioritization Evaluation Matrix, scoring mechanism, and weights on September 10, 2013. The evaluation matrix was approved by the Board at their regular October meeting. Program Prioritization has been a standing agenda item at the weekly Deans' Council meetings since August 2013.

Academic Affairs created a database system (the Viability Report System), utilizing staff in Institutional Research, to provide all of the program-level data needed for the evaluation matrix directly to program directors and chairs. The Viability Report System went live for log-in access in December 2013.

Following the approval of the matrix, Academic Affairs created a report template to be completed by each program. All Academic Affairs program directors and chairs were asked to complete the Program Prioritization Template (template and instructions included in Appendix 18) and to define the key linkages between the University's mission and Core Themes, and using the Viability Report System for data. This template was submitted to College Deans for analysis using a Score Sheet divided out by Department and Program (Score Sheet example included in Appendix 19). Deans were asked to enter a weighted average for all of the key areas (Demand – 30%, Quality – 30%, Revenue & Cost – 20%, and Impact & History – 20%) that resulted in a score (total amount possible was 100%).

Following the completion of the program reports, each program chair and/or director and dean scored the programs, and deans submitted the scoring sheets to Academic Affairs.

Colleges and programs provided an Action Plan for every low-scoring program.

Program reports, score sheets, and action plans were due to the Office of the Provost and Vice President for Academic Affairs on February 14, 2014.

The Provost, Vice Provost and Associate Vice Presidents reviewed and evaluated all of the reports, score sheets and recommendations during February and March 2014. A master quintiled list of all academic programs was created from the score sheets.

Academic Affairs aligned its budget process with Program Prioritization and presented its budget to the Special Budget Consultation Committee in early April 2014.

Academic Affairs presented its process and overview of its recommendations to the Vice Presidents, President Vailas, Faculty Senate, and the Deans' Council during March and April 2014.

Academic Affairs asked all academic units to provide additional information, cost savings, and feedback on the Academic Affairs recommendations in late April; these were due back to Academic Affairs in June 2014.

During June 2014, Academic Affairs compiled all of the additional information, feedback, and cost analyses and created a Program Actions Spreadsheet, based on the feedback from units, of all Program Prioritization recommendations.

*Results and Implementation:*

Idaho State University is on schedule with Program Prioritization. All programs have been analyzed using the viability indicators; all programs have been scored at the program and college/division level; programs have been quintiled; and programs have created action plans for every program in the fifth quintile. Program Prioritization recommendations have been collated, divided into three Phases based on approval timelines and catalog deadlines, and sent back to Colleges, Departments and Programs for cost analysis, program proposal development, and revision for final recommendations. All program proposals, cost analyses, and revisions were due to Academic Affairs on June 1, 2014 for preparation for submission to the Office of the State Board of Education.

Academic Affairs has generated the Program Actions Spreadsheet that will be used to implement the three-year, phased approach to Program Prioritization Action Plans. Academic Affairs hired a consultant to assist with implementation, beginning with the Deans' Retreat in July 2014.

*Non-academic Program Prioritization Process*

For the non-academic portion of campus a survey approach was used to assess key Program Prioritization factors. A questionnaire was developed uniquely adapted to the needs of ISU addressing the following six major areas:

- Key Goals and Objectives
- Key Services Provided to Customers
- Key Processes
- Organization Review
- Budgeting/Planning
- Opportunity for Savings or Additional Investments

Based on the six major areas above, the following five criteria and their respective weights were developed by the University and used to analyze, review, and rank non-academic programs into quintiles:

1. Cost Effectiveness (budget vs. actual, productivity, performance) (25% weight)
2. Importance to the Institution (mission, vision, core themes, strategic plan, mandates) (20% weight)

3. Demand (internal, external) (20% weight)
4. Quality (input, outcomes, how well delivered, research, student retention) (20% weight)
5. Opportunity (collaboration, resource sharing, savings, improvements) (15% weight)

The Program Prioritization process was comprised of three major steps – Program Analysis, Program Review, and Program Ranking.

1. Program Analysis – Each program director answered a series of questions addressing the six major areas and five measurement criteria for non-academic programs.
2. Program Review – Based on the questionnaire completed by program directors in step #1, each program director assigned a score to each program based on whether the program exceeds, meets, or does not achieve its measurement criteria. Each of the measurement criteria was weighted according to its relative importance to achieve a total weighted program score.
3. Program Ranking – Each program director used the weighted score(s) in step #2 above as a guide to rank and assign each of the programs to a quintile (1-5). The program directors' program rankings were reviewed and approved at each level of management until receiving final approval by the appropriate vice president. Results for each vice presidential unit were then reported to the President.

For each program identified in quintile five, the responsible vice presidential unit(s) created action plans including strategies to consolidate or eliminate programs and the quantified cost savings identified for each action. On March 14, 2014, Program Prioritization materials summarized by vice presidential unit were presented in written form and through oral presentations by all university vice presidents to the President.

On April 1 and 2, 2014, the Special Budget Consultation Committee (SBCC) budget hearings were held where each Vice President presented his/her fiscal year 2015 proposed program-prioritized budget, including the results and savings identified from his/her Program Prioritization review.

Vice presidents are currently taking steps to implement the action plans and recommendations identified by Program Prioritization.

## Conclusion

Idaho State University's unique mission as a research institution of learning and discovery, offering the full-range of postsecondary degree pathways and options, and committed to providing access to rural and underserved populations, stems from its long history of providing high-quality higher education access to its diverse communities.

Idaho State University's history began when the governor of Idaho created the Academy of Idaho in 1901. In 1947, another Idaho governor created Idaho State College, a four-year institution. The college became a university in 1963, amid pressure from Pocatello's Chamber of Commerce, the college's student body leadership, and state legislators committed to equitable higher education opportunities throughout the state.<sup>6</sup>

The importance of Idaho State University to its region cannot be separated from the history of the state of Idaho or the western region of the United States. Idaho's geographic diversity, low population density, and transportation difficulties between northern and southern Idaho have magnified the importance of the regional roles played by its state institutions. Even today, the northern and southern sections of Idaho are not connected by a freeway system, and the largest wilderness area in the Lower 48 resides between northern and southern Idaho. Pocatello and Moscow residents must drive ten hours through the state's scenic center or fly out of Washington and Utah airports to travel between their cities and state campuses. Idaho's "place is properly understood to be a product of its spaces, cultures, and times," notes University of Idaho historian Adam Sowards in the preface to a new collection of historical essays about the state. Likewise, Idaho State University's place in higher education is best understood through the interplay of its history, mission, and geography.<sup>7</sup>

Idaho State University serves the largest geographic area of any of the state institutions, an area stretching from the Montana and Wyoming border on the east, to rugged wilderness area on the north, to the irrigated farmland of the Magic Valley on the west. Idaho State University's region, like its mission, is expansive and diverse; it encompasses three of the state's largest urban centers (Pocatello, Idaho Falls, and Twin Falls), and some of the state's most isolated communities (Salmon and Challis). Idaho State University's responses to the unprecedented changes experienced within the higher education sector during the past decade—the explosion of online education, increased competition from the for-profit sector, shifts in state-level support for institutions and students—must also be analyzed within the context of ISU's complex mission and geography. In order to serve the diverse geographic region as well as fulfill ISU's mission, the University has outreach centers in Idaho Falls, Twin Falls, and Meridian.

Like other institutions in the American West during the previous decade, Idaho State University has addressed the challenges of the Great Recession. Despite going through a reduction in state support, Idaho State has consistently used its own funds to reward its employees through internal compensation plans. Other efforts, including expanding tuition benefits for employees, have also been put in place to support staff during these transitions.

---

<sup>6</sup> Diane Olson, *Idaho State University: A Centennial Chronicle* (Pocatello: Idaho State University Press, 2000), 350-363.

<sup>7</sup> Adam Sowards, "Idaho's Place: Reckoning with History," in *Idaho's Place: A New History of the Gem State*, edited by Adam Sowards (Seattle: University of Washington Press, 2014), 9.

In responding to the new fiscal climate for all of higher education, Idaho State University has examined its student processes and implemented new student supports, including the innovative Career Path Internship Program. To address pipeline issues inherent in Idaho's low "go-on" rate, ISU has significantly expanded its Early College Program, and implemented a widely supported Bengal Bridge program to assist graduating high school students to "bridge the gap" to college.

In an effort to address the problems of retention, Idaho State University utilized faculty committees to undertake a complete revision of its General Education Program that has been simplified while maintaining its goals and relevance. Idaho State also created a one-stop center for student services that has solidified its role on campus since the Standard One report. Other retention initiatives include the overhaul of the remediation program and the expansion of entrepreneurial opportunities for students.

As part of its effort to maintain affordable access in a state with low per-capita income rates, Idaho State University has implemented and maintained cost controls to keep tuition low. During 2013-2014, it also implemented Program Prioritization that has created systems that will enable core theme resource allocation and planning. The transitions ISU has undergone in order to improve student experience, retention, graduation rates, and to support faculty and staff within the new fiscal environment have necessitated a holistic review of all university policies and procedures. As detailed above, ISU has implemented a new process for institutional policy proposal and approval, and has implemented a review of all policies.

In the area of research, development, and creative activity, Idaho State has continued to move forward. New programs for faculty development and research support have been put in place by the Vice President for Research, and these are starting to show success. Consistent with ISU's commitment to opportunity and innovation, Idaho State University purchased the RISE Complex in order to support entrepreneurial faculty research efforts. Innovative efforts in health care include the creation of the Bengal Pharmacy and its expansion to rural Idaho in the form of a telepharmacy.

Finally, Idaho State University has implemented and created efficiencies throughout its system. The Office of Academic Affairs instituted new management process systems including the paperless electronic tracking system, the Academic Affairs project timeline, and it restructured its management and staff teams.

Since 2010, Idaho State University has embarked on a transformative journey that has included improvements to student services, academic programs, faculty and staff support, entrepreneurial supports for students, safe campus initiatives, and other transitions consistent with its mission. Idaho State University graduated its first class while it was a small academy at the beginning of the twentieth century; ISU is confident that a foundation and infrastructure has been maintained to continue its commitment to Idaho, its students, and its communities through the end of the 21<sup>st</sup> century and beyond.

***NORTHWEST COMMISSION ON COLLEGES AND UNIVERSITIES***

**BASIC INSTITUTIONAL DATA FORM**

Information and data provided in the institutional self-evaluation are usually for the academic and fiscal year preceding the year of the evaluation committee visit. The purpose of this form is to provide Commissioners and evaluators with current data for the year of the visit. After the self-evaluation report has been finalized, complete this form to ensure the information is current for the time of the evaluation committee visit. Please provide a completed copy of this form with each copy of the self-evaluation report sent to the Commission office and to each evaluator.

To enable consistency of reporting, please refer to the glossary in the 2003 Accreditation Handbook for definitions of terms.

Institution: Idaho State University

Address: 921 South 8<sup>th</sup> Avenue, Campus Box 8310

City, State, ZIP: Pocatello, ID 83209

Degree Levels Offered:  Doctorate  Masters  Baccalaureate  Associate  Other

If part of a multi-institution system, name of system: \_\_\_\_\_

**Programs and Academic Courses Offered at Sites Outside the United States.** Report information for sites outside the United States where degree programs and academic credit courses are offered, including study abroad programs and educational operations on military bases. (Add additional pages if necessary.)

**Degree Programs** – list the names of degree programs that can be completed at the site.

**Academic Credit Courses** – report the total number of academic credit courses offered at the site.

**Student Headcount** – report the total number (unduplicated headcount) of students currently enrolled in programs at the site.

**Faculty Headcount** – report the total number (unduplicated headcount) of faculty (full-time and part-time) teaching at the site.

Notes: Regarding ISU Study Abroad programs: Only our bilateral partners and ISEP are official approved foreign country programs; however, ISU students can arrange study abroad on their own and be approved at any accredited foreign university or program.

\*Degree program information, academic credit courses, and faculty headcount are not available.

## Appendix A

Programs at Idaho State University with special accreditation from agencies **not** recognized by the U.S. Department of Education

Program or School	Degree Level(s)	Recognized Agency	Date of Last Accreditation
Social Work	BA	CSWE (Council of Social Work Education)	2011
Business	BBA, MBA,MAcc	AACSB (Association to Advance Collegiate Schools of Business)	2012
Elementary Education	BS	Idaho State Department of Education	2008
Secondary Education	BS	Idaho State Department of Education	2008
School Psychology	EDSP	NASP (National Association of School Psychologists)	2012
Civil Engineering	BS, MS	ABET (Accreditation Board for Engineering and Technology)	2012
Electrical Engineering	BS	ABET (Accreditation Board for Engineering and Technology)	2012
Mechanical Engineering	BS, MS	ABET (Accreditation Board for Engineering and Technology)	2012
Nuclear Engineering	BS, MS, PhD	ABET (Accreditation Board for Engineering and Technology)	2012
Chemistry	BS	ASAC (Applied Science Accreditation Commission)	2009
Health Physics	BS	ASAC (Applied Science Accreditation Commission)	2009
Auto Collision Repair and Refinishing Technology	TC,ATC,AAS	NATEF (National Automotive Technicians Education Foundation)	2013
Automotive Technology	TC,AAS	NATEF (National Automotive Technicians Education Foundation)	2008
Civil Engineering Technology	PSTC,ATC, AAS	ABET (Accreditation Board for Engineering and Technology)	2012
Computer Machining Technology	AAS	ATMAE (Association of Technology, Management, and Applied Engineering)	2008
Computer Aided Design Drafting Technology	ATC,AAS	ATMAE (Association of Technology, Management, and Applied Engineering)	2008
Diesel Technology	ATC,AAS	AED (Associated Equipment Distributors)	2012
Early Childhood Care/Education	TC,AAS	NAEYC (National Association for the Education of Young Children)	2010
Geomatics Technology	BS	ABET (Accreditation Board for Engineering and Technology)	2012
Health Information Technology	AAS	CAHIIM (Commission on Accreditation for Health Informatics and Information Management Education)	2008
Massage Therapy	TC,AAS	COMTA (Commission on Massage Therapy Accreditation)	2013
Medical Assisting	AAS	CAAHEP (Commission on Accreditation of Allied Health Education Programs)	2006
Respiratory Therapy	AS	CAAHEP (Commission on Accreditation of Allied Health Education Programs)	2010
Robotics and Communication Systems Engineering Technology	ATC,AAS	ABET (Accreditation Board for Engineering and Technology)	2012
Marital, Couple, and Family Counseling/Therapy	MAC	CACREP (Council for the Accreditation of Counseling and Related Educational Programs)	2009
Counselor Education and Supervision	PhD	CACREP (Council for the Accreditation of Counseling and Related Educational Programs)	2009

Student Affairs	MAC	CACREP (Council for the Accreditation of Counseling and Related Educational Programs)	2009
School Counseling	MAC	CACREP (Council for the Accreditation of Counseling and Related Educational Programs)	2009
Mental Health Counseling	MAC	CACREP (Council for the Accreditation of Counseling and Related Educational Programs)	2009
Health Care Administration	BS	AUPHA (Association of University Programs in Health Administration)	2009
Medical Laboratory Science	BS, MS	NAACLS (National Accrediting Agency for Clinical Laboratory Sciences)	2009
Paramedic Science	AS	COAEMSP (Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions)	2013
Family Medicine	Residency Program	ACGME (Accreditation Council for Graduate Medical Education)	2007
Physician Assistant	MPAS	ARC-PA (Accreditation Review Commission on Education for the Physician Assistant)	2008
Audiology	AUD	ASHA (American Speech-Language Hearing Association)	2008
Speech-Language Pathology	MS	ASHA (American Speech-Language Hearing Association)	2008

---

Idaho State University has served the citizens of the state since 1901 when the institution was first established as the Academy of Idaho. Renamed the Idaho Technical Institute in 1915 and reorganized as the Southern Branch of the University of Idaho in 1927, it was established as Idaho State College in 1947. By action of the 37th Idaho Legislature, the institution became Idaho State University on July 1, 1963. The University's Strategic Plan is online at [http://www.isu.edu/acadaff/pdf/ISU\\_Strategic\\_Plan\\_2012-2015.pdf](http://www.isu.edu/acadaff/pdf/ISU_Strategic_Plan_2012-2015.pdf).

Certificate programs of varying lengths, an Associate of Applied Science degree, a Bachelor of Applied Science degree, and a Bachelor of Applied Technology degree are included in the curricula of the College of Technology. Bachelors' and masters' degrees in a variety of fields are awarded by the College of Arts and Letters, College of Business, College of Education, College of Science and Engineering, Division of Health Sciences, and the Graduate School. Terminal degrees offered at Idaho State University include Master of Business Administration, Master of Fine Arts, Doctor of Philosophy, Doctor of Arts, Doctor of Education, Doctor of Nursing Practice and Doctor of Pharmacy.

## Mission

The mission of Idaho State University is to advance scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits and high-quality academic instruction; to use these achievements to enhance technical, undergraduate, graduate, and professional education, health care services, and other services provided to the people of Idaho and the nation; and to develop citizens who will learn from the past, think critically about the present, and provide leadership to enrich the future in a diverse, global society.

Idaho State University is a public research institution which serves a diverse population through its broad educational programming and basic, translational, and clinical research. Idaho State University serves and engages its communities with health care clinics and services, professional technical training, early college opportunities, and economic development activities. The university provides leadership in the health professions and related biomedical and pharmaceutical sciences, as well as serving the region and the nation through its environmental science and energy programs.

## Core Themes:

### Core Theme One: Learning and Discovery

Idaho State University promotes an environment that supports learning and discovery through the many synergies that can exist among teaching, learning, and scholarly activity.

### Core Theme Two: Access and Opportunity

Idaho State University provides opportunities for students with a broad range of educational preparation and backgrounds to enter the university and climb the curricular ladder so that they may reach their intellectual potential and achieve their goals and objectives.

### Core Theme Three: Leadership in the Health Sciences

Idaho State University values its established leadership in the health sciences with primary emphasis in the health professions. We offer a broad spectrum of undergraduate, graduate, and postgraduate training. We deliver health-related services and patient care throughout the state in our clinics and postgraduate residency training sites. We are committed to meeting the health professions workforce needs in Idaho. We support professional development, continuing education, and TeleHealth services. We are active in Health Sciences research.

### Core Theme Four: Community Engagement and Impact

Idaho State University, including its outreach campuses and centers, is an integral component of the local communities, the state and the Inter-mountain region. It benefits the economic health, business development, environment, and culture in the communities it serves.

## Regional Accreditation

Idaho State University is accredited by the Northwest Commission on Colleges and Universities.

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding an institution's accredited status by the Northwest Commission on Colleges and Universities should be directed to the administrative staff of the institution. Individuals may also contact:

8060 165th  
Avenue N.E., Suite 100  
Redmond, WA 98052 (425) 558-4224 [www.nwccu.org](http://www.nwccu.org)

## Specialized Accreditation

In addition, many undergraduate and graduate programs maintain specialized professional accreditation. The Office of Institutional Research maintains the most up-to-date list of ISU programs with specialized accreditation. As of the printing of this catalog the following programs have received specialized accreditation by the following organizations:

### College of Arts and Letters

- American Psychological Association (APA)
- Council on Social Work Education (CSWE)
- National Association of Schools of Music (NASM)
- National Association of Schools of Theatre (NAST)

### College of Business

- Association to Advance Collegiate Schools of Business (AACSB)

### College of Education

- Commission on Accreditation of Athletic Training Education (CAATE)
- National Council for Accreditation of Teacher Education (NCATE)

### Division of Health Sciences

- Accreditation Council for Education in Nutrition and Dietetics (ACEND)
- Accreditation Council for Occupational Therapy Education (ACOTE)
- Accreditation Council for Pharmacy Education (ACPE)
- Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)
- American Speech-Language-Hearing Association (ASHA)
- Commission on Accreditation in Physical Therapy Education (CAPTE)
- Commission on Collegiate Nursing Education (CCNE)
- Commission on Dental Accreditation (CODA)
- Council for Accreditation of Counseling & Related Educational Programs (CACREP)
- Council on Education for Public Health (CEPH)
- Joint Review Committee on Education in Radiologic Technology (JRCERT)
- National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)
- National Council for Accreditation of Teacher Education (NCATE)

### College of Science and Engineering

- Accreditation Board for Engineering and Technology (ABET)

### College of Technology

- Accreditation Board for Engineering and Technology (ABET)
- Association of Technology, Management, and Applied Engineering (ATMAE)
- Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)
- Commission on Accreditation of Allied Health Education Programs (CAAHEP)
- Commission on Massage Therapy Accreditation (COMTA)
- National League for Nursing Accrediting Commission (NLNAC)

## Student Outcomes Assessment

All undergraduate academic programs at four year public institutions in Idaho are required to assess student learning in the major and general education programs. Similar requirements for assessment also appear in the new guidelines issued by the Northwest Commission on Colleges and Universities which provides Idaho State University's institution-wide accreditation.

Idaho State University's goal is to encourage students to develop abilities and acquire knowledge that will be of lasting benefit in their personal and professional lives. To ensure that this goal is met, a program of student outcomes assessment has been implemented to improve the teaching and learning process.

Comprehensive information that includes student performance and student opinion is vital to the success of the assessment program. To provide this information, undergraduate students in the academic division may be asked to participate in a variety of assessment activities which may include formal and informal examinations, interviews, surveys and follow-up studies after graduation.

## Federal Family Education Rights and Privacy Act of 1974

Idaho State University, in compliance with the Family Educational Rights and Privacy Act (FERPA), is responsible for maintaining educational records and monitoring the release of information of those records. Staff and faculty with access to student educational records are legally responsible for protecting the privacy of the student by using information only for legitimate educational reasons to instruct, advise, or otherwise assist students.

Only those records defined as "directory information" may be released without the express written permission of the student. Directory information includes the student's name, address listings, telephone listings, e-mail addresses, full-time/part-time status, class level, college, major field of study, degree types and dates, enrollment status, club and athletic participation records, and dates of attendance including whether or not currently enrolled. No other information contained in a student's educational records may be released to any outside party without the written consent of the student.

A student may restrict release of directory information through the BengalWeb (<https://bengalweb.isu.edu>) by accessing the "Update Addresses and Phones" screen under the Academic Tools tab. This restriction will apply to the student's address and telephone listings only. All other directory listings will continue to be available for release.

Additional FERPA information may be found on the web at: <http://www.isu.edu/areg/ferpafacts.shtml>

## Alumni Association and Foundations

Alumni Association

<http://www.isu.edu/alumni>

<mailto:alumni@isu.edu>

The mission of the Idaho State University Alumni Association is to promote the welfare and to advance the objectives of Idaho State University through the sustained involvement of its alumni by providing philanthropic, intellectual and social opportunities.

The association is governed by a board of directors and administered through the office of Alumni Relations, 554 S. 7th Avenue, Pocatello, in the H. F. Magnuson House.

Specific goals are to identify alumni and friends to assist Idaho State University in strengthening support from its constituencies, to inform alumni and friends about Idaho State University, to provide for the efficient management of the Alumni Association, and to involve and motivate alumni and students to maintain their affiliation and support of Idaho State University.

The officers and directors meet three times a year with the director of alumni relations, who is appointed by the university administration.

## Idaho State University Bengal Foundation

The Idaho State University Bengal Foundation is a nonprofit organization formed to raise money for athletic scholarships. The main fund raising activities include an annual auction, scholarship fund drive, athlete-to-athlete phone-a-thon, several golf tournaments, and other special events held throughout the year.

The Bengal Foundation was officially formed in September of 1976. It is governed by a board of directors and administered through the office of the Bengal Foundation located in Holt Arena. For information on becoming a member, contact The Bengal Foundation at (208) 282-2397.

## Idaho State University Foundation, Inc.

The Idaho State University Foundation is a nonprofit corporation established in 1967 under the laws of the State of Idaho.

The mission of the Idaho State University Foundation is to stimulate voluntary private support from alumni, parents, friends, corporations, foundations, and others for the benefit of Idaho State University.

The foundation raises and manages private resources supporting the mission and priorities of the university, and provides opportunities for students and a degree of institutional excellence unavailable with state funding levels.

The foundation is dedicated to assisting the university in the building of the endowment to address, through financial support, the long-term academic and other priorities of the university.

The foundation is responsible for identifying and nurturing relationships with potential donors and other friends of the university; soliciting cash, securities, real and intellectual property, and other private resources for the support of the university; and acknowledging and stewarding such gifts in accordance with donor intent and its fiduciary responsibilities.

The Idaho State University Foundation is located on the first floor of the Administration Building.

## Policy Statements

Catalogs, bulletins, course and fee schedules, etc., are not to be considered as binding contracts between Idaho State University and students. The university and its divisions reserve the right at any time, without advance notice, to: (a) withdraw or cancel classes, courses, and programs; (b) change fee schedules; (c) change the academic calendar; (d) change admissions and registration requirements; (e) change the regulations and requirements governing instruction in, and graduation from, the university and its various divisions; and (f) change any other regulations affecting students. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who are matriculated at the time in the university. When economic and other conditions permit, the university tries to provide advance notice of such changes.

Students enrolled in a program that is closed, relocated, or discontinued should be given notice of the closure as soon as is practical. Notwithstanding any other provision of State Board of Education policy, university policy, or university catalog statements to the contrary, arrangements should be made for enrolled students to complete affected programs in a timely manner and with minimum interruptions. When there is a similar program within the institutions governed by the Board, an affected student will be provided with information on transferring to that program, although admission to any such program is contingent upon the availability of a position and the student's meeting any applicable admission requirements. If there is no similar program available within the institutions governed by the Board or the student is not able to gain admission to a similar program, the university will make reasonable efforts to place the student in a related or comparable program within the university. If none is available, the university will make reasonable efforts to assist the student in locating to another program at the university or elsewhere for which he or she is qualified.

Idaho State University is committed to providing a positive education for all students. The university has a legal and ethical responsibility to ensure that all students and employees can learn and work in an environment free of harassment and discrimination. It is the ISU policy to prohibit and eliminate discrimination on the basis of race, color, national origin, religion, sex, age, or disability. This policy applies to all programs, services, and facilities, and includes, but is not limited to, recruitment, applications, admissions, access to programs and services and employment. For additional information and specific contact information, see: <http://www.isu.edu/aaction/>

## Undergraduate Programs

(For Graduate Programs, see Graduate Catalog (<http://coursecat.isu.edu/graduate>))

### Pre-Professional Programs

Students in pre-professional programs will typically take courses at Idaho State University for their first two years and complete the programs at cooperating universities elsewhere.

Pre-Audiology  
 Pre-Counseling  
 Pre-Dentistry  
 Pre-Law  
 Pre-Medicine  
 Pre-Occupational Therapy  
 Pre-Optometry  
 Pre-Osteopathic Medicine  
 Pre-Pharmacy  
 Pre-Physical Therapy  
 Pre-Physician Assistant  
 Pre-Podiatric Medicine  
 Pre-Speech-Language Pathology  
 Pre-Student Affairs  
 Pre-Veterinary Medicine

### Abbreviations:

AA Associate of Arts  
 AAS Associate of Applied Science  
 AASBT Associate of Applied Science in Business Technology

### Also Offered in the College of Technology:

- Southeast Idaho Region 5 Tech Prep
- Workforce Training

## Subject Abbreviations

Shown below is an alphabetical list of all **subjects** taught at the undergraduate level at Idaho State University; look here to learn what program or department teaches each course. If the subject name is different from the department name, both subject and department are shown; otherwise the bold text is the name of both the subject and the department. The College of Technology has departments, but a student interacts with the **Student Services Office** instead of with the department office, so departments are not shown in that college.

ACCT - **Accounting**; College of Business  
 ACRR - **Auto Collision Repair and Refinishing**; College of Technology  
 ADMT - **Advanced Manufacturing**; College of Technology  
 ADRN - **Associate Degree Registered Nursing**; College of Technology  
 AIRM - **Aircraft Maintenance**; College of Technology  
 ANTH - **Anthropology**; College of Arts and Letters  
 ARBC - **Arabic**, Department of Languages and Literatures; College of Arts and Letters  
 ART - **Art**, Department of Art; College of Arts and Letters  
 AUTM - **Automotive Technology**; College of Technology  
 BA - **Business Administration**; College of Business  
 BED - **Business Education**, Department of Educational Foundations; College of Education  
 BIOL - **Biological Sciences**; College of Science and Engineering  
 BT - **Business Technology**; College of Technology  
 CADD - **Computer-Aided Design Drafting**; College of Technology  
 CE - **Civil Engineering**, Department of Civil and Environmental Engineering; College of Science and Engineering  
 CET - **Civil Engineering Technology**; College of Technology  
 CFS - **Child and Family Studies**, Department of Educational Foundations; College of Education  
 CHEM - **Chemistry**; College of Science and Engineering  
 CHLD - **Early Childhood Care and Education**; College of Technology  
 CHNS - **Chinese**, Department of Languages and Literatures; College of Arts and Letters  
 CMLT - **Comparative Literature, Languages and Literatures**; College of Arts and Letters  
 CMP - **Communication, Media, and Persuasion**, Department of Communication, Media, and Persuasion; College of Arts and Letters  
 COMM - **Communication** (Speech), Department of Communication, Media, and Persuasion; College of Arts and Letters  
 COSM - **Cosmetology**; College of Technology  
 COUN - **Counseling**, Kasiska School of Health Professions; Division of Health Sciences  
 CS - **Computer Science**; College of Science and Engineering  
 CSD - **Communication Sciences & Disorders**; Division of Health Sciences  
 DAAC - **Dance Activity Courses**; College of Arts and Letters  
 DANC - **Dance**; College of Arts and Letters  
 DENT - **Dental Hygiene**, Kasiska School of Health Professions; Division of Health Sciences  
 DESL - **Diesel/On-Site Power Generation Technology**; College of Technology  
 DHS - **Division of Health Sciences**  
 ECON - **Economics**; College of Business  
 EDUC - **Education**, Department of Educational Foundations; College of Education  
 EE - **Electrical Engineering**, Department of Electrical Engineering; College of Science and Engineering  
 EMGT - **Emergency Management**; College of Technology

ENGL - **English** (writing or literature); College of Arts and Letters  
ENGR - **Engineering** (generic Engineering courses); College of Science and Engineering  
ENVE - **Environmental Engineering**, Department of Civil and Environmental Engineering; College of Science and Engineering  
ESET - **Energy Systems Engineering Technology** (several separate programs); College of Technology  
FIN - **Finance**; College of Business  
FREN - **French**, Department of Languages and Literatures; College of Arts and Letters  
FSA - **Fire Services Administration**; College of Technology  
GEMT - **Geomatics Technology**; College of Technology  
GEOL - **Geosciences**; College of Science and Engineering  
GERM - **German**, Department of Languages and Literatures; College of Arts and Letters  
HCA - **Health Care Administration**, Kasiska School of Health Professions; Division of Health Sciences  
HE - **Health Education and Promotion**, Kasiska School of Health Professions; Division of Health Sciences  
HIST - **History**; College of Arts and Letters  
HIT - **Health Information Technology**; College of Technology  
HO - **Health Occupations**; College of Technology  
HONS - **Honors**; University Honors Program  
HPHY - **Health Physics**, Department of Nuclear Engineering and Health Physics; College of Science and Engineering  
IC - **Industrial Controls**, Instrumentation and Automation Engineering Technology; College of Technology  
IDEP - **Idaho Dental Education Program**; Department of Dental Sciences, Division of Health Sciences  
INFO - **Informatics and Computer Science**; College of Business  
INST - **Instrumentation**, Instrumentation and Automation Engineering Technology; College of Technology  
IS - **International Studies**, Department of Political Science; College of Arts and Letters  
ITS - **Information Technology Systems**; College of Technology  
JAPN - **Japanese**, Department of Languages and Literatures; College of Arts and Letters  
LANG - **Language**, Department of Languages and Literatures; College of Arts and Letters  
LATN - **Latin**, Department of Languages and Literatures; College of Arts and Letters  
LAWE - **Law Enforcement**; College of Technology  
LEAD - **Leadership Studies**, Department of Communication and Rhetorical Studies; College of Arts and Letters  
MA - **Medical Assisting**; College of Technology  
MACH - (stands for Machining Technology) **Computerized Machining Technology**; College of Technology  
MATH - **Mathematics**; College of Science and Engineering  
ME - **Mechanical Engineering**; College of Science and Engineering  
MGT - **Management**; College of Business  
MKTG - **Marketing**; College of Business  
MLS - **Medical Laboratory Science**; Division of Health Sciences  
MSL - **Military Science and Leadership** (U.S. Army R.O.T.C.); College of Arts and Letters  
MSTH - **Massage Therapy**; College of Technology  
MUSA - **Applied Music** (music lessons), School of Performing Arts; College of Arts and Letters  
MUSC - **Music**, School of Performing Arts; College of Arts and Letters  
MUSP - **Music Performance**, School of Performing Arts; College of Arts and Letters  
MUSE - **Museology**, Idaho Museum of Natural History  
NE - **Nuclear Engineering**, Department of Nuclear Engineering and Health Physics; College of Science and Engineering  
NTD - **Dietetics** (stands for Nutrition and Dietetics), Kasiska School of Health Professions; Division of Health Sciences  
NURS - **Nursing**; Division of Health Sciences  
OLP - **Organizational Learning and Performance**, Department of Organizational Learning and Performance, College of Education  
PARA - **Paralegal Studies**; College of Technology  
PARM - **Paramedic Science**, Kasiska School of Health Professions; Division of Health Sciences  
PAS - **Physician Assistant Studies**; Division of Health Sciences  
PDNT - **Pharm.D. Non-Traditional**; Division of Health Sciences  
PE - **Physical Education**, Sport Science and Physical Education; College of Education  
PEAC - **Physical Education Activity Courses**, Sport Science and Physical Education; College of Education  
PHAR - **Pharmacy**; Division of Health Sciences  
PHIL - **Philosophy**, Department of English and Philosophy; College of Arts and Letters  
PHYS - **Physics**; College of Science and Engineering  
PNUR - **Practical Nursing**; College of Technology  
POLS - **Political Science**; College of Arts and Letters  
PPRA - **Pharmacy Practice**, Pharmacy Practice and Administrative Sciences; Division of Health Sciences  
PSCI - **Biomedical and Pharmaceutical Sciences**; Division of Health Sciences  
PSYC - **Psychology**; College of Arts and Letters  
PTA - **Physical Therapist Assistant**; College of Technology  
PTOT - **Physical Therapy and Occupational Therapy**; Division of Health Sciences  
RESP - **Respiratory Therapy**; College of Technology

RS - **Radiographic Science**, Kasiska School of Health Professions; Division of Health Sciences  
 RUSS - **Russian**, Department of Languages and Literatures; College of Arts and Letters  
 SHOS - **Shoshoni**, Department of Languages and Literatures; College of Arts and Letters  
 SOC - **Sociology**, Department of Sociology, Social Work, and Criminal Justice; College of Arts and Letters  
 SOWK - **Social Work**, Department of Sociology, Social Work, and Criminal Justice; College of Arts and Letters  
 SPAN - **Spanish**, Department of Languages and Literatures; College of Arts and Letters  
 SPED - **Special Education**, School Psychology, Literacy, and Special Education; College of Education  
 TGE - **Technical General Education**; College of Technology  
 THEA - **Theatre**, School of Performing Arts; College of Arts and Letters  
 US - **University Studies**; Bachelor of University Studies  
 WELD - **Welding**; College of Technology  
 WS - **Women Studies**; College of Arts and Letters

## Undergraduate Admission

Office of Admissions  
 921 S 8th Ave. Stop 8270  
 Pocatello, ID 83209-8270  
 (208) 282-2475  
<http://www.isu.edu/future/>  
 email:admiss@isu.edu

### Admission Process

*The following information applies to undergraduate students applying for admission to academic programs. For students seeking information regarding admission to professional-technical programs, contact the College of Technology (<http://coursecat.isu.edu/technology>). Graduate students should refer to the Graduate Catalog (<http://coursecat.isu.edu/graduate>).*

Idaho State University welcomes all students of good character who provide evidence of suitable preparation for work at the college level. Future students are welcome to contact the Office of Admissions for an admission application, other supporting forms, and accompanying instructions, or visit our web page at [www.isu.edu/future](http://www.isu.edu/future)

Typically, the Office of Admissions notifies students of admission decisions within 14 days of receiving the student's completed application. Decisions may be delayed if documentation is incomplete upon submission. Students may be admitted with an in-progress transcript. However, the university reserves the right to restrict registration for the term following admission if all required documents are not submitted.

***Failure to list and submit transcripts from all schools attended, or submission of inaccurate information, is considered fraud and is cause for refusal of admission or dismissal from Idaho State University. All required documentation must be received prior to admission.***

### Application

To allow appropriate time for evaluation, admission decisions, and appropriate notification, all applications and documentation should be submitted to the Office of Admission at least three weeks prior to the start of the semester for acceptance consideration. Otherwise, a \$20 late fee may be assessed and an admission decision cannot be guaranteed prior to the beginning of the ensuing semester.

Semester	Freshmen Applicants	Transfer Applicants	International Applicants
Fall	August 1	August 1	March 1
Spring	December 1	December 1	October 1
Summer	Contact Admissions	Rolling	Applications not accepted

Students should hear from the Office of Admissions at Idaho State University approximately 14 days following receipt of their complete application file.

### Definitions

Idaho State University has different application processes and requirements for the following groups of students:

1. Freshmen - Students who have not enrolled in any college or university after graduating from high school (or receiving a GED).

Note: Students who have been enrolled in an early college or dual/concurrent enrollment program while still classified as high school students are considered freshman.

2. Transfer Students - Students who have been enrolled at any college or university after graduating from high school (or receiving a GED) prior to enrolling at Idaho State University.

3. Former Students - Students who have been accepted and enrolled at ISU previously, but have not enrolled in classes for the past 8 semesters.

4. International Students

5. Professional Technical Students

**Assured Admission** means the student has satisfied the full complement of admission requirements.

**Conditional Admission** means the student has satisfied most of the admission requirements. Conditional Admission is not a probationary status but is subject to credit hour restrictions. Students conditionally accepted are considered for scholarships and have the rights and privileges granted all students.

## Idaho State Board of Education College Entrance Core Requirements

Department	# Semesters
English (Composition, Literature)	8
Mathematics (Applied Math I, Applied Math II, Algebra I, Algebra II, Geometry, Analytic Geometry, Calculus, Statistics, Trigonometry; at least 4 semesters must be taken during grades 10 through 12)	6
Natural Science (Anatomy, Biology, Chemistry, Earth Science, Geology, Physiology, Physical Science, Physics, Zoology. Selected applied science courses may count for up to 2 semesters. At least 2 semesters must be for courses which include a laboratory science experience.)	6
Social Science (American Government, Geography, U.S. History, World History. Economics, Philosophy, Psychology, Sociology)	5
Humanities/Foreign Language (Literature, History, Philosophy, Foreign Language, and related study of 2 or more of the traditional humanities disciplines)	2
Other college prep (Speech, Studio/Performing Arts (Art, Dance, Drama, Music), additional Foreign Language. Up to 2 semesters of approved vocational courses may apply; consult your high school counselor)	3

## New Freshmen

### Application Steps for New Freshmen

1. Apply for Admission—the form is online at <http://www.isu.edu/apply/>
2. Pay \$50 nonrefundable application fee.
3. Submit official ACT or SAT Scores. (Students 21 years or older are exempt from submitting ACT/SAT scores.)
4. Submit an official high school transcript (transcript should be sent by the high school in a sealed envelope.)
5. After high school graduation, an official copy of the final high school transcript must be mailed via U.S. Mail in a sealed envelope to Idaho State University by the awarding institution. Official transcripts by fax are permitted only when sent within the state of Idaho (from Idaho high schools or colleges.) GED recipients must request that official GED scores be mailed to ISU. No transcripts will be accepted directly from a student under any circumstances.

## High School Graduates

Students are admitted to Idaho State University with a status of Assured Admission or Conditional Admission.

**Assured Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. A 2.50 or better cumulative grade point average,
3. The completion of the Idaho State Board of Education high school core requirements,
4. A math minimum test score of 18 on the ACT or 490 on the SAT,
5. An English minimum test score of 18 on the ACT or 460 on the SAT Critical Reading.

Students from Idaho will be evaluated for completion of the Idaho State Board of Education core upon receipt of a final high school transcript with the graduation date posted.

Students who meet the above criteria for GPA and test scores but lack up to two core high school classes will be granted Conditional Admission.

**Conditional Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. A 2.25 or better cumulative grade point average,
3. A math minimum test score of 12 on the ACT or 270 on the SAT,
4. An English minimum test score of 12 on the ACT or 360 on the SAT Critical Reading.

Students from Idaho will be evaluated for completion of the Idaho State Board of Education core upon receipt of a final high school transcript with the graduation date posted.

## Home School Students

**Assured Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. Received test scores meeting the following:
  - a. Composite score of at least 21 on the ACT or a 980 combined SAT Math and Critical Reading score,
  - b. Math score of at least 18 on the ACT or 490 on the SAT,
  - c. English score of at least 18 on the ACT or 460 on the SAT Critical Reading exam,
3. Meet one of the following:
  - a. Passing score on the GED, or
  - b. Completion of the COMPASS tests in Math, Reading, Writing Skills and Writing Essay, with scores of at least 40 in Math/Algebra and at least 68 in Reading.

**Conditional Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. Received test scores meeting the following:
  - a. Composite score of at least 20 on the ACT or a 940 combined SAT Math and Critical Reading score,
  - b. Math score of at least 12 on the ACT or 270 on the SAT,
  - c. English score of at least 12 on the ACT or 360 on the SAT Critical Reading exam,
3. Meet one of the following:
  - a. Passing score on the GED, or
  - b. Completion of the COMPASS tests in Math, Reading, Writing Skills and Writing Essay, with scores of at least 40 in Math/Algebra and at least 68 in Reading.

## GED Students Between 18 and 21 Years of Age

**Assured Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. Received test scores meeting the following:
  - a. Composite score of at least 21 on the ACT or a 980 combined SAT Math and Critical Reading score,
  - b. Math score of at least 18 on the ACT or 490 on the SAT,
  - c. English score of at least 18 on the ACT or 460 on the SAT Critical Reading exam,
  - d. Passing score on the GED.

**Conditional Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. Received test scores meeting the following:
  - a. Composite score of at least 20 on the ACT or a 940 combined SAT Math and Critical Reading score,
  - b. Math score of at least 12 on the ACT or 270 on the SAT,
  - c. English score of at least 12 on the ACT or 360 on the SAT Critical Reading exam,
  - d. Passing score on the GED.

## GED Students Younger than 18 or Older than 21

GED students younger than 18 years of age must petition the Admission Committee to be considered for admission.

GED students over 21-years-old must have a passing GED score with a 450 (45) average and no individual score below 410 (41) and both a Compass score in English of at least 68 and Algebra score of at least 40.

## Admission by Petition

Applicants with a diploma or passing GED score who fail to meet the admission requirements above, or transfer students with a cumulative GPA of less than 2.0, may deserve further consideration for admission because of special circumstances. Applicants may submit an admission petition to the Office of Admissions explaining why they feel that they can be successful at Idaho State University and documenting their special circumstances. Letters of support from counselors, teachers, etc., are encouraged.

Admission petitions will be approved only when the applicant provides evidence of preparedness for academic success at the level described by the requirements for assured admission, even if not all the requirements are met. Examples of such evidence are above average ACT, SAT, GED, COMPASS, or TABE (Test of Basic Education) scores, a high school or college GPA that for all semesters but one or two is well above that given in the requirements, or military or other life experience in the years since previous academic work that demonstrates a strong foundation for academic success.

Admission petitions are reviewed by an Admission Committee chaired by a representative of the Office Admissions. The committee consists of at least five other members representing faculty, Academic Advising, the Athletics Department, Disability Services, and TRIO Student Services. Completed petitions are usually reviewed within one month. Applicants may be asked to complete a placement exam prior to an admission decision.

Applicants whose petitions are approved must sign an Admission Agreement that limits the number of credits the student may attempt, requires registration in support or developmental courses, and requires regular meetings with an assigned advisor from Central Academic Advising.

## Admission Deferment Policy

An admitted Freshmen student who decides to delay their enrollment at ISU in order to perform voluntary service (church mission, U.S. military, or other government or non-profit agency) may submit a one-time request to defer their admission to a future semester that is up to six subsequent semesters (not including the summer semesters) after the semester they were offered admission. (Example: A student admitted for the Fall 2014 semester could request a deferment up to and including the Fall 2017 semester. See the table below for additional semesters.) This deferment assumes that the student:

- will remain a first-time freshman upon enrollment,
- will enroll at ISU as a first-time freshman upon return from their volunteer service, and
- will not enroll at another post-secondary institution prior to their enrollment at ISU.

The "Admission Deferment Request" form (available at [www.isu.edu/future/defer](http://www.isu.edu/future/defer)) must be submitted to the Office of Admission by August 1 before the fall semester for which the student has been admitted. (Example: For students admitted for Fall 2014 semester, the form must be received by August 1, 2014.) See the table below for deadlines for additional semesters. The deferment guarantees admission to ISU but not necessarily admission to a particular academic major and/or program of study. More details on the Admission Deferment Policy can be found at [www.isu.edu/future/defer](http://www.isu.edu/future/defer).

Session Admitted: Fall 2014

Can defer admission until: Fall 2017

Deadline for ISU to receive Admissions Deferment Request Form: 8/1/2014

Session Admitted: Spring 2015

Can defer admission until: Spring 2018

Deadline for ISU to receive Admissions Deferment Request Form: 12/1/2014

Session Admitted: Fall 2015

Can defer admission until: Fall 2018

Deadline for ISU to receive Admissions Deferment Request Form: 8/1/2015

## Re-Applying for Admission

Applicants not meeting requirements to be granted assured or conditional admission have the opportunity to re-apply to the university after they have completed 14 or more transferable semester hours (credits) at a regionally accredited college or university. Students may also re-apply if they receive passing Test of Adult Basic Education (TABE) exam scores after additional preparation.

## New Transfer Students

### Definition

A transfer student is a student who has been enrolled or plans to enroll in any college or university after graduating from high school, (or receiving a GED,) prior to being admitted to Idaho State University.

### Application Steps

1. Apply for Admission—the form is online at <http://www.isu.edu/apply/>
2. Pay \$50 nonrefundable application fee

3. An official transcript from each college previously attended must be mailed via U.S. Mail in a sealed envelope to Idaho State University by the awarding institution. Official transcripts by fax are permitted only when sent within the state of Idaho (from Idaho colleges). No transcripts will be accepted directly from a student under any circumstances.
4. If applying in mid-semester while attending elsewhere, submit an in-progress college transcript indicating grades earned through the most recent completed semester.

***Failure to list and submit transcripts from all schools attended, or submission of inaccurate information, is considered fraud and is cause for refusal of admission or dismissal from Idaho State University. All required documentation must be received prior to registration.***

**Assured Admission** requires:

1. Completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. 2.0 or better cumulative grade point average
3. A final, official transcript from each college attended

Students with less than a 2.0 cumulative transfer GPA for previous college work are required to submit a petition to the Admission Committee (see Admission by Petition above).

## Transfer Credit Evaluation

Transfer courses are evaluated on a course-by-course basis. Credits earned at the baccalaureate level from a regionally accredited institution are transferable.

All international post-secondary transcripts must go through an evaluation service approved by the National Association of Credential Evaluation Services, Inc. (NACES). Students need to provide the Office of Admissions with the official credential evaluation in addition to the official transcripts. For evaluations, Idaho State University recommends:

- World Education Services - <http://www.wes.org> 212-966-6311
- Global Services Associates, Inc. - <http://www.globaleval.org> 310-828-5709
- Global Credential Evaluators Inc. - <http://www.gcevaluators.com> 512-528-0908
- Educational Credential Evaluators - <http://www.ece.org> 414-289-3400

In order for an evaluation to be considered official, it must come to us directly from the evaluation service.

Vocational or technical coursework may be considered for transfer with limitations; these courses are subject to review by the student's academic department chair and dean. For specific questions regarding technical transfer credit, please contact the Office of the Registrar at (208) 282-2661.

Note: Departments determine the transferability of specific transfer course into major and/or program requirements. Courses that are transferred to ISU do not count in the official ISU GPA.

## Transfer Credit Limitations

Students transferring to ISU from a two year institution may use a maximum of 70 credits of Junior College coursework towards a baccalaureate degree at ISU.

Students transferring to ISU from a quarter credit institution will earn 2/3 of a semester credit for every credit earned on the quarter system.

Credits are transferred to Idaho State University at the level earned at the institution of origin. Transferred lower division (1000 and 2000 level) credit may NOT count as upper division (3000 and 4000) credit regardless of the appropriate course equivalencies determined by the Office of the Registrar.

Credits earned from a non-regionally accredited institution are generally not transferable to ISU. If you have questions or concerns, please contact the Office of the Registrar.

## Transfer Credits toward General Education Requirements

1. Students transferring to ISU with an Associate of Science, Associate of Arts, or Associate of Arts and Science degree earned after 1995 or a baccalaureate degree from any U.S. regionally accredited institution will be considered to have met ISU's general education requirements.
2. Students transferring to ISU from any U.S. regionally accredited institution who have not earned an Associate of Science, Associate of Arts, or Associate of Arts and Science degree earned after 1995, but have earned an "Idaho Core Certified" designation from the sending institution will be considered to have met ISU's general education requirements.

Note: Some departments require specific courses identified as fulfilling general education requirements in their major or minor program of study. Students who earn general education waivers based on prior degrees must still complete all defined program requirements within their major or minor area.

## Other Applicants

### Former Students

Students who have NOT enrolled for classes at Idaho State University for 8 semesters are required to re-apply and submit the following to the Office of Admissions:

1. Application for Admission. Access online application at <http://www.isu.edu/apply/>
2. Complete, official transcripts from any other colleges attended since enrolled at Idaho State University.
3. Application Fee (\$50, nonrefundable).

### Students Who Previously Applied but did not Enroll

Students accepted for admission to Idaho State University who do not attend their first semester will be allowed to enroll the next semester without reapplying. Acceptance is granted for a two (2) semester time frame. However, students MUST complete an "Admissions Update Form" or call the Office of Admissions at (208) 282-2475 to provide current information, including official transcripts from all other colleges or universities attended since initial application submission, prior to being allowed to enroll for classes.

### Students with Behavioral Problems

Whenever an applicant for admission or a student (regardless of the program of study or whether full-time or part-time) exhibits behavior which poses a substantial threat to himself/herself or other members of the university community or is disruptive of the educational processes, said student or applicant will be subjected to a special screening process. This process has been formulated as a result of recommendations of a committee of the faculty and students of this institution and will apply to any admission or readmission request. In the event that the conduct or behavior of the individual or any other member of the university community is disruptive of the educational process of the institution, these procedures shall apply whether the cause of the condition is medical, psychiatric, behavioral, otherwise, or a combination of the above.

### Non-Degree Seeking Students

A person may apply as a non-degree seeking student if he/she does not wish to qualify for admission for degree work but to pursue studies for personal reasons. Such a student may register for at most 7 credits per semester, unless he or she is enrolled in the Early College Program. A non-degree seeking student who has completed 32 credits must follow regular admission procedures at Idaho State University to enroll for additional degree credits or sign a non-degree waiver to continue as a non-degree seeking student. All admission requirements must be met before the university can assist this student in obtaining a degree. Such a student will be classified as non-degree seeking until all admission requirements are met for classification as a regular student. Non-degree seeking students are NOT eligible for federal financial aid.

### Early College Program/High School Dual Credit

Academically qualified high school students may enroll at Idaho State University. Dual Credit allows high school students the opportunity to earn college credit while continuing their high school courses and activities. Courses may be taught at their high schools by teachers approved as Idaho State University adjunct faculty. High schools may allow Idaho State University courses to be applied to meet high school graduation requirements.

High school students must complete an Idaho State University Early College Program registration form. Written permission from their principal or counselor is needed along with a parent's and the student's written signatures. High school students meeting the necessary requirements will be allowed to enroll as non-degree seeking students. High school students may enroll in any class offered through Idaho State University for which they have met the prerequisites.

All qualified high school students receive a partial fee scholarship and pay reduced fees. A student must hold the status of high school student for the entire Idaho State University course's length in order to participate within the Early College Program. High school students are NOT eligible to receive federal financial aid.

For additional information and/or registration contact the Early College Program at (208) 282-6067/ (208) 282-2633 or <http://www.earlycollege.isu.edu>.

Idaho State University has established the University Health High School program to introduce students to the health professions, since the university is Idaho's center for education in this domain. Learn more about careers, hear from working professionals, and discover opportunities to take dual credit, on-line, introductory courses in the health professions by logging on as a guest at <http://www.isu.edu/ecp/uhhs/index.shtml>.

## International Admissions

### International Admissions

Idaho State University encourages and welcomes international students to apply. We are proud of the active part taken in student activities by students from around the world. Admission to Idaho State University for international students is dependent upon credentials showing proof that the students are able to perform well in an American academic environment. The Office of International Admissions recognizes there are no such things as equivalents between curricula in any other country, and the United States. Thus; foreign courses must be evaluated in terms of approximations.

## Applications

The priority dates for international student admission applications are March 1 for fall semester, and August 1 for spring semester. The form is online at <http://apply.isu.edu>. The following additional items are needed:

1. Application Fee (\$50, nonrefundable);
2. Documents showing English Proficiency (ex. IELTS, TOEFL)
3. Official Transcripts from all universities previously attended and statements of English proficiency when applicable;
4. Official secondary or high school transcripts if fewer than 26 transfer college credits have been earned;
5. Declaration of Financial Support for one academic year.
6. Students transferring from another U.S. college or university are required to have the Transfer Verification form completed and submitted to the Office of International Admissions along with a copy of the current I-20 or DS-2019 forms issued to them by the school from which they wish to transfer.

ALL REQUIRED ADMISSIONS DOCUMENTS MUST BE RECEIVED PRIOR TO ENROLLMENT AND REGISTRATION FOR CLASSES.

***Failure to list and submit transcripts from all schools attended, or submission of inaccurate information, is considered fraud and is cause for refusal of admission or dismissal from Idaho State University.***

*NOTE: It is critical that students submit necessary admission documents early so they may be cleared to register for classes. Those submitting application materials late cannot be assured of registration for the current semester. An official transcript is one that is sent directly from the college/university to the International Programs Office at Idaho State University.*

## English Proficiency

Students from other countries are required to provide evidence of a satisfactory score on one of the following standardized tests:

- Compass Test -- 68 or higher,
- English TOEFL-- iBT of 61 or above,
- IELTS -- overall band score of 5.5 or above, or a 5.0 on each of the sub-tests .

Exemption from the English Proficiency requirement is possible for students who:

1. are coming from countries where English is the official medium of instruction.
2. are transferring 26 or more credits from another college or university in the United States.
3. have successfully completed their prescribed course of study at the ISU Intensive English Institute and who have the recommendation of the IEI staff.

To see whether you qualify, contact the International Programs Office at 208-282-4320.

Test results must be sent directly to ISU International Programs Office from the testing organization.

To find test centers and to learn more about the tests, go to <http://www.ets.org/toefl/> or <http://www.ielts.org/>.

Students can also show English proficiency by completing Level 112 at any ELS program (<http://www.els.edu>).

## International High School Graduates

**Assured Admission** requires:

1. A completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. 2.50 or better cumulative grade point average,
3. Secondary school (high school) diploma and mark sheets (grades) in original, or copies certified by the school principal, or the controller of examinations. Documents must be sent in an official, sealed school envelope. Translation of these documents by a certified translator must be done if the documents are not in English.
4. Meeting English proficiency requirements.

We do not require SAT or ACT scores for admission. However, we strongly encourage our students to take these.

**Conditional Admission** requires:

1. A completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid;
2. 2.25 or better cumulative grade-point average;

3. Secondary school (high school) diploma and mark sheets (grades) in original, or copies certified by the school principal, or the controller of examinations. Documents must be sent in an official, sealed school envelope. Translation of these documents by a certified translator must be done if the documents are not in English.
4. Meeting English Proficiency requirements.

We do not require SAT or ACT scores for admission. However, we strongly encourage our students to take these.

All I-20's are generated and tracked by the International Programs Office. If you have questions regarding this process, please call (208) 282-4320.

## International Alternative Admissions without High School Diploma

**Assured Admission** requires:

1. A completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid;
2. Composite score of at least 21 on ACT or a 1050 combined SAT Critical Reading and Math score;
3. GED score with a 450 (45) average and no individual score below 410 (41) or both a Compass score in English of at least 68 and Algebra score of at least 40.

Students will be required to provide either a TOEFL iBT score of 61 or above or an IELTS overall band score of 5.5 or above, or a 5.0 on each of the sub-tests to demonstrate their English proficiency if they score less than:

- 18 on the ACT English test;
- 450 on their SAT Critical Reading test;
- 68 on the COMPASS writing test.

Test results must be sent directly to the International Programs Office from the testing organization.

**Conditional Admission** requires:

1. A completed Undergraduate Admission Application with the \$50 nonrefundable application fee paid,
2. Composite score of at least 20 on ACT or a 1000 combined SAT Critical Reading and Math score,
3. GED score with a 450 (45) average and no individual score below 410 (41) or both a Compass score in English of at least 68 and Algebra score of at least 40

Students will be required to provide either a TOEFL iBT score of 61 or above or an IELTS overall band score of 5.5 or above, or a 5.0 on each of the sub-tests to demonstrate their English proficiency if they score less than:

- 18 on the ACT English test,
- 450 on their SAT Critical Reading test,
- 68 on the COMPASS writing test.

Test results must be sent directly to the International Programs Office from the testing organization.

## International Transfer Student Admission Requirements

1. International students who have completed less than 2 semesters of full-time study (less than 26 credits) are required to submit secondary school (high school) diploma and mark sheets (grades) in original, or copies certified by the school principal, or the controller of examinations. Documents must be in official, sealed school envelope. Students are also required to mail in official (original) college/university transcripts in a sealed official envelope from the school or copies certified by the school principal or the controller of examinations.
2. If student has completed at least 26 credits at a college/university, then a student is required to submit official (original) college/university transcripts in a sealed official envelope from the school, or copies certified by the school principal, or the controller of examinations. Documents must be in an official, sealed school envelope. Students who have attended more than one college/university must submit official transcripts from each institution attended.
3. Students who have already completed an associate's (2 year) or bachelor's (3 or 4 year) degree must also submit their diploma, or have their diploma posted on the transcript.
4. All non-English documents must be translated by a certified translator.
5. All international post-secondary documents must go through an evaluation service approved by the National Association of Credential Evaluation Services, Inc. (NACES). Students need to provide the International Programs Office with the official credential evaluation in addition to the official transcripts. For evaluations, Idaho State University recommends:

World Education Services - <http://www.wes.org> 212-966-6311

Global Services Associates, Inc. - <http://www.globaleval.org> 310-828-5709

Global Credential Evaluators Inc. - <http://www.gcevaluators.com> 512-528-0908

Educational Credential Evaluators - <http://www.ece.org> 414-289-3400

In order for an evaluation to be considered official, it must come to us directly from the evaluation service.

6. Students must meet English proficiency requirements.

## Transfer of I-20/DS-2019 Form

International students who have attended any other college, or university, in the United States are required to have the Transfer of I-20/DS-2019 Form completed by the official International Student Advisor from their previous institution. The form should be submitted to the International Programs Office along with a copy of the student's I-20/DS-2019 and I-94 forms.

## Declaration of Financial Support / Financial Statement

All international students must submit documentation showing that they are financially able to support themselves while attending Idaho State University. The Declaration of Financial Support Form from a sponsor along with an attached official bank statement will serve as proof of the student's financial ability to meet his/her educational costs. The designated sponsor must release funds when needed to pay for expenses as indicated on the declaration. Refer to the estimate of costs, shown below. International students receiving athletic scholarships from Idaho State University must have the Athletic Department submit written verification of such a financial award. Idaho State University reserves the right to require financial deposits from students before registration.

**Note: Based on academic merit and availability, new entering International students may be considered for non-resident fee waiver scholarships worth approximately \$11,800 per year. For more information, contact: [scholar@isu.edu](mailto:scholar@isu.edu)**

## Estimated Costs

### Undergraduate, Without Scholarship

Fee	Amount
Tuition and Fees*	\$18,676.00
Other Expenses (Books, Supplies, and Medical Insurance)**	\$3,828.00
Room and Meals	\$5,497.00
Total	\$28,001.00

### Undergraduate, With Non-resident Tuition Scholarship

Fee	Amount
Tuition and Fees*	\$6,344.00
Other Expenses (Books, Supplies, and Medical Insurance)**	\$3,828.00
Room and Meals	\$5,497.00
Total	\$15,669.00

**Note: Academic year includes Fall and Spring semesters only. Summer Semester costs are not included in the estimates. Costs are subject to change; see <http://www.isu.edu/iso/cost.shtml> for the most updated information.**

\* Some academic and most College of Technology programs require **additional** tool or class costs. Students need to contact individual departments or programs for these costs.

\*\* Students must have the necessary funds to purchase medical insurance for themselves and their family. Costs for medical services provided while in the U.S. are NOT covered by the state of Idaho or the federal government.

Tuition costs include the basic fees paid by all students, plus Non-Resident Tuition which is required of all non-Idaho residents.

See Expenses (<http://coursecat.isu.edu/undergraduate/aboutISU/expenses>) within the About Idaho State University section of this catalog for on-campus housing. Off-campus options are available. Married students accompanied by spouse and children must provide additional funds for them. International students are confronted with a different circumstance than resident students or even out-of-state students. These students may need to supplement their personal belongings with purchases after they arrive on campus. In addition, international students may be required to arrange for their own meals during vacations when residence hall cafeterias are closed.

## Physical Facilities and University Services

The Idaho State University campus encompasses over 1,100 acres of property. Its 105 buildings are surrounded by 180 acres of attractively maintained landscape. There are over 5,600 parking spaces available throughout the campus.

For convenience, a free on-campus shuttle bus is available during the fall and spring semesters. Riding a bicycle is also a popular way to get around campus. The campus is located just off of the interstate, making access very easy. The university commuter bus system brings students to the campus from over 70 miles away from Idaho Falls, neighboring towns, and areas in between.

All seven colleges are housed in the various campus buildings ranging from the oldest, Frazier Hall (built in 1925), to the newest, the Rendezvous Building (completed in 2008). The Rendezvous is a new 256,000 square foot, multi-use facility located in the center of campus. It contains 82 student suites which house 300 students, a 40 classroom academic building with a 250 seat lecture hall/future planetarium, a core food service facility to serve housing students and retail customers, as well as a 120 seat drop-in computer lab and numerous styles of study and relaxation spaces. This expansive facility creates a new living, learning, studying, social and academic heart for the campus.

The L. E. and Thelma E. Stephens Performing Arts Center, completed in 2004, is located on 16.8 acres, high on a hill on the perimeter of the campus, adjacent to Interstate 15. This 123,000 square foot facility includes a 1,200 seat concert hall, an elegant rotunda, a 446 seat thrust theatre, and a 200 seat black box theatre. The three-level concert hall, the Center's largest venue, incorporates state-of-the-art design and technology to optimize sound. The Center also includes classroom space, offices for the Department of Theatre and Dance, and a conference room. The facility and the various, wonderful performances it presents are a must-see part of campus.

Opened in October 2008, the Center for Advanced Energy Studies or "CAES" Building is a world-class research facility with offices and laboratories for collaborative projects between Idaho State University, Boise State University, the University of Idaho, and Idaho National Laboratory scientists and engineers. It is certified as a LEED Gold building and located on our Idaho Falls campus. It is a 55,000 square foot, \$18 million facility and includes a fluids lab, advanced materials lab, imaging suite, radio chemistry and chemistry labs, systems modeling, power wall, and visualization cave.

Opened in August 2009, the 101,000 square foot ISU-Meridian Health Sciences Center includes programs with an emphasis on health sciences, consolidating programs already leasing space in Meridian and the Treasure Valley.

Remodeling and updates of the campus are an ongoing process. All of the campus buildings are accessible to the disabled.

Occupied in 1971, Holt Arena was the first enclosed football stadium on any university campus. The arena is used for football and basketball games, indoor track meets, and various trade and garden shows, as well as championship rodeos.

Remodeled in 2002, Reed Gymnasium provides a unique and exciting venue for basketball games, volleyball, and other sporting events. A world-class climbing wall is located in the Recreation Center along with racquetball courts, a running track, weight rooms and other sports equipment as well as an Olympic-size swimming pool. The Recreation Center was expanded in 1996. A new \$7.7 million expansion, completed in April 2010, includes weight, cardio-training and fitness areas, dance/multipurpose rooms, offices, and lobby.

A new NCAA Women's Softball Field is under construction and will provide a competition-level practice and performance field for the ISU women's softball team.

Historic Davis Field provides a well-maintained, multi-use field and outdoor running track where Idaho State University hosts a variety of events including soccer and track tournaments and Special Olympics. Bartz Field is a 30 acre, dog-friendly field used for events such as softball, archery, sledding, cross country, golf, and rugby. The Pocatello Greenway passes through the campus above Davis Field, connecting with 13 miles of trail through the Portneuf Valley.

Outdoor recreation opportunities abound on the many acres of developed and undeveloped campus grounds. A disc golf course, challenging cross-country track, vertical challenge tower, bike trails, jogging trails, hiking areas, and walking paths are part of the Idaho State University campus. Softball, track, ultimate frisbee, soccer, and rugby are all options for the active student. Summer and winter sports, including rock climbing, skiing and snowboarding, are also available only minutes away in the beautiful mountains surrounding the city. Just 35 miles away, located in the mountainous valley of the Portneuf River on the old route of the Oregon Trail and California Trail, the city of Lava Hot Springs is a popular resort location, noted for its numerous hot springs amenable to bathing, an Olympic-size swimming pool, and unique shops and restaurants.

The ISU-Idaho Falls campus provides modern classroom facilities and a student union. The university also has many outreach centers available to assist students in Southeast Idaho, Twin Falls, and Meridian.

## Bookstore

The Idaho State University Bookstore, located in the lower level of the Pond Student Union Building, carries a large selection of new and used textbooks, software, office supplies, Idaho State University clothing, and general interest books.

Regular Bookstore hours are 8 a.m. - 5 p.m. Monday through Friday, and 10 a.m. - 2 p.m. Saturdays, with extended hours during registration. Call the Bookstore at (208) 282-3237 (in Pocatello) or 1-800-688-4781 (outside Pocatello) for more information.

Textbooks may be purchased online using our <http://www.efollett.com> service.

The Bookstore maintains a branch office in Idaho Falls (Idaho State University-Idaho Falls, (208) 282-7940).

Students should purchase textbooks as early as possible to ensure good selection. A full refund will be paid for unmarked books, accompanied by the original sales slip, that are returned by the 7th day from the start of Fall or Spring semester. Books that are marked or damaged will be refunded at the used book price.

## Idaho Museum of Natural History

<http://imnh.isu.edu/home/>

The Idaho Museum of Natural History was founded by legislative proclamation in 1977. At that time, the museum received its state-mandated mission to enhance in the citizens of Idaho and visitors an understanding of and delight in Idaho's natural and cultural heritage. The museum has four divisions: Anthropology, Earth Science, Life Science, and Public Programs. Each of the first three divisions is headed by a Research Curator, with other affiliate curators and collections managers. Significant collections include the Anthropology ethnographic collections, the Earl R. Swanson Archaeological Repository, extensive collections in vertebrate and invertebrate paleontology, and the Ray J. Davis Herbarium. The museum houses the Idaho Virtualization Laboratory and the Center for Archaeology, Materials, and Applied Spectroscopy (CAMAS). Affiliated research institutes include the GIS Training and Research Center, the Informatics Research Institute, and the Don Crabtree Experimental Archaeology Lab.

Curators in Anthropology, Earth Science and Life Science lead national and international research. Our active research profile supports acquisition and use of collections for all areas of natural history research and education. ISU faculty and students have access to museum collections for instruction, training, and graduate theses and dissertations.

Our Public Programs Division develops and implements programs and exhibitions on a wide range of science topics, emphasizing current museum research and environmental and ecological themes. These programs are both university level and for K-12 education.

The museum offers undergraduate and graduate students educational credits under the museum subject code (MUSE) and through courses in Anthropology, Biology, Education, Geo-sciences, History, and other affiliated Idaho State University departments. See Idaho Museum of Natural History course descriptions (<http://coursecat.isu.edu/artsandletters/idahomuseumofnaturalhistory/#courseinventory>) in the College of Arts and Letters section of the catalog.

The Idaho Museum of Natural History gallery is open from 12:30 - 5 p.m., Wednesday through Friday, 10-5 p.m. Saturday, except for Federal and State holidays. Admission to the museum is \$5 for adults and \$1 for children K-12.

## Information Technology Services

Idaho State University's Information Technology Services (ITS) is dedicated to meeting the computing needs of ISU's students. ITS maintains eight full service student computer labs in Pocatello, three in Idaho Falls, two in Meridian, and one in Twin Falls. They also provide kiosk computers in numerous locations throughout campus to provide fast and convenient stand-up email and internet access. And, finally, ITS provides wireless access for students on campus who have their own mobile devices.

Many individual departments operate additional computer labs (partially supported by ITS) which often feature specialized discipline-specific software. Use of the general ITS computer labs, kiosks, wireless network and most departmental labs require the purchase of an ISU Computer Account (currently \$35 per semester and \$30 for summer). Up to \$25 worth of black and white printing is included with a computer account. Some courses require computer accounts.

New computer accounts may be purchased at the IT Service Desk in Pocatello (BA-B9 and Rendezvous Computer Lab), and in the ISU Idaho Falls, Twin Falls, and Meridian computer labs. Students who currently have a computer account can renew their account online or in person.

The IT Service Desk, 208-282-HELP (4357) or [help@isu.edu](mailto:help@isu.edu), provides technology support to students accessing IT services, such as Moodle, BengalWeb, or e-mail. Students may also visit our IT Service Desk locations wherever computer accounts are sold (locations listed above).

BengalWeb (ISU's electronic portal) provides one-stop, personalized access to all of ISU's electronic resources. Students can use it to register for classes, print out class schedules, find book lists, check on financial aid, pay for classes and fees, and check their grades. It also provides links to campus news, advising, housing, the library, movie schedules, and much more. All admitted students have access to BengalWeb at <http://BengalWeb.isu.edu>.

All ISU students are automatically given a free ISU email account for life. ISU uses this account for all official communication, from waitlist notifications to pending deadlines. Students should check their ISU email often or have it forwarded to their preferred email address. Students who need help accessing BengalWeb or their ISU email should contact the ISU Service Desk at (208) 282-HELP (4357).

## Student Unions

Idaho State University offers student union services in three locations: the Earl R. Pond Student Union and Hypostyle (Pocatello lower campus), the Samuel H. Bennion Student Union (Idaho Falls), and Union facilities in the new Rendezvous Center (Pocatello mid campus). These locations serve the campus as focal points for experiential education and provide student opportunities for campus employment.

The Earl R. Pond Student Union provides students with: lounges, check cashing service, automatic teller machine, food service, bowling, billiards, movie theater, computer lab, copy service, ballroom, barber shop, bookstore, meeting rooms, guest rooms, and much more. This facility is in constant use by students, organizations, university departments, and community groups.

The Pond Student Union and the Union Hypostyle house offices for the Associated Students of Idaho State University (ASISU); Student Affairs, including the Vice President for Student Affairs, Associate Dean of Students (University Judicial Officer), The Bengal student newspaper, the Outdoor Adventure Center (comprised of C.W. HOG, Outdoor Program, and Outdoor Adventure Rentals), Craft Shop, Idaho State University Mail Center, KISU-FM Public Radio, New Student Orientation, Scheduling and Event Services, Student Activities Board (SAB), Student Organizations and Greek Life, Union Program Council (UPC), University Food Services, an ISU Credit Union branch, and the Bengal Card Services office.

The Samuel H. Bennion Student Union provides students with: lounges, automatic teller machine, food service areas, computer lab, multi-purpose room, bookstore, meeting rooms, the Student Health Center, TRiO Student Services, Parking and Bengal Card Services, Counseling, Testing, Career Services, Early Learning Center, and the offices of Student Services.

The Rendezvous Center brings additional student lounging areas, automatic teller machine, food service areas, computer lab, meetings rooms, and convenience store.

## University Housing

<http://www.isu.edu/housing>

<mailto:reslife@isu.edu>

208-282-2120

745 S. 5th Avenue, Stop 8083

Pocatello, ID 83209-8083

According to the American Council on Education, students who live on campus are more likely to succeed academically than students who live off campus. This includes earning higher grades and being more likely to complete a college degree. University Housing is here to contribute to your success at Idaho State University.

### Housing Options

University Housing offers traditional residence halls and suites, as well as apartments. Traditional age first-year students are eligible to live in either the residence halls or the suites; however, returning students have priority and availability in the suites can be limited. On-campus apartments are available for sophomores and above, married students, and students with children. Floor plans and photos, as well as pricing, can be found at <http://www.isu.edu/housing>. The housing fee covers all utilities and basic cable television. On-campus housing is within the university's wireless internet network, but beware that use of internet service requires an ISU computer account, for which a fee is charged per semester.

### Food Service

University food service is required for first-year students living in the residence halls, and is an option for other students, regardless of whether they live on campus.

### To Apply

Applying for University Housing is separate from application to Idaho State University. Housing applications are completed and submitted online. To apply, simply go to the Housing website (<http://www.isu.edu/housing>) and then click the "Apply Now" link. Then select either the residence hall or apartment application. If you have questions please email [reslife@isu.edu](mailto:reslife@isu.edu).

## University Library

The University Library, named for its past director, Eli M. Oboler, contains major collections of books, periodicals, electronic resources, maps, microforms, and government publications and provides a full range of services to students, faculty, and staff. The library collection of 700,377 book and serial volumes and its 4,576 active journal subscriptions in all formats are accessible through its automated catalog and circulation system, or it's A-Z Journal List, both available through the library web page at <http://www.isu.edu/library/>. In addition, the library provides access to numerous databases, many of them with full-text content providing access to an additional 63,711 journals. The University Library has been a depository for federal publications since 1908 and for state of Idaho publications since 1972. The government publications collection contains over 445,024 printed items and approximately 1,964,868 items published in microform.

General reference service is provided on the first floor, where librarians are available to assist patrons in the use of over 89 databases and other reference resources. Library instruction is available to classes and student groups and is tailored to address students' specific needs, from general library orientation to subject-specific bibliographic research. In addition to supplying informational materials from its own collections, the library provides an inter-library loan service, equipped to locate and deliver books and periodical articles from other libraries' holdings. Using online electronic ordering and transmission, as well as postal services, the inter-library loan service fills most requests within a week, but students should allow a two-week turnaround time.

The Idaho Health Sciences Library, a department of the Eli M. Oboler Library, supports the health sciences information needs of the university and the Idaho health care community. It also provides specialized health science reference, research and instruction services. The Arthur P. Oliver Law Library, located on the first floor of the Eli M. Oboler Library, houses more than 13,000 law books. An excellent reference resource for students, faculty, and staff, it is supplemented with legal databases.

## Idaho Falls

The University Library Center at Idaho State University-Idaho Falls provides reference services, a limited reference collection, and a study area for Idaho State University students. Also available are public access workstations on which students and faculty are able to access most of the information databases available to students at the main campus. With the assistance of trained staff, students are able to request the delivery of books and journal articles from the University Library.

## Twin Falls and Lewiston

The Oboler Library has agreements with the libraries at the College of Southern Idaho and at Lewis-Clark State College. These agreements ensure strong library support for Idaho State University students in the Twin Falls and the Lewiston areas. Under these agreements, students are able to access the two libraries and check out materials. They also receive full reference, instruction, inter-library loan, and database searching services. On-line access is available to Idaho State University Library databases and the catalog.

## Meridian

A similar agreement in Meridian provides ISU students and faculty the same library privileges accorded to Boise State University students and faculty upon presentation of their Idaho State University identification card.

For more detailed information regarding Library services, including hours of service and policies, visit the library website at <http://www.isu.edu/library>.

## Library Course

LLIB 1115 **Information Research 1 credit.** Develop life-long strategies for recognizing when you need information, locating it, evaluating it, and using it effectively and ethically. Explore a variety of tools and formats in order to find sources worth using/citing in support of academic projects. Equivalent to ACAD 1115. F, S

## Graduate Programs and Graduate Courses

Idaho State University offers many master's and several doctoral programs as well as a Family Practice Residency Training Program for physicians. Numerous graduate courses are delivered in almost all disciplines. Undergraduates who are last semester seniors may take up to six credits at the graduate level in the 5000 series with permission. Enrollment in graduate courses requires admission to graduate school, except the professional development courses which are the 5597 series. For additional information regarding graduate courses and programs of study, please see the *Graduate Catalog*.

## Registration

### Registration

Questions about academic regulations or registration should be directed to:

Office of the Registrar  
921 S 8th Ave Stop 8196  
Pocatello ID 83209-8196  
(208) 282-2661  
[reginfo@isu.edu](mailto:reginfo@isu.edu)

## New Students

You must apply for and be accepted for admission. Contact the Central Academic Advising Office to complete the Fundamentals of Advisement and Registration (Mandatory Advising) session (online at [www.isu.edu/advising/](http://www.isu.edu/advising/)) and for assistance with registration.

## Transfer Students

You must apply for and be accepted for admission. After notification of admittance, you must complete the online Transfer Fundamentals of Advisement and Registration session at [www.isu.edu/advising/](http://www.isu.edu/advising/); upon completion, you should make an appointment with your major advisor.

## Former Students

If you are a student who has attended within the last eight semesters, you are eligible to register for classes without readmission. However, your program of study may require separate departmental readmission. Also, if any prior restrictions exist, they must be cleared. You are required to provide the Office of Admissions with current address, telephone number, major, and a transcript from any university or college you have attended and have not

previously reported. You are encouraged to contact the Office of Admissions to indicate your intent to reenroll. Former students NOT enrolled for eight semesters must reapply. Once accepted, make an appointment with your major advisor.

## Continuing Students

Students who major within the College of Science and Engineering, the College of Pharmacy, or selected departments within the Division of Health Sciences, must see their advisor before attempting to register.

All students are expected to know academic requirements and policies. They are also expected to assume major responsibility for planning their individual programs of study in accordance with university and major requirements and policies, as described in the Undergraduate Catalog.

## Academic Calendar

The Academic Calendar is available online at: [www.isu.edu/areg/acadclnd.shtml](http://www.isu.edu/areg/acadclnd.shtml) or from the ISU homepage at [www.isu.edu](http://www.isu.edu). Choose "Quick Links;" then choose "Calendars/Schedules."

Students are expected to know the Add/Drop and Withdrawal deadlines for the semester and any sessions within a semester.

## Class Schedule

The class schedule is available online and may be accessed by students and non-students alike by navigating as follows: From the ISU homepage at [www.isu.edu](http://www.isu.edu), choose "Quick Links;" then choose "Class Schedule." Enrolled students should access the class schedule through BengalWeb. Instructions for using the system are at <http://www.isu.edu/tigeri/bengalweb/ClassScheduleStudents.shtml>.

## Registration Schedule

Registration activity can be performed 24 hours a day through BengalWeb (<https://bengalweb.isu.edu>). The dates that registration opens for a particular semester can be found at: [www.isu.edu/areg/regtime.shtml](http://www.isu.edu/areg/regtime.shtml).

## Class Level

Sophomore: 26 credit hours

Junior: 58 credit hours

Senior: 90 credit hours

## Part-Time/Full-Time Student Status

To be considered a full-time student for academic and financial aid purposes, an undergraduate must be enrolled for 12 or more credits. Graduate students are full time when enrolled for 9 or more credits.

For financial aid purposes, an undergraduate may qualify for half-time financial aid when enrolled for 6-8 credits, and three-quarter time financial aid when enrolled for 9-11 credits (for a semester or any of the sessions within the semester).

Please contact ASISU to determine eligibility for ASISU elective or appointed office.

**Please note: in order to graduate in four years, an undergraduate student must complete an average of 30 credits per year and all required coursework. Students paying by the credit hour pay "full-time" fees if taking 10 or 11 credits. However, full-time status depends on the credit hours attempted, not the fees actually paid.**

## Expenses

The following fee rates are subject to change without advance notice. (See Policy Statement (<http://coursecat.isu.edu/undergraduate/aboutISU>) concerning catalog contents at the beginning of this catalog.)

In general, the expenses for Idaho State University students may be divided into classifications of tuition and fees, board, and room. In addition to the fees listed, some courses may require the expense of special uniforms, protective clothing, field trip expenses, lab fees, special materials fees, etc.

## Enrollment Fees

### Academic Undergraduate and College of Technology Semester Fees, including Summer

The following fees are estimates and are subject to change. They are a sample of the generally charged fees, but the actual charges will be reflected on each student's billing. Summer semester fees are paid on a per credit basis. Additional class fees and program fees may be charged. Updated fees and other Financial Services information are found at <http://www.isu.edu/finserv/costinfo.shtml>. College of Technology students should consult with the Student Services Office at (208) 282-2622.

**Full-time (12 credit hours or more, per semester)**

Status	Amount
Resident	\$3,283.00 + insurance*
Non-resident	\$9,663.00 + insurance*

**Part-time (1-11 credits)**

Status	Amount
Resident	\$328.00 per credit hour
Non-resident	\$535.00 per credit hour

\* All full-time academic undergraduate students taking twelve (12) or more credit hours, graduate students taking nine (9) or more credits, and international students taking one (1) or more credits are automatically enrolled in the student health insurance plan. College of Technology students are also automatically enrolled in the student health insurance plan. This premium is added to their fees each semester or session. Any student with existing health insurance coverage may be exempt from participation in the Student Insurance Plan by completing and filing a Health Insurance Waiver each academic year. For any questions regarding coverage, premium, or enrollment, contact the Student Health Insurance Office at (208) 282-2972. You can also get more information by visiting [www.isu.edu/stuhlth/insurance/](http://www.isu.edu/stuhlth/insurance/).

**Audit Fee:**

Same as part-time credit hour fees

**Student Health Insurance Fee**

All full-time fee paying students, and all International students taking 1 credit or more

Status	Amount
Fall Semester	\$1,251
Spring Semester	\$1,251
Summer Semester	\$625
Any 8-week session	\$469.25

Any student with existing health insurance coverage may become exempt from participating in the Student Insurance Plan by completing and filing a Health Insurance Waiver each academic year. For more information, contact the Student Health Insurance Office, (208) 282-2972.

**Room and Board Expenses**

All rates include all utilities. The expenses shown on the website given below do not include the cost of laundry, bedding, books, or personal items. A refundable multipurpose deposit is collected. These prices are subject to change. The most current information will be found online at <http://www.isu.edu/housing/>.

**Refund Policy on Room and Board Fees**

Students who fail to complete their agreement with the University Housing Office will have their board fees prorated and, after appropriate penalties have been deducted, may receive a refund. See the Terms and Conditions of Residence section of the Residence Life and Apartment Agreements for details on the penalties for room violations.

**Class Fees**

Many university classes require additional fees for specialized instruction and/or supplies. See the Class Schedule ([https://ssb.isu.edu/bprod/bwckschd.p\\_disp\\_dyn\\_sched](https://ssb.isu.edu/bprod/bwckschd.p_disp_dyn_sched)) for class fees required for specific courses. A listing of current class fees by semester is published here: <http://www.isu.edu/finserv/costinfo.shtml>

**Professional Fees****Dental Hygiene (Semester Fee)**

Status	Amount
Junior/Senior	\$288

**Medical Laboratory Science**

Fee	Amount
Semester Fee	\$470

## Nursing, Bachelor's Degree

Fee	Amount
Semester Fee	\$861

## Occupational Therapy Professional Fees (per semester)

Status	Amount
Resident	\$1,160
Nonresident	\$3,425

## Paramedic Science, Associate Degree

Fee	Amount
Semester Fee	\$656
8-week Summer Session	\$328

## Pharmacy Professional Fee (per semester)

Status	Amount
Resident	\$4,839
Non-Resident	\$7,209

## PharmD Non-Traditional

Fee	Amount
Rate A: entered program 2004 to Summer 2010	
Resident	\$339 per credit
Non-Resident	\$370 per credit
Rate B: entered program Summer 2010 and after	
Resident	\$471 per credit
Non-Resident	\$570 per credit

## Radiographic Science

Fee	Amount
Semester Fee	\$412

## Social Work Fees

Fee	Amount
Application Fee	\$30
Semester Fee	\$125

## Speech Language Pathology Online Pre-Professional Fee

Fee	Amount
Per credit fee	\$200

## Other Fees and Charges

### Application Fee

#### (Academic and College of Technology students)

Status	Amount
Undergraduate	\$50
Graduate	\$55

### Credit by Challenge Examination

Challenge examinations (arranged by petition) are charged per credit at the rate of 33% of the current cost per credit hour (payment required at Idaho State University Cashier's Office prior to taking the exam); more information is located under the heading, "Credit by Challenge Examination," in the Alternative Credit Opportunities (<http://coursecat.isu.edu/academicinformation/alternativecreditopportunities>) section of this catalog.

## Credit from College Level Examination Program (CLEP)

For information about CLEP examinations (taken at Counseling and Testing Center), see the website <http://www.isu.edu/ctc/> or contact the Counseling and Testing Center at **208-282-2130**.

## Credit Recording Fee\*

Fee	Amount
Credit Recording Fee	\$15/credit hour

(\* Per credit hour and in addition to evaluation fee; payable after evaluation.)

## Experiential Credit

Fee	Amount
Evaluation Fee*	\$50
Credit Recording Fee**	\$15

\* Per academic area evaluated; payable at Idaho State University Cashiers Office prior to evaluation process.

\*\* Per credit hour and in addition to evaluation fee; payable after evaluation.

## GED Transcript Fee

Fee	Amount
GED Transcript Fee	\$5

## Graduation/Diploma Fee

Fee	Amount
Graduation/Diploma Fee*	\$20

\* This fee is collected from each applicant for a certificate or for each associate, bachelor's, master's or doctoral degree.

## Late Registration Processing Charges

Students are expected to pay fees by the due date of fees, regardless of receipt of bill or financial aid availability. Please start early in arranging for fee payment, and check for options if you are having difficulty by calling (208) 282-3000. Account information is available in BengalWeb on the Finances tab.

- \$50 if tuition and fees are not paid by the due date, generally the Friday before classes start. Fees for classes starting later in the semester are due on the first day of class.
- Additional \$50 after last day to drop the class. Students allowed to pay fees after the tenth day of classes will be charged \$100 or more in late fees. Additional late fees may be charged for each month or portion in which fee payment is not complete.
- \$50 per month if fees have not been paid in full yet for the semester.
- \$25 per month if fees have been paid in full, then additional fees are charged and left unpaid.

No department or employee of the University, other than those specifically authorized, has the authority to waive the fee.

## Non-credit Course Fees

Fees are established to recover costs attributable to each unique presentation. Additional fees may be established to cover the cost of awarding Continuing Education Units (CEUs) if the course is one for which CEUs are awarded.

## Placement Testing Fee (Compass Tests)

Fee	Amount
Placement Testing Fee (Compass Tests)	\$5 per examination

## Remediation Fees

Payment of remediation fees is required for precollege courses, as follows:

Fee	Amount
Arithmetic/Pre-Algebra (MATH 015)	\$90
Elementary Algebra (MATH 025)	\$90
Basic Writing (ENGL 90)	\$75

## Transcript Fee

See information at <http://transcripts.isu.edu>.

## VTE Competency Credit Fee (College of Technology) - \$135.00

## Reduced Fee Options

### Senior Citizens

Residents of Idaho age 60 or over pay \$20.00 per semester plus \$5.00 per credit hour in place of basic registration fees listed above. They also pay any class fees or professional fees associated with their program or class selection. This rate does not apply to workshop courses 4498P or 5598P, which are charged at \$50.00 per credit plus class fees.

### Employees or spouses of employees qualifying for educational benefits

Students qualified under the employee/spouse benefit programs pay \$20.00 per semester plus \$5.00 per credit hour in place of basic registration fees listed above. They also pay any class fees or professional fees associated with their program or class selection. Graduate employees are taxed on fee reduction benefits exceeding IRS limits, and employees are taxed on their spouse's graduate fee reduction benefits. This rate also does not apply to 4498P or 5598P courses.

### Dependent children of qualifying employees

The ISU employee dependent child tuition reduction benefit provides for a 50 percent reduction of resident (in state) student tuition and general fees (Full-time fee or credit-hour fee) for dependent children of eligible ISU employees. Full benefit details and related forms are available in the Office of Human Resources or online at the educational benefits page.

### Professional Development workshops

4497/5597 classes set up as professional development workshops have special rates for those qualifying for educational inservice MOU (\$50.00 per credit plus class fees) or supervising teacher provisions of the Teacher Education Program (\$20.00 per semester plus \$5.00 per credit plus class fees). The inservice undergraduate rate for those not covered by MOU is \$103.00 per credit, and the inservice graduate rate is \$125.00 per credit. 4497/5597 workshop rates are limited to specific classes and students qualified by employment in Idaho school districts.

1198P/2298P/3398P/4498P/5598P professional development workshops will be charged a cost recovery workshop fee and a \$50.00 per credit recording fee.

## Refund Policy

The Refund Policy applies to all for-credit classes regardless of location of the class.

This policy does not include the advance deposits required by the College of Technology and by the Dental Hygiene, Physical Therapy, and Physician Assistant programs in the Division of Health Sciences.

When students enrolled in for-credit classes withdraw from Idaho State University or make schedule changes that reduce their total fee obligation, refunds are made on the following basis:

### General University fees paid without use of a fee reduction program:

1. Refunds are calculated and authorized by the Office of Finance and Administration. The drop/withdrawal date is the actual date the drop or withdrawal form is received by an authorized University office or automated system.
2. Refunds of registration charges for full-time fees, part-time credit hour fees, non-resident tuition, professional program fees, and departmental fees are calculated on the total amount of fees paid, using the first official day of the University semester or session as the starting date.
3. Federal refund provisions may supersede Idaho State University Refund Policy under certain conditions for federal financial aid recipients. The greater of (1) Idaho State University calculations or (2) Federal guidelines is refunded according to Federal refund requirements, when applicable.

## Refunds

### Academic and College of Technology Semester Classes

Before and during the first two weeks of classes: 100%

During the third week of classes: 50%

After the third week of classes: **NO REFUNDS**

### College of Technology Sessions

Before and during the first week of classes: 100%

During the second week of classes: 50%

After the second week of classes: **NO REFUNDS**

For classes, seminars and workshops with nonstandard starting and ending dates, refund requests are reviewed on an exception basis. The starting and ending dates are those designated by the University Registrar.

This policy does not include the advance deposit required by the College of Technology or academic departments.

## Nonrefundable Charges

1. State Board of Education-authorized reduced fee charges. (Examples include but are not limited to faculty/staff reduced fees, senior citizen - reduced fees, education contract classes, etc.)
2. Late processing charges.
3. Any amounts paid to satisfy fees/charges due from previous terms.
4. Amounts paid for student malpractice insurance.
5. Student Health Insurance premiums are not refunded under this policy. Please contact the Student Insurance Coordinator at (208) 282-2972 for Student Health Insurance refund provisions.

## Refunds for Exceptional Circumstances

In specific cases, as listed below, a full refund of the registration fee, credit hour fee, non-resident tuition and professional fees will be granted following official withdrawal from school, provided the withdrawal process is completed during the first half of the semester or session (i.e., first eight weeks of a semester, first four weeks of a session). Proper documentation must be presented and approval granted by the Office of Finance and Administration before the refund will be processed.

1. Military transfer of students who at the start of a semester are serving in the United States military in the Reserves, National Guard, or on active duty.
2. Incapacitating illness or injury which prevents the student from returning to school for the remainder of the term. A medical withdrawal must be processed through the University Student Health Center.
3. Death of a student.
4. Death of spouse, child, parent, or legal guardian of student.

## Deductions from Refunds

The University reserves the right to deduct from refunds any amounts due the University. Refunds of actual fees for the term, less any remaining fee loan balances for the term, are used to offset financial aid awarded as prioritized below:

1. Federal aid programs (see Financial Aids Handbook for priority).
2. Agency authorizations for payment of actual fees.
3. University authorizations specifically for the payment of fees (i.e., graduate teaching assistant, athletics, etc.)
4. Miscellaneous outstanding balances due the University.
5. University loan programs.
6. University and donor scholarship programs.

Any balance is refunded to the student.

## Payment of Refund

The student has the option of receiving a refund via check or e-refund. Refund checks or e-refunds are processed as soon as the student drops a class.

## Registration Refund Appeals

Contact the Office of Finance and Administration for information on the University registration fee refund appeal process. A Tuition and Fees Refund Appeals form can be found at [isu.edu/finserv/refundinfo.shtml](http://isu.edu/finserv/refundinfo.shtml) under How to Appeal for Tuition Refund.

## Delinquent Accounts

The Office of Finance and Administration may, without further notice, cancel current registration, withhold academic credit, place a hold on transcripts, or block future registration for any student with a delinquent account or unsatisfactory financial relationship with that office, provided the campus department in which the hold originated has attempted to notify the student. This regulation may be invoked at the discretion of the Vice President for Financial Services in cases of disregard in the settlement of returned checks, registration fees due, residence hall damage, library fines, telephone toll charges, overdue notes, traffic fines, room and/or board charges, apartment rental charges, etc.

## Dishonored Check Policy

A charge of \$20 is assessed each time a check is returned; this amount is charged to the student's account and s/he is so notified. If the check is not cleared within ten days, a second notice is sent and a hold placed on his/her records.

Any check tendered in payment of registration fees and subsequently returned by the bank will result in automatic postponement of the student's registration.

In the case of a check tendered in payment for room and board and subsequently returned by the bank, the student is notified immediately and allowed not more than five days for the check to clear. If not cleared within that time, the student's meal ticket and/or room reservation is canceled.

## Idaho Residency Requirements

### Idaho Residency Requirements for Fee Payment

See <http://www.isu.edu/areg/residency/residencyInfo.shtml> for the most complete and current information regarding residency requirements. Residency for tuition purposes is governed by Idaho Code § 33-3717 and the residency rules of the State Board of Education. Although a full-time regularly-enrolled resident student is not required to pay tuition while enrolled at Idaho State University, students are charged fees for educational costs excluding the cost of instruction in accordance with the Idaho State System of Higher Education "Notice to Nonresidents of the State of Idaho."

#### A student is a "resident" for purposes of fee payment if he or she:

1. has a parent or court-appointed guardian currently domiciled in Idaho who has maintained a bona fide domicile in Idaho for at least one year prior to the opening day of the term for which the student enrolls; or
2. receives less than 50% financial support from parents or guardians who are not residents of Idaho and has continuously resided in Idaho for at least 12 months prior to the opening day of the term for which the student enrolls and has established a bona fide domicile in Idaho primarily for purposes other than educational; or
3. is a graduate of an accredited secondary school in the state of Idaho and is enrolled in a college or university in Idaho during the semester immediately following such graduation regardless of the residence of his/her parents or guardians; or
4. is the spouse of an Idaho resident or person who qualifies for Idaho residency; or
5. is (or his/her spouse, parent or guardian is) an active duty member of the United States armed forces (only the U.S. Army, Navy, Air Force or Marine Corps) stationed in Idaho on military orders and the student receives 50% or more financial support from parent or guardian; or
6. is (or spouse, parent or guardian) an active duty member of the United States armed forces stationed in Idaho and the student receives 50% or more financial support from parent or guardian; or
7. is (or spouse, parent or guardian) an officer or enlisted member of the Idaho National Guard and the student receives 50% or more financial support from parent or guardian; or
8. is (or spouse, parent or guardian) separated, under honorable conditions from the United States armed forces (a certified copy of the DD-214 separation papers must be provided) after at least two years of active duty service and has Idaho as the home of record in service or elects Idaho as his/her intended domicile within one year of separation and enters a college or university in Idaho within one year of the date of separation and the student receives 50% or more financial support from parent or guardian; or
9. is a member of any one of the Idaho Native American Indian tribes (Coeur d'Alene, Shoshone-Paiute, Nez Perce, Shoshone-Bannock, Kootenai, or Eastern Shoshone), regardless of current domicile.

Any individual who has been domiciled in the state of Idaho, has qualified as a resident and would otherwise be qualified under the provisions of this statute and who is away from the state for a period of less than 30 months and has not established legal residence elsewhere provided a twelve (12) month period of continuous residency has been established immediately prior to departure is considered an Idaho resident for purposes of fee payment.

Direct specific questions to:

Idaho State University  
Office of the Registrar  
921 S 8th Ave Stop 8196  
Pocatello, ID 83209-8196  
(208)-282-2661

#### A "nonresident" student shall include:

1. Any student attending an institution in this state with the aid of financial assistance provided by another state or governmental unit or agency thereof. This non-residency status shall continue for one (1) year after the completion of the semester for which such assistance is last provided.
2. Any person who is not a citizen of the United States of America, who does not have permanent or temporary resident status or does not hold "refugee-parolee" or "conditional entrant" status with the U.S. Immigration and Naturalization Service or is not otherwise permanently residing in the U.S. under color of the law and who does not also meet and comply with all applicable requirements for establishing residency as covered under these provisions.

## Establishing a New Domicile in Idaho:

The establishment of a new domicile in Idaho by a person formerly domiciled in another state has occurred if such person is **physically present in Idaho primarily for purposes other than educational** and can show satisfactory proof that such person is without a present intention to return to such other state or to acquire a domicile at some other place outside of Idaho.

Residency decisions for fee payment purposes are made by the Office of the Registrar.

### **This notice provides for appeal from a final determination denying residency status in the following way:**

Appeal may be initiated by the filing of an action in the District Court of Bannock County wherein Idaho State University is located; an appeal from the District Court shall lie as in all civil actions.

Normal Idaho residency requirements shall be in force for students who apply for some special graduate and professional programs. These include but are not limited to the Idaho Dental Education Program (IDEP), the WAMI (Washington, Alaska, Montana, Idaho) Regional Medical Education Program; the University of Utah College of Medicine; the WOI (Washington, Oregon, Idaho) Regional Program in Veterinary Medicine; the Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Programs (medicine, optometry and occupational therapy) and Graduate Education Program.

**Students who initially enroll at Idaho State University as nonresidents and later wish to be considered for a change in residency status must submit an Idaho Residency Determination Worksheet (IRDW) with the appropriate documentation. IRDWs intended to change residency status for the current term are accepted through the tenth day of classes.**

*NOTE: It is the responsibility of the person requesting reclassification of residency status to provide clear and convincing evidence of bona fide domicile in Idaho.*

## Financial Aid and Scholarships

A significant number of students receive financial assistance at Idaho State University. Students frequently receive assistance from a variety of funding sources; e.g., a Pell Grant, plus an Idaho State University Freshman Scholarship, plus College Work Study.

Financial assistance programs are administered by various departments at Idaho State University. The following list identifies the types of financial funding available and the university office to contact for further information. If writing to any of the departments listed below, use the address format here:

Office Name  
921 S 8th Ave Stop 8xxx  
Pocatello ID 83209-8xxx

## Federal and State Financial Aid

Financial aid is help for meeting college costs – both direct educational costs (such as tuition, fees, books, etc.) and personal living expenses (such as food, housing, and transportation). Each year thousands of Idaho State University students rely upon student assistance funds to meet some of their college costs. The majority of these students rely upon federal and state government student assistance programs which are managed by the Financial Aid and Scholarship Office.

Major financial aid programs available through the Financial Aid and Scholarship Office include the following:

- Federal College Work Study
- Federal Perkins Loans
- Need-based Nonresident Waivers
- Federal TEACH grants
- Federal Supplemental Educational Opportunity Grants
- Federal Pell Grants
- Federal Student Loans
- Federal Parent Loans for Undergraduate Students
- Federal Graduate PLUS Loans

The application form used for financial aid programs through the Financial Aid Office is the Free Application for Federal Student Aid (FAFSA). The FAFSA will cover one full academic year – fall, spring and summer semesters. Students are encouraged to submit their FAFSA as early as possible, preferably after filing tax forms for the applicable year.

Financial Aid counselors are available to discuss students' concerns related to financial aid. The Financial Aid staff will describe the types of financial assistance available and will assist students with the application process. Financial Aid counselors can also assist students in determining the cost of attendance, how to manage money while in school, and how to identify alternative sources of funding.

Students must meet certain conditions in order to receive federal financial assistance through Idaho State University. The general conditions include the following: completion of a FAFSA to determine eligibility; admission and enrollment as a degree seeking student in an aid-eligible major; meet Financial Aid satisfactory academic progress policy; be a U.S. citizen or an eligible non-citizen; and not owe a refund or repayment on Title IV loans. Loans and work study require at least half-time enrollment. In some cases, students enrolled in fewer than six credits may qualify for Pell and TEACH grants.

To obtain more specific information, contact the Financial Aid Office, Room 337, Museum Building, 921 S 8th Ave, Stop 8077, Pocatello, ID 83209-8077, (208) 282-2756. Or use the Financial Aid and Scholarship Web page, <http://www.isu.edu/finaid/>.

## Scholarships

The majority of scholarships at Idaho State University are administered by the Associate Director of Scholarships with the assistance of various University committees. Scholarship funds are made possible through student fees, the generosity of individuals, and contributions of business, labor, fraternal, and professional organizations.

Scholarship criteria vary (i.e., minimum grade point average, financial need, major, etc). Scholarship announcements, including eligibility and application deadline information, are regularly distributed by the Scholarship Office through the Bengal Online Scholarship System (BOSS), to campus departments, and posted on the Scholarship Office bulletin boards located in the Hypostyle of the Pond Student Union Building. Please visit the Scholarship Office website (<http://www.isu.edu/scholar>) for a link to apply through the BOSS system as well as receive other valuable information. Individuals seeking information on scholarships should contact the Scholarship Office:

Scholarship Office  
Museum Building, Room 327  
921 South 8th Avenue, Stop 8391  
Pocatello, ID 83209-8391  
(208) 282-3315  
<http://www.isu.edu/scholar>

Non-resident tuition waivers are available to qualified students who demonstrate financial need (inquiries should be addressed to the Idaho State University Financial Aid and Scholarship Office), and to students who have demonstrated strong academic ability. Contact the Scholarships Office for Non-Resident Tuition Waiver information and applications.

## Scholarships for New Incoming (First Time) Freshman or Transfer Students

The Application for Admission to ISU is the application for scholarships and Non-Resident Tuition Waivers for new incoming (first time) freshmen and/or transfer students. February 15th is the deadline for Fall entry (new incoming freshman and transfer students). Spring entry deadline is November 1st (transfer students only). Scholarships are awarded based on academic merit and/or ACT/SAT scores.

## Idaho Falls Campus

### Idaho State University–Idaho Falls

Dean, Academic Programs:  
Lyle Castle, Ph.D.

Idaho State University–Idaho Falls  
350 University Place  
1784 Science Center Drive  
Idaho Falls, ID 83402

(208) 282-7800 from off campus  
<http://www.isu.edu/departments/ifche>

Idaho State University–Idaho Falls is the higher education center of one of Idaho's most dynamic cities. It offers a comprehensive general education curriculum as well as 29 complete degree programs, all from a Carnegie-classified research institution with more than 50 years of experience in helping Upper Snake River Valley residents achieve their goals. Idaho State University–Idaho Falls is the largest of Idaho State University's statewide network of higher education centers. It provides more than 2,000 students each semester the opportunity to complete associate, bachelor, master, and doctoral degrees in Idaho Falls, making it the city's hometown university. Conveniently located at University Place on the banks of the Snake River, Idaho State University–Idaho Falls' neighbors include the U.S. Department of Energy headquarters for the Idaho National Laboratory, and the new Center for Advanced Energy Studies.

Students at Idaho State University–Idaho Falls take classes that are not only close to home, but also just a short drive from a three-state region's commercial, health care, business and government centers. Upper Valley residents who are seeking continuing-education opportunities find electives as well as noncredit professional- and personal-development courses. Day and evening classes also are available. Among the many degree programs that can be completed at Idaho State University–Idaho Falls are associate degrees in biology, business, English, history, mathematics and physics; the M.B.A.; the B.S. in nuclear engineering; the Ph.D. in Engineering and Applied Science (Nuclear Engineering); the B.S. in nursing; and the M.Ed. and Ed.D.

Through its partnership with the University of Idaho, students can take classes from either university using a single admission, registration and fee-payment process. A partnership with Eastern Idaho Technical College makes health-professions education available close to the city's high-tech regional medical center.

Idaho State University–Idaho Falls' contemporary facilities include up-to-date computing labs, a large auditorium and student-services offices. A campus centerpiece is the Samuel H. Bennion Student Union that includes study and games areas, cafeteria, lounge, bookstore, and computer lab.

Between classes, students can cross-country ski at adjacent Freeman Park, jog on the paved riverside greenbelt, or watch University Place's resident bald eagles and ospreys soar above the river.

To learn how Idaho State University–Idaho Falls can help you achieve your goals conveniently and affordably, call (208) 282-7800; visit the campus at 1776 Science Center Drive; or browse online at <http://www.isu.edu/departments/ifche>.

## Meridian Campus

### Idaho State University–Meridian

Dean, Academic Programs:

Ms. Bessie Katsilometes

Idaho State University–Meridian

1311 E Central Dr.

Meridian ID 83642

(208) 373-1700

<http://www.isu.edu/meridian/>

In keeping with Idaho State University's mission to educate health professionals and address the need for graduates in the health disciplines, Idaho State University–Meridian offers several programs in the health professions.

Idaho State University–Meridian currently offers five undergraduate programs, including an Associate of Science in Paramedic Science, Bachelor of Science degrees in Communication Sciences and Disorders, Medical Laboratory Science, and Educational Interpreting, and a 16-month Fast Track Nursing program. Idaho State University–Meridian also offers 10 graduate degree programs, primarily in the health professions, including the third and fourth year in a Doctor of Audiology program. The College of Pharmacy in the Division of Health Sciences oversees third- and fourth-year professional pharmacy students, including clinical rotations in the Meridian area. Other programs housed at Idaho State University–Meridian include a dietetic internship and a dental residency program.

The campus covers approximately 40,000 square feet and houses classrooms, six distance learning rooms, two computer labs, a laboratory, and clinics for speech-language pathology, nursing, and counseling.

Student applications and enrollment materials are available at Idaho State University–Meridian.

## Twin Falls Campus

### Idaho State University–Twin Falls

Director, Academic Programs:

Ms. Chris Vaage

Idaho State University–Twin Falls

Evergreen Building, Suite B-40

College of Southern Idaho

PO Box 1238

Twin Falls, ID 83303

(208) 736-2101 • (208) 282-4840

<http://www.isu.edu/twinfalls/>

Idaho State University has offered courses in the Twin Falls area since the 1960s. As part of the university mission to serve southern Idaho students, a resident center was established in Twin Falls in 1981. The center was moved in 1992 to the Evergreen Building on the College of Southern Idaho campus, which also houses two state-of-the-art distance learning classrooms and a student computer laboratory networked with the Idaho State University campus in Pocatello. Three professionals and support staff advise students with curriculum questions and act as general advocates for commuting students.

Idaho State University-Twin Falls offers programs leading to one doctoral, four master's, and five baccalaureate degrees from the Colleges of Arts and Letters, Education, and Health Professions. Idaho State University-Twin Falls provides the upper-division and graduate work on a rotating schedule, while the general education requirements and most other lower-division courses are available through CSI. University professors and highly qualified local adjunct instructors ensure that course quality is equal to that found on the Pocatello campus.

An interactive telecommunications system has broadcast classes live from Pocatello to CSI since 1990. Courses in anthropology, biology, corporate training, education, English, geosciences, health education, history, library science, mass communication, nursing, pharmacy, political science, psychology, rhetorical studies, social work, sociology, women studies, and vocational education have all been presented in this way. Regularly scheduled courses are enhanced by courses Idaho State University delivers to area school districts for teacher development. Workshops and seminars in specific professional development areas are also available.

Access to Internet, email, and a large variety of software augments the Idaho State University student experience in a 20-station computer lab networked with the main campus. Twin Falls area Idaho State University students who have home computers with modems may access the network with a local phone call. Free computer workshops are routinely scheduled in the lab.

Other services include registration, fee payment, and assistance with university forms and information. In addition, a student commuter bus operates between Twin Falls and Pocatello.

## **Alumni Association**

### **Alumni Association and Foundations**

#### **Alumni Association**

[www.isu.edu/alumni](http://www.isu.edu/alumni)

[alumni@isu.edu](mailto:alumni@isu.edu)

The mission of the Idaho State University Alumni Association is to promote the welfare and to advance the objectives of Idaho State University through the sustained involvement of its alumni by providing philanthropic, intellectual, and social opportunities.

The association is governed by a board of directors and administered through the office of Alumni Relations, 554 S. 7th Avenue, Pocatello, in the H. F. Magnuson House.

Specific goals are to identify alumni and friends to assist Idaho State University in strengthening support from its constituencies, to inform alumni and friends about Idaho State University, to provide for the efficient management of the Alumni Association, and to involve and motivate alumni and students to maintain their affiliation and support of Idaho State University.

The officers and directors meet three times a year with the director of alumni relations, who is appointed by the university administration.

#### **Idaho State University Bengal Foundation**

The Idaho State University Bengal Foundation is a nonprofit organization formed to raise money for athletic scholarships. The main fund raising activities include an annual auction, scholarship fund drive, athlete-to-athlete phone-a-thon, several golf tournaments, and other special events held throughout the year.

The Bengal Foundation was officially formed in September of 1976. It is governed by a board of directors and administered through the office of the Bengal Foundation located in Holt Arena. For information on becoming a member, contact The Bengal Foundation at (208) 282-2397.

#### **Idaho State University Foundation, Inc.**

The Idaho State University Foundation is a nonprofit corporation established in 1967 under the laws of the state of Idaho.

The mission of the Idaho State University Foundation is to stimulate voluntary private support from alumni, parents, friends, corporations, foundations, and others for the benefit of Idaho State University.

The foundation raises and manages private resources supporting the mission and priorities of the university, and provides opportunities for students and a degree of institutional excellence unavailable with state funding levels.

The foundation is dedicated to assisting the university in the building of the endowment to address, through financial support, the long-term academic and other priorities of the university.

The foundation is responsible for identifying and nurturing relationships with potential donors and other friends of the university; soliciting cash, securities, real and intellectual property, and other private resources for the support of the university; and acknowledging and stewarding such gifts in accordance with donor intent and its fiduciary responsibilities.

The Idaho State University Foundation is located on the first floor of the Administration Building.

## Division of Continuing Education and Conference Services

Ms. Victoria Bañales, Director  
Division of Continuing Education and Conference Services  
1001 N 7th Ave. Stop 8062  
Pocatello ID 83209-8062  
(208) 282-3155  
extendedlearning@isu.edu  
<http://www.isu.edu/conteduc>

Continuing Education coordinates programs throughout Idaho State University as well as area businesses. Programs include courses and workshops for faculty and staff, professionals, businesses and educators, with emphasis on administering a wide variety of educational experiences for the community and surrounding region.

The general mission of Continuing Education is to provide high quality leadership and support services for continuing professional education and lifelong learning activities for all ages held throughout the university's service territory, with special emphasis on teacher education, health professions, and arts and sciences. Program sites in Idaho include Pocatello, Idaho Falls, Twin Falls, Ketchum/Sun Valley, and Meridian. Specific programs are also held nationally. Offerings include credit and non-credit programs, evening and weekend programs, short courses, web conferences, seminars, institutes, youth enrichment programs, customized training and conferences. Continuing Education administers the National Continuing Education Unit (CEU) (see below) in conjunction with the International Association for Continuing Education and Training. More than 15,000 people participate annually in 400 activities.

Programs served by Conference Services include the annual Idaho Conference on Health Care, Early Childhood Conference, Intermountain Conference on the Environment, and coordination of web conferences such as those produced by the National University Telecommunications Network (NUTN), PBS/Adult Learning Systems (ALS), and Worldwide Lessons in Leadership.

ISU's Division of Continuing Education, in partnership with Gatlin Education Services (GES), offers hundreds of engaging online courses for personal enrichment and/or professional development in a variety of industries and fields. For more information, visit <http://www.isu.edu/conteduc/>.

For a list of course offerings, to make suggestions for course offerings or potential instructors, or other desired information, write or telephone the address given above.

### CEU Program

The Continuing Education Unit is an internationally accepted method for quantifying the value of noncredit continuing education activities (defined as quality instruction that does not carry academic credit). Each contact hour in an approved workshop, in-service, conference session, short course or training program is recorded as 1/10 CEU. These do not accumulate for college credit. Noncredit continuing education programs that offer CEUs are most frequently sponsored by associations, agencies, educational institutions, business and industry for the benefit of members, registered participants, employees, etc. It communicates to participants the value that the sponsoring group places upon professional development, information updating, retraining and lifelong learning. There is a recording fee of \$20 per class to create a permanent transcript that is then available through the Idaho State University Registrar's Office upon written request.

### New Knowledge Adventures and Friends for Learning

Under the direction of the former Elderhostel organization, now known as Road Scholar, Idaho State University has developed these programs for Idahoans 50 years and older, featuring member-directed, peer-led programs throughout the fall and spring semesters, and short courses in a wide variety of areas. Members join for one semester at a time and all programs are open to them in Pocatello (New Knowledge Adventures (<http://www.isu.edu/dce/nka>)) and Idaho Falls (Friends for Learning (<http://friendsforlearning.com>)).

# Academic Information

---

## Academic Policies

Academic policies fall under the purview of the Office of Academic Affairs. The Office of Academic Affairs seeks the input, advice, and recommendations of faculty representative constituent groups as follows:

The **Faculty Senate** who represents the *University Faculty* in the initiation, consideration, recommendation, and implementation of policy within the purpose and powers of the *University Faculty*. The Faculty Senate considers matters referred to it by the *University Faculty*, Senators, the Provost/Vice President for Academic Affairs, the University President, or the President's representative. It recommends to the Provost changes in academic and other policies that affect the Faculty, and through the President recommends policy changes to the State Board of Education.

The **Undergraduate Curriculum Council** who is responsible for ensuring the quality and appropriateness of undergraduate courses and undergraduate degree programs offered by Idaho State University. All proposals for the addition of or changes in undergraduate courses and undergraduate degree programs must be approved by the Curriculum Council.

The **General Education Requirements Committee**, a subcommittee of the *Undergraduate Curriculum Council*, who is responsible for courses and policies that relate to the University's general education requirements for appropriateness, rigor, assessment, and to make recommendations based on these evaluations to the Undergraduate Curriculum Council.

The **Graduate Council** who is responsible for ensuring the quality and appropriateness of graduate courses and graduate degree programs. The Graduate Council provides recommendations concerning establishment and maintenance of requirements for graduation; allocation of privileges such as scholarships, honors, awards and grants-in-aid for graduate students; and the establishment of grade standards to be maintained by graduate students.

The **Research Council** who is responsible for advising the Vice President for Research on the formulation, review, and application of policies touching on research matters. The Research Council provides oversight of subcommittees involved in the peer review and administration of internal grant awards funded by the Vice President for Research.

## Courses Required of All Degree-Seeking Students

All degree-seeking students must fulfill departmental, General Education, and general graduation requirements for their particular fields of study. Departmental graduation requirements are course concentration requirements for a major in each field of study, and are listed under the college to which the department belongs. General Education requirements are course distribution requirements for particular degrees; all students pursuing a bachelor's academic associate degree must complete 8 of the 9 General Education Objectives (<http://coursecat.isu.edu/undergraduate/academicinformation/generaleducation>). Graduation requirements regarding credits, grades, and residence are common to all bachelor's degrees and are described in the Graduation Requirements (<http://coursecat.isu.edu/undergraduate/academicinformation/graduationrequirements>) section of this catalog.

## General Education

### The General Education Program

The General Education program at Idaho State University prepares students to be life-long, independent learners and active, culturally aware participants in diverse local, national, and global communities. As the foundation for all further studies, General Education promotes comprehensive literacy - including effective communication, mathematical, and technological skills; reasoning and creativity; and information literacy - and a broad knowledge base in the liberal arts.

#### **General Skills and Abilities:**

Through completing the General Education program, students will be able to

- Communicate effectively and clearly in standard written and spoken language
- Use mathematical language and quantitative reasoning effectively
- Think logically, critically, and creatively
- Locate relevant sources and use them critically and responsibly

### General Education Requirements: The Nine Objectives

All students must complete a minimum of 36 credits from the nine Core Objective areas as outlined below. All students must meet Objectives 1 through 6, Objective 9 and choose to meet either Objective 7 or 8.

If a student does not meet the minimum credits required (36) once all 9 Core Objective areas have been met, the student must complete additional coursework from any of the outlined Core Objective areas to meet the 36 credit minimum.

## Objective 1, Written English:

Minimum of one (1) course.

The goal of this Objective is to provide students the opportunity to learn to:

- Communicate effectively in standard written English.

### Courses that satisfy Objective 1:

ENGL 1102	Critical Reading and Writing <sup>1</sup>	3
HONS 1101	Honors Humanities I <sup>1</sup>	3

<sup>1</sup> Must obtain a minimum grade of C- or better.

## Objective 2, Spoken English:

Minimum of one (1) course.

The goals of this Objective are to provide students the opportunity to learn to:

- Communicate effectively in standard spoken English, and
- Communicate effectively in standard written English.

### One course satisfies the objective:

COMM 1101	Principles of Speech	3
-----------	----------------------	---

## Objective 3, Mathematics:

Minimum of one (1) course.

The goals of this Objective are to provide students the opportunity to learn to:

- Explain basic mathematical concepts;
- Apply basic techniques in solving mathematical problems;
- Interpret real-world problems in mathematical language; and
- Use mathematics to formulate appropriate conclusions for real-world problems.

### Courses that satisfy Objective 3:

MATH 1123	Mathematics in Modern Society	3
MATH 1127	The Language of Mathematics	3
MATH 1130	Finite Mathematics	3
MATH 1153	Introduction to Statistics	3
MATH 1160	Applied Calculus	3
MATH 1170	Calculus I	4
MATH 2256	Structure of Arithmetic for Elementary School Teachers	3
MATH 2257	Structure of Geometry and Probability for Elementary School Teachers	3
MGT 2216	Business Statistics	3
RCET 1372	Calc for Advanced Electronics	4

For further information about mathematics prerequisites and placement, see Placement in Mathematics (p. 55).

## Objective 4, Humanities, Fine Arts and Foreign Language:

Minimum of two (2) courses. Courses must be selected from **two different categories**: Humanities, Fine Arts, or Foreign Language.

The goals of this Objective are to provide students the opportunity to learn to:

- Demonstrate and apply basic terms and concepts in the Fine Arts and Humanities;
- Explain foundational influences or theories in the Fine Arts and Humanities; and
- Apply analytical skills as appropriate to the discipline.

**Courses that satisfy Objective 4:****Humanities**

EDUC 1110	Education and Schooling in the U.S.	3
ENGL 1110	Introduction to Literature	3
ENGL 1115	Major Themes in Literature	3
ENGL 1126	Art of Film I	3
ENGL 2257	Survey of World Literature I Beginnings through 16th Century	3
ENGL 2258	Survey of World Literature II 17th Century to Present	3
HONS 1102	Honors Humanities II	3
PHIL 1101	Introduction to Philosophy	3
PHIL 1103	Introduction to Ethics	3
TGE 1257	Applied Ethics in Technology	3

**Fine Arts**

ART 1100	Survey of Art	3
ART 1101	History of Western Art I	3
ART 1102	History of Western Art II	3
ART 2210/CMP 2250	History and Appreciation of Photography	3
DANC 1105	Survey of Dance	3
DANC 2205	Dance in the Modern Era	3
MUSC 1100	Introduction to Music	3
MUSC 1106	American Music	3
MUSC 1108	The World of Music	4
MUSC 1109	Survey of Jazz History	3
THEA 1101	Survey of Theatre	3

**Foreign Languages**

ANTH/SHOS 1101	Elementary Shoshoni I	4
ANTH/SHOS 1102	Elementary Shoshoni II	4
ARBC 1101	Elementary Arabic I	4
ARBC 1102	Elementary Arabic II	4
CHNS 1101	Elementary Chinese I	4
CHNS 1102	Elementary Chinese II	4
CSD 1151	American Sign Language I	3
CSD 1152	American Sign Language II	3
FREN 1101	Elementary French I	4
FREN 1102	Elementary French II	4
GERM 1101	Elementary German I	4
GERM 1102	Elementary German II	4
JAPN 1101	Elementary Japanese I	4
JAPN 1102	Elementary Japanese II	4
LATN 1101	Elementary Latin I	4
LATN 1102	Elementary Latin II	4
RUSS 1101	Elementary Russian I	4
RUSS 1102	Elementary Russian II	4
SPAN 1101	Elementary Spanish I	4
SPAN 1102	Elementary Spanish II	4

**Objective 5, Natural Science:**

Minimum of two (2) lecture courses and one (1) laboratory. Courses must be selected from **two different course prefixes**. One course must be from a Natural Science.

The goals of this Objective are to provide students the opportunity to learn to:

- Demonstrate and apply basic terms and concepts in the Natural, Applied or Health Sciences;
- Explain foundational influences or theories in the Natural, Applied or Health Sciences; and
- Apply analytical skills as appropriate to the Natural, Applied or Health Sciences.

#### Courses that satisfy Objective 5:

BIOL 1100 & 1100L	Concepts Biology Human Concerns and Concepts Biology Human Concerns Lab (designed for non-science, non-health related majors) <sup>N/L</sup>	4
BIOL 1101 & 1101L	Biology I and Biology I Lab (designed for students preparing for majors in science, pre-medical fields, and health related professions) <sup>N/L</sup>	4
CHEM 1100	Architecture of Matter <sup>N,L</sup>	4
CHEM 1101	Introduction to General Chemistry <sup>N</sup>	3
CHEM 1102 & CHEM 1103	Introduction to Organic and Biochemistry and Introduction to General Organic and Biochemistry Laboratory <sup>N/L</sup>	4
CHEM 1111 & 1111L	General Chemistry I and General Chemistry I Lab <sup>N/L</sup>	5
CHEM 1112 & 1112L	General Chemistry II and General Chemistry II Lab <sup>N/L</sup>	4
GEOL 1100 & 1100L	The Dynamic Earth and The Dynamic Earth Lab (this is the lab for students in Geoscience majors) <sup>N/L</sup>	4
GEOL 1101 & 1101L	Physical Geology and Physical Geology Lab <sup>N/L</sup>	4
GEOL 1110	Physical Geology for Scientists Laboratory <sup>L</sup>	1
NTD 2239	Nutrition <sup>H</sup>	3
PHYS 1100	Essentials of Physics <sup>N/L</sup>	4
PHYS 1101 & 1101L	Elements of Physics and Elements of Physics Laboratory <sup>N/L</sup>	4
PHYS 1111	General Physics <sup>N</sup>	3
PHYS 1112	General Physics II <sup>N</sup>	3
PHYS 1113	General Physics I Laboratory <sup>L</sup>	1
PHYS 1114	General Physics II Laboratory <sup>L</sup>	1
PHYS 1152	Descriptive Astronomy <sup>N</sup>	3
PHYS 1153	Descriptive Astronomy Laboratory <sup>L</sup>	1
PHYS 2211	Engineering Physics I <sup>N</sup>	4
PHYS 2212	Engineering Physics II <sup>N</sup>	4
PHYS 2213	Engineering Physics I Laboratory <sup>L</sup>	1
PHYS 2214	Engineering Physics II Laboratory <sup>L</sup>	1

H Courses with an H notation will apply to Objective 5 as a Health or Applied Science Lecture Course

L Courses with an L notation will apply to Objective 5 as a Laboratory Experience

N Courses with an N notation will apply to Objective 5 as a Natural Science Lecture Course

GEOL 1115 and 1115L (N/L) taken prior to Fall 2013 may also be used toward Objective 5.

## Objective 6, Behavioral and Social Science:

Minimum of two (2) courses. Courses must be selected from **two different course prefixes**.

The goals of this Objective are to provide students the opportunity to learn to:

- Demonstrate and apply basic terms and concepts in the Behavioral and Social Sciences;
- Explain foundational influences or theories in the Behavioral and Social Sciences; and
- Apply analytical skills as appropriate to the Behavioral and Social Sciences.

#### Courses satisfying Objective 6:

ANTH 1100	General Anthropology	3
ECON 1100	Economic Issues	3
ECON 2201	Principles of Macroeconomics	3
ECON 2202	Principles of Microeconomics	3
HIST 1101	Foundations of Europe	3
HIST 1102	Modern Europe	3
HIST 1111	US History I to 1865	3
HIST 1112	US History II 1865 to present	3
IS 2203	Introduction to International Organizations	3
POLS 1101	Introduction to United States Government	3
PSYC 1101	Introduction to General Psychology	3
SOC 1101	Introduction to Sociology	3
SOC 1102	Social Problems	3
TGE 1135	Work Place Relations	3

## Objective 7, Critical Thinking

Minimum of one (1) course from either Objective 7 or Objective 8.

Critical thinking is defined as the ability to think analytically, critically, creatively, and reflectively to make informed and logical judgements, draw reasoned and meaningful conclusions, and apply ideas to new contexts. Courses satisfying this Objective must include active learning.

The goals of this Objective are to provide students the opportunity to learn to:

- Formulate/frame problems and analyze how others do so;
- Recognize and apply appropriate practices for analyzing ambiguous problems;
- Identify and apply relevant information for problem solving;
- Create, analyze, and evaluate/interpret diverse perspectives and solutions;
- Establish a reasoned framework for drawing conclusions and/or recommending solutions; and
- Effectively articulate the results of a thinking process.

#### Courses satisfying Objective 7:

ANTH/ENGL/LANG 1107	Nature of Language	3
CS 1181	Computer Science and Programming I	3
HIST 1118	US History and Culture	3
HIST 1120	Global History Since 1500	3
PHIL 2201	Introduction to Logic	3
POLS 2202	Introduction to Politics Critical Thinking and Analysis	3
SOC 2248	Critical Analysis of Social Diversity	3
THEA 1118	Oral Interpretation of Literature	3
THEA 2251	Fundamentals of Acting	3

## Objective 8, Information Literacy

Minimum of one (1) course from either Objective 7 or Objective 8.

Information literacy is defined as the ability to recognize when information is needed and to locate, evaluate, and use information effectively. Courses satisfying this Objective must involve hands-on practice for students rather than merely the presentation of theoretical principles.

The goals of this Objective are to provide students the opportunity to learn to:

- Determine the nature and extent of the information/data needed to accomplish a specific purpose;
- Identify sources and gather information/data effectively and efficiently;
- Evaluate credibility of sources and information/data;
- Understand the economics, ethical, legal, and social issues surrounding the creation, collection, and use of information/data; and
- Use information/data effectively to accomplish a specific purpose.

**Courses satisfying Objective 8:**

FIN 1115	Personal Finance	3
GEOL 1108	Exploring Data and Information	3
HIST 2291	The Historian's Craft	3
INFO 1101	Digital Information Literacy	3
LLIB 1115	Introduction to Information Research	3

**Objective 9, Cultural Diversity:**

Minimum of one (1) course.\*

The goals of this Objective are to provide students the opportunity to learn to:

- Identify the defining characteristics of culturally diverse communities in regional, national, or global contexts;
- Describe the influence of cultural attributes such as ability, age, class, epistemology, ethnicity, gender, language, nationality, politics, or religion inherent in different cultures or communities; and
- Apply knowledge of diverse cultures to address contemporary or historical issues.

**Courses satisfying Objective 9:**

ANTH/SHOS 2201	Intermediate Shoshoni I	4
ANTH/SHOS 2202	Intermediate Shoshoni II	4
ANTH/ENGL 2212	Introduction to Folklore and Oral Tradition	3
ANTH 2237	Peoples and Cultures of the Old World	3
ANTH 2238	Peoples and Cultures of the New World	3
ANTH 2239	Latino Peoples and Cultures	3
ARBC 2201	Intermediate Arabic I	4
ARBC 2202	Intermediate Arabic II	4
CHNS 2201	Intermediate Chinese I	4
CHNS 2202	Intermediate Chinese II	4
CMLT 2207	Contemporary European Culture	3
CMLT 2208	Cultures of the Spanish Speaking World	3
CMLT 2209	Cultures of East Asia	3
CSD 2256	Deaf Culture and Community	3
EDUC 2204	Families Community Culture	3
ENGL 2210	American Cultural Studies	3
FREN 2201	Intermediate French I	4
FREN 2202	Intermediate French II	4
GERM 2201	Intermediate German I	4
GERM 2202	Intermediate German II	4
HIST 2249	World Regional Geography	3
HIST 2251	Latin America	3
HIST 2252	East Asian History	3
HIST 2254	Middle Eastern Civilization	3
HIST 2255	African History and Culture	3
IS 2202	The World Today:Introduction to Global Issues	3
JAPN 2201	Intermediate Japanese I	4
JAPN 2202	Intermediate Japanese II	4
LATN 2201	Intermediate Latin I	4

LATN 2202	Intermediate Latin II	4
PHIL 2210	Introduction to Asian Philosophies	3
RUSS 2201	Intermediate Russian I	4
RUSS 2202	Intermediate Russian II	4
SPAN 2201	Intermediate Spanish I	4
SPAN 2202	Intermediate Spanish II	4
WS 2201	Introduction to Womens Studies	3

\*Credit by CLEP exam does not fulfill Objective 9, the Cultural Diversity Objective.

## Graduation Requirements

### Graduation Requirements

In addition to departmental requirements provided elsewhere in this catalog, the requirements for graduation from Idaho State University are in several broad categories, each of which is detailed below:

- 1) Graduation Application
- 2) Credit Requirements
- 3) Catalog Requirements
- 4) Grade Requirements

Degrees, diplomas, or certificates may not be granted unless all requirements are fulfilled. A certificate or degree awarded in error, or upon fraudulent claims, will be withdrawn immediately and the student record corrected accordingly.

### Graduation Application

Students planning to graduate should complete a graduation application no less than one semester before all requirements are completed.

Graduation applications for December and May candidates will not be accepted after mid term week of the student's graduation semester.

Graduation applications for August candidates will not be accepted after the last day of spring semester.

Students will be notified by the Registrar's Office of any **university** course or credit deficiencies. Students must consult their advisors about **departmental** requirements. The graduation application must be approved by the student's major department chairperson and/or the college dean before the degree will be granted.

### How To Apply

#### **Academic Undergraduate Students**

- In person: Contact the Office of the Registrar, located in the Museum Building, Room 318, at (208) 282-4225 or (208)-282-4874.
- On-line: <https://bengalweb.isu.edu>

#### **College of Technology Students**

- In person: Student Services Office, located in the RFC Building, Room 184, at (208) 282-2622

#### **Graduate Students**

- In person: Contact the Graduate School, located in the Museum Building, Room 401, at (208) 282-2229
- On-line: <http://www.isu.edu/graduate>

### Graduation/Diploma Fee

Both undergraduate and graduate students are required to pay a \$20.00 graduation/diploma fee.

#### **Payment Options**

- Pay by credit card at <https://bengalweb.isu.edu>
- Pay in person:

Academic students:  
contact the Cashier's Office (<http://www.isu.edu/finserv/cashier.shtml>)

College of Technology students:

contact the Student Services Office (<http://www.isu.edu/ctech/studentservices>)

## Additional Deadlines

### **Transfer Work**

- All pending transfer work must be reported to the ISU graduation staff in the Office of the Registrar.
- Official transcripts with transfer work (including correspondence courses) must be received no later than four weeks after the date of graduation.

### **Incomplete Grades**

- All incomplete (I) or in-progress (IP) grades received in ISU courses must be cleared prior to posting of degrees.
- Change of grade forms must be received in the Office of the Registrar no later than two weeks after the date of graduation.

## Additional Information Website:

<http://www.isu.edu/areg/gradApp.shtml#>

## Credit Requirements

### **Idaho State University Resident Credit Requirements**

- Students earn “resident credits” for credit-bearing Idaho State University courses.
- For the Associate Degree, at least 16 credits in the major area of study must be resident credits, or 16 of the last 24 credits applied to the degree must be resident credits, as defined above.
- Of the last 50 credits applied to a bachelor’s degree, 32 must be resident credits, as defined above.
- At least 16 upper division credits required for the major must be resident credits, as defined above and approved by the department.
- At least 6 credits required for the minor must be resident credits, as defined above and approved by the department.
- Additional resident credit is granted as specified in the “Alternative Credit Opportunities” section of this catalog.

Certain pre-professional curricula allow completion of the fourth year in a professional school. In these cases, the last 32 credits of work taken before transfer to the professional school must be Idaho State University resident credits, as defined above.

Resident credit for graduate programs is addressed in the Graduate Catalog.

**Please note: Resident credits are not synonymous with Idaho State residency definitions for tuition purposes (see the section on “Idaho Residency Requirement for Fee Payment” (<http://coursecat.isu.edu/aboutISU/idahoresidencyrequirements>)) in the About Idaho State University section of this catalog.**

### **Bachelor’s Degree Credit Requirements**

At least 120 undergraduate credits are required for graduation with a bachelor’s degree, although some specific degrees and majors may require more to fulfill all major requirements. At least 36 of the credits counted toward graduation must be in upper division courses carrying 3000 or 4000 numbers. Sixteen of these credits must be earned in courses approved by department of the student’s major concentration.

Of the credits transferred from a junior college, no more than half the number required for graduation in a given four-year curriculum or the first four years of a longer program may be applied to meet the requirements of the curriculum. (70 credits will be allowed for Idaho junior college transfer students.) Transferred courses with grades of D may be used to meet course requirements for graduation unless the department in which the student is majoring requires that the courses be retaken. The department may refuse the application toward graduation of any transfer course in which the student has received a D grade.

Graduation requirements may be met by no more than the number of credits in certain groups as listed below.

- 48 credits by examination\*
- 32 credits in experiential learning\*
- 16 credits of correspondence courses\*
- 8 credits from Professional Development workshop courses.
- 8 credits of electives from an Idaho State University or transfer Professional Technical program.

\*See *Alternative Credit Opportunities* (<http://coursecat.isu.edu/academicinformation/alternativecreditopportunities>) in the *Academic Information* section of this catalog for specific information.

Not more than a total of 64 credits may be counted from the above areas.

- 32 credits in business or courses commonly available in a school of business unless the student is earning a Bachelor of Business Administration.
- 8 credits in organized music (Music majors may count 8 credits of organized music as free electives in addition to 50 credits)
- 8 credits in nonsectarian courses in religious education

- 8 credits in physical activity courses (including all PEAC courses, DAAC courses, and MSL 1110/PEAC 1110)
- 8 credits in speech and drama activity
- 4 credits in auto-tutorial foreign language courses.

It is further stipulated that not more than a total of 12 credits from the last five of the above may be counted.

## Catalog Requirements

Candidates for associate or bachelor's degrees may choose to fulfill the degree requirements stated in any one catalog in effect during their enrollment at Idaho State University, subject to the following stipulations:

1. Candidates for bachelor's degrees must use a catalog in effect the year that they were accepted into their major program or any later year. For majors without a formal acceptance process, the choice of catalog year begins with the year in which the student first files an intent to major in that field. For students who change majors, it begins with the year in which they changed majors.
2. The catalog cannot precede the academic year in which the student graduates by more than 8 years.
3. Selection of a catalog for certifying graduation requirements must be approved by the department's chair or program director.
4. Students with a gap in enrollment at the university for three years or more from the date of last attendance must meet degree requirements as outlined in the catalog in effect at the date of their re-enrollment, degree conferral date, or any subsequent catalog.
5. If a major program is discontinued by the university and the State Board of Education, students enrolled will be assisted in transferring to an equivalent program in the state. If there is no similar program within the state, currently enrolled students will be permitted to complete the program in accordance with existing graduation requirements.

Regardless of the catalog the student chooses, deviations may be required for accreditation, licensing, or State Board of Education mandates.

## Grade Requirements

An Idaho State University grade point average of 2.0 or higher is required for graduation. Certain allowances in the calculation of the average may be possible when a curriculum is changing or courses are repeated.

In addition, a grade point average of at least 2.0 is required for all courses taken at Idaho State University and those required by the department in which the major or minor is sought.

Individual departments may require a higher grade point average.

## Other Information Related to Graduation

### Revocation of Degrees

The university reserves the right to revoke a previously granted degree, either for failure to satisfy the degree requirements (i.e., a mistake in granting the degree), or for fraud or other academic misconduct on the part of the recipient discovered or acted upon after the degree has been awarded.

### Honors Designation at Graduation

Students who secure minimum grade point averages of 3.33 **and** also are in the top 10% of their respective college's graduating class are designated as graduating with honors. Those in the top 5% are designated as graduating with high honors. See also the University Honors Program information within the Student Success Center (<http://coursecat.isu.edu/servicesforstudents/studentssuccesscenter>) section of this catalog.

## Individualized Degree Programs

### Individualized Degree Programs

The degrees described below are administered by faculty committees that approve course choices designed to meet the student's goals. Degrees described here are:

- Bachelor of Applied Science or Bachelor of Applied Technology
- Associate of Arts and Bachelor of Arts in General Studies
- Bachelor of Science in Health Science
- Bachelor of University Studies

## Bachelor of Applied Science or Bachelor of Applied Technology

The Bachelor of Applied Science (BAS) and the Bachelor of Applied Technology (BAT) degrees are interdisciplinary degrees designed specifically for students who have completed Associate of Applied Science (AAS) degrees approved by the Idaho State Board of Education. The purpose of these degrees is to provide AAS graduates the opportunity to expand their general education competencies and to enhance the technical coursework of their AAS with related academic coursework. These degrees build upon the knowledge a student gained through the pursuit of the AAS while providing the

education and critical-thinking skills that open career opportunities. The BAS and BAT degrees are administered through the Student Services Office in the College of Technology. All individual degree plans are approved by assigned advisors and a committee.

The BAS/BAT degree includes the following credit requirements:

### Requirements for Robotics and Communication Systems Engineering Technology (3-year A.A.S)

Professional-Technical credits applied toward the BAT/BAS Degree	76
General Education Requirements, 16 credits of which will be completed in the A.A.S.	approx 32
Academic Coursework (all upper division credits earned beyond coursework completed for A.A.S. degree) *	18
<b>Total Credits Required</b>	<b>120</b>

### Requirements for all Other ISU CTech A.A.S. Programs\*

Professional-Technical credits applied toward the BAT/BAS Degree	up to 50
General Education Requirements, 16 credits of which will be completed in the A.A.S.	approximately 34
Academic Coursework (all upper division credits) *	36
<b>Total Credits Required</b>	<b>120</b>

\* A minimum of 12 of these credits must support the AAS technical coursework. All BAS/BAT students must earn a minimum of a 2.0 GPA in academic coursework for graduation. No more than 32 credits of the academic coursework may be taken from the College of Business. Upper division academic coursework must relate to the student's approved goal statement. It is recommended that 24 academic credits be completed after degree plan approval.

Out-of-state AAS degrees must be evaluated for meeting Idaho State Board of Education standards. If the AAS degree is over 5 years old, the student must be evaluated for currency in technical field.

After completing a minimum of 15 credit hours of BAS/BAT general education requirements and one semester of the technical program, the BAS/BAT student develops an individualized degree plan in consultation with both academic and technical advisors assigned to the student by the BAS / BAT committee chair in the College of Technology Student Services Office. Based on the student's concise and clearly written goal statement, the individualized degree plan will list the specific approved courses that meet the above described degree requirements. The degree plan and the goal statement must be approved by the BAS/BAT Committee.

For information contact:

#### College of Technology Student Services

RFC Building (Bldg #48)

(208)282-3939

<http://www.isu.edu/ctech/studentservices/>

## Bachelor of Arts in General Studies

This is a non-specialist degree program designed to meet the needs of students interested in broadly-based education in the liberal arts. It provides greater flexibility and breadth in subject matter than provided by traditional degree programs. See the Associate Dean for Social and Behavioral Sciences in the College of Arts and Letters for advising in this program.

#### This degree requires completion of the following program:

8 of the 9 General Education Objectives	36
Upper division courses in the fine arts and humanities and/or social and behavioral sciences	20
Upper division credits from programs in the College of Arts and Letters, College of Business, College of Education, College of Science and Engineering, or Division of Health Sciences	20
Electives from across the university	44
<b>Total Hours</b>	<b>120</b>

## Associate of Arts in General Studies

This degree requires completion of the General Education Requirements (<http://coursecat.isu.edu/academicinformation/generaleducation>) as outlined for the Bachelor of General Studies degree (above); 3 additional lower division credits in the arts and humanities; 3 additional lower division credits in the social and behavioral sciences; 6 additional lower division credits beyond the General Education Requirements from the Colleges of Arts and Letters, Business, Education, Science and Engineering, or the Division of Health Sciences; and elective credits from all across the university (please consult the restrictions on graduation credits from certain groups, as defined under Credit Requirements in the Graduation Requirements (<http://coursecat.isu.edu/academicinformation/graduationrequirements>) section of the catalog) to total 64 credit hours.

## Bachelor of Science in Health Science

The objective of the Bachelor of Science in Health Science (B.S.H.S.) program is to allow students who have graduated from or are enrolled in health occupations training at the level of an associate degree to pursue a bachelor's degree with an advanced general health science focus. This degree provides a curriculum for students who desire an education that can serve as a foundation for additional professional or graduate work in several health science professions, including medicine, dentistry, hospital administration, medical technology, physical therapy, and occupational therapy. All students are encouraged to work closely with their associate degree program advisors to ensure that the courses they plan to take will meet the students' specific career goals.

Students pursuing the Bachelor of Science in Health Science degree must complete all Objectives in the General Education Requirements (<http://coursecat.isu.edu/academicinformation/generaleducation>).

A student applying for this degree program must be a graduate of or be enrolled in a health occupations program that awards an associate degree. Out-of-state associate degrees must be evaluated for meeting the Idaho State Board of Education standards. If the associate degree is over five years old, the degree must be evaluated for currency in the technical field. Students with an Associate of Applied Science degree may transfer up to a maximum of 50 credits from this degree (all lower division credits).

See a complete description of this degree in the Division of Health Sciences (<http://coursecat.isu.edu/divisionhealth>) section of this catalog.

## Bachelor of University Studies

The Bachelor of University Studies (BUS) is an interdisciplinary degree designed for students whose educational and career goals are not addressed by traditional degree programs offered at Idaho State University. Formal application to the BUS program requires completion of a minimum of 24 semester hours, a 2.5 cumulative GPA, and an application packet that includes a statement of educational and career goals, a rationale for an individualized program of study, and a proposed selection of courses to meet stated goals. The BUS Committee will review and approve all applications. Once the BUS Committee grants approval for admission to candidacy, an advisory committee is appointed to assist the student in refining a program of study. Completion of US 4490 Capstone Project, a BUS Committee interview, and achievement of a 2.5 cumulative GPA are required for graduation; at least 120 total credits are necessary for this degree. The BUS degree requires careful and thoughtful planning. At least 24 semester credit hours (including 16 upper division hours) in a student's approved program of study must be taken after the semester in which admission to BUS was approved.

For information about this degree, contact:

**Director, Bachelor of University Studies Business Administration Bldg, Rm 248**

921 S 8th Avenue Stop 8087

Pocatello ID 83209-8087(208) 282-3204

<http://www.isu.edu/cal/BUS.shtml>

## Course Policies

### All-University Courses

Departments in colleges of the university may offer any of the following courses subject to adequate student interest. The following course numbers are regarded as "reserved" for these uses.

**1198P, 2298P, 3398P, 4498P Professional Development Workshop 0-3 credits.** New methods and opportunities to enhance and supplement skills. Subject to the approval of the dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option. May be repeated. May be graded S/U. Courses and course instructors are approved by the appropriate department chairs and college deans. Idaho State University maintains responsibility for the academic quality of all programs and courses through management and supervision by Idaho State University faculty and administrators. Credit for these courses is established using the same methods as a normal semester course (i.e. 15 contact hours equals one credit.). Course assignments and tests should be used for outcomes assessment and should be clearly linked to the course goals.

**1199, 2299, 3399, 4499 Experimental Courses 1-6 credits.** These are courses not described in the catalog. Title and number of credits are announced in the Class Schedule. Experimental courses may be offered no more than three times.

**4493 Senior Thesis 1-4 credits.** Supervised by a committee of at least two faculty members, the thesis must be approved by the chairperson(s) of the department(s) involved. The thesis topic may be interdisciplinary, with up to six credits total conferred by one or more departments. May be repeated for up to 6 credits. PREREQ: Senior standing and permission of chairperson(s) involved.

**4497 Professional Development 1-3 credits.** A course for practicing professionals (certified Idaho teachers) aimed at the development and improvement of skills. May not be applied to undergraduate or graduate degrees. May be repeated. May be graded S/U.

## Attendance

Students are expected to attend all meetings of classes in which they are registered. Students who do not attend any sessions of a class during the first week and have not made prior arrangements with the instructor may be dropped from the class by the instructor to make room for students who are interested in adding the class.

No student may be absent from the campus in connection with extracurricular activities more than sixteen college instructional days per semester. No one extracurricular activity may take students away from the campus more than twelve college instructional days.

## Auditing Courses

An auditor is a person who is permitted to attend a course as an observer without participating in class discussions or class activity or submitting work for a grade. Students must pay the part-time credit hour fee to audit a course. This fee is waived in the case of full fee paying students. A final grade of AU is recorded at the time of registration. Changing from audit to credit is not allowed at any time.

To register for audit, a student must submit a completed Schedule Change Card to the Office of the Registrar during the published Add/Drop period for the term. In a full semester course, students may not change from credit to audit after the 10th day of class. In an 8 week course, students may not change from credit to audit after the 5th day of class.

Schedule Change Cards are available at <http://www.isu.edu/areg/policy-proc/rr-forms.shtml>.

## Course Numbering

Courses numbered 0000-0099 do not carry academic credit. Courses numbered 1100-2299 are lower division courses for freshmen and sophomores, respectively.

Courses numbered 3300-4499 are upper division courses for juniors and seniors, respectively. Courses above 3300 are open without restrictions, except specific prerequisites, to students who have completed 58 credits. Other students may take such courses on approval of the instructor, advisor, and dean.

Courses numbered 66xx and 77xx are for students admitted into Graduate School only.

Courses numbered 99xx are currently reserved for the Doctor of Pharmacy (Pharm.D.) program.

## Course Scheduling

To assist with your academic planning, courses in the Undergraduate Catalog are designated according to the semester they are usually offered. Unanticipated faculty vacancies and academic program changes may affect future course scheduling. Therefore, students should always contact the academic department to verify future course offerings, especially when specific courses are needed for graduation.

The following letters which appear after the course descriptions indicate the anticipated course scheduling:

F = Fall Semester, every year

S = Spring Semester, every year

Se = Sequential; a series of courses is presented until all have been taught.

Su = Summer Semester, every year

EF, ES, ESu = Even-numbered years, Fall, Spring, or Summer Semester

OF, OS, OSu = Odd-numbered years, Fall, Spring, or Summer Semester

D = Students should contact the department to ask when this course will be offered.

R1 = Course is rotated every year, either Fall or Spring

R2 = Course is rotated every two years, either Fall or Spring

R3 = Course is rotated every three years, either Fall or Spring

W = Web (Internet) interactive course scheduled in conjunction with Idaho State University semester(s); contact department for details

## Cross-listing

Any university program leading to an academic degree that approves courses taught by College of Technology faculty for inclusion in the academic curriculum may cross-list the course(s) using the academic department's prefix and the College of Technology department's prefix.

## Prerequisites and Corequisites

Courses showing the abbreviation "COREQ" require simultaneous registration with each course named as a corequisite.

The abbreviation "PRE-or-COREQ" means that each course named may have been taken prior to or may be taken concurrently with the course for which it is required.

Courses showing the abbreviation "PREREQ" require the courses named as prerequisites to have been taken previously.

## Repeating Courses

A course in which an F grade is earned must be repeated if that course is required for graduation. Courses in which a D grade is earned must be repeated if the major department so requires. Also, a student may elect to repeat a course provided he/she has not completed a course for which that course was a prerequisite. If a course is repeated, the latest grade is used in computing grade point average unless the description includes language indicating the maximum number of credits for which the course may be repeated.

## Placement into English and Mathematics Courses

### Placement into English and Mathematics Courses

#### English

1. Students with an ACT English score below 18, a Compass score below 68, or an SAT score of 440 or lower register for ENGL 0090.
2. Students with an ACT English score of 18-24, a Compass score of 68-94, or an SAT score of 450-560 and students who have passed ENGL 0090 register for ENGL 1101.
3. Students with an ACT English score of 25-30 or an SAT score of 570-690 receive 3 ENGL 1101-equivalent credits and register for ENGL 1102.
4. Students with a Compass score of 95-99 register for ENGL 1102; credit for ENGL 1101 will be assigned with a grade of "Satisfactory" upon passing ENGL 1102, unless they already have a transcribed grade for ENGL 1101. The Compass Test cannot be used to replace an earned grade in a course for purposes of GPA calculation.

For questions regarding ACT scores over 30 or SAT scores of 700 or higher, contact the Department of English and Philosophy: (208) 282-2478.

#### Advanced Placement Options

1. Transfer students who have taken a three-credit freshman-level course in expository or argumentative writing which is equivalent to Idaho State University's ENGL 1101 course may proceed to ENGL 1102.
2. Students who have achieved scores of 3 or 4 on the Composition and Literature or the Language and Literature Advanced Placement Examination administered by Educational Testing Service receive a grade of "Satisfactory" and three ENGL 1101-equivalent credits. Students who receive a 5 on the same test(s) will receive two grades of "Satisfactory" and three ENGL 1101-equivalent credits and three ENGL 1102-equivalent credits.

Because Objective 1 courses advance acquisition of writing skills important for academic success, students are encouraged to complete them in a timely fashion. Accordingly, ENGL 1101 should normally be completed during the freshman year, ENGL 1102 by the conclusion of the sophomore year.

#### Mathematics

All mathematics courses except MATH 0015 have prerequisites. Students place into a course either by completing the prerequisite courses with a grade of C- or better or by achieving appropriate scores on the ACT exam, SAT exam, or Compass mathematics placement exam. For placement purposes, prerequisite coursework or placement examinations must have been taken within the last seven years.

The following diagram shows the chain of prerequisites for basic mathematics courses.

Figure 1. Objective 3 Prerequisite Tree

Courses that fulfill Objective 3 are underlined. The dotted lines indicate that MATH 1147 also fulfills the prerequisite for any course that has MATH 1143 as a prerequisite. Students should plan their mathematics coursework according to their intended majors. Some majors, for instance, require MATH 1153, and others require MATH 1160. Students who will take calculus must be especially careful to determine whether MATH 1160, Applied Calculus, or MATH 1170, Calculus I, is appropriate. Taking one after the other counts as a repeat and provides no further credit toward graduation. Students place into courses higher than MATH 0015 by achieving any one of the following scores on their ACT, SAT, or Compass placement examinations (Objective 3 courses are **bolded**):

MATH	ACT	SAT	Compass
0015 <sup>1</sup>	---	---	---
0025 <sup>2</sup>	16	390	46 on Prealgebra (MAPL 1)
1108, 1123, 1127 <sup>3</sup>	19	460	46 on Algebra (MAPL 2)
1130, 1143, 1147, 1153 <sup>4</sup>	23	540	61 on Algebra (MAPL 2)
1144, 1160, 2256, 2257 <sup>5</sup>	27	620	51 on College Algebra (MAPL 3)
1170 <sup>6</sup>	29	650	51 on Trigonometry (MAPL 4)

<sup>1</sup> There is no prerequisite course for MATH 0015, and no scores are necessary.

<sup>2</sup> A student must pass MATH 0015 or achieve one of the listed test scores to take MATH 0025.

<sup>3</sup> A student must pass MATH 0025 or achieve one of the listed test scores to take MATH 1108, MATH 1123, or MATH 1127.

<sup>4</sup> A student must pass MATH 1108 or achieve one of the listed test scores to take MATH 1130, MATH 1143, MATH 1147, or MATH 1153.

<sup>5</sup> A student must pass MATH 1143 or achieve one of the listed test scores to take MATH 1144, MATH 1160, MATH 2256, or MATH 2257.

<sup>6</sup> A student must pass MATH 1144 or MATH 1147 or achieve one of the listed test scores to take MATH 1170.

## Credit and Grading Policies

### Credit and Grading Policies

#### Credit or Credit Hour

The credit, sometimes referred to as semester credit or semester hour, is a unit of academic work. One credit is defined to require fifty minutes in a class each week for one semester (or the equivalent).

One semester credit hour in academic courses requires (1) fifty minutes in class each week for one semester (which assumes approximately twice this amount of time in study and preparation outside the classroom), or (2) approximately two and one-half hours in laboratory each week for a semester, or (3) equivalent combinations of (1) and (2). For purposes of equivalency calculations, a semester is assumed to be sixteen weeks. Short term courses of one week (five days) or more require time in class, laboratory, and preparation equivalent to the above for a total of 45 clock hours per credit.

#### Credits Allowed per Semester

Students may enroll for up to 18 credits per semester, and may enroll for a larger number with permission of the dean. To be eligible for participation in student activities, a student must be enrolled for at least 8 credits.

The number of credits awarded for a graduate thesis and other courses varies from department to department, and students may spread the registration for those credits over several semesters.

#### Grade Reports and Transcripts

Final grades are not automatically sent to students at the end of the semester. Students may access final grades electronically by logging on to <https://bengalweb.isu.edu>.

Current students and students who have attended since the Summer 2008 semester may also access their unofficial transcripts at <https://bengalweb.isu.edu>.

Students who wish to order official Idaho State University transcripts will find the latest ordering information on the web at <http://transcripts.isu.edu>. Official transcript requests will be processed within 3 to 5 working days, unless there is a financial obligation on record for the student requesting the transcript. For additional information, or if you have specific questions about the process, please email [transcriptordering@isu.edu](mailto:transcriptordering@isu.edu).

### Grading System

Idaho State University uses a graduated letter grading system to indicate the instructor's evaluation of a student's performance in a course. These letter grades are converted to a numerical value for computing a student's semester and cumulative grade point averages (GPAs). At the beginning of each course, an instructor should inform students via the course syllabus or other written means of the criteria to be used in evaluating their performance.

**There are are no campus-wide grading criteria.**

Idaho State University uses letter grades with the four (4) point maximum grading scale. The grade A is the highest possible grade, and a grade of F is considered failing. Plus (+) or minus (-) symbols are used to indicate grades that fall above or below the letter grades. The grades of A+, F+, and F- are not used. For purposes of calculating grade points and averages, the plus (+) increases the grade's point value by .3 and minus (-) decreases the grade's point value by .3 (e.g., a grade B+ is equivalent to 3.3 and A- is 3.7). A student's work is rated in accordance with the following definitions:

Grade	Value	Description
A	4.00	Excellent Performance
A-	3.70	Excellent Performance
B+	3.30	Good Performance
B	3.00	Good Performance
B-	2.70	Good Performance
C+	2.30	Adequate Performance
C	2.00	Adequate Performance
C-	1.70	Adequate Performance
D+	1.30	Marginal Performance
D	1.00	Marginal Performance
D-	.70	Marginal Performance
F	0.00	Unacceptable Performance

Courses in which any A, A-, B+, B, B-, C+ or C grade is earned are always acceptable toward an undergraduate program and graduation requirements unless specifically excluded for a particular course, program, or degree. Courses in which a C-, D+, D or D- grade is earned are acceptable towards graduation requirements unless otherwise noted. No credits are awarded for any course in which an F grade is earned. A grade of C+, C, C-, D+, D, D-, or F is considered failing for students pursuing graduate level programs or degrees.

The plus (+) and minus (-) grading system is in effect for all new freshmen and transfer students, all returning former students who have not been enrolled at Idaho State University for five years, and any student starting a degree or certificate program. Students who are not yet subject to the +/- grading system may elect to be included by completing paperwork, in person, at the Office of the Registrar in Pocatello or Student Services Offices in Idaho Falls, Twin Falls, or Meridian. A student's election of the +/- grading is final and cannot be reversed.

## Other Grade Symbols

Other grading symbols used are: I - Incomplete; IP - Thesis work "in progress;" W - Withdrawal after the close of the registration period; P or NP - the Pass or No pass option; S or U, for Satisfactory/Unsatisfactory performance; and X for no basis for grade. Each of these grades has special conditions which are described below.

### Incomplete Grades

An incomplete grade, I, may be awarded only as a final grade and only at the discretion of the instructor. To be eligible for an incomplete grade, a student must have satisfactorily completed a substantial portion of the course. No grade points are awarded for a course in which an Incomplete grade is earned.

The instructor must complete a Course Completion Contract that stipulates the assignment(s) required to finish the course and the allowable time period. No student will be allowed more than one year to complete the required assignment(s). Both the student and the instructor must sign the contract, a copy of which is to be given to the student. The instructor retains a copy and a third copy is kept on file by the department head. Upon the student's timely satisfaction of the Course Completion Contract, the instructor will fill out a Change of Grade Form and send it to the Registrar.

Students should NOT re-register for a course in which an incomplete grade has been assigned. If the Registrar does not receive a Change of Grade Form within a one-year time period following the recording of the Incomplete, the Registrar's Office will automatically convert the Incomplete to an F. Only in extreme circumstances will a student be allowed an extension of the time stipulated by the instructor. A normal petition process may be used for those circumstances that would extend the allowable time period beyond one calendar year following the recording of the Incomplete grade.

### Pass/No-Pass Grades

P/NP grades are given in courses taken under the pass/no-pass option. This option is offered as an inducement for students to take courses outside their major curriculum. The following restrictions apply: the option applies only to undergraduate courses; the option must be declared using a schedule change card (<http://www.isu.edu/areg/forms/ScheduleChangeCard.pdf>) signed by the instructor and the department no later than the last day to add or drop courses; credits earned under the option will not satisfy specific graduation requirements except that they may be counted towards total credits required; students taking a course under this option must comply with the established prerequisites or obtain the permission of the instructor; students may not register for more than one P/NP course per semester.

No credits are awarded for any course in which an NP grade is earned.

### Satisfactory/Unsatisfactory

S/U grades are awarded in such courses as religion, student teaching, and special projects to which the regular performance grades are not applicable. The use of S/U grades must be specifically approved by the University Curriculum Council. All students in such courses are graded either S or U. There is no method for incorporating these grades into a student's grade point average. No credits are awarded in any course for which a U grade is earned.

## X Grade

An instructor can give an X grade when a student has not attended or stops attending, therefore giving the instructor no basis to calculate a grade for the student. The X grade is equivalent to an F or a U. No credits or grade points are awarded in any courses for which an X grade is reported.

## Withdrawal Grades

A student may drop a course within the add/drop period; no transcript entry will reflect his/her ever having been in the course.

From the end of the add/drop period to the end of the withdrawal period, a student may withdraw at his/her option. After the withdrawal period, a student may withdraw from individual courses only by the procedure described in the section covering withdrawal procedures. In both of these two cases, a W grade will be recorded, and no grade points will be awarded.

If a student simply ceases to attend classes without formally withdrawing from the university, an F or an X grade will be recorded for each affected class. A student may be withdrawn from a course or receive a reduced grade as a result of disruptive classroom behavior.

Information about add/drop periods and withdrawal periods can be found on the Academic Calendar (<http://www.isu.edu/areg/acadclnd.shtml>). Information on withdrawing from classes can be found in the Withdrawal Procedures (<http://coursecat.isu.edu/academicinformation/withdrawalprocedures>) section of this catalog.

## Midterm Grades

Instructors are requested to report unsatisfactory grades at midterm, including D, F, U, NP (not passing), X (no basis to grade).

Faculty can choose to report satisfactory grades at their own discretion. Midterm grades are not recorded on the student's transcript and are not used in grade point average computations.

## Grade Point Average

A grade point average (GPA) is computed each semester by dividing the sum of the products of grade points and credits for each course by the sum of the credits for the courses. Numerical grade points for each course credit are assigned as shown earlier, on a scale in which an A is 4.00 points and an F is 0.00 points. For purposes of calculating grade points and averages, the plus (+), if present, increases the grade's value by .3 and minus (-) decreases the grade's value by .3 (e.g., a grade B+ is equivalent to 3.3 and A- is 3.7).

An accumulated grade point average (Accum. GPA) is computed by the same process, but the student's entire record is covered by the computation.

To maintain "academic satisfactory progress" and avoid probation and/or academic dismissal, a student must maintain a minimum Idaho State University GPA of 2.0.

## Credits and Grades for Transfer Courses

When students transfer credit to Idaho State University, the university reserves the right to reclassify credit designated as correspondence, extension, credit by examination and repeated credit according to its own policy governing the acceptance and limitations of such credit. Grades transferred from other institutions will be converted to the equivalent grades at Idaho State University by the registrar. Where there is a question as to whether transferred courses satisfy specific departmental requirements, the head of the department concerned will make the interpretation.

Transfer students may be required to repeat transfer courses in which a grade equivalent to a D or F was received.

## Awarding of Credit from Non-Accredited Institutions

The process for considering possible transfer credits and recognizing undergraduate degrees granted by non-accredited colleges and universities is as follows:

The student must petition the appropriate academic department at Idaho State University. In addition to formal evaluation of the request, the department may require competency verification.

In the petition, the student must explain how s/he wishes to deviate from university policy. Some scenarios include:

- a) wishing to have certain courses from the non-accredited institutions substitute for courses at Idaho State University that fulfill General Education Objectives;
- b) a request to have designated courses from the non-accredited institution substitute for Idaho State University courses that fulfill requirements in the student's major;
- c) a request that an entire degree from a non-accredited institution be recognized as equivalent to that earned from an accredited institution.

## Academic Renewal Policy

The purpose of this policy is to allow undergraduate students who are returning or transferring to Idaho State University after having been away from college for a number of years a chance for a fresh start. Idaho State University has a petition process for one-time-only use in which the student may request that consecutive terms of course work be disregarded in calculating the GPA for graduation. To apply, a student must file an Academic Renewal petition with the dean of his/her college. Eligibility for the program will be subject to the following conditions:

1. A minimum of three (3) years will have elapsed since last enrollment at an institution of higher education before petition may be filed.
2. Applicants must have a previous cumulative ISU GPA of less than 2.00.
3. This policy will not be used for individual courses.
4. The petition to be filed by the student will specify consecutive terms of undergraduate courses on the transcript to be disregarded.
5. Academic renewal may be awarded one time only.
6. Academic renewal shall not apply to any credits earned for a completed, prior academic degree.
7. Before the petition may be filed, the student must have completed a semester or semesters of an additional 12 credit hours of course work at Idaho State University with a minimum grade point average of 2.5 or at least 24 credit hours of course work with a minimum grade point average of 2.00.
8. Upon approval of the petition, the student's permanent official academic record will be suitably annotated to indicate that no work taken during the disregarded term(s) may apply toward the computation of credits and grade points, academic standing, and graduation requirements. However, all work will remain on the records, ensuring an accurate academic history.
9. Students should be aware that this policy MIGHT NOT BE ACCEPTED at transfer institutions. Academic Renewal granted elsewhere is not transferable to Idaho State University. Idaho State University conditions must be met.

## Academic Standing

### Good Academic Standing

Students are considered to be in Good Academic Standing at Idaho State University until their Idaho State University GPA places them on academic probation. At the end of any semester, undergraduate students may be placed on probation if the cumulative Idaho State University grade point average (GPA) does not meet a minimum of 2.0. To maintain "academic satisfactory progress" and avoid academic probation and/or academic dismissal, undergraduate students must maintain a cumulative Idaho State University GPA of 2.0 or higher.

### Academic Probation

Academic standing is calculated once at the end of the semester. At that time, undergraduate students whose cumulative Idaho State University GPA does not meet a minimum of 2.0 will be placed on Academic Warning. Students on Academic Warning are limited to attempting 13 credits for the next semester of attendance, are required to complete the Online Probation Workshop (<http://isu.edu/advising/nosearch/probation>), and are expected to meet with their academic advisor of record prior to registering for classes.

Undergraduate students on Academic Warning who do not earn a 2.0 semester GPA (and whose cumulative ISU GPA is less than 2.0) will be placed on Probation One. Students on Probation One are limited to attempting 9 credits for the next semester of attendance, are required to complete the Online Probation Workshop (<http://isu.edu/advising/nosearch/probation>), and are expected to meet with their academic advisor of record prior to registering for classes.

Undergraduate students on Probation One who do not earn a 2.0 semester GPA (and whose cumulative ISU GPA is less than 2.0) will be placed on Probation Two. Students on Probation Two are limited to attempting 6 credits for the next semester of attendance, are required to complete the Online Probation Workshop (<http://isu.edu/advising/nosearch/probation>), and are expected to meet with their academic advisor of record prior to registering for classes.

Undergraduate students on Academic Warning, Probation One, or Probation Two who attain a semester GPA of 2.0 or higher, but whose cumulative ISU GPA is still below 2.0, will remain at their current level of academic probation (Academic Warning, Probation One, or Probation Two) with the corresponding credit limitation of 13, 9, or 6, as specified above.

Undergraduate students on Academic Warning, Probation One, or Probation Two who attain a cumulative ISU GPA of 2.0 or higher are automatically removed from warning or probation.

Undergraduate students are notified at mid-semester as to whether they are earning below satisfactory grades in any class. The undergraduate students' advisors will also receive this information so they may work with the undergraduate students to try to prevent probationary status.

### Academic Dismissal

Undergraduate students on Probation Two who do not earn a 2.0 semester GPA (and whose cumulative ISU GPA is less than 2.0) will be dismissed from the university.

## Non-Degree Seeking Status

### Non-Degree Seeking Status

Each non-degree-seeking student admitted to Idaho State University will declare himself/herself as such by selecting the code for this non-degree-seeking status on the application for admission. Other students attend classes as non-degree students without being admitted to the university. In either case, the student may change his/her status to that of a degree-seeking student by complying with admissions criteria for degree-seeking students (detailed in the Admissions (<http://coursecat.isu.edu/about/ISU/undergraduateadmission>) section of this catalog). A maximum of 32 credits may be earned by non-degree-seeking students.

## Petition Policies

### Petition Policies

An undergraduate student may petition the appropriate college dean or committee for consideration of problems of curricula or admission which are not covered by stated procedures. Curricular petitions must: 1) include a recommendation from the undergraduate student's advisor, 2) a recommendation by the chair of the department offering courses in the subject field or by a special committee overseeing the requirement, and 3) catalog copy of descriptions of courses transferred from other institutions if the course is to be considered in a test of course equivalency. All copies of the petition are to be advanced to the Registrar's Office for action after all signatures are affixed. Decisions may require several weeks, and notice of the result will be mailed to the undergraduate student. An undergraduate student may petition for:

1. **Readmission following a dismissal.** Undergraduate students with extenuating circumstances that warrant a review of the dismissal status may petition the Readmission Review Board (RRB) located in the Academic Advising Center. Petitions must be accompanied by relevant documentation from appropriate sources and a thoughtfully prepared Readmission Statement. The RRB will be guided in its decision by evidence of academic potential and readiness to handle the curriculum in a satisfactory manner; evidence of motivation to pursue an educational goal; evidence of corrective measures undertaken by the undergraduate student. Readmitted undergraduate students will have stipulations placed upon their readmission which may include: repeating courses previously taken, limiting the number of credits attempted, enrolling in specific courses, having regular follow-up with an advisor or faculty member, receiving specific assistance from the Career Center, ADA, or other ISU resources, and/or participating in specified study labs or help groups. The deadline for petitions is August 1st for Fall semester and December 1st for Spring semester. Decisions reached by the RRB are final.
2. **Substitution of departmental requirements.** An undergraduate student may petition to substitute courses in lieu of departmental requirements. The course or courses the undergraduate student wishes to substitute must be approved by the departmental chairperson.
3. **Substitution of the General Education requirements.** An undergraduate student who transfers from another institution may petition to have courses with similar content but different titles than those offered at Idaho State University substituted for courses listed in the General Education requirements. Petitions must be approved by the Provost.

## Withdrawal Procedures

### Withdrawal Procedures

Before the last day to add or drop courses in a semester or session, students may drop and add classes freely. No entry will be made on a student's transcript for classes dropped during this period.

After the last day to add or drop courses, students may withdraw from a class or from all classes until the last day to withdraw from the semester or session. Check the Academic Calendar (<http://www.isu.edu/areg/acadclnd.shtml>) for the withdrawal date for each semester or session. The time in which withdrawals are allowed is called the Withdrawal Period. A grade of W is recorded on the student's transcript for each course from which he or she withdraws.

#### **Before Withdrawal Deadline (see Academic Calendar (<http://www.isu.edu/areg/acadclnd.shtml>) for dates):**

To initiate a withdrawal from a class prior to the deadline, a student may use BengalWeb (<https://bengalweb.isu.edu/cp/home/displaylogin>). In extreme cases where the student does not have the ability to access BengalWeb, contact the Office of the Registrar (<http://www.isu.edu/areg>) for assistance.

To withdraw from the university (withdraw from all classes) prior to the deadline, the student may use BengalWeb (<https://bengalweb.isu.edu/cp/home/displaylogin>) and withdraw from all classes. In extreme cases where the student does not have the ability to access BengalWeb, contact the Office of the Registrar (<http://www.isu.edu/areg>) for assistance. Students are encouraged to meet with an advisor before withdrawing completely.

#### **After Withdrawal Deadline (see Academic Calendar (<http://www.isu.edu/areg/acadclnd.shtml>) for dates):**

After the deadline, all withdrawals are handled by petition to the dean of the college in which the student is enrolled. (College of Technology students should contact the Student Services Office (<http://www.isu.edu/ctech/studentservices>.) The dean will follow the same procedure used in the petitioning process for considering extraordinary academic issues.

## Medical Withdrawal Policy\*

*\*At the time of publication, the withdrawal policy was under review; it remains subject to change.*

### Voluntary (Student-Initiated) Medical Withdrawal

A medical withdrawal request must involve the student being ill or disabled from an illness, not the effects of another person's illness. It is initiated in the same manner as other withdrawals, as noted above. Only complete withdrawals from the university are eligible to be considered for a medical withdrawal.

To initiate a medical withdrawal before the complete withdrawal deadline (see the Academic Calendar (<http://www.isu.edu/areg/acadclnd.shtml>)), a student first needs to completely withdraw from all classes through the Office of the Registrar (via a paper form or BengalWeb (<https://bengalweb.isu.edu/cp/home/displaylogin>)). When that is done, the student may then apply for a medical withdrawal through the Student Health Center by completing a Medical Withdrawal Application form. This form may be obtained from the Student Health Center, the Office of the Registrar, the Counseling and Testing Center, the Student Services Office in the College of Technology, and the outreach offices of Idaho Falls, Twin Falls, and Meridian. It is also available on ISU's Student Health Center (<http://www.isu.edu/stuhlth/withdrawal.shtml>) website. Completed forms should be submitted to the Student Health Center within two weeks (10 working days) of the date of complete withdrawal. The application must include a narrative summary written by the student requesting the medical withdrawal as well as medical documentation from a physician or counselor describing the problem and their recommendations that withdrawal due to illness is necessary. The Medical Withdrawal Committee then reviews the completed application and determines medical withdrawal eligibility.

*Note: For refund information, see ISU's Refund Policy and Refunds for Exceptional Circumstances Policy in the Expenses (<http://coursecat.isu.edu/aboutISU/expenses>) section of this catalog. If you wish to initiate an appeal for refund of fees, please contact Financial Services at 282-2287.*

If the complete withdrawal deadline (see Academic Calendar (<http://www.isu.edu/areg/acadclnd.shtml>)) has passed, a student can still seek a medical withdrawal designation. First, the student fills out a petition for hardship withdrawal through the dean's office of the college in which the student is enrolled (Arts and Letters for those students not yet affiliated with any college). If the dean (or designee) grants the student a hardship withdrawal, the student may then pursue a medical withdrawal designation as outlined in the above paragraph. The dean (or designee) may choose instead to sign a referral allowing the Student Health Center to examine the evidence (always medically related) and determine whether a withdrawal is warranted. Only if a hardship withdrawal is granted, or a referral is signed by the dean's office, will the Medical Withdrawal Committee consider a request for a medical withdrawal.

### The Medical Withdrawal Committee

The Medical Withdrawal Committee may include the director of the Student Health Center (or designee), the director of the Counseling and Testing Center (or designee), the university controller (or designee), the associate dean of Student Affairs (or designee), and/or the director of the ADA and Disabilities Resource Center (or designee).

### Appeal of Denial of Medical Withdrawal

If the medical withdrawal is denied, the student may appeal the decision by written request to the vice president for Student Affairs. The appeal must be received within one month of the date of denial. The vice president's (or designee's) decision is final.

### Medical Readmission

Students who have withdrawn for medical reasons may be required to petition the University Medical Withdrawal Committee for readmission. The decision to require a petition for readmission is based on need for further documentation that the medical condition has been adequately treated and that any necessary accommodations have been prepared to enhance the future academic success of the student. The decision is made at the time that the medical withdrawal is granted. This decision will be included in the letter of notification to the student that the medical withdrawal has been granted.

Students may forward their written petition for readmission to the Medical Withdrawal Committee via the Student Health Center staff. The granting readmission decision is based upon consideration of (1) reports of treatment, (2) letters of recommendation, and in some instances, (3) a personal interview with the medical director.

### Appeal of Denial of Readmission

In the event of denial of readmission, the student may appeal to the vice president for Student Affairs. A written appeal (a letter from the student explaining the circumstances) must be received in the vice president for Student Affairs' Office within two weeks (10 working days) of receipt of notification of denial of readmission. The vice president's (or designee's) decision is final.

### Mandatory Medical/Psychiatric Withdrawal

The directors of the University Counseling and Testing Services and the Student Health Center are authorized to order a mandatory medical or psychiatric withdrawal in those situations where there is reason to believe that a student is a substantial threat to him/herself or interferes with the welfare of other members of the university or the education process of the institution. These directors may require immediate withdrawal if there appears to be a substantial imminent threat. Either director may request that the student be professionally evaluated by a physician, psychologist, or psychiatrist. The student shall be notified in writing of initiation of the withdrawal process.

If a psychological/psychiatric evaluation is required and the student does not comply within a reasonable time or refuses to comply, mandatory withdrawal may be ordered by either director. The responsible director shall submit a written report to the Medical Withdrawal Committee and the vice president for Student Affairs summarizing the need for mandatory withdrawal and the reasons for the action. The student and the director will have the opportunity to present information to the Medical Withdrawal Committee. The Medical Withdrawal Committee shall convene at the earliest reasonable time for final determination of disposition. If the physician ordering the withdrawal is also on the Medical Withdrawal Committee, another physician from the Student Health Center or the Center director will be appointed to sit on the committee for that case.

In the event that mandatory withdrawal is ordered, the student may appeal to the vice president for Student Affairs. A request for an appeal must be filed in writing to the vice president for Student Affairs within two weeks of receipt of notification of mandatory withdrawal.

## Other Policies

### Other Policies

#### Academic Study Day Policy

The university annual calendar includes two academic study days each semester. The academic study days are scheduled during the two calendar days directly following Closed Week and directly preceding Final Examination Week. Saturday classes are exempt from the Academic Study Day Policy. When the last two calendar days directly following Closed Week fall on Saturday, Sunday, or both, those days will be designated as academic study days. No undergraduate classes are held during academic study days. For academic study days falling on Monday through Friday, faculty will schedule office hours.

#### Closed/Finals Week Policy

Any final examination must be conducted during the officially scheduled time slot except in laboratory courses or sections where the final examination may be conducted during the last regularly scheduled class session. Any exception to this policy may be allowed only on an individual student basis, to be arranged between the professor and the student.

Other required tests or quizzes on which the professor bases any part of the course grade are prohibited during the 7 calendar days immediately preceding the first day of final examinations week except in performance sections, night classes, 8-week courses, Saturday courses, and sessions during the summer semester.

Graduate-level courses and activities are exempt from this closed week and final exam policy.

### Final Examinations

Regular final examinations are held during an examination period at the end of the semester in accordance with a schedule published by the registrar. They shall not be rescheduled outside of the period, nor to a different time within it, except by permission of the Deans' Council. No examination shall be longer than the scheduled time. Special examinations may be arranged for individual students within the examination period.

A student who is absent from a regular final examination without valid excuse receives an F on the exam. If the excuse is valid and the work of the semester is satisfactory, the student receives an Incomplete, which may be removed by taking a special final examination.

#### Saturday Classes–Vacation Policy

Saturday Classes will recognize the following holidays during the Fall and Spring semesters: Fall–Labor Day and Thanksgiving weekends; Spring–the Saturday at the end of Spring Break. Saturday classes will be held on the Saturdays prior to all other Monday holidays, and on the Saturday at the beginning of Spring Break.

## Alternative Credit Opportunities

Students at Idaho State University have the opportunity to earn undergraduate credit for prior learning through a wide variety of means:

- College Entrance Examination Board Advanced Placement Program (AP)
- College Level Examination Program (CLEP)
- Credit by Challenge Examination
- Credit for Military Service
- Credit through the Defense Activity for Non-Traditional Education Support (DANTES)
- Experiential Learning Assessment (ELA)
- Correspondence and Extended Learning Online Courses
- Study Abroad
- Individualized Degree Programs
- Cooperative Education Programs

A maximum of 32 credit hours granted through any combination of the means listed above may be counted toward an associate degree; a maximum of 64 credit hours may be applied to a baccalaureate degree. Credits earned through any of the above means affect total credits toward a particular degree but generally do not impact the student's grade point average. Grades for all said credits, except challenge and correspondence/distance learning, are recorded as Satisfactory (S). The student is responsible for providing Idaho State University with an official copy of grades/scores from the appropriate educational, testing, or reporting agency.

When the credit awarded is dependent upon evaluation by Idaho State University faculty, such as Experiential Learning Assessment and Challenge, credit will be counted as resident credit; that which is standardized or not evaluated by Idaho State University faculty will be counted as non-resident credit.

An explanation of each program is given below. For additional information on these programs, contact:

The Office of the Registrar,  
Museum Building Room 319  
921 S 8th Ave Stop 8196  
Pocatello, ID 83209-8196  
(208) 282-2661

## College Entrance Examination Board Advanced Placement Program (AP)

Idaho State University affirms the principle of advanced placement and acknowledges the accomplishments of students who have taken college-level courses in high school. The university encourages participation in the College Entrance Examination Board Advanced Placement Program.

The CEEB Advanced Placement Examinations are administered each May at most high schools. For more information about the tests, students should contact their Advanced Placement instructor or high school counselor. The tests and students' ratings are sent to the university at the individual student's request.

Advanced Placement Examination credit will not be posted on an official Idaho State University transcript to other agencies or institutions until the student is a **registered** Idaho State University student. Credit from Advanced Placement is classified as non-resident credit.

### Advanced Placement Scores Required for Credit

Idaho State University will grant credit for approved AP exams and scores. Contact the Office of the Registrar or academic departments for further information. An "S" grade is entered on the student's record for credit earned in this way. Credit for AP examinations transferred from another institution is subject to evaluation based on the rules and regulations of Idaho State University. Please see <http://www.isu.edu/areg/> for information as to what course credit will be given for each AP score accepted by ISU.

## College Level Examination Program (CLEP)

Elective credit only is granted toward graduation for achievement of satisfactory scores on any of the four CLEP general examinations: humanities, natural science, mathematics, and social science/history. A student may earn a maximum of 16 elective semester hours toward an associate degree, 32 elective semester hours toward a baccalaureate degree on the basis of the general examinations.

Scores on the general examinations range from 200 to 800. The point of test proficiency is fixed at 500 for the purpose of granting credit.

Subject-area CLEP examinations may satisfy specific objectives in the General Education Requirements at the discretion of the departments whose courses satisfy those objectives. Similarly, at the discretion of the department, credits earned on the CLEP subject-area examinations may be allowed toward that department's major program. Students may earn a maximum of 48 semester credit hours by CLEP subject-area examination with department approval, and scores of 50 or higher are accepted for credit award.

An "S" grade is entered on a student's record for credit hours earned through CLEP examinations. Credit for CLEP examinations transferred from another institution is subject to evaluation based on the rules and regulations of Idaho State University. Transfer students need to submit official CLEP score reports for Idaho State University evaluation. CLEP credits cannot be granted for college courses previously taken. Credit from CLEP is classified as non-resident credit.

Information including costs may be obtained from the website <http://www.isu.edu/ctc/> or by contacting the Counseling and Testing Center at Idaho State University at (208)-282-2130.

Counseling and Testing Center,  
Graveley Hall, 3rd Floor South  
921 S 8th Ave Stop 8027  
Pocatello, ID 83209-8027

## Subject-Area CLEP Scores Required for Credit

Idaho State University will grant credit for approved CLEP exams and scores. Contact the Office of the Registrar or academic departments for further information.

## Credit by Challenge Examination

Enrolled Idaho State University students may obtain credit by course-specific examinations only with permission of the department and the college. Other relevant policies are as follows:

- Students may challenge a course through examination by 1) **obtaining approval** through petition, and 2) **passing** the challenge examination.
- Students must procure the petition from the office of the dean of the college of their major.
- If the petition to take the examination is approved, students must pass the examination at the level required by the course in order for challenge credits to be awarded.
- A student may sit for a challenge examination only in a course in which s/he has not yet registered. Students may not receive credit by challenge examination either for courses already completed or for courses that are prerequisite to courses already completed.
- Compass placement examinations are not challenge examinations.
- Only one challenge examination for the course in question is allowed.
- When a challenge examination is taken, whatever grade is earned is recorded. Should the grade from a challenge examination be undesirable to the student, the student may take the course for credit to change the grade.
- Credits obtained by challenge examination are not used in determining a semester's credit load or for financial aid purposes in the semester in which the examination is taken.
- Grades obtained by challenge examination are not used in determining grade point average for that semester, but are used in calculating the cumulative grade point average.
- A student may complete a total of 24 credits by challenge examination toward an associate degree.
- A student may complete a total of 48 credits by challenge examination toward a baccalaureate degree.
- The cost of each credit earned by challenge examination is 33% of the current cost per credit hour, payable to the Idaho State University Cashier's Office **prior to the examination**.
- Credits earned by passing a challenge examination are considered resident credit.

## Credit for Military Service (Military Transcript Information)

Military credits will be evaluated after the student has applied for admission and furnished the Veterans' Coordinator with official transcripts. Non-resident credit will be posted for military courses.

## Credit through DANTES

The College Level Examination Program (CLEP) general and specific subject-area examinations administered through Defense Activity for Nontraditional Education Support (DANTES) are treated in the same manner as those taken through the traditional CLEP. Only elective credits may be granted to those completing the general examinations, while subject-area CLEP examinations may satisfy specific objectives in the General Education Requirements. Refer to the College Level Examination Program above for details.

## Correspondence and Extended Learning Online Courses

Many institutions offer correspondence courses. Those offered by Idaho State University via Independent Study in Idaho (ISI) are granted resident credit.

Independent Study in Idaho  
 PO Box 443225  
 Moscow ID 83844-3225  
 (208) 885-6641 or (877) 464-3246  
 Fax 208/885-5738  
 indepst@uidaho.edu  
<http://www.uidaho.edu/isi>

Independent Study in Idaho was created in 1973 by the Idaho State Board of Education as a consortium of four accredited Idaho institutions led by the University of Idaho. Other consortium members include Boise State University (BSU), Idaho State University (ISU), and Lewis-Clark State College (LCSC). The ISI office is located at the University of Idaho North Campus Center in Moscow, Idaho. Each member institution of the ISI consortium is accredited by the Northwest Commission on Colleges and Universities (NWCCU), the region's accrediting agency. High school courses are accredited by the Northwest Association of Accredited Schools (NAAS).

Independent Study in Idaho delivers over 100 college undergraduate, graduate, and high school distance education courses in online and print-based formats in over 30 subject areas to more than 1,600 students each year. Independent Study in Idaho college courses parallel their on-campus

counterparts in content and completion standards. People from all walks of life, worldwide, take ISI courses to begin college programs early, resolve on-campus class-time conflicts, satisfy prerequisites, pursue professional development, and for personal enrichment. Courses are self-paced and available anytime, anywhere; students have one full year to complete ISI courses, or may purchase a time extension. Idaho residency is not required. Independent Study in Idaho courses carry semester-hour credit from one of the four consortium institutions and may be applied toward a degree at one of the consortium institutions or transferred to other institutions that accept ISI credits.

On average, ISI students may expect to spend at least 45 hours of scholarly activity per course credit to successfully complete a course. Upon course completion, a student may request a transcript of the credits from the Office of the Registrar or website of the credit-granting institution.

## Experiential Learning Assessment

Experiential Learning Assessment (ELA) is an avenue by which a student may be awarded undergraduate credit for experiential learning. The program assists in the process for requesting academic credit through the portfolio method. In a portfolio, a student thoroughly describes and documents knowledge gained experientially and also demonstrates how knowledge gained outside the classroom is related to college-level learning. The academic department in which credit is being requested assesses the portfolio and makes credit recommendations to the dean of their college. Idaho State University allows a maximum of 16 credits toward an associate degree, 30 credits toward a baccalaureate degree through this evaluation process.

To receive credit awarded through ELA, the student must have completed at least 9 semester credit hours in Idaho State University coursework with a minimum of a 2.0 GPA and must be enrolled the semester in which credit is awarded. ELA credit is available only for those academic subjects offered at Idaho State University.

Idaho State University follows Northwest Commission on Colleges and Universities (NWCCU) policies 2.C.3 and 2.C.7 in awarding credit for prior experiential learning.

## Study Abroad

The Idaho State University Office of International Programs and Services provides information and assistance to students who wish to augment their education with study outside the United States. Study abroad is a viable option for students to enhance their curriculum and professional prospects. A study abroad program is an excellent way to develop foreign language skills. An international educational experience also helps students gain a competitive edge in the global marketplace. And since many programs are taught in English, or located in English-speaking countries, students without foreign language skills may also study abroad in a wide range of disciplines.

Idaho State University participates in a wide variety of quality study abroad programs, providing students access to programs in more than 50 countries. Course work in these programs is recognized as resident credit at Idaho State University and allows students to use financial aid to support their study abroad. Idaho State University also has cooperative agreements with The University of Plymouth in England, Al Akhawayn University in Morocco, The University of Valencia and The Polytechnic University of Valencia in Spain, Paderborn University in Germany, Kansai Gaidai University and KCP International in Japan, Umea University in Sweden, the University of Burgundy in France, ITESO University in Mexico, InHolland University in The Netherlands, and Universidad ORT in Uruguay.

The Office of International Programs and Services assists students in identifying appropriate programs, works with academic advisors and departments in preparation for transfer of study abroad credit, and advises students on financial aid and other related matters. For more information on study abroad and related opportunities, contact the Office of International Programs and Services at (208) 282-4320 or at ipomail@isu.edu.

Students may register for Study Abroad credits after their program is approved by an advisor and the Office of International Programs and Services. The course description is as follows.

### Study Abroad Courses

**STUA 2200, STUA 3300, STUA 4400 Study Abroad 12-18 credits each** . Pre-arranged, planned courses of study at selected academic institutions outside of the United States. Student is responsible for resident credit arrangements with department(s) and the Office of International Programs and Services prior to departure. Prefix and course name will be replaced on Idaho State University transcript when study abroad transcript arrives. Graded S/ U, F, S, Su

## Cooperative Education Programs

### Cooperative Education Programs

In addition to regular programs, Idaho State University students may be eligible to participate in any one of a number of special cooperative programs, both in-state and out-of-state. For specific information on requirements for pre-health professions programs, see the section on pre-health professional programs under the Division of Health Sciences (<http://coursecat.isu.edu/divisionhealth>).

### Dental Education

Idaho Dental Education Program (IDEP): Depending on legislative appropriations, a certain number of Idaho residents are eligible to participate in the Idaho Dental Education Program. The program, a cooperative effort of Creighton University School of Dentistry and Idaho State University, provides

Idaho residents with the opportunity to attend their first year of dental school at Idaho State University. Students will spend their second, third, and fourth years in Omaha. For further information, contact:

Idaho Dental Education Program  
921 S 8th Ave Stop 8088  
Pocatello, ID 83209-8088  
(208) 282-3289  
larsjeri@isu.edu

Or visit the IDEP website at: <http://www.isu.edu/idep/idep.shtml>.

## ELS Language Center

Gordon E. Clark, Director  
Continuing Education Building  
1001 N.7th Ave. Stop 8084  
Pocatello ID 83209-8084  
(208) 282-5201

Idaho State University's partner in intensive English-language instruction, ELS Language Center, is located in the Continuing Education and Conference Services building. Founded in 1961, ELS Language Centers is the oldest and largest U.S.-based Intensive English as a Second Language (ESL) program. Since its inception, ELS has assisted well over a quarter million people in learning U.S.-style English. Affiliated with Berlitz International since 1997, ELS currently has more than 50 centers in the U.S. and another 33 schools in other countries.

As an intensive, preparatory ESL program, ELS supplements Idaho State University's existing English for Speakers of Other Languages (ESOL) program housed in the Center for Teaching and Learning. The ESOL program provides tutorial and other support services for international students already enrolled at Idaho State University. ELS, by contrast, serves as an initial point of entry for other international students who seek full-time English-language instruction, and who intend to complete this training to enroll at Idaho State University or another institution of higher education.

Visit ELS at Idaho State University on the Web at <http://www.els.edu/Pocatello>

## Medical Education

Certification of Idaho Residency

The cooperative medical education programs described below (WWAMI and University of Utah) require a Certification of Residency (that is, documentation that the person is a legal resident of Idaho). This certification is obtained at the following addresses for each of these programs:

### WWAMI (University of Washington):

Director of Admissions  
University of Idaho  
Moscow, ID 83843

### University of Utah Contact:

Office of the Registrar  
921 S 8th Ave. Stop 8196  
Pocatello, ID 83209-8196

### WWAMI (Washington/Wyoming/Alaska/Montana/Idaho) Regional Medical Education Program

This program is designed to enhance the training capability of the University of Washington School of Medicine by using facilities of Washington State University, University of Wyoming, University of Alaska, Montana State University and the University of Idaho. Currently 20 Idaho residents are accepted into the WWAMI program each year. For further information, contact:

Coordinator, WWAMI Medical Program University of Idaho  
Moscow ID 83843

or

Pre-Health Professions Advisor  
921 S 8th Ave Stop 8007  
Pocatello ID 83209-8007

## University of Utah School of Medicine

Each year eight Idaho residents are admitted to this medical education program through a cooperative agreement between Idaho and Utah. Idaho also provides a support fee to the University of Utah for each Idahoan admitted to the program under this agreement. For further information, contact:

Pre-Health Professions Advisor  
921 S 8th Ave Stop 8007  
Pocatello ID 83209-8007

## Oak Ridge Associated Universities

Since 1993, students and faculty of Idaho State University have benefitted from Idaho State University's membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility operated by ORAU, undergraduates, graduates, postgraduates and faculty may access a multitude of opportunities for study and research. Students may participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found on the ORISE website (<http://see.orau.org>), or by calling either of the contact persons below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major - federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, visit the ORAU website at <http://orise.orau.gov> or contact:

Dr. Thomas F. Gesell  
Professor of Health Physics  
ORAU Counselor for Idaho State University  
(208) 282-2350

or

Monnie E. Champion  
ORAU Corporate Secretary  
(865-576-3306)

## Veterinary Medicine

### Washington State University Regional Program in Veterinary Medicine

A cooperative effort between Washington and Idaho, this program is centered at the College of Veterinary Medicine at Washington State University. Depending on legislative appropriations, a certain number of Idaho residents (usually 11) are admitted to the program each year; Idaho provides a support fee to the program for each Idaho student admitted. Certification of Idaho residency is obtained at the following address:

Residency Officer

University of Idaho

Moscow, ID 83844-4260

For further information, contact:

College of Veterinary Medicine  
Office of Student Services  
Washington State University  
Pullman, WA 99164

or

Pre-Health Professions Advisor

921 S 8th Ave Stop 8007  
Pocatello, ID 83209-8007

## **Western Interstate Commission for Higher Education (WICHE) Programs**

### **Professional Student Exchange Program**

The Professional Student Exchange Program (PSEP) of the Western Interstate Commission for Higher Education (WICHE) enables students in the 13 western states (including North Dakota) to enroll in professional programs in other states when those programs are not available in their home states. Students accepted in the program pay resident tuition at public schools (or one-third the standard tuition at private schools) and their home states pay a student fee to the admitting school to help cover educational costs. The exchange area supported by Idaho includes optometry.

To be certified as eligible for this program, the student must write to the WICHE Certifying Officer in his/her state of legal residence for the program application form.

For further information, contact the Certifying Officer for Idaho, WICHE Student Exchange Program:

Office of the State Board of Education  
Room 307, Len B. Jordan Building  
650 West State Street, Room 307  
Boise, ID 83720  
Phone (208) 334-2270  
Fax (208) 334-2632

### **Western Regional Graduate Program**

The Western Regional Graduate Program (WRGP) of WICHE provides Idaho residents an opportunity to enroll at resident tuition rates in selected graduate programs in 13 states which are not available in Idaho. Doctor of Arts programs in biology, English, mathematics and political science are available at Idaho State University to graduate students from participating WICHE states. An interdisciplinary Master of Science program in Hazardous Waste Management is also available, as is a Master of Science in Deaf Education. Students pay tuition at the resident rate of the receiving institution, rather than the normal nonresident rate. For further information, contact:

Graduate School  
921 S 8th Avenue Stop 8075  
Pocatello, ID 83209  
Phone (208) 282-2150

### **Western Undergraduate Exchange**
